

# NX3DV2567

## Low-ohmic four-pole double-throw analog switch

Rev. 2 — 9 November 2011

Product data sheet

### 1. General description

The NX3DV2567 is a four-pole double-throw analog switch (4PDT) optimized for switching WLAN-SIM supply, data and control signals. It has one digital select input (S) and four switches each with two independent input/outputs (nY0 and nY1) and a common input/output (nZ). Schmitt trigger action at S makes the circuit tolerant to slower input rise and fall times across the entire  $V_{CC}$  range from 1.4 V to 4.3 V.

A low input voltage threshold allows pin S to be driven by lower level logic signals without significant increase in supply current  $I_{CC}$ . This makes it possible for the NX3DV2567 to switch 4.3 V signals with a 1.8 V digital controller, eliminating the need for logic level translation.

The NX3DV2567 allows signals with amplitude up to  $V_{CC}$  to be transmitted from nZ to nY0 or nY1; or from nY0 or nY1 to nZ..

### 2. Features and benefits

- Wide supply voltage range from 1.4 V to 4.3 V
- Very low ON resistance for supply path:
  - ◆ 0.5  $\Omega$  (typical) at  $V_{CC} = 1.8$  V
  - ◆ 0.45  $\Omega$  (typical) at  $V_{CC} = 2.7$  V
- Low ON resistance for data path:
  - ◆ 7  $\Omega$  (typical) at  $V_{CC} = 1.8$  V
  - ◆ 6  $\Omega$  (typical) at  $V_{CC} = 2.7$  V
- Low ON capacitance for data path
- Wide -3 db bandwidth > 160 MHz
- Break-before-make switching
- High noise immunity
- ESD protection:
  - ◆ HBM JESD22-A114F Class 3A exceeds 4000 V
  - ◆ HBM JESD22-A114F Class 3A I/O to GND exceeds 7000 V
  - ◆ CDM AEC-Q100-011 revision B exceeds 1000 V
- CMOS low-power consumption
- Latch-up performance exceeds 100 mA per JESD 78B Class II Level A
- 1.8 V control logic at  $V_{CC} = 3.6$  V
- Control input accepts voltages above supply voltage
- Very low supply current, even when input is below  $V_{CC}$
- High current handling capability (350 mA continuous current under 3.3 V supply for supply path switch)

- Specified from –40 °C to +85 °C and from –40 °C to +125 °C

### 3. Applications

- Cell phone, PDA, digital camera, printer and notebook
- LCD monitor, TV and set-top box

### 4. Ordering information

Table 1. Ordering information

| Type number | Package           |          |                                                                                                                    |           |
|-------------|-------------------|----------|--------------------------------------------------------------------------------------------------------------------|-----------|
|             | Temperature range | Name     | Description                                                                                                        | Version   |
| NX3DV2567HR | –40 °C to +125 °C | HXQFN16U | plastic thermal enhanced extremely thin quad flat package; no leads; 16 terminals; UTLP based; body 3 x 3 x 0.5 mm | SOT1039-1 |
| NX3DV2567GU | –40 °C to +125 °C | XQFN16   | plastic, extremely thin quad flat package; no leads; 16 terminals; body 1.80 x 2.60 x 0.50 mm                      | SOT1161-1 |

### 5. Marking

Table 3. Pin description

| Symbol          | Pin      | Description                                 |
|-----------------|----------|---------------------------------------------|
| 1Y0             | 1        | independent input or output (supply switch) |
| 2Y0, 3Y0, 4Y0   | 5, 9, 13 | independent input or output (data switch)   |
| S               | 2        | select input                                |
| 1Y1             | 15       | independent input or output (supply switch) |
| 2Y1, 3Y1, 4Y1   | 3, 7, 11 | independent input or output (data switch)   |
| 1Z              | 16       | common output or input (supply switch)      |
| 2Z, 3Z, 4Z      | 4, 8, 12 | common output or input (data switch)        |
| GND             | 6        | ground (0 V)                                |
| n.c.            | 10       | not connected                               |
| V <sub>CC</sub> | 14       | supply voltage                              |

## 8. Functional description

Table 4. Function table<sup>[1]</sup>

| Input S | Channel on |
|---------|------------|
| L       | nY0        |
| H       | nY1        |

[1] H = HIGH voltage level; L = LOW voltage level.

