

**MICROCHIP**

---

**EVB-LAN9252-PICtail™  
Add-On Board  
User's Guide**

---

**Note the following details of the code protection feature on Microchip devices:**

- Microchip products meet the specification contained in their particular Microchip Data Sheet.
- Microchip believes that its family of products is one of the most secure families of its kind on the market today, when used in the intended manner and under normal conditions.
- There are dishonest and possibly illegal methods used to breach the code protection feature. All of these methods, to our knowledge, require using the Microchip products in a manner outside the operating specifications contained in Microchip's Data Sheets. Most likely, the person doing so is engaged in theft of intellectual property.
- Microchip is willing to work with the customer who is concerned about the integrity of their code.
- Neither Microchip nor any other semiconductor manufacturer can guarantee the security of their code. Code protection does not mean that we are guaranteeing the product as "unbreakable."

Code protection is constantly evolving. We at Microchip are committed to continuously improving the code protection features of our products. Attempts to break Microchip's code protection feature may be a violation of the Digital Millennium Copyright Act. If such acts allow unauthorized access to your software or other copyrighted work, you may have a right to sue for relief under that Act.

**QUALITY MANAGEMENT SYSTEM  
CERTIFIED BY DNV  
= ISO/TS 16949 =**

*Microchip received ISO/TS-16949:2009 certification for its worldwide headquarters, design and wafer fabrication facilities in Chandler and Tempe, Arizona; Gresham, Oregon and design centers in California and India. The Company's quality system processes and procedures are for its PIC® MCUs and dsPIC® DSCs, KEELOQ® code hopping devices, Serial EEPROMs, microperipherals, nonvolatile memory and analog products. In addition, Microchip's quality system for the design and manufacture of development systems is ISO 9001:2000 certified.*

**Object of Declaration: EVB-LAN9252-PICtail Add-On Board**

EU Declaration of Conformity

Manufacturer: Microchip Technology Inc.  
2355 W. Chandler Blvd.  
Chandler, Arizona, 85224-6199  
USA

This declaration of conformity is issued by the manufacturer.

The development/evaluation tool is designed to be used for research and development in a laboratory environment. This development/evaluation tool is not a Finished Appliance, nor is it intended for incorporation into Finished Appliances that are made commercially available as single functional units to end users under EU EMC Directive 2004/108/EC and as supported by the European Commission's Guide for the EMC Directive 2004/108/EC (8<sup>th</sup> February 2010).

This development/evaluation tool complies with EU RoHS2 Directive 2011/65/EU.

This development/evaluation tool, when incorporating wireless and radio-telecom functionality, is in compliance with the essential requirement and other relevant provisions of the R&TTE Directive 1999/5/EC and the FCC rules as stated in the declaration of conformity provided in the module datasheet and the module product page available at [www.microchip.com](http://www.microchip.com).

For information regarding the exclusive, limited warranties applicable to Microchip products, please see Microchip's standard terms and conditions of sale, which are printed on our sales documentation and available at [www.microchip.com](http://www.microchip.com).

Signed for and on behalf of Microchip Technology Inc. at Chandler, Arizona, USA

### NOTICE TO CUSTOMERS

All documentation becomes dated, and this manual is no exception. Microchip tools and documentation are constantly evolving to meet customer needs, so some actual dialogs and/or tool descriptions may differ from those in this document. Please refer to our web site ([www.microchip.com](http://www.microchip.com)) to obtain the latest documentation available.

Documents are identified with a “DS” number. This number is located on the bottom of each page, in front of the page number. The numbering convention for the DS number is “DSXXXXA”, where “XXXX” is the document number and “A” is the revision level of the document.

For the most up-to-date information on development tools, see the MPLAB® IDE online help. Select the Help menu, and then Topics to open a list of available online help files.

