

Micropower dual CMOS voltage comparators

Datasheet - production data

Features

- Low supply current: 5 μ A typ. per comparator
- Wide single supply range 2.7 V to 16 V or dual supplies (± 1.35 V to ± 8 V)
- Extremely low input bias current: 1 pA typ.

- Input common-mode voltage range includes ground
- Open drain output
- High input impedance: 10^{12} Ω typ
- Fast response time: 2 μ s typ. for 5 mV overdrive
- ESD tolerance: 4 kV HBM, 200 V MM

Related products

- Pin-to-pin and functionally compatible with the dual CMOS TS393 comparators
- See the TSX3702 for push-pull output

Applications

- Automotive
- Industrial

Description

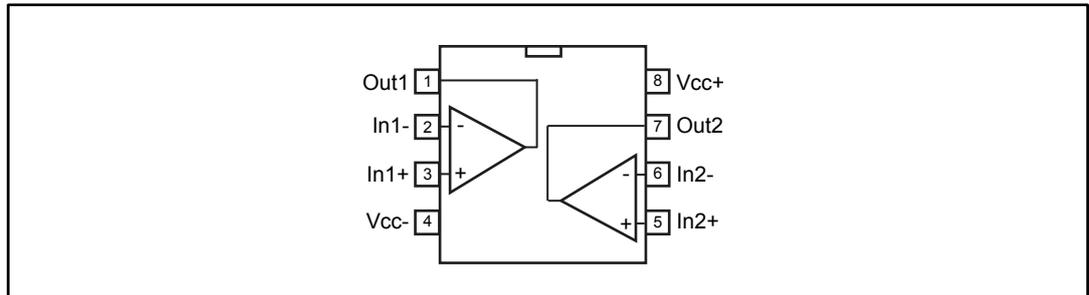

The TSX393 is a micropower CMOS dual voltage comparator which exhibits a very low current consumption of 5 μ A typical per comparator. This device was designed as the improvement of the TS393: it shows a lower current consumption, a better input offset voltage, and an enhanced ESD tolerance. The TSX393 is fully specified over a wide temperature range and is proposed in automotive grade for the SO8 package. It is fully compatible with the TS393 CMOS comparator and is available with similar packages. New tiny packages (MiniSO8 and DFN8 2x2 mm) are also proposed for the TSX393 thus allowing even more integration on applications.

| | MM: machine model ⁽⁷⁾ | 200 | | |
| | CDM: charged device model ⁽⁸⁾ | 1500 | | |
| | Latch-up immunity | 200 | mA | |

Notes:

⁽¹⁾All voltage values, except the differential voltage, are with respect to network ground terminal

⁽²⁾Differential voltages are the non-inverting input terminal with respect to the inverting input terminal

⁽³⁾Excursions of input voltages may exceed the power supply level. As long as the common mode voltage (V_{icm} = (V_{in+}) + (V_{in-})/2) remains within the specified range, the comparator provides a stable output state. However, the maximum current of the input stage, through the ESD diodes (I_F), must be strictly observed.

⁽⁴⁾Guaranteed by design

⁽⁵⁾Short-circuits can cause excessive heating and destructive dissipation. Values are typical.

⁽⁶⁾According to JEDEC standard JESD22-A114F

⁽⁷⁾According to JEDEC standard JESD22-A115A

⁽⁸⁾According to ANSI/ESD STM5.3.1

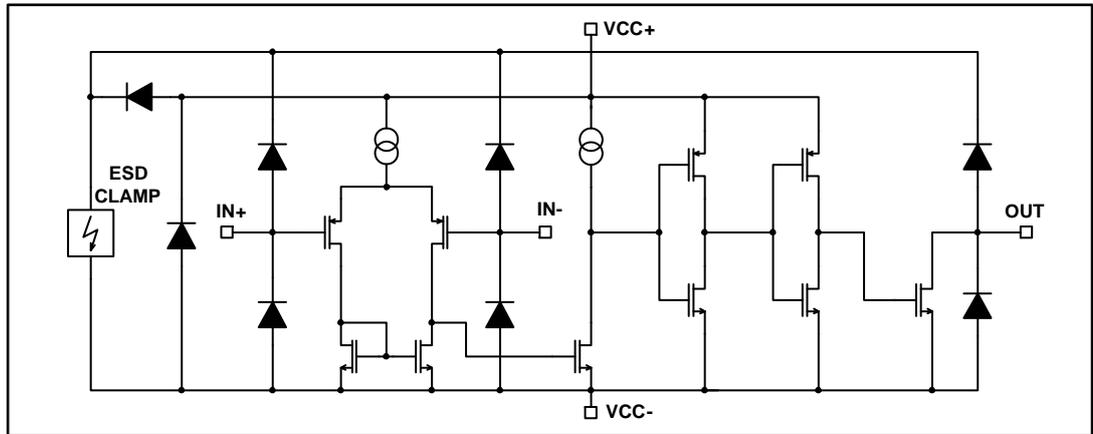

3 Operating conditions

Table 2: Operating conditions

| Symbol | Parameter | Value | Unit |
|------------|--------------------------------------|-------------------------|------|
| V_{CC^+} | Supply voltage | 2.7 to 16 | V |
| V_{icm} | Common mode input voltage range | 0 to $(V_{CC^+}) - 1.5$ | |
| | $T_{min} \leq T_{amb} \leq T_{max}$ | 0 to $(V_{CC^+}) - 2$ | |
| T_{oper} | Operating free-air temperature range | -40 to 125 | °C |

6 Application information (input voltages)

The ESD strategy used in the TSX393 (and shown in [Figure 2](#) allows input voltages from -0.3 V up to 16 V to be applied regardless of the V_{CC+} voltage. When $V_{IN} > V_{CC+}$ a leakage current goes from the input through the protection diode to the ESD clamp. This current is about 0.2 nA at 25 °C and about 250 nA at 125 °C. For a detailed input characteristic see [Figure 12](#). The device is designed to prevent phase reversal.

7 Package information

In order to meet environmental requirements, ST offers these devices in different grades of ECOPACK® packages, depending on their level of environmental compliance. ECOPACK® specifications, grade definitions and product status are available at: www.st.com. ECOPACK® is an ST trademark.

Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