## 9. Limiting values

Table 5. Limiting values

In accordance with the Absolute Maximum Rating System (IEC 60134). Voltages are referenced to GND (ground = 0 V).

| Symbol           | Parameter               | Conditions                                                                                                                            | Min                 | Max                   | Unit |
|------------------|-------------------------|---------------------------------------------------------------------------------------------------------------------------------------|---------------------|-----------------------|------|
| V <sub>CC</sub>  | supply voltage          |                                                                                                                                       | -0.5                | +4.6                  | V    |

**Table 5.** Limiting values ...continued

In accordance with the Absolute Maximum Rating System (IEC 60134). Voltages are referenced to GND (ground = 0 V).

| Symbol           | Parameter               | Conditions                           | Min      | Max | Unit |
|------------------|-------------------------|--------------------------------------|----------|-----|------|
| P <sub>tot</sub> | total power dissipation | T <sub>amb</sub> = -40 °C to +125 °C | [3][4] - | 250 | mW   |

[1] The minimum input voltage rating may be exceeded if the input current rating is observed.

[2] The minimum and maximum switch voltage ratings may be exceeded if the switch clamping current rating is observed but may not exceed 4.6 V.

[3] For HXQFN16U package: above 135 °C the value of P<sub>tot</sub> derates linearly with 16.9 mW/K.[4] For XQFN16 package: above 133 °C the value of P<sub>tot</sub> derates linearly with 14.5 mW/K.

## 10. Recommended operating conditions

**Table 6.** Recommended operating conditions

| Symbol           | Parameter                           | Conditions                       | Min   | Max             | Unit |
|------------------|-------------------------------------|----------------------------------|-------|-----------------|------|
| V <sub>CC</sub>  | supply voltage                      |                                  | 1.4   | 4.3             | V    |
| V <sub>I</sub>   | input voltage                       | select input S                   | 0     | 4.3             | V    |
| V <sub>SW</sub>  | switch voltage                      |                                  | [1] 0 | V <sub>CC</sub> | V    |
| T <sub>amb</sub> | ambient temperature                 |                                  | -40   | +125            | °C   |
| Δt/ΔV            | input transition rise and fall rate | V <sub>CC</sub> = 1.4 V to 4.3 V | [2] - | 200             | ns/V |

[1] To avoid sinking GND current from terminal nZ when switch current flows in terminal nYn, the voltage drop across the bidirectional switch must not exceed 0.4 V. If the switch current flows into terminal nZ, no GND current will flow from terminal nYn. In this case, there is no limit for the voltage drop across the switch.

[2] Applies to control signal levels.

## 11. Static characteristics

**Table 7.** Static characteristics

At recommended operating conditions; voltages are referenced to GND (ground 0 V).

| Symbol          | Parameter                | Conditions                                                                            | T <sub>amb</sub> = 25 °C |     |     | T <sub>amb</sub> = -40 °C to +125 °C |             |              | Unit |

|           |                        | $V_{CC} = 2.3 \text{ V to } 2.7 \text{ V}$   | -     | 15                 | -   | 4                 | -           | -            | ns   |
|           |                        | $V_{CC} = 2.7 \text{ V to } 3.6 \text{ V}$   | -     | 13                 | -   | 3                 | -           | -            | ns   |
|           |                        | $V_{CC} = 3.6 \text{ V to } 4.3 \text{ V}$   | -     | 12                 | -   | 2                 | -           | -            | ns   |

[1] Typical values are measured at  $T_{amb} = 25 \text{ °C}$  and  $V_{CC} = 1.5 \text{ V}$ ,  $1.8 \text{ V}$ ,  $2.5 \text{ V}$ ,  $3.3 \text{ V}$  and  $4.3 \text{ V}$  respectively.

