853 Series

EN2997/ESC Qualified - Fire Wall Connectors

Applications

Benefits

High temperature firewall connector

- Resist up to 260°C (500°F)
- Flame test per EN 2591

Excellent corrosion performances

- Up to 500 hours salt spray

Upgraded vibration performances

- Self locking coupling mechanism to resist the highest vibration performances

EMI & Lightning Resistance

- Protection of the signal thanks to:
 - . EMI grounding ring
 - . shell to shell bottoming
 - . 360° rear accessory teeth

Qualified per ASD Cert EN2997 and Rolls Royce ESC Standards

MIL-83723 Series III based design, including additional features to respond to today's aircraft's harshest needs.

853 Series

EN2997/ESC Qualified - Fire Wall Connectors

Product overview

8533 Hermetic version

See page 24

- For hermetic interface or space constrained application.
- Leak rate $< 10^{-9}$ atm.cm³/s.
- Solder cup & PC Tail contacts.

8533 Quadrax / 8533 Power

See page 30

- Quadrax contacts for high speed ethernet network.
- Power contacts for high power current under temperature and vibration constraints.
- ABS qualified solution.

8533 Standard version

See page 14

8534 Scoop Proof

See page 34

- For blind mate connection.
- ESC11 qualified.

8535/8536 integrated backshell

See page 38

- For weight saving solutions.
- ESC15 and ESC16 qualified.

Heat shrink boot
EMI braid
Integrated backshell
Clamp collar

8533 Series

Standard Version

Description

- **Stainless steel screw coupling** connector derived from MIL-C-83723 & designed for use in aviation **harsh environments**:
 - . high vibration resistance
 - . high temperature resistance (up to 260°C)
 - . Fireproof (1100°C)
- **Qualified** to AECMA **EN2997** standard and to Rolls Royce **ESC10** standard
- Large array of crimp contacts, **EN3155** and **ESC30** qualified:
 - . size 12, 16 & 20 standard contacts
 - . size 12, 16 & 20 thermocouple contacts for temperature measurement
- **Fuel immersion** version available

Technical features

Mechanical

- **Shell:**
 - . aluminum alloy (class R, W and A)
 - . stainless steel (class K and E)
- **Plating:**
 - . nickel (class R)
 - . olive green cadmium (class W)
 - . black anodized (class A)
 - . passivated (class K and E)
- **Grommet and seal:**
 - . silicone elastomer
- **Insulator:**
 - . thermoplastic
- **Contact body:**
 - . copper alloy
- **Contact plating:**
 - . gold over nickel
- **Contact retention:**
 - . size 20: 90 N
 - . size 16: 110 N
 - . size 12: 130 N
- **Mating cycles:**
 - . 250 mating cycles (class R and W)
 - . 500 mating cycles (class K and E)
- **Shock:**
 - . 300 m/s² (30g) during 3 ms
- **Vibration:**
 - . random 5 Hz to 2000 Hz at 1G²/Hz (2 x 8 hours)

Electrical

- **Dielectric withstanding:**

Altitude	Service I
Sea level	1500 Vrms
15 000 m	600 Vrms
21 000 m	400 Vrms
33 000 m	200 Vrms

- **Contact resistance:**
 - . initial contact resistance at ambient temperature as per EN 2997 and EN3155

Contacts size	20	16	12
Resistance mΩ	7.3	3.8	3.5

- **Insulation resistance:**
 - . 5000 MΩ at 500 Vdc

- **Max current rating per contact:**

Contacts size	20	16	12
Rating (A)	7.5	13	23

- **Electrical continuity:**
 - . 5 mΩ max with RFI shielding
 - . 60 mΩ without RFI shielding

- **Shielding:**
 - . to 100 MHz at 1 GHz attenuation 65 dB

- **Lightning strike (3K & 3E classes):**
 - . 15A according D0160, wave 5A

Environmental

- **Operating temperature:**
 - . class W: -65° to +175°C (-149° to +347°F)
 - . class R, A and K: -65° to +200°C (-149° to +392°F)
 - . class E: -65° to +260°C (-149° to +500°F)
 - . fuel tank long term immersion version specification 22 limited to +105°C max
- **Leakage:**
 - . as per 2591-312:
 - Method B differential pressure: 100kPa
 - Maximum leakage flow: 16x10⁻⁶ m³/h
- **Salt spray:**
 - . 48 hours (class R)
 - . 500 hours (class W, K, E and A)
- **Resistance to fluids:**
 - . MIL-H 5606 - SKYDROL 500 B4 - LD4 - JP5 - MIL-L 7870A - MIL-L 23699 - MIL- L 7808 - MIL-C 25769 - MIL-A 8243
- **Fire resistance:**
 - . as per EN 2591-318:
 - 6 min under a 1100°C flame without electrical perturbation, plus 14 min with no flame propagation (ES class)

