

In most applications, a signal booster (Model Number: B122-000-60) should be used with this cable to ensure a signal strong enough for your display. An alternate, more cost effective solution is to use a Tripp Lite HDMI over Cat5 Extender (Model Number: B126-1A1) in place of a 100 ft. HDMI cable and signal booster.

Standard Speed HDMI Easy Pull Cable, 1080p, Digital Video with Audio (M/M), 100-ft.

MODEL NUMBER: **P568-100-EZ**

Description

Tripp Lite's 100 ft. Standard Speed HDMI Easy Pull All-in-One Monitor Cable makes running long length video cables a snap. The pull-apart design allows the cable to be run through conduit or other tight areas that a HDMI connector wouldn't fit through. Diameter of the circular DIN end is only 7/8". Circular Easy Pull connector is threaded to ensure maximum security once the cable is reattached. Supports iPad2 Video Mirroring when used with Apple Digital AV Adapter. HDMI assures that the best audio/video signal is always sent from the source (HDTV signal, Blu-Ray Player) to the display (Projection Television, LCD, Plasma, etc.). It does this by allowing uncompressed video and multi-channel audio data to be input to the display device through a single cable. An HDMI connection allows input at high rates of speed, up to 10.2 Gbps. In most applications, a signal booster ([B122-000-60](#)) will need to be used with this cable to ensure a signal strong enough for your display.