[2] Break-before-make guaranteed by design.

## 12.1 Waveform and test circuits

Measurement points are given in [Table 10](#).

Logic level:  $V_{OH}$  is typical output voltage level that occurs with the output load.

**Fig 14. Enable and disable times**

**Table 10. Measurement points**

| Supply voltage | Input       | Output      |
|----------------|-------------|-------------|
| $V_{CC}$       | $V_M$       | $V_X$       |
| 1.4 V to 4.3 V | $0.5V_{CC}$ | $0.9V_{OH}$ |

Table 11. Test data

| Supply voltage | Input    |               | Load  |             |
|----------------|----------|---------------|-------|-------------|
| $V_{CC}$       | $V_I$    | $t_r, t_f$    | $C_L$ | $R_L$       |
| 1.4 V to 4.3 V | $V_{CC}$ | $\leq 2.5$ ns | 35 pF | 50 $\Omega$ |

12.2 Additional dynamic characteristics

Table 12. Additional dynamic characteristics
At recommended operating conditions; voltages are referenced to GND (ground = 0 V); V\_I = GND or V\_CC (unless otherwise specified); t\_r = t\_f ≤ 2.5 ns; T\_amb = 25 °C.

| Symbol              | Parameter                | Conditions                                                                                                                               | Min | Typ | Max | Unit |

## 16. Legal information

### 16.1 Data sheet status

| Document status <sup>[1][2]</sup> | Product status <sup>[3]</sup> | Definition                                                                            |
|-----------------------------------|-------------------------------|---------------------------------------------------------------------------------------|
| Objective [short] data sheet      | Development                   | This document contains data from the objective specification for product development. |
| Preliminary [short] data sheet    | Qualification                 | This document contains data from the preliminary specification.                       |
| Product [short] data sheet        | Production                    | This document contains the product specification.                                     |

[1] Please consult the most recently issued document before initiating or completing a design.

[2] The term 'short data sheet' is explained in section "Definitions".

[3] The product status of device(s) described in this document may have changed since this document was published and may differ in case of multiple devices. The latest product status information is available on the Internet at URL <http://www.nxp.com>.

### 16.2 Definitions

**Draft** — The document is a draft version only. The content is still under internal review and subject to formal approval, which may result in modifications or additions. NXP Semiconductors does not give any representations or warranties as to the accuracy or completeness of information included herein and shall have no liability for the consequences of use of such information.

**Short data sheet** — A short data sheet is an extract from a full data sheet with the same product type number(s) and title. A short data sheet is intended for quick reference only and should not be relied upon to contain detailed and full information. For detailed and full information see the relevant full data sheet, which is available on request via the local NXP Semiconductors sales office. In case of any inconsistency or conflict with the short data sheet, the full data sheet shall prevail.

**Product specification** — The information and data provided in a Product data sheet shall define the specification of the product as agreed between NXP Semiconductors and its customer, unless NXP Semiconductors and customer have explicitly agreed otherwise in writing. In no event however, shall an agreement be valid in which the NXP Semiconductors product is deemed to offer functions and qualities beyond those described in the Product data sheet.

### 16.3 Disclaimers

**Limited warranty and liability** — Information in this document is believed to be accurate and reliable. However, NXP Semiconductors does not give any representations or warranties, expressed or implied, as to the accuracy or completeness of such information and shall have no liability for the consequences of use of such information.

In no event shall NXP Semiconductors be liable for any indirect, incidental, punitive, special or consequential damages (including - without limitation - lost profits, lost savings, business interruption, costs related to the removal or replacement of any products or rework charges) whether or not such damages are based on tort (including negligence), warranty, breach of contract or any other legal theory.

