

# 0.01 GHz to 10 GHz Low Noise Amplifier

Enhanced Product

**HMC8411TCPZ-EP**

## FEATURES

Low noise figure: 1.7 dB typical  
Single positive supply (self biased)  
High gain: 15.5 dB typical  
High OIP3: 34 dBm typical  
6-lead, 2 mm × 2 mm LFCSP

## ENHANCED PRODUCT FEATURES

Supports defense and aerospace applications (AQEC standard)  
Military temperature range (−55°C to +125°C)  
Controlled manufacturing baseline  
1 assembly/test site  
1 fabrication site  
Product change notification  
Qualification data available on request

## APPLICATIONS

Test instrumentation  
Military communications

## GENERAL DESCRIPTION

The HMC8411TCPZ-EP is a gallium arsenide (GaAs), monolithic microwave integrated circuit (MMIC), pseudomorphic high electron mobility transistor (pHEMT), low noise wideband amplifier that operates from 0.01 GHz to 10 GHz.

The HMC8411TCPZ-EP provides a typical gain of 15.5 dB, a 1.7 dB typical noise figure, and a typical output third-order intercept (OIP3) of 34 dBm, requiring only 55 mA from a 5 V supply voltage. The saturated output power ( $P_{SAT}$ ) of 19.5 dBm typical enables the low noise amplifier (LNA) to function as a local oscillator (LO) driver for many of Analog Devices, Inc., balanced, in-phase/quadrature (I/Q), or image rejection mixers.

## FUNCTIONAL BLOCK DIAGRAM

Figure 1.

The HMC8411TCPZ-EP also features inputs and outputs that are internally matched to 50  $\Omega$ , making the device ideal for surface-mounted technology (SMT)-based, high capacity microwave radio applications.

The HMC8411TCPZ-EP is housed in a RoHS compliant, 2 mm × 2 mm, 6-lead LFCSP.

Multifunction pin names may be referenced by their relevant function only.

Additional application and technical information can be found in the [HMC8411LP2FE](#) data sheet.

## ABSOLUTE MAXIMUM RATINGS

Table 4.

| Parameter <sup>1</sup>                                                   | Rating                 |
|--------------------------------------------------------------------------|------------------------|
| Drain Bias Voltage ( $V_{DD}$ )                                          | 7 V                    |
| Radio Frequency Input ( $RF_{IN}$ ) Power                                | 20 dBm                 |
| Channel Temperature                                                      | 175°C                  |
| Continuous Power Dissipation, $P_{DISS}$ <sup>2</sup>                    |                        |
| $T_{CASE} = 85^{\circ}\text{C}$                                          | 1.098 W                |
| $T_{CASE} = 125^{\circ}\text{C}$                                         | 0.61 W                 |
| Storage Temperature Range                                                | -65°C to +150°C        |
| Operating Temperature Range                                              | -55°C to +125°C        |
| Peak Reflow Temperature Moisture Sensitivity Level 1 (MSL1) <sup>3</sup> | 260°C                  |
| Electrostatic Discharge (ESD) Sensitivity Human Body Model (HBM)         | 500 V, Class 1B passed |

<sup>1</sup> When referring to a single function of a multifunction pin in the parameters, only the portion of the pin name that is relevant to the specification is listed. For full pin names of multifunction pins, refer to the Pin Configuration and Function Descriptions section.

<sup>2</sup> For maximum power dissipation vs. case temperature, see Figure 2.

<sup>3</sup> See the Ordering Guide section for more information.

Stresses at or above those listed under Absolute Maximum Ratings may cause permanent damage to the product. This is a stress rating only; functional operation of the product at these or any other conditions above those indicated in the operational section of this specification is not implied. Operation beyond the maximum operating conditions for extended periods may affect product reliability.

## THERMAL RESISTANCE

Thermal performance is directly linked to printed circuit board (PCB) design and operating environment. Close attention to PCB thermal design is required.

$\theta_{JC}$  is the junction to case thermal resistance.

Table 5. Thermal Resistance

| Package Type | $\theta_{JC}$ | Unit |
|--------------|---------------|------|
| CP-6-12      | 82            | °C/W |

## POWER DERATING CURVES

Figure 2 shows the maximum power dissipation vs. case temperature.

Figure 2. Maximum Power Dissipation vs. Case Temperature

## ESD CAUTION

**ESD (electrostatic discharge) sensitive device.** Charged devices and circuit boards can discharge without detection. Although this product features patented or proprietary protection circuitry, damage may occur on devices subjected to high energy ESD. Therefore, proper ESD precautions should be taken to avoid performance degradation or loss of functionality.

PIN CONFIGURATION AND FUNCTION DESCRIPTIONS

Figure 3. Pin Configuration

Table 6. Pin Function Descriptions

| Pin No. | Mnemonic                           | Description                                                                                                                                                                                                                                                                  |
|---------|------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1       | R <sub>BIAS</sub>                  | Current Mirror Bias Resistor Pin. Use this pin to set the current to the internal resistor by the external resistor. See Figure 4 for the interface schematic.                                                                                                               |
| 2       | RF <sub>IN</sub>                   | RF Input. This pin is ac-coupled and matched to 50 Ω. See Figure 5 for the interface schematic.                                                                                                                                                                              |
| 3, 4    | NIC                                | Not Internally Connected. This pin is not connected internally. This pin must be connected to the RF and dc ground.                                                                                                                                                          |
| 5       | RF <sub>OUT</sub> /V <sub>DD</sub> | Radio Frequency Output (RF <sub>OUT</sub> ). This pin is ac-coupled and matched to 50 Ω. See Figure 6 for the interface schematic.<br>Drain Bias for the Amplifier (V <sub>DD</sub> ). This pin is ac-coupled and matched to 50 Ω. See Figure 6 for the interface schematic. |
| 6       | GND<br>EPAD                        | Ground. This pin must be connected to the RF and dc ground. See Figure 7 for the interface schematic.<br>Exposed Pad. The exposed pad must be connected to RF and dc ground.                                                                                                 |

(CP-6-12)

Dimensions shown in millimeters

## ORDERING GUIDE

| Model <sup>1</sup> | Temperature Range | MSL Rating <sup>2</sup> | Package Description <sup>3</sup>             | Package Option |
|--------------------|-------------------|-------------------------|----------------------------------------------|----------------|
| HMC8411TCPZ-EP-PT  | −55°C to +125°C   | MSL1                    | 6-Lead Lead Frame Chip Scale Package [LFCSP] | CP-6-12        |
| HMC8411TCPZ-EP-R7  | −55°C to +125°C   | MSL1                    | 6-Lead Lead Frame Chip Scale Package [LFCSP] | CP-6-12        |

<sup>1</sup> The HMC8411TCPZ-EP-PT and HMC8411TCPZ-EP-R7 are RoHS compliant parts.

<sup>2</sup> See the Absolute Maximum Ratings section for additional information.

<sup>3</sup> The lead finish of the HMC8411TCPZ-EP-PT and HMC8411TCPZ-EP-R7 is nickel palladium gold (NiPdAu).

## Данный компонент на территории Российской Федерации

**Вы можете приобрести в компании MosChip.**

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
