

## HEX INVERTERS WITH SCHMITT TRIGGER INPUTS

### Description

The 74HC14 provides six independent Schmitt trigger input inverters with standard push-pull outputs. The device is designed for operation with a power supply range of 2.0V to 6.0V.

The gates perform the Boolean function:

$$Y = \overline{A}$$

### Features

- Wide Supply Voltage Range from 2.0V to 6.0V
- Sinks or Sources 4mA at  $V_{CC} = 4.5V$
- CMOS Low Power Consumption
- Schmitt Trigger Action at All Inputs
- ESD Protection Exceeds JESD 22
  - 200-V Machine Model (A115-A)
  - 2000-V Human Body Model (A114-A)
  - Exceeds 1000-V Charged Device Model (C101C)
- Range of Package Options SO-14 and TSSOP-14
- **Totally Lead-Free & Fully RoHS Compliant (Notes 1 & 2)**
- **Halogen and Antimony Free. "Green" Device (Note 3)**

### Pin Assignments

### Applications

- General Purpose Logic
- Wide array of products such as:
  - PCs, Networking, Notebooks, Netbooks
  - Computer Peripherals, Hard Drives, CD/DVD ROM
  - TV, DVD, DVR, Set Top Box

Notes:

1. No purposely added lead. Fully EU Directive 2002/95/EC (RoHS) & 2011/65/EU (RoHS 2) compliant.
2. See <http://www.diodes.com> for more information about Diodes Incorporated's definitions of Halogen- and Antimony-free, "Green" and Lead-free.
3. Halogen- and Antimony-free "Green" products are defined as those which contain <900ppm bromine, <900ppm chlorine (<1500ppm total Br + Cl) and <1000ppm antimony compounds.

## Pin Descriptions

| Pin Number | Pin Name        | Function       |
|------------|-----------------|----------------|
| 1          | 1A              | Data Input     |
| 2          | 1Y              | Data Output    |
| 3          | 2A              | Data Input     |
| 4          | 2Y              | Data Output    |
| 5          | 3A              | Data Input     |
| 6          | 3Y              | Data Output    |
| 7          | GND             | Ground         |
| 8          | 4Y              | Data Output    |
| 9          | 4A              | Data Input     |
| 10         | 5Y              | Data Output    |
| 11         | 5A              | Data Input     |
| 12         | 6Y              | Data Output    |
| 13         | 6A              | Data Input     |
| 14         | V <sub>CC</sub> | Supply Voltage |

| ESD MM           | Machine Model ESD Protection                                                          | 200          | V    |
| V <sub>CC</sub>  | Supply Voltage Range                                                                  | -0.5 to +7.0 | V    |
| V <sub>I</sub>   | Input Voltage Range (Note 5)                                                          | -0.5 to +7.0 | V    |
| I <sub>IK</sub>  | Input Clamp Current V <sub>I</sub> < -0.5V or V <sub>I</sub> > V <sub>CC</sub> +0.5V  | ±20          | mA   |
| I <sub>OK</sub>  | Output Clamp Current V <sub>O</sub> < -0.5V or V <sub>O</sub> > V <sub>CC</sub> +0.5V | ±20          | mA   |
| I <sub>O</sub>   | Continuous Output Current -0.5V < V <sub>O</sub> < V <sub>CC</sub> +0.5V              | +/- 25       | mA   |
| I <sub>CC</sub>  | Continuous Current Through V <sub>CC</sub>                                            | 50           | mA   |
| I <sub>GND</sub> | Continuous Current Through GND                                                        | -50          | mA   |
| T <sub>J</sub>   | Operating Junction Temperature                                                        | -40 to +150  | °C   |
| T <sub>STG</sub> | Storage Temperature                                                                   | -65 to +150  | °C   |
| P <sub>TOT</sub> | Total Power Dissipation                                                               | 500          | mW   |

- Notes:
- Stresses beyond the absolute maximum may result in immediate failure or reduced reliability. These are stress values and device operation should be within recommend values.
  - Input Voltage cannot exceed V<sub>CC</sub> to the extent the Maximum clamp current is exceeded