Fuel resistance

- **Standard version:**
 - . as per EN2997
- **Long term immersion (specification 22):**
 - . as per PrEN3645 3 cycles of 96 hours in fuel

Orientation

Orientation

A technical diagram showing the front face view of a plug. It features a circular plug with a central point and four radial lines extending to the outer edge, labeled A°, B°, C°, and D°. A dashed vertical line is labeled N at the top. A curved arrow on the left side points towards the center and is labeled 'Master Key'. The plug has a flange with four mounting points.

8533 Series

Hermetic Connectors

Description

- Glass sealed hermetic:
 - . high hermeticity performance
 - . compact low profile
- Robust screw coupling according to EN 2997 and ESC10 standards
- Various mounting styles:
 - . compact solder mount receptacle
 - . easy to fix square flange receptacle
 - . easy to replace jam nut receptacle
- Signal and power solder cup contacts
- PCB contact version available
- Special fuel tank versions
- 230V qualified versions where higher voltage is used to reduce cable weight

Applications

All purposes in severe climatic environments and high temperature, engine area, civil and military aircrafts, pressure and temperature sensors.

Technical features

Mechanical

- **Shell:**
 - . Passivated Stainless steel
- **Seals:**
 - . Silicone elastomer
- **Contact:**
 - . Ferrous alloy
- **Contact plating:**
 - . Gold
- **Shock:**
 - . 300 m/s² (30g) during 3 ms
- **Endurance:**
 - . 500 mating/unmating operations
- **Vibration:**
 - . Random 5 Hz to 2000 Hz at 1G²/Hz (2 x 8 hours)

Electrical

- **Max current rating per contact:**

Contact size	20	16	12	6	4
Rating (A)	5	10	17	46	60

- **Dielectric withstanding voltage:**

Altitude	Service I
Sea level	1500 Vrms
15 000 m	600 Vrms
21 000 m	400 Vrms
33 000 m	200 Vrms

- **Contact resistance at rated current:**
 - . Maximum initial contact resistance at ambient temperature

Contact size	20	16	12	6	4
Resistance mΩ	12	8.5	5	2	2

Environmental

- **Operating temperature:**
 - . Class Y : -65°C to 200°C
 - . Class YE : -65°C to 260°C cyclic
- **Hermeticity:**
 - . Leak rate up to <10⁻⁷ atm.cm³/s (helium gas test)
- **Damp heat:**
 - . As per EN 2997 and NFL 54143: 10 cycles of 24h
- **Salt spray:**
 - . 500 hours
- **Resistance to fluids:**
 - . MIL-H 5606 - SKYDROL 500 B4 - LD4 - JP5 - MIL-L 7870A - MIL-L 23699 - MIL- L 7808 - MIL-C 25769 - MIL-A 8243
- **Fuel immersion version:**
 - . 105°C max
 - . As per PrEN3645

8533 Series

Power & Quadrax Series

Description

- The utmost solution to combine **high vibrations**, **high temperatures** and **high power supply**: up to 80 Amps continuous rating at 260°C ambient temperature with a 20% space-savings compared with other solutions.
- Two contact sizes - size 6 and size 4 - as well as the possibility to use directly **quadrax contacts** in size 6 cavities layouts.
- Standard strain relief backshell or spacer accessory to adapt any specific backshell.
- Airbus ABS 1340-1343, 1426-1427, 1452 qualified.
- **Hermetic** versions available for through bulkhead applications.
- **Grounded insert** option for optimized quadrax performance.

Applications

- Electro mechanical actuator power supply, alternator, starter applications.

Technical features

Mechanical

- **Shell:**
 - . nickel plated aluminum (R class),
 - . passivated stainless steel (E class).
- **Grommet and seal:**
 - . silicone elastomer.
- **Insulator:**
 - . thermoplastic.
- **Contact body:**
 - . copper alloy.
- **Contact plating:**
 - . gold over nickel.
- **Contact retention:**
 - . Size 4: 200N
 - . Size 6: 156 N
- **Endurance:**
 - . 500 mating / unmating operation.
- **Vibration & shock:**
 - . according to EN 2997.

