

Force Sensors

FSA Series, Compensated/Amplified

32311096

Issue B

Datasheet

DESCRIPTION

The FSA Series are piezoresistive-based force sensors offering a ratiometric analog or digital output for reading force over the specified full scale force span and temperature range. They are fully calibrated and temperature compensated for sensor offset, sensitivity, temperature effects, and nonlinearity using an on-board Application Specific Integrated Circuit (ASIC). Direct mechanical coupling allows for easy interface with the sensor, coupling with tubing, membrane or a plunger, providing repeatable performance and a reliable mechanical interface to the application. The package also provides excellent corrosion resistance and isolation to external package stress. All products are designed and manufactured according to ISO 9001 standards.

VALUE TO CUSTOMERS

The FSA Series are designed to meet the customers' need for a compensated, amplified force sensor that provides analog and digital outputs, a variety of force sensing ranges, and enhanced durability and accuracy. Their flexible design provides multiple standard configurations over a wide operating temperature range.

DIFFERENTIATION

- Multiple force ranges allow the customer to choose the force range to maximize sensitivity and improve system resolution/performance
- Overforce provides enhanced durability in applications where overforce may exist
- Enhanced accuracy includes all errors due to force non-linearity, force hysteresis, and non-repeatability
- Total Error Band enhances system performance
- Digital output enhances performance through reduced conversion requirements and the convenience of direct interface to microprocessors
- Diagnostics functions allow the user to determine if the sensor is working correctly by detecting if the electrical paths are broken or shorted inside the sensor
- Supply voltage provides customers flexibility of design within the application

FEATURES

- Wide variety of force ranges
 - Newton (N): 5, 7.5, 10, 15, 20, 25
 - pound (lb): 1, 1.5, 2, 3, 5
 - gram (g): 500, 750
 - kilogram (kg): 1, 2
- Total Error Band: $\pm 5\%$ FSS
- Accuracy: $\pm 3\%$ FSS
- Ratiometric analog or SPI- or I²C-compatible digital output
- Fully calibrated and temperature compensated over a temperature range of 5°C to 50°C [41°F to 122°F]
- Overforce: 6804 g [15 lb]
- Supply voltage: 3.3 Vdc typ. or 5.0 Vdc typ.
- Low power consumption: 13 mW (analog) or 20 mW (digital)
- Excellent part-to-part repeatability
- Enhanced reliability
- Stable interface plunger
- Internal diagnostic functions available
- REACH and RoHS compliant

POTENTIAL APPLICATIONS

Medical:

- Ambulatory non-invasive pump pressure
- Infusion pumps
- Kidney dialysis machines
- Occlusion detection

Industrial:

- Load and compression sensing

PORTFOLIO

The FSA Series joins the FSG Series, FSS Series, FSS-SMT Series, TBF Series, and 1865 Series.

Force Sensors, FSA Series Compensated/Amplified

Table 1. Operating Specifications

| Characteristic | Analog | | | Digital | | | Unit |
|-------------------------------------------------------------------------|-------------|------------|-------------|-------------|------------|-------------|------------------------|
| | Min. | Typ. | Max. | Min. | Typ. | Max. | |
| Supply voltage (V_{supply}): ^{1,2,3} 3.3 Vdc 5.0 Vdc | 3.0 4.75 | 3.3 5.0 | 3.6 5.25 | 3.0 4.75 | 3.3 5.0 | 3.6 5.25 | Vdc |
| Supply current: 3.3 Vdc 5.0 Vdc | — — | 2.0 2.6 | — — | — — | 2.8 3.9 | 3.9 4.6 | mA |
| Power input | 13 | | | 20 | | | mW |
| Operating temperature range ⁴ | 0 [32] | — | 70 [158] | 0 [32] | — | 70 [158] | °C [°F] |
| Compensated temperature range ⁵ | 5 [41] | — | 50 [122] | 5 [41] | — | 50 [122] | °C [°F] |
| Storage temperature range | -40 [-40] | — | 85 [185] | -40 [-40] | — | 85 [185] | °C [°F] |
| Startup time (power up to data ready) | — | — | 5 | — | — | 3 | ms |
| Response time | — | 1 | — | — | 0.42 | 0.84 | ms |
| Clipping limit: upper lower | — 2.5 | — — | 97.5 — | — — | — — | — — | % V_{supply} |
| SPI/I ² C voltage level: low high | — — | — — | — — | — 80 | — — | 20 — | % V_{supply} |
| Pull up on SDA/MISO, SCL/SCLK, SS | — | — | — | 1 | — | — | kOhm |
| Accuracy ⁶ | — | — | ±3 | — | — | ±3 | %FSS ⁷ BFSL |
| Total Error Band ⁸ | — | — | ±5 | — | — | ±5 | %FSS |
| Output resolution | — | — | — | 12 | — | — | bits |
| Long term stability ⁹ | — | ±1.3 | — | — | ±1.3 | — | %FSS |

¹Sensors are either 3.3 Vdc or 5.0 Vdc based on the catalog listing selected.

²Ratiometricity of the sensor (the ability of the device output to scale to the supply voltage) is achieved within the specified operating voltage.

³The sensor is not reverse polarity protected. Incorrect application of supply voltage or ground to the wrong pin may cause electrical failure.

⁴Operating temperature range: The temperature range over which the sensor will produce an output proportional to force.

⁵Compensated temperature range: The temperature range over which the sensor will produce an output proportional to force within the specified performance limits.