Notwithstanding any damages that customer might incur for any reason whatsoever, NXP Semiconductors' aggregate and cumulative liability towards customer for the products described herein shall be limited in accordance with the *Terms and conditions of commercial sale* of NXP Semiconductors.

**Right to make changes** — NXP Semiconductors reserves the right to make changes to information published in this document, including without limitation specifications and product descriptions, at any time and without notice. This document supersedes and replaces all information supplied prior to the publication hereof.

**Suitability for use** — NXP Semiconductors products are not designed, authorized or warranted to be suitable for use in life support, life-critical or safety-critical systems or equipment, nor in applications where failure or

malfunction of an NXP Semiconductors product can reasonably be expected to result in personal injury, death or severe property or environmental damage. NXP Semiconductors accepts no liability for inclusion and/or use of NXP Semiconductors products in such equipment or applications and therefore such inclusion and/or use is at the customer's own risk.

**Applications** — Applications that are described herein for any of these products are for illustrative purposes only. NXP Semiconductors makes no representation or warranty that such applications will be suitable for the specified use without further testing or modification.

Customers are responsible for the design and operation of their applications and products using NXP Semiconductors products, and NXP Semiconductors accepts no liability for any assistance with applications or customer product design. It is customer's sole responsibility to determine whether the NXP Semiconductors product is suitable and fit for the customer's applications and products planned, as well as for the planned application and use of customer's third party customer(s). Customers should provide appropriate design and operating safeguards to minimize the risks associated with their applications and products.

NXP Semiconductors does not accept any liability related to any default, damage, costs or problem which is based on any weakness or default in the customer's applications or products, or the application or use by customer's third party customer(s). Customer is responsible for doing all necessary testing for the customer's applications and products using NXP Semiconductors products in order to avoid a default of the applications and the products or of the application or use by customer's third party customer(s). NXP does not accept any liability in this respect.

**Limiting values** — Stress above one or more limiting values (as defined in the Absolute Maximum Ratings System of IEC 60134) will cause permanent damage to the device. Limiting values are stress ratings only and (proper) operation of the device at these or any other conditions above those given in the Recommended operating conditions section (if present) or the Characteristics sections of this document is not warranted. Constant or repeated exposure to limiting values will permanently and irreversibly affect the quality and reliability of the device.

**Terms and conditions of commercial sale** — NXP Semiconductors products are sold subject to the general terms and conditions of commercial sale, as published at <http://www.nxp.com/profile/terms>, unless otherwise agreed in a valid written individual agreement. In case an individual agreement is concluded only the terms and conditions of the respective agreement shall apply. NXP Semiconductors hereby expressly objects to applying the customer's general terms and conditions with regard to the purchase of NXP Semiconductors products by customer.

**No offer to sell or license** — Nothing in this document may be interpreted or construed as an offer to sell products that is open for acceptance or the grant, conveyance or implication of any license under any copyrights, patents or other industrial or intellectual property rights.

**Export control** — This document as well as the item(s) described herein may be subject to export control regulations. Export might require a prior authorization from competent authorities.

**Non-automotive qualified products** — Unless this data sheet expressly states that this specific NXP Semiconductors product is automotive qualified, the product is not suitable for automotive use. It is neither qualified nor tested in accordance with automotive testing or application requirements. NXP Semiconductors accepts no liability for inclusion and/or use of non-automotive qualified products in automotive equipment or applications.

In the event that customer uses the product for design-in and use in automotive applications to automotive specifications and standards, customer (a) shall use the product without NXP Semiconductors' warranty of the product for such automotive applications, use and specifications, and (b) whenever customer uses the product for automotive applications beyond

NXP Semiconductors' specifications such use shall be solely at customer's own risk, and (c) customer fully indemnifies NXP Semiconductors for any liability, damages or failed product claims resulting from customer design and use of the product for automotive applications beyond NXP Semiconductors' standard warranty and NXP Semiconductors' product specifications.

## Данный компонент на территории Российской Федерации

**Вы можете приобрести в компании MosChip.**

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
