

MICROCHIP

**EVB-LAN9252-ADD-ON
for Beckhoff EL9800
User's Guide**

Note the following details of the code protection feature on Microchip devices:

- Microchip products meet the specification contained in their particular Microchip Data Sheet.
- Microchip believes that its family of products is one of the most secure families of its kind on the market today, when used in the intended manner and under normal conditions.
- There are dishonest and possibly illegal methods used to breach the code protection feature. All of these methods, to our knowledge, require using the Microchip products in a manner outside the operating specifications contained in Microchip's Data Sheets. Most likely, the person doing so is engaged in theft of intellectual property.
- Microchip is willing to work with the customer who is concerned about the integrity of their code.
- Neither Microchip nor any other semiconductor manufacturer can guarantee the security of their code. Code protection does not mean that we are guaranteeing the product as "unbreakable."

Code protection is constantly evolving. We at Microchip are committed to continuously improving the code protection features of our products. Attempts to break Microchip's code protection feature may be a violation of the Digital Millennium Copyright Act. If such acts allow unauthorized access to your software or other copyrighted work, you may have a right to sue for relief under that Act.

Information contained in this publication regarding device applications and the like is provided only for your convenience and may be superseded by updates. It is your responsibility to ensure that your application meets with your specifications. MICROCHIP MAKES NO REPRESENTATIONS OR WARRANTIES OF ANY KIND WHETHER EXPRESS OR IMPLIED, WRITTEN OR ORAL, STATUTORY OR OTHERWISE, RELATED TO THE INFORMATION, INCLUDING BUT NOT LIMITED TO ITS CONDITION, QUALITY, PERFORMANCE, MERCHANTABILITY OR FITNESS FOR PURPOSE. Microchip disclaims all liability arising from this information and its use. Use of Microchip devices in life support and/or safety applications is entirely at the buyer's risk, and the buyer agrees to defend, indemnify and hold harmless Microchip from any and all damages, claims, suits, or expenses resulting from such use. No licenses are conveyed, implicitly or otherwise, under any Microchip intellectual property rights unless otherwise stated.

Trademarks

The Microchip name and logo, the Microchip logo, dsPIC, FlashFlex, flexPWR, JukeBlox, KEELOQ, KEELOQ logo, Kleer, LANCheck, MediaLB, MOST, MOST logo, MPLAB, OptoLyzer, PIC, PICSTART, PIC³² logo, RightTouch, SpyNIC, SST, SST Logo, SuperFlash and UNI/O are registered trademarks of Microchip Technology Incorporated in the U.S.A. and other countries.

**QUALITY MANAGEMENT SYSTEM
CERTIFIED BY DNV
= ISO/TS 16949 =**

Microchip received ISO/TS-16949:2009 certification for its worldwide headquarters, design and wafer fabrication facilities in Chandler and Tempe, Arizona; Gresham, Oregon and design centers in California and India. The Company's quality system processes and procedures are for its PIC® MCUs and dsPIC® DSCs, KEELOQ® code hopping devices, Serial EEPROMs, microperipherals, nonvolatile memory and analog products. In addition, Microchip's quality system for the design and manufacture of development systems is ISO 9001:2000 certified.

Object of Declaration: EVB-LAN9252-ADD-ON for Beckhoff EL9800

EU Declaration of Conformity

Manufacturer: Microchip Technology Inc.
2355 W. Chandler Blvd.
Chandler, Arizona, 85224-6199
USA

This declaration of conformity is issued by the manufacturer.

The development/evaluation tool is designed to be used for research and development in a laboratory environment. This development/evaluation tool is not a Finished Appliance, nor is it intended for incorporation into Finished Appliances that are made commercially available as single functional units to end users under EU EMC Directive 2004/108/EC and as supported by the European Commission's Guide for the EMC Directive 2004/108/EC (8th February 2010).

This development/evaluation tool complies with EU RoHS2 Directive 2011/65/EU.

This development/evaluation tool, when incorporating wireless and radio-telecom functionality, is in compliance with the essential requirement and other relevant provisions of the R&TTE Directive 1999/5/EC and the FCC rules as stated in the declaration of conformity provided in the module datasheet and the module product page available at www.microchip.com.

For information regarding the exclusive, limited warranties applicable to Microchip products, please see Microchip's standard terms and conditions of sale, which are printed on our sales documentation and available at www.microchip.com.

