

LT3591  
 LED Driver with Integrated Schottky in  
 3mmx2mm DFN

## DESCRIPTION

Demonstration circuit 1124 is an LED Driver with Integrated Schottky in 3mmx2mm DFN featuring the LT3591. The LT3591 is a fixed frequency step-up current mode DC/DC converter to drive up to ten white LEDs in series. The high switching frequency allows using tiny components for the circuit. External components are minimized by integrating the schottky diode and the open circuit protection into the package. The high side current sensing feature of the LT3591 allows “one wire” current source, i.e. the low side of the LED string can return to ground anywhere. The input voltage range of the demo board is from 3V to 9V. This driver can provide 20mA for up to 10 LEDs. Different dimming controls can be

implemented on the demo board. Please refer to the quick start procedure.

The LT3591 datasheet gives complete description of the part, operation and application information. The datasheet must be read in conjunction with this quick start guide for working on or modifying the demo circuit 1124.

**Design files for this circuit board are available. Call the LTC factory.**

LT, LTC and LT are registered trademarks of Linear Technology Corporation. ThinSOT and PowerPath are trademarks of Linear Technology Corporation.

## PERFORMANCE SUMMARY

**Specifications are at  $T_A = 25^\circ\text{C}$**

SYMBOL	PARAMETER	CONDITIONS	MIN	TYP	MAX	UNITS
$V_{IN}$	Input Supply Range **		3		9	V
$I_{OUT}$	Output Current	$V_{IN} = 3V$ , 10 LEDs			20	mA
$\eta$	Efficiency	$V_{IN} = 3.6V$ , 10 LEDs		78.2		%
$V_{OPEN}$	CAP pin Over voltage Protection	LED Open	40	42	44	V
$I_Q$	Quiescent Current	$V_{IN} = 3V$ , $V_{CTRL} = 3V$			5	mA
$I_{QSHDN}$	Quiescent Current While in Shutdown	$V_{IN} = 3V$ , $V_{CTRL} = 0V$			11	$\mu\text{A}$
$F_s$	Switching Frequency		0.75	1	1.2	MHz

\*\* The Input Supply Range of the demo circuit 1124 is limited by the input capacitors. The input voltage absolute maximum rating of the LT3591 is 12V.

## QUICK START PROCEDURE

Demonstration circuit 1124 is easy to set up to evaluate the performance of the LT3591. Refer to Figure 1 for

proper measurement equipment setup and follow the procedure below:

# LT3591

NOTE . When measuring the input or output voltage ripple, care must be taken to avoid a long ground lead on the oscilloscope probe. Measure the input or output voltage ripple by touching the probe tip directly across the Vin or Vout and GND terminals. See Figure 2 for proper scope probe technique. Place jumper JP1 in the ON position.

1. With power off, connect the input power supply to  $V_{IN}$  and GND.
2. Turn on the power at the input.

NOTE . Make sure that the input voltage does not exceed 9V.

3. Check for the proper voltage and current.

NOTE . If the LEDs do not light up, check the jumper setting and LED connection.

4. Once proper operation is established, adjust the input within the operating range and observe the parameters of interest.
5. To test the filtered PWM dimming or the direct DC dimming, apply the PWM or the DC signal to the CTRL terminal and observe the brightness of the LED output.
6. To test the direct PWM dimming, remove C4 and R3. Install Q1 and connect CTRL with PWM pin. Apply the PWM signal to the PWM pin and observe the brightness of the LED output.

Figure 1.

This circuit is proprietary to Linear Technology and supplied for use with Linear Technology parts.  
**Customer Notice:** Linear Technology has made a best effort to design a circuit that meets customer-supplied specifications; however, it remains the customer's responsibility to verify proper and reliable operation in the actual application. Component substitution and printed circuit board layout may significantly affect circuit performance or reliability. Contact Linear Applications Engineering for assistance.

## Данный компонент на территории Российской Федерации

### Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
