K-Type Cable Markers

K-Type markers are used to identify wire bundles, cables, pipes and conduits. The oval shaped profile has been designed to allow markers to be accurately positioned onto a carrier strip. The marker and carrier strip assembly is attached to the substrate using cable ties. K-Type markers are ideal for post termination applications or where retrofitting is required.

Markers are supplied as internationally color coded yellow with pre-printed black legends. K-Type markers come in one standard size to fit carrier strips that can hold from 7 to 18 markers and are made from a plasticized PVC material. Suitable for industrial applications.