Electrical

- **Dielectric withstanding:**

Altitude	Service
Sea level	1500 Vrms
15 000 m	600 Vrms
21 000 m	400 Vrms
33 000 m	200 Vrms

- **Insulation Resistance:**
 - . 5000 M Ω under 500 Vdc.

- **Max current rating per contact:**

Contacts size	6	4
Rating (A)	60	80

- **Contact resistance:**
 - . Initial < 0.4 m Ω .
- **Electrical continuity:**
 - . 5m Ω with RFI shielding.
- **Shielding:**
 - . to 100 MHz at 1 GHz attenuation 65 dB.

Environmental

- **Temperature range:**
 - . -60°C +200°C R class,
 - . -60°C +260°C E class & #6 contact only.
- **Leakage:**
 - . as per 2591-312:
 - Method B differential pressure: 100kPa
 - Maximum leakage flow: 16x10⁻⁶ m³/h
- **Salt Spray:**
 - . 48 hours (R class),
 - . 500 hours (E class).
- **Fire resistance:**
 - . as per EN 2591-318:
 - 6 min under a 1100°C flame without electrical perturbation, plus 14 min with no flame propagation (ES class).
- **Resistance to fluids:**
 - . MIL-H 5606 - SKYDROL 500 B4 - LD4 - JP5 - MIL-L 7870A - MIL-L 23699 - MIL- L 7808 - MIL-C 25769 - MIL-A 8243

Scoop Proof Fire Wall Connectors

Description

- **Stainless steel screw coupling connector designed for use in aviation engine harsh environments:**
 - . high vibration resistant
 - . high temperature resistant (260° C)
 - . fire proof (1100° C)
- **Scoop proof design to enable blind mating.**
- **Qualified to Rolls-Royce ESC11 standard, and per PrEN4067 standard project.**
- **Fully interchangeable and intermateable with ESC16 / 8536 connectors (integrated backshell version).**
- **Large array of crimp contact:**
 - . (same as for 8533 Series)
 - . standard size 12, 16 and 20 contacts
 - . thermocouple size 12, 16 and 20 contacts
- **Fuel tank version available upon request.**

Technical features

Mechanical

8535/8536 Series

Integrated Backshell Connectors

Description

- **Stainless steel screw coupling connector designed for use in aviation engine harsh environments:**
 - High vibration resistance
 - High temperature resistance (260° C)
 - Fire proof (1100° C)
- **Integrated backshell for compact and light weight applications, with the possibility to have a full scoop proof connection (8536 Series / ESC16 Series).**
- **Qualified to Rolls-Royce ESC15 (8535 Series) and ESC16 (8536 Series) standard, and per the on going new EN2997 issue.**
- **Fully interchangeable and intermateable:**
 - 8535 Series with BACC 63 CM-CN, EN2997, MIL-C-83723 Series III & ESC10 connectors
 - 8536 Series with ESC11 connectors
- **Large array of crimp contacts:** (same as for 8533 Series)
 - Standard size 12, 16 and 20 contacts
 - Thermocouple size 12, 16 and 20 contacts

Technical features

Mechanical

- **Shell:**
 - . Passivated stainless steel.
- **Grommet and seal:**
 - . Silicone elastomer.
- **Insulator:**
 - . Thermoplastic.
- **Contact body:**
 - . Copper Alloy.
- **Contact plating:**
 - . Gold Over Nickel.
- **Contact retention:**
 - . Size 20: 90 N
 - . Size 16: 111 N
 - . Size 12: 133 N
- **Mating cycles:**
 - . 500 mating / unmating operation.
- **Vibration & shock:**
 - . According to JES290-083: 41 grms, 2x 8 hours (ES class)
 - . According to JES290-102: 35 grms, 60 hours (KV class)

Electrical

- **Dielectric withstanding:**

Altitude	Service
Alt ground	1500 Vrms
15 000 m	600 Vrms
21 000 m	400 Vrms
33 000 m	200 Vrms

- **Insulation Resistance:**
 - . 5000 MΩ at 500 Vdc.
- **Max current rating per contact:**
 - . Size 20: 7.5 A
 - . Size 16: 13 A
 - . Size 12: 23 A
- **Contact resistance:**
 - . 1 mΩ.
- **Electrical continuity:**
 - . 5mΩ with RFI shielding.
- **Shielding:**
 - . to 100 MHz at 1 GHz attenuation 65 dB.

