Vibration resistance	10 to 55 Hz, 1.5 mm double amplitude	
Shock resistance	300 m/s <sup>2</sup> (approx. 30G)	
Ambient temperature	Operating: -10°C to 55°C (14°F to 131°F) with no icing Storage: -25°C to 65°C (-13°F to 149°F) with no icing	
Ambient humidity	Operating: 35% to 85% with no condensation	

- Note: 1. The transmission distance values stated in this table are based on one power supply attached to each Input or Output Link Terminal. If two Input or Output Link Terminals share one power supply, the transmission distance will be derated, and the voltage must be 24 VDC  $\pm$ 10%. The derated transmission distance for normal-speed models is 100 m maximum and that of a high-speed model is 50 m maximum. Additional information on power supply connections follows in Operation section.
2. A shielded transmission cable or plain twisted pair cable with a thickness of 0.75 mm<sup>2</sup> minimum must be used for signal transmission. If twisted pair cable is used, however, the transmission distance will be 10 m maximum regardless of whether or not independent power supplies for the Input and the Output Link Terminals are used.
3. The minimum input time is required for the B7A/B7AS to read an input signal.
4. For high-speed models, these values are possible without grounding the shielded line.

## POWER SUPPLY

There are 16-point models with standard and high-speed transmission speeds, which are different in recommended transmission cable and transmission distance. If one power supply is connected to two Input or Output Modules, the current on the power line will be limited.

Connection of Single Power Supply to Input or Output Terminal

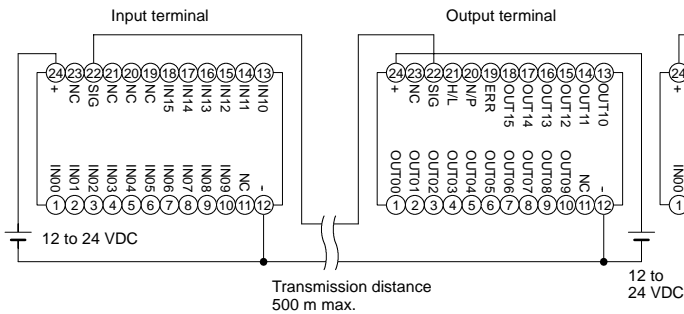

Note: In this example, a shielded transmission cable with a thickness of 0.75 mm<sup>2</sup> is used, through which a current of 1.8 A max. can be transmitted. It is recommended that the shield be grounded.  
The maximum transmission distance is 10 m if a twisted pair or VCTF cable with a thickness of 0.75 mm<sup>2</sup> is used instead of a shielded cable for the transmission path.