Signed for and on behalf of Microchip Technology Inc. at Chandler, Arizona, USA

Preface

NOTICE TO CUSTOMERS

All documentation becomes dated, and this manual is no exception. Microchip tools and documentation are constantly evolving to meet customer needs, so some actual dialogs and/or tool descriptions may differ from those in this document. Please refer to our web site (www.microchip.com) to obtain the latest documentation available.

Documents are identified with a “DS” number. This number is located on the bottom of each page, in front of the page number. The numbering convention for the DS number is “DSXXXXA”, where “XXXX” is the document number and “A” is the revision level of the document.

For the most up-to-date information on development tools, see the MPLAB® IDE online help. Select the Help menu, and then Topics to open a list of available online help files.

INTRODUCTION

This chapter contains general information that will be useful to know before using the EVB-LAN9252-ADD-ON. Items discussed in this chapter include:

- [Document Layout](#)
- [Conventions Used in this Guide](#)
- [The Microchip Web Site](#)
- [Development Systems Customer Change Notification Service](#)
- [Customer Support](#)
- [Document Revision History](#)

DOCUMENT LAYOUT

This document describes how to use the EVB-LAN9252-ADD-ON as a development tool for the Microchip LAN9252 EtherCAT® slave controller. The manual layout is as follows:

- **Chapter 1. “Overview”** – Provides a brief description of the EVB-LAN9252-ADD-ON.
- **Chapter 2. “Board Details & Configuration”** – Includes details and instructions for using the EVB-LAN9252-ADD-ON.
- **Appendix A. “Evaluation Board Photo”** – This appendix shows the EVB-LAN9252-ADD-ON.
- **Appendix B. “Evaluation Board Schematics”** – This appendix shows the EVB-LAN9252-ADD-ON schematics.
- **Appendix C. “Bill of Materials (BOM)”** – This appendix includes the EVB-LAN9252-ADD-ON Bill of Materials (BOM).

CONVENTIONS USED IN THIS GUIDE

This manual uses the following documentation conventions:

DOCUMENTATION CONVENTIONS

Description	Represents	Examples
Arial font:		
Italic characters	Referenced books	<i>MPLAB[®] IDE User's Guide</i>
	Emphasized text	...is the <i>only</i> compiler...
Initial caps	A window	the Output window
	A dialog	the Settings dialog
	A menu selection	select Enable Programmer
Quotes	A field name in a window or dialog	"Save project before build"
Underlined, italic text with right angle bracket	A menu path	<u><i>File>Save</i></u>
Bold characters	A dialog button	Click OK
	A tab	Click the Power tab
N'Rnnnn	A number in verilog format, where N is the total number of digits, R is the radix and n is a digit.	4'b0010, 2'hF1
Text in angle brackets < >	A key on the keyboard	Press <Enter>, <F1>
Courier New font:		
Plain Courier New	Sample source code	#define START
	Filenames	autoexec.bat
	File paths	c:\mcc18\h
	Keywords	_asm, _endasm, static
	Command-line options	-Opa+, -Opa-
	Bit values	0, 1
	Constants	0xFF, 'A'
Italic Courier New	A variable argument	<i>file.o</i> , where <i>file</i> can be any valid filename
Square brackets []	Optional arguments	mcc18 [options] <i>file</i> [options]
Curly brackets and pipe character: { }	Choice of mutually exclusive arguments; an OR selection	errorlevel {0 1}
Ellipses...	Replaces repeated text	var_name [, var_name...]
	Represents code supplied by user	void main (void) { ... }

THE MICROCHIP WEB SITE

Microchip provides online support via our web site at www.microchip.com. This web site is used as a means to make files and information easily available to customers. Accessible by using your favorite Internet browser, the web site contains the following information:

- **Product Support** – Data sheets and errata, application notes and sample programs, design resources, user's guides and hardware support documents, latest software releases and archived software
- **General Technical Support** – Frequently Asked Questions (FAQs), technical support requests, online discussion groups, Microchip consultant program member listing
- **Business of Microchip** – Product selector and ordering guides, latest Microchip press releases, listing of seminars and events, listings of Microchip sales offices, distributors and factory representatives

DEVELOPMENT SYSTEMS CUSTOMER CHANGE NOTIFICATION SERVICE

Microchip's customer notification service helps keep customers current on Microchip products. Subscribers will receive e-mail notification whenever there are changes, updates, revisions or errata related to a specified product family or development tool of interest.