Environmental

- **Temperature range:**
 - . - 60°C +260°C
- **Leakage:**
 - . as per 2591-312:
 - Method B differential pressure: 100kPa
 - Maximum leakage flow: 16x10⁻⁶ m³/h
- **Salt Spray:**
 - . 500 hours.
- **Fire resistance:**
 - . as per EN 2591-318:
 - 6 min under a 1100°C flame without electrical perturbation, plus 14 min with no flame propagation (ES class).
- **Resistance to fluids:**
 - . MIL-H 5606 - SKYDROL 500 B4 - LD4 - JP5 - MIL-L 7870A - MIL-L 23699 - MIL- L 7808 - MIL-C 25769 - MIL-A 8243

853 Series

Common Section

Introduction

- Souriau's fire wall contacts offering covers a **wide range** of performances within the scope of **high temperatures** and **high vibrations** constraints.
- Each type has been qualified and validated by either major qualification organizations or major aerospace users:
 - Size 12, 16 & 20 signal contacts:
EN3155 and ESC30 qualified
 - Size 12, 16 & 20 thermocouple contacts:
EN3155 and ESC30 qualified
- Souriau also provides any tool or accessory that are necessary either for harnessing (crimping tool, insertion and extraction tool,...) or for test benches (dummy receptacles,...)

853 Series

EN2997/ESC Qualified - Fire Wall Connectors

Range Extension

■ 230V connector	64
■ Filtered connectors	64
■ Power contacts for PCB	65
■ Hermetic connector with removeable contacts	65

853 Series

EN2997/ESC Qualified - Fire Wall Connectors

Products Range Extension

230V connector

The use of higher voltage to reduce cable weight has lead to the development of double voltage in un-pressurized connectors.

Robust design and materials:

- . ensuring that in un-pressurized areas no partial discharge will weaken the connector.
- . each production batch is tested to ensure performance to this high level.

No possible mismatch:

- . specific T and V clocking to avoid mating with a non 230V qualified counterpart.

Flexible offering:

- . available in standard watertight as well as in hermetic connectors.
- . available in composite and stainless steel shells.

See «8533 Series 230V Connector» product news on www.souriau.com

Filtered connectors

Protection of sensitive electronic components inside the equipment against any EMI or lightning interference as well as protection of signal integrity.

Signal Integrity principles - EMI/RFI Filter:

- . Protection of sensitive electronic components inside equipment.
- . Signal integrity (incoming data noise free / prevents noise exiting the equipment).

Space/weight/time saving:

- . Less electronics inside the equipment.
- . Filtered receptacle are generally standard length.

Excellent performances/reliability adapted to Mil-aero environments:

- . Insertion loss (attenuation) to -80dB at critical frequencies.
- . Filter ideally positioned at system entry point.
- . Tested as per MIL-STD-220.

A complete solution: Optional TVS functionality, Hermetic version available, 100 % ITAR free solution if required.

853 Series

EN2997/ESC Qualified - Fire Wall Connectors

Products Range Extension

Power Contacts for PCB

Firewall connector for power supply, adapted to PCB solutions.

Safe & Quick Avoid soldering of contacts:

- . No heat applied: no risk of damaging the connector.
- . Quicker fit in the equipment.

Robust:

- . True mechanical link between PCB and contacts: no additional double flange needed. Power contacts are attached directly to the board with screws for an optimized connection.
- . Available in size 6 contact (Ø4.6mm) & size 4 contact (Ø5.74mm).

Compact:

- . Tapped contacts for direct and small sized connections, especially compared to standard lugs.

See «EN2997 Series Power Contacts for PCB» product news on www.souriau.com

Hermetic Connector with Removeable Contacts

Extension of the fuel immersion range

High hermeticity performance:

- . Glass to metal sealing: leakage of less than 10^{-9} atm.cm³/s.

Removeable crimp contacts:

- . A technology combining crimp contacts with glass beads
- . RoHS: no lead used.
- . Long lifetime: superior to solder cup contacts in kerosene immersion.
- . Easy MRO: contact replacement.

Long term fuel immersion materials:

- . Performances guaranteed for minimum 90,000 hours in fuel immersion.

Wide Availability:

- . EN3646 (Airbus Qualified Products).
- . EN2997, EN3645, MIL-DTL-38999.

See «MIL-DTL-38999, EN3646, EN2997 Fuel Tank Connector» product news on www.souriau.com

Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009

Офис по работе с юридическими лицами:
