

# EVALUATION BOARD for WYSBMVGXB (WBSBMVGXB-1)

**This evaluation board is an object for experiment of operation, and does not guarantee quality. Moreover, the conditions of a module of operation is not recommended in the schematic, the parts, the software, etc. currently used for evaluation board.**

The **Bluetooth**<sup>®</sup> word mark and logos are owned by the **Bluetooth** SIG, Inc. and any use of such marks by TAIYO YUDEN CO., LTD. is under license.

29-Jul. 2011> Ver.1.00

## Introduction

This evaluation board is developed for communication test of **WLAN and Bluetooth® (FM)** module which TAIYO YUDEN develops and sells.

This evaluation board makes it possible to perform easily the communication test of **WLAN and Bluetooth® (FM)** module of TAIYO YUDEN.

## Mounted module

- WBSBMVGXB (2.4GHz / 5GHz dual band WLAN 11a/b/g/n ,BT, (FM))

Note\* FM function is not available. Please let us know if you use FM function.

## Accessories

1	DC power supply cable	1 piece
---	-----------------------	---------

Example of connection

\*RF probe : MM126036(MURATA) / MXHS83QE3000(MURATA) / MXHS83QH3000(MURATA) or equivalent

## Operating procedure:

- (1) Supply 5.0V DC to the evaluation board.
- (2) Insert the evaluation board to the host PC's SDIO slot.
- (3) Insert USB mini cable to evaluation board and HOST PC if you use UART interface to control Bluetooth or (FM) function
- (4) Execute the application software on host PC.

**(If you fail to follow the right order, the Evaluation Board will not work.)**

## Notes:

- (1) This Evaluation Board supports USB I/F and SDIO I/F. USB-UART converter is built in the board. USB-UART converter is FT232R made by Future Technology Devices International Limited. Download USB driver from following URL.

<http://www.ftdichip.com/Support/Knowledgebase/index.html>

- (2) This Evaluation Board is only used for RF evaluation.

## Hardware Recommendations

### **HOST PC Specifications;**

CPU : 1000MHz or higher

RAM: 500MB or more

I/F : USB, SDIO

For example : IBM Think Pad X40 / IBM Think Pad X60,X61

Note : If you use host PC with Windows XP, Service pack 3 is required.

### **DC POWER SUPPLY Specifications;**

Input voltage is 3.6 – 5.5V. Current Limit setting should be more than 1A.

## Software

- Application software for module evaluation is packaged into CD-ROM.
- Usage of 88W8787 application software and the way to install the 88W8787 driver are described in the manuals.