## INTRODUCTION

This chapter contains general information that will be useful to know before using the EVB-LAN9252-PICtail Add-On Board. Items discussed in this chapter include:

- [Document Layout](#)
- [Conventions Used in this Guide](#)
- [The Microchip Web Site](#)
- [Development Systems Customer Change Notification Service](#)
- [Customer Support](#)
- [Document Revision History](#)

## DOCUMENT LAYOUT

This document describes how to use the EVB-LAN9252-PICtail Add-On Board as a development tool for the LAN9252 and its connectivity to the Explorer 16 development platform. The manual layout is as follows:

- **Chapter 1. “Overview”** – Shows a brief description of the EVB-LAN9252-PICtail Add-On Board.
- **Chapter 2. “Board Details”** – Describes the various board features of the EVB-LAN9252-PICtail Add-On Board, including jumpers, LEDs, test points, system connections, and switches.
- **Chapter 3. “Board Configuration”** – Provides information about the EVB-LAN9252-PICtail Add-On Board configuration.
- **Appendix A. “EVB-LAN9252-PICtail Add-On Board”** – This appendix shows the EVB-LAN9252-PICtail Add-On Board.
- **Appendix B. “Schematics”** – This appendix shows the EVB-LAN9252-PICtail Add-On Board schematics.
- **Appendix C. “Bill of Materials (BOM)”** – This appendix includes the EVB-LAN9252-PICtail Add-On Board Bill of Materials (BOM).

## CONVENTIONS USED IN THIS GUIDE

This manual uses the following documentation conventions:

### DOCUMENTATION CONVENTIONS

Description	Represents	Examples
<b>Arial font:</b>		
Italic characters	Referenced books	<i>MPLAB® IDE User's Guide</i>
	Emphasized text	...is the <i>only</i> compiler...
Initial caps	A window	the Output window
	A dialog	the Settings dialog
	A menu selection	select Enable Programmer
Quotes	A field name in a window or dialog	"Save project before build"
Underlined, italic text with right angle bracket	A menu path	<u><i>File&gt;Save</i></u>
Bold characters	A dialog button	Click <b>OK</b>
	A tab	Click the <b>Power</b> tab
N'Rnnnn	A number in verilog format, where N is the total number of digits, R is the radix and n is a digit.	4'b0010, 2'hF1
Text in angle brackets < >	A key on the keyboard	Press <Enter>, <F1>
<b>Courier New font:</b>		
Plain Courier New	Sample source code	#define START
	Filenames	autoexec.bat
	File paths	c:\mcc18\h
	Keywords	_asm, _endasm, static
	Command-line options	-Opa+, -Opa-
	Bit values	0, 1
	Constants	0xFF, 'A'
Italic Courier New	A variable argument	<i>file.o</i> , where <i>file</i> can be any valid filename
Square brackets [ ]	Optional arguments	mcc18 [options] <i>file</i> [options]
Curly brackets and pipe character: {   }	Choice of mutually exclusive arguments; an OR selection	errorlevel {0 1}
Ellipses...	Replaces repeated text	var_name [, var_name...]
	Represents code supplied by user	void main (void) { ... }

## THE MICROCHIP WEB SITE

Microchip provides online support via our web site at [www.microchip.com](http://www.microchip.com). This web site is used as a means to make files and information easily available to customers. Accessible by using your favorite Internet browser, the web site contains the following information:

- **Product Support** – Data sheets and errata, application notes and sample programs, design resources, user's guides and hardware support documents, latest software releases and archived software
- **General Technical Support** – Frequently Asked Questions (FAQs), technical support requests, online discussion groups, Microchip consultant program member listing
- **Business of Microchip** – Product selector and ordering guides, latest Microchip press releases, listing of seminars and events, listings of Microchip sales offices, distributors and factory representatives

## DEVELOPMENT SYSTEMS CUSTOMER CHANGE NOTIFICATION SERVICE

Microchip's customer notification service helps keep customers current on Microchip products. Subscribers will receive e-mail notification whenever there are changes, updates, revisions or errata related to a specified product family or development tool of interest.

To register, access the Microchip web site at [www.microchip.com](http://www.microchip.com), click on Customer Change Notification and follow the registration instructions.

