1. Introduction

The OMB.915.B08F21 is a fiberglass omni-directional outdoor antenna, operating in 915 MHz ISM band. The antenna has an 8dBi high peak gain, providing a large coverage area. Typical applications are in ISM, WLAN, RFID, SigFox, Lora and LPWA networks

The OMB.915.B08F21 Operated at 915MHz, with an 8dBi peak gain. The omni-directional antenna collinear dipole design means it radiates uniformly in the azimuth with a high gain, providing coverage over long distances, thus minimizing the number of cells or nodes needed in a network.

The UV resistant fiberglass housing enables the OMB antenna to be utilized in all kinds of harsh environments, making it more robust and safer than traditional whip antennas. It has been designed to withstand high wind load. The integrated aluminum mounting bracket is perfect for directly mounting the antenna onto a pole or a wall.

The connector is industry standard N-type female. Connector can be customized subject to MOQ. Other frequencies and gains are available. Contact Taoglas regional sales office for more details.