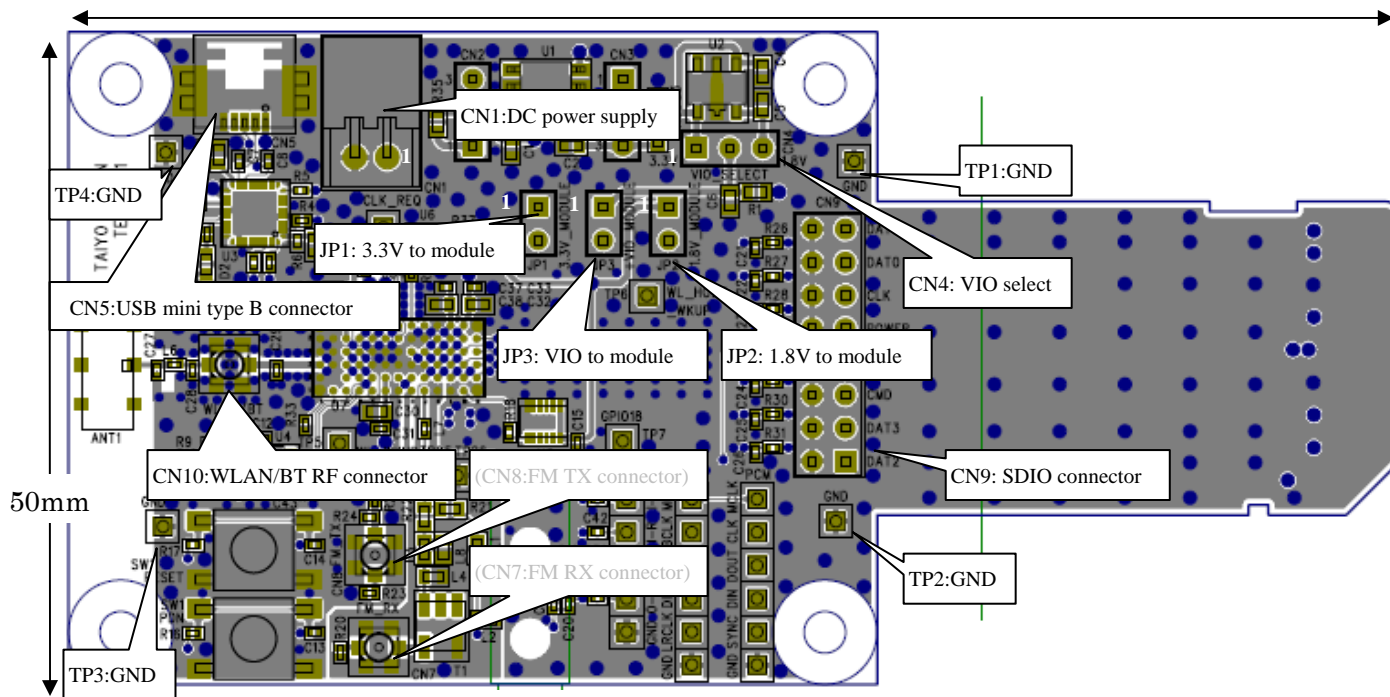

# WBSBMVGXB-1

& Tentative

## Evaluation board layout

Board size : 102 mm x 50 mm

102mm

Pin description of evaluation board

JP1: 3.3V to module

No.	Pin name	Direction	Description
1		Output	3.3V output
2		input	3.3V input to the module

JP2: 1.8V to module

No.	Pin name	Direction	Description
1		Output	1.8V LDO output
2		input	1.8V input to the module

JP3: VIO to module

No.	Pin name	Direction	Description
1		Output	3.3V or 1.8V output
2		input	VIO Input to the module

CN1: DC Power Supply

No.	Pin name	Direction	Description
1	5V	Input	3.6 to 5.5V DC Power input.
2	GND	-	VIO Input to the module

CN4: VIO select (1.8V / 3.3V)

No.	Pin name	Direction	Description
1		Output	3.3V power rail
2		Input	Input power to VIO
3		Output	1.8V power rail

Note: VIO input voltage level should be same as HOST computer's IO voltage. According to the host, you need to adjust VIO input voltage level. (If you use Windows PC, VIO input setting is 3.3V normally.)

CN5: USB mini type B connector

No.	Pin name	Direction	Description
1	VBUS	Input	USB power from host
2	D-	Input/Output	USB data line minus
3	D+	Input/Output	USB data line plus
4	ID	-	-
5	GND	-	Ground

**WBSBMVGXB-1**TAIYO YUDEN Confidential  
& Tentative

## CN9:SDIO connector

No.	Pin name	Direction	Description
1	SD_DATA2	Input/Output	SDIO Data Line 2
2	GND	-	Ground
3	SD_DATA3	Input/Output	SDIO Data Line 3
4	GND	-	Ground
5	SD_CMD	Input/Output	SDIO COMMAND
6	GND	-	Ground
7	GND	-	Ground
8	GND	-	Ground
9	SDIO_POWER	Output	SDIO Power from host
10	GND	-	Ground
11	SD_CLK	Input	SDIO Clock
12	GND	-	Ground
13	SD_DATA0	Input/Output	SDIO Data Line 0
14	GND	-	Ground
15	SD_DATA1	Input/Output	SDIO Data Line 1
16	GND	-	Ground

## (CN7:FM\_RX connector)

Pin name	Direction	Description
FM_RX*	Input	FM_RX Radio In

## (CN8:FM\_TX connector)

Pin name	Direction	Description
FM_TX*	Output	FM_TX Radio Out

## CN10:WLAN/BT RF connector

Pin name	Direction	Description
WLAN BT*	Output/Input	WLAN BT Radio Out

\*You need to connect RF probe listed below when you measure the RF characteristics.

Recommended RF probe ;

MM126036(MURATA) / MXHS83QE3000(MURATA) / MXHS83QH3000(MURATA) or equivalent

\*Note: FM function is not available. Please let us know if you use FM function.

### Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
