

## Description

IS31IO7326 is a 64 key, key-scan controller. It offloads the burden of keyboard scanning from the host processor. The IS31IO7326 supports keypad matrix of up to 8x8. Key press and release events are encoded into a byte format and loaded into a key event register for retrieval by the host processor.

To minimize power, the IS31IO7326 automatically enters a low power standby mode when there is no keypad, I/O, or host activity.

## Features

- Supply voltage range from 3.0V to 5.5V
- 400kHz I<sup>2</sup>C serial interface
- Available for multi-key press detect
- Low 0.3μA (typ.) standby current
- Operate in -40°C to +125°C
- Pb-free 4mm x 4mm QFN-24 package

## Quick Start

## Evaluation Board Ordering Information

Part No.	IC Package
IS31IO7326-QFLS4-EB	QFN-24, Lead-free

Table1: Ordering Information

**For pricing, delivery, and ordering information, please contact ISSI's analog marketing team at [analog\\_mkt@issi.com](mailto:analog_mkt@issi.com) or (408) 969-6600.**

## Recommended Equipment

- 5.0V, 2A power supply

## Absolute Maximum Ratings

- ≤ 5.5V power supply

**Caution: Do not exceed the conditions listed above, otherwise the board will be damaged.**

## Procedure

The IS31FL7326 evaluation board is fully assembled and tested. Follow the steps listed below to verify board operation.

**Caution: Do not turn on the power supply until all connections are completed.**

- 1) Connect the ground terminal of the power supply to the GND and the positive terminal to the VCC. Or connect the DC power to the connector (DC IN).
- 2) Turn on the power supply and pay attention to the supply current. If the current exceeds 200mA, please check for circuit fault.

## Evaluation Board Operation

K0 to K63 are push buttons on the demo board. When each of the button is pressed briefly, a number corresponding to the key will be displayed. When the button is pressed and held for a few seconds, the period dot will also be displayed. If two buttons are pressed at the same time, the corresponding key numbers will be displayed.

**Note:**

IS31I07326 solely controls the Key-Scan function on the evaluation board.

## Software support

**Note:**

JP1 is set to close circuit by default. If it is set to open, the on-board MCU will stop working. The pins driving the I2C pin from MCU will be set to High Impedance. External control signals can be connected to TP3 port to control the IS31I07326.

Refer to the datasheet to get more information about IS31I07326.

### Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