The Development Systems product group categories are:

- **Compilers** – The latest information on Microchip C compilers, assemblers, linkers and other language tools. These include all MPLAB C compilers; all MPLAB assemblers (including MPASM assembler); all MPLAB linkers (including MPLINK object linker); and all MPLAB librarians (including MPLIB object librarian).
- **Emulators** – The latest information on Microchip in-circuit emulators. This includes the MPLAB REAL ICE and MPLAB ICE 2000 in-circuit emulators.
- **In-Circuit Debuggers** – The latest information on the Microchip in-circuit debuggers. This includes MPLAB ICD 3 in-circuit debuggers and PICkit 3 debug express.
- **MPLAB IDE** – The latest information on Microchip MPLAB IDE, the Windows Integrated Development Environment for development systems tools. This list is focused on the MPLAB IDE, MPLAB IDE Project Manager, MPLAB Editor and MPLAB SIM simulator, as well as general editing and debugging features.
- **Programmers** – The latest information on Microchip programmers. These include production programmers such as MPLAB REAL ICE in-circuit emulator, MPLAB ICD 3 in-circuit debugger and MPLAB PM3 device programmers. Also included are nonproduction development programmers such as PICSTART Plus and PIC-kit 2 and 3.

## CUSTOMER SUPPORT

Users of Microchip products can receive assistance through several channels:

- Distributor or Representative
- Local Sales Office
- Field Application Engineer (FAE)
- Technical Support

# **EVB-LAN9252-PICtail Add-On Board User's Guide**

---

---

Customers should contact their distributor, representative or field application engineer (FAE) for support. Local sales offices are also available to help customers. A listing of sales offices and locations is included in the back of this document.

Technical support is available through the web site at:  
<http://www.microchip.com/support>

## **DOCUMENT REVISION HISTORY**

### **Revision A (November 2015)**

- Initial Release of this Document.

## Chapter 1. Overview

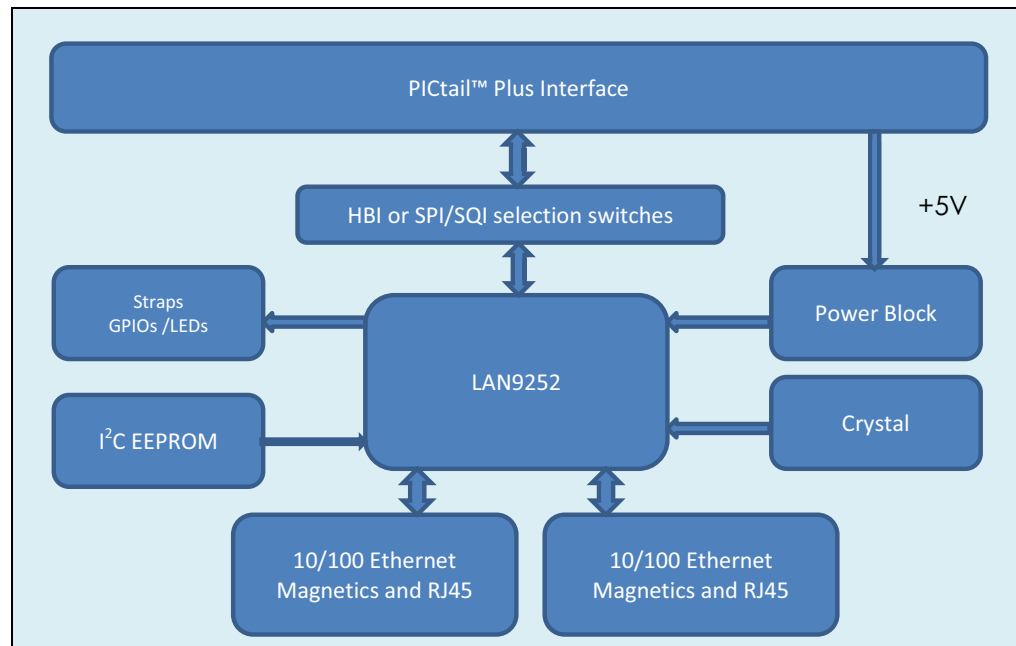

### 1.1 INTRODUCTION

EVB-LAN9252-PICTail™ Add-On Board is used for evaluating Microchip Technology's LAN9252, a 2/3-port EtherCAT® slave controller with dual integrated Ethernet PHYs. It is an expansion board compatible with Explorer 16 development platform.

This document details the EVB-LAN9252-PICTail Add-On Board features and its connectivity to the Explorer 16 development platform. This EVB currently supports 3 plug-in modules (PIMs), namely [MA320003 (PIC32MX795F512L), MA240011 (PIC24FJ128GA010), and MA320012 (PIC32MZxxxxECx100)], on this platform.

Figure 1-1 shows the block diagram.

**FIGURE 1-1: EVB-LAN9252-PICTAIL ADD-ON BOARD BLOCK DIAGRAM**

## 1.2 REFERENCES

Concepts and material available in the following documents may be helpful when reading this document. Visit [www.microchip.com](http://www.microchip.com) for the latest documentation.

Document	Location
LAN9252 Datasheet	Visit <a href="http://www.microchip.com">www.microchip.com</a> .
AN8-13 Suggested Magnetics	<a href="http://www.microchip.com/wwwAppNotes/AppNotes.aspx?appnote=en562793">http://www.microchip.com/wwwAppNotes/AppNotes.aspx?appnote=en562793</a>
EVB-LAN9252-PICtail Add-On Board Schematic	Visit <a href="http://www.microchip.com">www.microchip.com</a> .

## 1.3 TERMS AND ABBREVIATIONS

- EVB - Evaluation Board
- DNP - Do Not Populate
- 100BASE-TX- 100 Mbps Fast Ethernet, IEEE 802.3u Compliant
- GPIO - General Purpose I/O
- HBI - Host Bus Interface
- SPI - Serial Peripheral Interface
- SQI - Serial Quad Interface
- PIM - Plug-in Module

## Chapter 2. Board Details

The following sections describe the various board features, including jumpers, LEDs, test points, system connections, and switches. A top view of the EVB-LAN9252-PICtail Add-On Board is shown in [Figure 2-1](#).

**FIGURE 2-1: EVB-LAN9252-PICTAIL ADD-ON BOARD**

## 2.1 POWER

Power is supplied as +5V and +3.3V to the board via the PICtail™ Plus interface from the Explorer 16 Development Board. LAN9252 has an internal 1.2 V regulator which supplies power to the internal core logic.

## 2.2 PICTAIL™ PLUS INTERFACE

Plug the EVB-LAN9252-PICtail Add-On Board J1 edge connector into the topmost position of the J5 slot on the Explorer 16 Board, as shown in [Figure 2-2](#).

**FIGURE 2-2: EVB-LAN9252-PICTAIL ADD-ON BOARD WITH EXPLORER 16 DEVELOPMENT BOARD**

The pin details of the connector J1 of EVB-LAN9252-PICtail Add-On Board are enumerated in [Table 2-1](#).

**TABLE 2-1: J1 CONNECTOR PIN DETAILS**

Pin Number	Signal	Pin Number	Signal	Pin Number	Signal
1	MX_SCS	4	NC	7	SDI
2	NC	5	MX_SDO	8	NC
3	SCK	6	NC	9	GND

**TABLE 2-1: J1 CONNECTOR PIN DETAILS (CONTINUED)**

Pin Number	Signal	Pin Number	Signal	Pin Number	Signal
10	GND	47	GND	86	NC
11	NC	48	GND	87	NC
12	NC	49	IRQ_MX- _PIC24	88	NC
13	NC	50	NC	89	NC

32	NC	71	NC	108	3V3
33	A2	72	NC	109	D0
34	NC	73	SQI_SCK	110	D1
35	NC	74	SQI_D3	111	D2
36	IRQ_MZ	75	NC	112	D3
37	A4	76	NC	113	D4
38	NC	77	NC	114	D5
39	A3	78	NC	115	D6
40	NC	79	MZ_SDO	116	D7
41	GND	80	NC	117	NC
42	GND	81	NC	118	NC
43	NC	82	MZ_SCS	119	GND
44	NC	83	ALEHI_A1_J5	120	GND
45	NC	84	ALELO_A0_J 5		
46	NC	85	NC		

## 2.3 CLOCK

The LAN9252 requires a fixed-frequency 25 MHz clock source for use by the internal clock oscillator and phase-locked loop (PLL). This is typically provided by attaching a 25 MHz crystal to the OSCI and OSCO pins.

NOTES:

## Chapter 3. Board Configuration

### 3.1 STRAPS AND LEDS

The following tables describe the default settings and jumper descriptions for the EVB-LAN9252-PICtail Add-On Board. These defaults are the recommended configurations for evaluation of the LAN9252. These settings may be changed as needed, however, any deviation from the defaults settings should be approached with care and knowledge of the schematics and datasheet. An incorrect jumper setting may disable the board.

#### 3.1.1 Chip Mode

By default, EVB-LAN9252-PICtail Add-On Board supports only the 2-port mode (CHIP\_MODE0 and CHIP\_MODE1 signals pulled down).

#### 3.1.2 EEPROM Size Configuration

By default, the EEPROM size in this EVB-LAN9252-PICtail Add-On Board is 512k.

#### 3.1.3 LEDs

D1 LED is used as a RUN indicator (green) to show the AL status of the EtherCAT State Machine (ESM), as detailed in [Table 3-1](#).

**TABLE 3-1: D1 RUN LED STATUS INDICATOR**

State	Description
Off	The device is in the INITIALIZATION state
Blinking (on 200ms, off 200ms)	The device is in the PRE-OPERATIONAL state
Single Flash (on 200ms, off 1000ms)	The device is in the SAFE-OPERATIONAL state
On	The device is in the OPERATIONAL state
Flickering (on 50ms, off 50ms)	The device is booting and has not yet entered the INITIALIZATION state, or the device is in the BOOTSTRAP state and firmware download is in progress. (Optional. Off when not implemented.)

### 3.2 PROCESS DATA INTERFACE

The Process Data Interface (PDI) is used to communicate with external system-on-chip (SoC). The EVB-LAN9252-PICtail Add-On Board supports three different PDI configurations:

- HBI (8-bit mode only)
- SPI (default)
- SQI [supported only with MA320003 (PIC32MX795F512L)]

The following sections detail the hardware configurations required for the EVB-LAN9252-PICtail Add-On Board for all three PDI options.

## 3.2.1 IRQ Selection

Based on the PIMs on the Explorer 16 Development Board [MA320003 (PIC32MX-795F512L), MA240011 (PIC24FJ128GA010) or with MA320012 (PIC32MZxxxx-ECx100)] the following configuration in [Table 3-2](#) has to be done in J3 for Interrupt Request (IRQ) signal.

**TABLE 3-2: IRQ SELECTION**

Short Pins (J3)	Plug-In Board with Explorer 16 Development Board
2-3	MA320003 (PIC32MX795F512L) MA240011 (PIC24FJ128GA010)
1-2	MA320012 (PIC32MZxxxxECx100)

## 3.2.2 HBI Mode

The Host Bus Interface (HBI) module provides a high-speed asynchronous slave interface that facilitates communication between LAN9252 and the host system. The HBI allows access to the System CSRs and the internal FIFOs and memories, and also handles byte swapping based on the endianness select.

To select HBI Mode, configuration should be done based on [Table 3-3](#). However, to further configure in indexed or multiplexed mode, refer to the subsections below.

**TABLE 3-3: HBI MODE SWITCH CONFIGURATION**

Switch	Short Pins
SW2 (D9 and D5)	1-2 & 4-5
SW3 (D0 and D1)	1-2 & 4-5
SW4 (D2 and D3)	1-2 & 4-5

### 3.2.2.1 HBI MULTIPLEXED MODE CONFIGURATION

In Multiplexed Address/Data mode, the address, FIFO Direct Select and endianness select inputs are shared with the data bus.