⁶Accuracy: The maximum deviation in output from a Best Fit Straight Line (BFSL) fitted to the output measured over the force range at 25°C [77°F]. Includes all errors due to force non-linearity, force hysteresis, and non-repeatability.

⁷Full Scale Span (FSS): The algebraic difference between the output voltage at full scale force and the output at zero force.

⁸Total Error Band (TEB): Combined error from calibration, accuracy and temperature effects over the compensated temperature range at 5.0V from 15 %FSS to 95 %FSS.

⁹Long-term stability after 1000 hr of operation at 25°C [77°F].

Force Sensors, FSA Series Compensated/Amplified

Table 2. Environmental Specifications

| Characteristic | Parameter |
|-------------------|------------------------------------------------|
| Humidity | 0% to 95% RH, non-condensing |
| Vibration | MIL-STD-202, Method 214, Condition 1E (16.9 G) |
| Shock | MIL-STD-202, Method 213, Condition F (1500 G) |
| Life ¹ | 1 million full scale force cycles minimum |

¹Life may vary depending on specific application in which the sensor is utilized.

Table 3. Materials¹

| Component | Material |
|-----------------------|--------------------------------|
| Covers | high temperature polyamide |
| Plunger | stainless steel 316 |
| Substrate | alumina, ceramic |
| Adhesives | epoxy, silicone |
| Electronic components | ceramic silicon, glass, solder |

¹Contact Honeywell customer service for detailed material information.

Table 4. Absolute Maximum Specifications

| Characteristic | Min. | Max. | Unit |
|---------------------------------------|---------------------------|---------------------------|---------|
| Supply voltage | -0.3 | 6.0 | Vdc |
| Voltage on any pin | -0.3 | $V_{\text{supply}} + 0.3$ | V |
| Digital interface clock frequency: | | | |
| SPI | 50 | 800 | kHz |
| I ² C | 100 | 400 | |
| ESD susceptibility (human body model) | 2 | — | kV |
| Storage temperature range | -40 [-40] | 85 [185] | °C [°F] |
| Overforce limit | — | 6804 [15] | g [lb] |
| Minimum operating voltage | 2.8 Vdc | | |
| Lead soldering time and temperature | 4 s max. at 220°C [428°F] | | |

Force Sensors, FSA Series Compensated/Amplified

Figure 1. Nomenclature and Order Guide

For example, **FSAGPNXX001LCAA3** defines an FSA Series Force Sensor, gel coupling, plunger contact element, no diagnostics, 2 lb force range, force unit in pounds, compression force type, analog output, 10% to 90% transfer function, 3.3 Vdc supply voltage

¹Custom designations available upon request.

²Consult with factory.

³For other available transfer functions, contact Honeywell customer service.

Figure 2. Transfer Function Limits¹

Analog Version

$$\text{Output (V)} = \frac{0.8 \times V_{\text{supply}}}{\text{Force}_{\text{range}}} \times (\text{Force}_{\text{applied}}) + 0.10 \times V_{\text{supply}}$$

Digital Version

$$\text{Output (\% of } 2^{14} \text{ counts)} = \frac{80\%}{\text{Force}_{\text{range}}} \times (\text{Force}_{\text{applied}}) + 10\%$$

¹Transfer Function "A" is shown. See Figure 1 for other available transfer function options.

Force Sensors, FSA Series Compensated/Amplified

Figure 3. Mounting Dimensions (For reference only: mm/in.)

Analog version

| Function | Pin 1 | Pin 2 | Pin 3 |
|----------|---------------------|------------------|-------|
| analog | V_{supply} | V_{out} | GND |

Digital version

| Function | Pin 1 | Pin 2 | Pin 3 | Pin 4 | Pin 5 |
|------------------|-------|---------------------|-------|-------|-------|
| SPI | GND | V_{supply} | SS | MISO | SCLK |
| I ² C | GND | V_{supply} | N/C | SDA | SCL |

ADDITIONAL INFORMATION

⚠ WARNING **PERSONAL INJURY**

DO NOT USE these products as safety or emergency stop devices or in any other application where failure of the product could result in personal injury.

Failure to comply with these instructions could result in death or serious injury.

⚠ WARNING **MISUSE OF DOCUMENTATION**

- The information presented in this datasheet is for reference only. Do not use this document as a product installation guide.
- Complete installation, operation, and maintenance information is provided in the instructions supplied with each product.

Failure to comply with these instructions could result in death or serious injury.

Warranty/Remedy

Honeywell warrants goods of its manufacture as being free of defective materials and faulty workmanship during the applicable warranty period. Honeywell's standard product warranty applies unless agreed to otherwise by Honeywell in writing; please refer to your order acknowledgment or consult your local sales office for specific warranty details. If warranted goods are returned to Honeywell during the period of coverage, Honeywell will repair or replace, at its option, without charge those items that Honeywell, in its sole discretion, finds defective. **The foregoing is buyer's sole remedy and is in lieu of all other warranties, expressed or implied, including those of merchantability and fitness for a particular purpose. In no event shall Honeywell be liable for consequential, special, or indirect damages.**

While Honeywell may provide application assistance personally, through our literature and the Honeywell web site, it is buyer's sole responsibility to determine the suitability of the product in the application.

Specifications may change without notice. The information we supply is believed to be accurate and reliable as of this writing. However, Honeywell assumes no responsibility for its use.

Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
