## Document Revision History

| Revision | Date       | Description                    | Changed by |
|----------|------------|--------------------------------|------------|
| 0        | 11/19/2015 | Initial Release                | PB         |
| 1        | 1/11/2016  | Functions and Features Updated | PB         |

## Functions and Features

- 128 x 96 pixel resolution
- Built-in SSD1351 controller
- SPI MPU interface
- RoHS compliant
- microSD card reader (microSD card not included)
- Built-in logic level shifting for 3.3V ~ 5V operation

Mechanical Drawing

# Schematic

## Interface Description

### JP1 Interface:

| Pin No. | Symbol | External Connection | Function Description                                |
|---------|--------|---------------------|-----------------------------------------------------|
| 1       | MOSI   | MPU                 | Master Out Slave In                                 |
| 2       | SCK    | MPU                 | Serial Clock signal                                 |
| 3       | D/C    | MPU                 | Register Select signal. D/C=0: Command, D/C=1: Data |
| 4       | /RES   | MPU                 | Active LOW Reset signal                             |
| 5       | OLEDCS | MPU                 | OLED Active LOW Chip Select signal                  |
| 6       | SDCS   | MPU                 | Micro SD Active LOW Chip Select signal              |
| 7       | MISO   | MPU                 | Master In / Slave Out                               |
| 8       | NC     | -                   | No Connect                                          |
| 9       | NC     | -                   | No Connect                                          |
| 10      | VDD    | Power Supply        | Supply Voltage for OLED and logic (3.3V~5V)         |
| 11      | GND    | Power Supply        | Ground                                              |

### JP2 Interface:

| Shield Pin Symbol | Arduino UNO Pin Symbol | Function Description                   |
|-------------------|------------------------|----------------------------------------|
| AREF              | AREF                   | No Connect                             |
| GND               | GND                    | Ground                                 |
| Digital 13        | 13                     | Serial Clock signal                    |
| Digital 12        | 12                     | Master In / Slave Out                  |
| Digital 11        | 11                     | Master Out Slave In                    |
| Digital 10        | 10                     | Micro SD Active LOW Chip Select signal |
| Digital 9         | 9                      | No Connect                             |
| Digital 8         | 8                      | No Connect                             |

### JP3 Interface:

| Shield Pin Symbol | Arduino UNO Pin Symbol | Function Description                                |
|-------------------|------------------------|-----------------------------------------------------|
| Digital 7         | 7                      | No Connect                                          |
| Digital 6         | 6                      | Active LOW Reset signal                             |
| Digital 5         | 5                      | OLED Active LOW Chip Select signal                  |
| Digital 4         | 4                      | Register Select signal. D/C=0: Command, D/C=1: Data |
| Digital 3         | 3                      | No Connect                                          |
| Digital 2         | 2                      | No Connect                                          |
| Digital 1         | 1                      | No Connect                                          |
| Digital 0         | 0                      | No Connect                                          |

### JP4 Interface:

| Shield Pin Symbol | Arduino UNO Pin Symbol | Function Description |
|-------------------|------------------------|----------------------|
| Analog 5          | A5                     | No Connect           |
| Analog 4          | A4                     | No Connect           |
| Analog 3          | A3                     | No Connect           |
| Analog 2          | A2                     | No Connect           |
| Analog 1          | A1                     | No Connect           |
| Analog 0          | A0                     | No Connect           |

### JP5 Interface:

| Shield Pin Symbol | Arduino UNO Pin Symbol | Function Description                   |
|-------------------|------------------------|----------------------------------------|
| RST               | RESET                  | No Connect                             |
| 3V                | 3.3V                   | No Connect                             |
| 5V                | 5V                     | Supply Voltage for OLED and logic (5V) |
| GND               | GND                    | No Connect                             |
| GND               | GND                    | No Connect                             |
| Vin               | Vin                    | No Connect                             |

## Electrical Characteristics

| Item                        | Symbol | Condition    | Min.    | Typ. | Max.    | Unit |
|-----------------------------|--------|--------------|---------|------|---------|------|
| Operating Temperature Range | Top    | Absolute Max | -30     | -    | +70     | °C   |
| Storage Temperature Range   | Tst    | Absolute Max | -40     | -    | +80     | °C   |
|                             |        |              |         |      |         |      |
| Supply Voltage              | VDD    |              | 3.0     | 3.3  | 5.5     | V    |
| Supply Current              | IDD    |              | -       | 80   | 200     | mA   |
| "H" Level input             | Vih    |              | 0.8*VDD | -    | VDD     | V    |
| "L" Level input             | Vil    |              | 0       | -    | 0.2*VDD | V    |
| "H" Level output            | Voh    |              | 0.9*VDD | -    | VDD     | V    |
| "L" Level output            | Vol    |              | 0       | -    | 0.1*VDD | V    |