To operate in the HBI Multiplexed mode, the following switch configurations in [Table 3-4](#) must be enabled.

**TABLE 3-4: HBI MULTIPLEXED MODE SWITCH CONFIGURATION**

Switch	Short Pins
SW9 (ALELO)	2-3 & 5-6
SW5 (ALEHI)	2-3 & 5-6

Along with the switch configuration the following jumper configuration in [Table 3-5](#) must be enabled.

**TABLE 3-5: HBI MULTIPLEXED MODE JUMPER CONFIGURATION**

Jumper	Short Pins
J2 (D15)	2-3

### 3.2.2.2 HBI INDEXED MODE

In Indexed Address mode, access to the internal registers and memory of the device are indirectly mapped using Index and Data registers.

To operate in the HBI Multiplexed mode, the following switch configurations in [Table 3-6](#) must be enabled.

**TABLE 3-6: HBI INDEXED MODE SWITCH CONFIGURATION**

Switch	Short Pins
SW9 (A0 and A1)	1-2 & 4-5
SW5 (A2 and A1)	1-2 & 4-5

Along with the switch configuration, the following jumper configuration in [Table 3-7](#) must be done for 8-bit/16-bit mode.

**TABLE 3-7: HBI INDEXED MODE JUMPER CONFIGURATION**

Jumper	Short Pins	Mode
J2 (D15)	2-3	Indexed 8-bit
J3 (A0)	1-2	Indexed 16-bit

### 3.2.3 SPI/SQI Mode

The SPI/SQI Slave module provides a low pin count synchronous slave interface that facilitates communication between the device and a host system. The SPI/SQI Slave allows access to the System CSRs and the internal FIFOs and memories. It supports single and multiple register read and write commands with incrementing, decrementing and static addressing. Single-bit lanes are supported in SPI mode.

To select SPI/SQI Mode, configuration should be done as in [Table 3-8](#).

**TABLE 3-8: SPI/SQI MODE SWITCH CONFIGURATION**

Jumper	Short Pins
SW2 (SPI/SQI_CLK and SCS#)	2-3 & 5-6
SW3 (SI/SIO0 and SO/SIO1)	2-3 & 5-6
SW4 (SQI_D2 and SQI_D3)	2-3 & 5-6

#### 3.2.3.1 SPI MODE CONFIGURATION

The following switches need to be configured as in [Table 3-9](#) to enable the SPI mode to communicate with the Explorer 16 Development Board.

**TABLE 3-9: SPI MODE SWITCH CONFIGURATION**

Jumper	Short Pins
SW6 (SCK and SDI)	2-3 & 5-6
SW7 (SCS and SO)	2-3 & 5-6

Based on the plug-in boards on the Explorer 16 Development Board, [MA320003 (PIC32MX795F512L), MA240011 (PIC24FJ128GA010) or with MA320012 (PIC32MZxxxxECx100)] the following configuration in [Table 3-10](#) has to be done in SW8.

**TABLE 3-10: SPI CONFIGURATION**

Short Pins	Plug-In Board with Explorer 16 Development Board
1-2 & 4-5	MA320003 (PIC32MX795F512L) MA240011 (PIC24FJ128GA010)
2-3 & 5-6	MA320012 (PIC32MZxxxxECx100)

## 3.2.3.2 SQI MODE CONFIGURATION [MA320012 (PIC32MZXXXECX100) ONLY]

The following switches need to be configured to enable the SPI mode to communicate with the Explorer 16 Development Board.

**TABLE 3-11: SQI MODE SWITCH CONFIGURATION**

Jumper	Short Pins
SW6 (SQI_SCI and SQI_D0)	1-2 & 4-5
SW7 (SQI_CS0 and SQI_D1)	1-2 & 4-5

## Данный компонент на территории Российской Федерации

### Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