To register, access the Microchip web site at www.microchip.com, click on Customer Change Notification and follow the registration instructions.

The Development Systems product group categories are:

- **Compilers** – The latest information on Microchip C compilers, assemblers, linkers and other language tools. These include all MPLAB C compilers; all MPLAB assemblers (including MPASM assembler); all MPLAB linkers (including MPLINK object linker); and all MPLAB librarians (including MPLIB object librarian).
- **Emulators** – The latest information on Microchip in-circuit emulators. This includes the MPLAB REAL ICE and MPLAB ICE 2000 in-circuit emulators.
- **In-Circuit Debuggers** – The latest information on the Microchip in-circuit debuggers. This includes MPLAB ICD 3 in-circuit debuggers and PICkit 3 debug express.
- **MPLAB IDE** – The latest information on Microchip MPLAB IDE, the Windows Integrated Development Environment for development systems tools. This list is focused on the MPLAB IDE, MPLAB IDE Project Manager, MPLAB Editor and MPLAB SIM simulator, as well as general editing and debugging features.
- **Programmers** – The latest information on Microchip programmers. These include production programmers such as MPLAB REAL ICE in-circuit emulator, MPLAB ICD 3 in-circuit debugger and MPLAB PM3 device programmers. Also included are nonproduction development programmers such as PICSTART Plus and PIC-kit 2 and 3.

CUSTOMER SUPPORT

Users of Microchip products can receive assistance through several channels:

- Distributor or Representative
- Local Sales Office
- Field Application Engineer (FAE)
- Technical Support

Customers should contact their distributor, representative or field application engineer (FAE) for support. Local sales offices are also available to help customers. A listing of sales offices and locations is included in the back of this document.

Technical support is available through the web site at:

<http://www.microchip.com/support>

DOCUMENT REVISION HISTORY

Revision	Section/Figure/Entry	Correction
DS50002356A (03-19-15)	Initial Release of document.	
DS50002356B (10-08-15)	(Throughout document.)	Updated EVB-LAN9252-BECKHOFF-ADD-ON to EVB-LAN9252-ADD-ON.
	Section 1.1 “Introduction”	Updated/replaced entire introduction.
	Figure 1-1	Updated image.
	Section 1.3 “Terms and Abbreviations”	Updated definition of EVB. Added definition for DIGIO.
	Section 2.1 “Power”	Updated/replaced entire paragraph.
	Section 2.2 “Board-to-Board Connector Pinout”	Updated/replaced entire paragraph.
	Table 2-1	Updated title, fixed arrangement of Pin Numbers.
	Section 2.4 “Resets”	Removed entirely; numbering of succeeding sections updated as a result.
	Section 2.4 “Configuration”	Updated first paragraph to include REV B.
	Figure 2-1	Updated image.
	Figure 2-2	Updated image.
	Section 2.5.1 “Chip Mode”	Updated title. Updated/replaced entire paragraph.
	Section 2.6 “Process Data Interfaces”	Updated first paragraph, second bullet point and note.
	Section 2.6.1.1.1 “SPI Mode”	Updated/replaced entire SPI Mode section including tables.
	Section 2.6.1.1.2 “DIGIO Mode”	Updated/replaced entire DIGIO Mode section including tables.
	Section 2.6.1.2 “EVB-LAN9252-ADD-ON Software Configuration”	Updated step 1 to add definition for ESI.
	Figure 2-6	Updated image.
	Figure 2-7	Updated image.
	Figure 2-8	Updated image.
	Section 2.6.2 “Configuring PDI Selection on the Beckhoff EL9800”	Added note.
	Figure B-1	Updated schematic.
	Figure B-2	Updated schematic.

Revision	Section/Figure/Entry	Correction
	Figure B-3	Updated schematic.
	Table C-1	Updated BOM.
	Table C-2	Updated BOM - DNP Components.

Chapter 1. Overview

1.1 INTRODUCTION

The LAN9252 is a 2-port EtherCAT[®] Slave Controller (ESC) with dual-integrated Ethernet PHYs which each contain a full-duplex 100BASE-TX transceiver and support 100Mbps (100BASE-TX) operation. 100BASE-FX is supported via an external fiber transceiver.

