### EVAL BOARD USER'S MANUAL

#### Introduction

This document describes the CAT4104AEVB evaluation board for the ON Semiconductor CAT4104 quad channel constant current LED driver. The functionality and major parameters of the CAT4104 can be evaluated with the CAT4104AEVB board.

The CAT4104 is a LED driver with four matched current sinks capable of driving up to 175 mA per channel. All current sinks are programmed by a single resistor from the RSET pin to GND. Enable and dimming control is available via the EN/PWM pin. Additional details and electrical characteristics can be found in the CAT4104 data sheet.

#### Board Hardware

The evaluation board contains one CAT4104 in a typical application circuit. Four test points labeled T4 through T7 are available to connect the cathode side of an LED string to the CAT4104.

The VIN test point (T1) is connected to the VIN supply of the CAT4104. The voltage between test points VIN and GND (T2) should not exceed 6.0 V.

The EN/PWM test point is the enable and PWM input for the CAT4104. The control signal should be connected between test points EN/PWM and GND.

Trimmer potentiometer R2 can be adjusted to change the LED current. The RSET pin of the CAT4104 is a fixed 1.2 V reference and the LED current is set by changing the current through the RSET resistor (R1 + R2). The CAT4104 has a typical dropout voltage of 400 mV for 175 mA LED current.

Table 1. CAT4104AEVB BOARD LIST OF COMPONENTS

Name	Manufacturer	Description	Part Number	Units
U1	ON Semiconductor	Quad Channel LED Driver in SOIC-8 or TDFN-8 package	CAT4104V or CAT4104VP2	1
C1	Taiyo Yuden	Ceramic Capacitor 1 μF/10 V, 10%, X7R, Size 0805	LMK212B7105KD-T	1
R1	Yageo	SMT Resistor 1/8 W, 750 Ω, Size 0805	RC0805FR-07560RL	1
R2	Vishay	Trimmer Potentiometer, 10 kΩ	T63YB103K	1

## Данный компонент на территории Российской Федерации

### Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