## Optical Characteristics

| Item                   | Symbol | Condition                                           | Min.   | Typ.   | Max. | Unit              |
|------------------------|--------|-----------------------------------------------------|--------|--------|------|-------------------|
| Viewing Angle – Top    |        |                                                     | 80     | -      | -    | °                 |
| Viewing Angle – Bottom |        |                                                     | 80     | -      | -    | °                 |
| Viewing Angle – Left   |        |                                                     | 80     | -      | -    | °                 |
| Viewing Angle – Right  |        |                                                     | 80     | -      | -    | °                 |
| Contrast Ratio         | Cr     |                                                     | -      | 2000:1 | -    | -                 |
| Response Time (rise)   | Tr     | -                                                   | -      | 10     | -    | us                |
| Response Time (fall)   | Tf     | -                                                   | -      | 10     | -    | us                |
| Brightness             |        | 50% checkerboard                                    | 60     | 75     | -    | cd/m <sup>2</sup> |
| Lifetime               |        | 90 cd/m <sup>2</sup> , Ta=25°C,<br>50% checkerboard | 10,000 | -      | -    | Hrs               |

**Note:** Lifetime at typical temperature is based on accelerated high-temperature operation. Lifetime is tested at average 50% pixels on and is rated as Hours until **Half-Brightness**. The Display OFF command can be used to extend the lifetime of the display.

Luminance of active pixels will degrade faster than inactive pixels. Residual (burn-in) images may occur. To avoid this, every pixel should be illuminated uniformly.

## Controller information

Built-in SSD1351 controller.

Please download specification at [www.newhavendisplay.com/app\\_notes/SSD1351.pdf](http://www.newhavendisplay.com/app_notes/SSD1351.pdf)

## Table of Commands

(D/C# = 0, R/W#(WR#)= 0, E(RD#) = 1) unless specific setting is stated

Single byte command (D/C# = 0), Multiple byte command (D/C# = 0 for first byte, D/C# = 1 for other bytes)

| Fundamental Command Table |        |                |                |                |                |                |                |                |                |                                                 |                                                                                                                     |
|---------------------------|--------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|-------------------------------------------------|---------------------------------------------------------------------------------------------------------------------|
| D/C#                      | Hex    | D7             | D6             | D5             | D4             | D3             | D2             | D1             | D0             | Command                                         | Description                                                                                                         |
| 0                         | 15     | 0              | 0              | 0              | 1              | 0              | 1              | 0              | 1              | Set Column Address                              | A[6:0]: Start Address. #### Note

(1) After executed the graphic command, waiting time is required for update GDDRAM content.  
V<sub>CI</sub>=2.4~3.5V, waiting time = 500ns/pixel.

(2) “\*” stands for “Don’t care”.

## Timing Characteristics

### 4-wire SPI:

| Symbol             | Parameter              | Min | Typ | Max | Unit |
|--------------------|------------------------|-----|-----|-----|------|
| $t_{\text{cycle}}$ | Clock Cycle Time       | 220 | -   | -   | ns   |
| $t_{\text{AS}}$    | Address Setup Time     | 15  | -   | -   | ns   |
| $t_{\text{AH}}$    | Address Hold Time      | 42  | -   | -   | ns   |
| $t_{\text{CSS}}$   | Chip Select Setup Time | 20  | -   | -   | ns   |
| $t_{\text{CSH}}$   | Chip Select Hold Time  | 10  | -   | -   | ns   |
| $t_{\text{DSW}}$   | Write Data Setup Time  | 15  | -   | -   | ns   |
| $t_{\text{DHW}}$   | Write Data Hold Time   | 20  | -   | -   | ns   |
| $t_{\text{CLKL}}$  | Clock Low Time         | 20  | -   | -   | ns   |
| $t_{\text{CLKH}}$  | Clock High Time        | 20  | -   | -   | ns   |
| $t_{\text{R}}$     | Rise Time              | -   | -   | 15  | ns   |
| $t_{\text{F}}$     | Fall Time              | -   | -   | 15  | ns   |

**Note 1:** No condensation to be observed.

**Note 2:** Conducted after 2 hours of storage at 25°C, 0%RH.

**Note 3:** Test performed on product itself, not inside a container.

### Evaluation Criteria:

- 1: Display is fully functional during operational tests and after all tests, at room temperature.
- 2: No observable defects.
- 3: Luminance >50% of initial value.
- 4: Current consumption within 50% of initial value

## Precautions for using OLEDs/LCDs/LCMs

## Данный компонент на территории Российской Федерации

**Вы можете приобрести в компании MosChip.**

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