The EtherCAT module implements a 3 port EtherCAT slave controller with 4K bytes of Dual Port memory (DPRAM), 4 SyncManagers, 3 Fieldbus Memory Management Units (FMMUs) and a 64-bit Distributed Clock.

This document details the various sections of the EVB-LAN9252-ADD-ON, which is designed to be used as an add-on board (ESC board) with the Beckhoff EL9800 EtherCAT Evaluation Board.

This board supports the SPI and DIGIO PDI modes of the LAN9252 board, combining a LAN9252 EtherCAT Slave Controller, two RJ45 1x1 Tab-DOWN with LEDs, 8-pin integrated magnetics connector (ICM), and a PDI-Connector on a printed circuit board.

A simplified block diagram of the EVB-LAN9252-ADD-ON is displayed in [Figure 1-1](#).

FIGURE 1-1: EVB-LAN9252-ADD-ON BLOCK DIAGRAM

1.2 REFERENCES

Concepts and material available in the following documents may be helpful when reading this document. Visit www.microchip.com for the latest documentation.

- LAN9252 Data Sheet
- Beckhoff EL9800 EtherCAT Base Board Datasheet
- AN 8.13 Suggested Magnetics
- EVB-LAN9252-ADD-ON Schematics

1.3 TERMS AND ABBREVIATIONS

ESC - EtherCAT[®] Slave Controller

EVB - Evaluation Board

HAL - Hardware Abstraction Layer

HBI - Host Bus Interface

IDE - Integrated Development Environment

PDI - Process Data Interface

SPI - Serial Protocol Interface

SSC - Slave Stack Code

DIGIO - Digital Input/Output

Chapter 2. Board Details & Configuration

This chapter includes sub-sections on the following EVB-LAN9252-ADD-ON details:

- Power
- Board-to-Board Connector Pinout
- Clock
- Configuration
- Strap Options
- Process Data Interfaces
- Mechanicals

2.1 POWER

Power is supplied as +5V to the EVB-LAN9252-ADD-ON via the board-to-board connector. +3.3V is generated internally via an LDO. Assertion of the D2 green LED indicates +3.3V o/p. The LAN9252 includes an internal +1.2V regulator which supplies power to the internal core logic.

2.2 BOARD-TO-BOARD CONNECTOR PINOUT

[Table 2-1](#) details the pinout of connector J202 of the EVB-LAN9252 ADD ON board-to-board connector, which connects to the Beckhoff EL9800 J202 connector.

TABLE 2-1: EVB-LAN9252 CONNECTOR J202 PIN OUT

Pin Number	Signal	Pin Number	Signal
1	DIGIO 0	20	GND
2	GND	21	SCS#
3	DIGIO 2	22	NC
4	DIGIO 1	23	NC
5	DIGIO 4	24	NC
6	DIGIO 3	25	NC
7	DIGIO 6	26	NC
8	DIGIO 5	27	GND
9	GND	28	NC
10	DIGIO 7	29	NC
11	DIGIO 9	30	SO
12	DIGIO 8	31	NC
13	DIGIO 11	32	SI
14	DIGIO 10	33	NC
15	DIGIO 13	34	NC
16	DIGIO 12	35	NC
17	DIGIO 15	36	NC
18	DIGIO 14	37	WD_TRIG/SPI_CLK
19	NC	38	GND

TABLE 2-1: EVB-LAN9252 CONNECTOR J202 PIN OUT (CONTINUED)

Pin Number	Signal	Pin Number	Signal
39	SOF	46	OE_EXT
40	OUTVALID	47	NC
41	SYNC/LATCH0	48	VCC_5V_IN
42	NC	49	3V3
43	LATCH_IN	50	VCC_5V_IN
44	SYNC/LATCH1	51	TP3
45	GND	52	TP2

Note: Pins 53-56 are NC.

2.3 CLOCK

LAN9252 requires a fixed-frequency 25MHz clock source for use by the internal clock oscillator and PLL. This is typically provided by attaching a 25MHz crystal to the OSC1 and OSC0 pins.

2.4 CONFIGURATION

The following sub-sections describe the various board features and configuration settings. A top view of the EVB-LAN9252-ADD-ON REV-B is displayed in [Figure 2-1](#).

