

RoHS  **SL1411A Series Two-terminal Gas Plasma Arrester**

### Description

The Greentube™ SL1411A (Delta) Series Gas Plasma Arrester (improved gas discharge tube (GDT)) features a high-performance transient voltage suppressor designed for heavy-duty protection of telecom and industrial equipment.

The Delta range provides high levels of protection against fast rising transients measuring 100V/μs to 1kV/μs and is usually caused by lightning disturbances.

The high surge rating of these devices makes them ideal for arduous service conditions and Outside Plant locations.

The Delta range also features ultra low capacitance (typically 1 pF or less) and optimized internal geometry which provides low insertion loss at high frequencies, so are ideal for the protection of broadband equipment.