**Recommended Operating Conditions** (Note 6) (@T<sub>A</sub> = +25°C, unless otherwise specified.)

| Symbol          | Parameter                          | Conditions             | Min | Max             | Unit |

## Parameter Measurement Information

From Output  
Under Test

| V <sub>CC</sub> | Inputs          |                                | V <sub>M</sub>     | C <sub>L</sub> |
|-----------------|-----------------|--------------------------------|--------------------|----------------|
|                 | V <sub>I</sub>  | t <sub>r</sub> /t <sub>f</sub> |                    |                |
| 2.0V to 6.0V    | V <sub>CC</sub> | 6ns                            | V <sub>CC</sub> /2 | 15pF, 50pF     |

**Voltage Waveform  
Pulse Duration**

**Voltage Waveform  
Propagation Delay Times  
Inverting and Non Inverting Outputs**

- Notes:
- A. Includes test lead and test apparatus capacitance.
  - B. All pulses are supplied at pulse repetition rate  $\leq 1$  MHz
  - C. Inputs are measured separately one transition per measurement.
  - D.  $t_{PLH}$  and  $t_{PHL}$  are the same as  $t_{PD}$ .

| θ                    | 0°       | 8°   |
| All Dimensions in mm |          |      |

Figure 1 illustrates the dimensions and details of the test specimen. The main dimensions are labeled as A, B, C, D, G, K, L, and Pin#1 Indent. The specimen is shown in a top view and a side view. The side view includes a detail labeled 'Detail A' showing a cross-section with dimensions F, F1, and F2, and a 22-degree angle. The top view includes a detail labeled 'Detail A' showing a cross-section with a 27-degree angle. The side view also shows the 'Gauge Plane' and 'Seating Plane' with a 0.25 dimension.

Diodes Incorporated and its subsidiaries reserve the right to make modifications, enhancements, improvements, corrections or other changes without further notice to this document and any product described herein. Diodes Incorporated does not assume any liability arising out of the application or use of this document or any product described herein; neither does Diodes Incorporated convey any license under its patent or trademark rights, nor the rights of others. Any Customer or user of this document or products described herein in such applications shall assume all risks of such use and will agree to hold Diodes Incorporated and all the companies whose products are represented on Diodes Incorporated website, harmless against all damages.

Diodes Incorporated does not warrant or accept any liability whatsoever in respect of any products purchased through unauthorized sales channel. Should Customers purchase or use Diodes Incorporated products for any unintended or unauthorized application, Customers shall indemnify and hold Diodes Incorporated and its representatives harmless against all claims, damages, expenses, and attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized application.

Products described herein may be covered by one or more United States, international or foreign patents pending. Product names and markings noted herein may also be covered by one or more United States, international or foreign trademarks.

This document is written in English but may be translated into multiple languages for reference. Only the English version of this document is the final and determinative format released by Diodes Incorporated.

#### LIFE SUPPORT

Diodes Incorporated products are specifically not authorized for use as critical components in life support devices or systems without the express written approval of the Chief Executive Officer of Diodes Incorporated. As used herein:

A. Life support devices or systems are devices or systems which:

1. are intended to implant into the body, or
2. support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in significant injury to the user.

B. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or to affect its safety or effectiveness.

Customers represent that they have all necessary expertise in the safety and regulatory ramifications of their life support devices or systems, and acknowledge and agree that they are solely responsible for all legal, regulatory and safety-related requirements concerning their products and any use of Diodes Incorporated products in such safety-critical, life support devices or systems, notwithstanding any devices- or systems-related information or support that may be provided by Diodes Incorporated. Further, Customers must fully indemnify Diodes Incorporated and its representatives against any damages arising out of the use of Diodes Incorporated products in such safety-critical, life support devices or systems.

## Данный компонент на территории Российской Федерации

**Вы можете приобрести в компании MosChip.**

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