FIGURE 2-1: EVB-LAN9252-ADD-ON TOP VIEW WITH CALLOUTS

The EVB-LAN9252-ADD-ON connects with the Beckhoff EL9800 EtherCAT Base Board as depicted in [Figure 2-2](#).

2.6.1 PDI Configuration on the EVB-LAN9252-ADD-ON

2.6.1.1 EVB-LAN9252-ADD-ON BOARD LEVEL CONFIGURATION

2.6.1.1.1 SPI Mode

The SPI Slave module provides a low pin count synchronous slave interface that facilitates communication between the LAN9252 and a host system. The SPI/Slave allows access to the System CSRs, internal FIFOs and registers. It supports single and multiple register read and write commands with incrementing, decrementing and static addressing. Single-bit lane is supported in SPI mode.

The jumper detailed in [Table 2-2](#) and switch detailed in [Table 2-3](#) should be configured as shown in order to use SPI Mode.

TABLE 2-2: SPI MODE JUMPER CONFIGURATION

Jumper	Short Pins
J1	1,2

TABLE 2-3: SPI MODE SWITCH CONFIGURATION

Switch	Short Pins	Knob Position
SW2	1-2, 4-5	Right Side

2.6.1.1.2 DIGIO Mode

For simple modules without microcontrollers, the LAN9252 can operate in Digital IO mode where 16 digital signals can be controlled or monitored by the EtherCAT master. Six control signals are also provided.

The jumper detailed in [Table 2-4](#) and switch detailed in [Table 2-5](#) should be configured as shown in order to use DIGIO Mode.

TABLE 2-4: DIGIO MODE JUMPER CONFIGURATION

Jumper	Short Pins
J1	2,3

TABLE 2-5: DIGIO MODE SWITCH CONFIGURATION

Switch	Short Pins	Knob Position
SW2	2-3, 5-6	Left Side

2.6.1.2 EVB-LAN9252-ADD-ON SOFTWARE CONFIGURATION

To configure the LAN9252 in SPI/DIGIO mode, the appropriate binary files (ESI files) must be programmed into the LAN9252 configuration EEPROM.

The LAN9252 configures itself to the desired mode by reading the strap settings located in EEPROM. The LAN9252 EEPROM is programmed and validated via the TwinCAT master tool. The programming procedure is as follows:

- Note 1:** This example utilizes the TwinCAT tool. Procedures may differ when using other EtherCAT master tools.
- 2:** Ensure the system network properties are configured properly for the EtherCAT frames, Ethernet cable linking your system, and EtherCAT slave board.

Board Details & Configuration

1. Load the corresponding EtherCAT Slave Information (ESI) file in the directory path “C:\TwinCAT\Io\EtherCAT” and select the appropriate ESI file. For this demo, the ESI file for the SPI Mode is used.
2. If TwinCAT installed successfully, a TwinCAT icon will be displayed in the bottom right corner of the desktop. After clicking the icon, a pop-up list will display. Select “System Manager,” as displayed in [Figure 2-3](#).

FIGURE 2-3: TWINCAT SYSTEM MANAGER

3. If any devices are present, delete them accordingly by clicking the device and selecting “Delete Device”, as displayed in [Figure 2-4](#).

FIGURE 2-4: TWINCAT DELETE DEVICE

4. Scan for EtherCAT slave devices by clicking "I/O devices" and selecting "Scan Devices", as displayed in [Figure 2-5](#).

