RoHS Pb HF HB34, HF34 and HG34 Varistor Series

Agency Approvals

Agency	Agency File Number
	E320116
	LR91788

Description

The HB34, HF34, and HG34 Series of transient surge suppressors are industrial high-energy Metal-Oxide Varistors (MOVs). They are designed to provide surge suppression in the AC mains outdoor and service entrance environment (distribution panels) of buildings. Applications also include industrial heavy motors, controls, and power supplies such as used in the oil-drilling, mining, and transportation fields, including HVAC and motor/generator applications.

The HB34 Series provides rigid terminals for through-hole solder mounting on printed circuit boards, thereby eliminating the need for screw mounting. The HF34 Series has the same rigid through-hole terminals as the HB34 with the addition of mounting holes for bolt-down mounting and longer terminals to allow for additional mounting flexibility. The HG34 has formed feet with mounting holes for vertical bolt-down mounting.

See Ratings and Specifications table for part numbers.

Features

- Lead-Free, Halogen-Free and RoHS Compliant available
- Wide operating voltage range $V_{M(AC)RMS}$ 110V to 750V
- High energy absorption capability W_{TM} = 220J to 1050J
- High peak pulse current capability I_{TM} = 40,000A
- Rigid terminals for secure through-hole solder mounting
- No derating up to 85°C ambient

Absolute Maximum Ratings

• For ratings of individual members of a series, see Device Ratings and Specifications chart

Continuous	Hx34 Series	Units
Steady State Applied Voltage:		
AC Voltage Range ($V_{M(AC)RMS}$)	110 to 750	V
DC Voltage Range ($V_{M(DC)}$)	148 to 970	V
Transients:		
Peak Pulse Current (I_{TM})		
For 8/20μs Current Wave (See Figure 2)	40000	A
Single Pulse Energy Range		
For 2ms Current Wave (W_{TM})	220 to 1050	J
Operating Ambient Temperature Range (T_A)	-55 to +85	°C
Storage Temperature Range (T_{STG})	-55 to +125	°C
Temperature Coefficient (a^V) of Clamping Voltage (V_C) at Specified Test Current	<0.01	%/°C
Hi-Pot Encapsulation (COATING Isolation Voltage Capability) (Dielectric must withstand indicated DC voltage for one minute per MIL-STD 202, Method 301)	2500	V
COATING Insulation Resistance	1000	MΩ

CAUTION: Stresses above those listed in "Absolute Maximum Ratings" may cause permanent damage to the device. This is a stress only rating and operation of the device at these or any other conditions above those indicated in the operational sections of this specification is not implied.

NOTE: Average power dissipation of transients not to exceed 2.0W.

1. Peak current applies to applications rated up to 97V_{RMS}. Peak current is 30kA for applications greater than 97V.
2. Peak current applies to applications rated up to 115V_{RMS}. Peak current is 30kA for applications greater than 115V
3. Peak current applies to applications rated up to 123V_{RMS}. Peak current is 30kA for applications greater than 123V.
4. Peak current applies to applications rated up to 132V_{RMS}. Peak current is 30kA for applications greater than 132V.

Power Dissipation Ratings

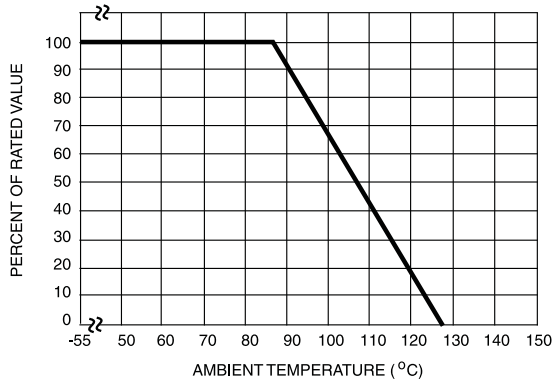

Figure 1

Should transients occur in rapid succession, the average power dissipation result is simply the energy (watt-seconds) per pulse times the number of pulses per second. The power so developed must be within the specifications shown on the Device Ratings and Specifications Table for the specific device. The operating values must be derated as shown in above.

Peak Pulse Current Test Waveform

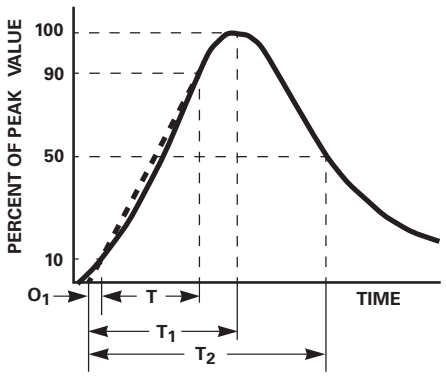

Figure 2

0_1 = Virtual Origin of Wave
T = Time from 10% to 90% of Peak
T_1 = Rise Time = 1.25 x T
T_2 = Decay Time

Example - For an 8/20 μs Current Waveform:
$8\mu s = T_1$ = Rise Time
$20\mu s = T_2$ = Decay Time

Clamping Voltage for HB34, HF34 and HG34 Series

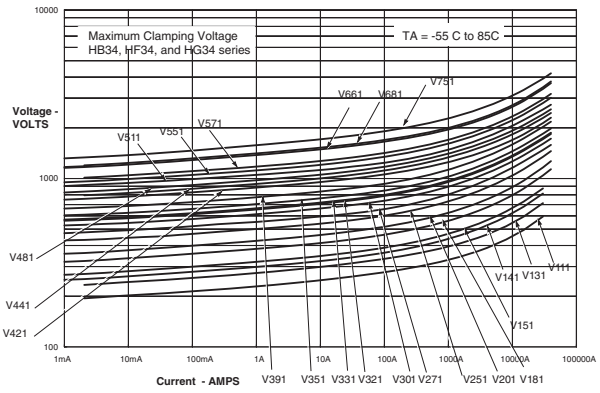

Figure 3

Surge Current Rating Curves for HB34, HF34 and HG34 Series

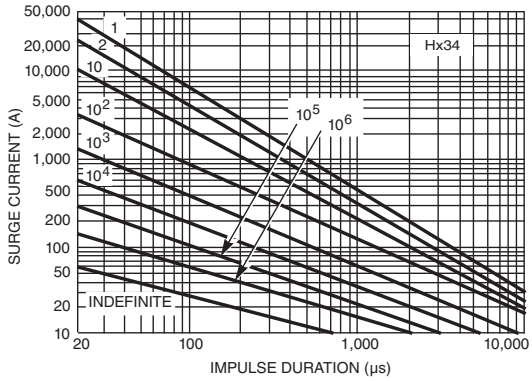

Figure 4

NOTE: If pulse ratings are exceeded, a shift of $V_{N(DC)}$ (at specified current) of more than +/-10% could result. This type of shift, which normally results in a decrease of $V_{N(DC)}$, may result in the device not meeting the original published specifications, but it does not prevent the device from continuing to function, and to provide ample protection.
