

Product Description

The Qorvo TGC4403-SM packaged MMIC combines a frequency doubler with a 3-stage amplifier, operating at input frequencies of 8 – 15 GHz. With greater than 30 dBc isolation between the input and doubler frequency, the TGC4403-SM achieves 20 dBm output power, with 2 dBm input power. This performance makes this doubler ideally suited for Point to Point Radios and Ka-Band satellite ground terminal applications. The TGC4403-SM provides the frequency doubling function in a compact 4 mm x 4 mm package foot print.

Lead-free and RoHS compliant.

16-pin 4x4 mm QFN package