FIGURE 2-5: TWINCAT SCAN DEVICES

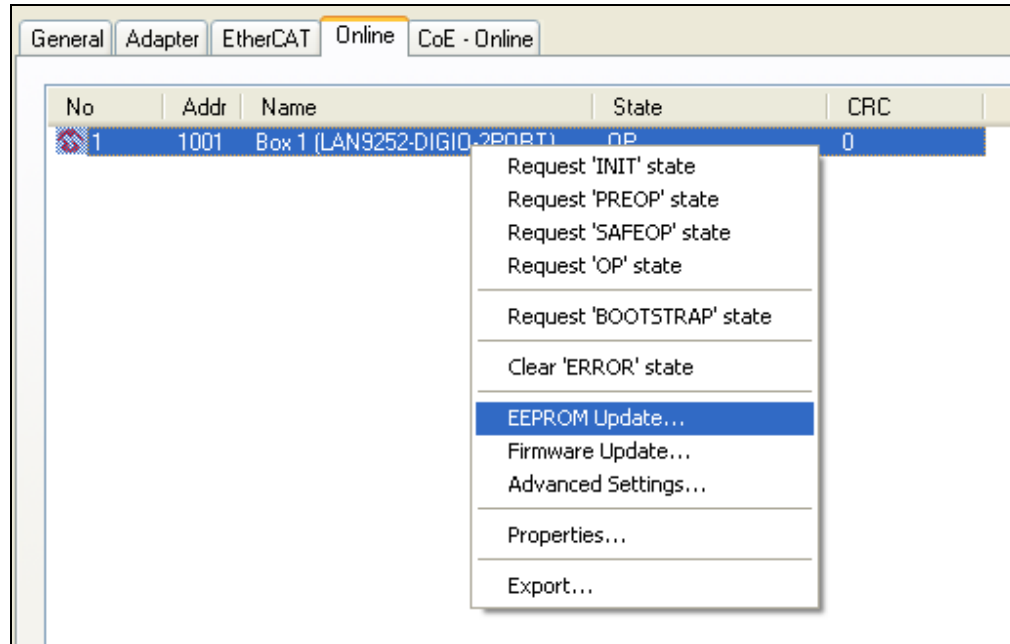

5. After scanning is complete, the right panel of the TwinCAT window will appear as displayed in [Figure 2-6](#).

FIGURE 2-6: TWINCAT DEVICE LIST

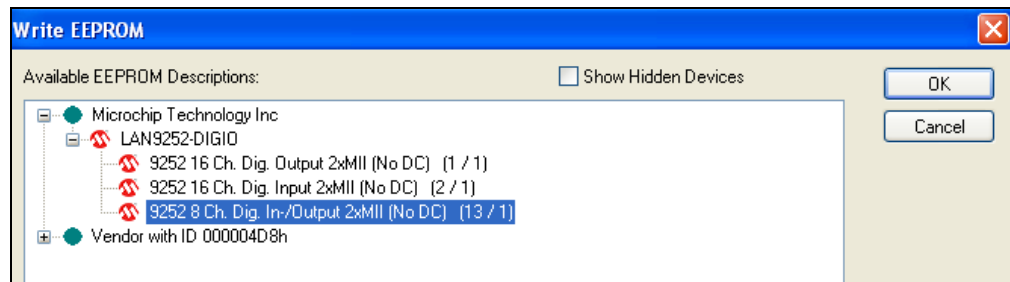

6. After a successful scan, click the “Device 2 (EtherCAT)” drop-down bar on the left panel of the TwinCAT tool (as highlighted in [Figure 2-5](#)). Then click the “Online” tab on the right-side panel of the TwinCAT tool, as displayed in [Figure 2-6](#). Right-click the LAN9252 listing and select “EEPROM Update” from the contextual menu as displayed in [Figure 2-7](#).

FIGURE 2-7: TWINCAT EEPROM UPDATE

7. Upon selecting “EEPROM Update”, the Write EEPROM window will open. Click the “OK” button to initiate EEPROM programming as displayed in [Figure 2-8](#).

FIGURE 2-8: TWINCAT WRITE EEPROM

Board Details & Configuration

2.6.2 Configuring PDI Selection on the Beckhoff EL9800

Selection of the different PDIs on the EL9800 takes place using a rotary selector in the PDI-Selection Area. Based on the four physical PDIs, eight logical PDIs are selectable over the PDI-Selector. The selector positions listed in [Table 2-6](#) activate the corresponding PDI.

TABLE 2-6: BECKHOFF EL9800 SELECTOR POSITIONS

Position	Process Data Interface
0	OFF
1	8/16 Bit Microcontroller Interface
2	32-Bit Digital interface - 32 Inputs
3	32-Bit Digital interface - 32 Outputs
4	32-Bit Digital interface - 16 Inputs / 16 Outputs
5	32-Bit Digital interface - 24 Inputs / 8 Outputs
6	32-Bit Digital interface - 8 Inputs / 24 Outputs
7	PIC (SPI)
8	SPI

Note: The Selector Position must be changed to Position 6 to select DIGIO -8 Ch.Dig IN-/OUT Test by Default.

[Microchip:](#)

[EVB-LAN9252-ADD-ON](#)

Данный компонент на территории Российской Федерации

Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
