

## SERIES: CFM-70 | DESCRIPTION: DC AXIAL FAN

### FEATURES

- 70 x 70 mm frame
- high fan speed for greater air flow
- dual ball bearing construction
- auto restart protection standard on all models

| MODEL       | input voltage |             | input current |         | input power | rated speed | air flow <sup>1</sup> | static pressure <sup>2</sup> | noise     |
|-------------|---------------|-------------|---------------|---------|-------------|-------------|-----------------------|------------------------------|-----------|
|             | rated (Vdc)   | range (Vdc) | typ (A)       | max (A) | max (W)     | typ (RPM)   | (CFM)                 | (inch H <sub>2</sub> O)      | max (dBA) |
| CFM-7010-13 | 12            | 6~13.8      | 0.22          | 0.27    | 3.24        | 4,400       | 31.11                 | 0.16                         | 40.6      |

Notes: 1. At 0 inch H<sub>2</sub>O static pressure.  
2. At 0 CFM airflow.

### PART NUMBER KEY

## INPUT

| parameter               | conditions/description | min | typ  | max  | units |
|-------------------------|------------------------|-----|------|------|-------|
| operating input voltage |                        | 6   | 12   | 13.8 | Vdc   |
| current                 |                        |     | 0.22 | 0.27 | A     |
| power                   |                        |     | 2.64 | 3.24 | W     |
| starting voltage        | at 25°C                |     | 6    |      | Vdc   |

## PERFORMANCE

| parameter       | conditions/description                             | min   | typ   | max   | units                 |
|-----------------|----------------------------------------------------|-------|-------|-------|-----------------------|
| rated speed     | at 25°C, after 10 minutes                          | 3,960 | 4,400 | 4,840 | RPM                   |
| air flow        | at 0 inch H <sub>2</sub> O, see performance curves |       | 31.11 |       | CFM                   |
| static pressure | at 0 CFM, see performance curves                   |       | 0.16  |       | inch H <sub>2</sub> O |
| noise           | at 1 m                                             |       | 39.5  | 40.6  | dBA                   |

## PROTECTIONS / SIGNALS<sup>1</sup>

| parameter               | conditions/description            | min | typ | max | units |
|-------------------------|-----------------------------------|-----|-----|-----|-------|
| auto restart protection | available on all models           |     |     |     |       |
| rotation detector       | available on "11" models          |     |     |     |       |
| tachometer signal       | available on "20" and "22" models |     |     |     |       |
| PWM control signal      | available on "22" models          |     |     |     |       |

Notes: 1. See application notes for details.

## SAFETY & COMPLIANCE

| parameter                      | conditions/description                                                             | min | typ    | max | units |
|--------------------------------|------------------------------------------------------------------------------------|-----|--------|-----|-------|
| insulation resistance of frame | at 500 Vdc between frame and positive terminal                                     | 10  |        |     | MΩ    |
| dielectric strength            | at 500 Vac, 60 Hz, 1 minute between frame and positive terminal                    |     |        | 5   | mA    |
| safety approvals               | UL/cUL 507, TUV (EN 62368-1)                                                       |     |        |     |       |
| EMI/EMC                        | EN 55022:2010+AC:2011 Class B, EN 61000-3-2:2014, EN 61000-3-3:2013, EN 55024:2010 |     |        |     |       |

| dimensions            | 70 x 70 x 10.6                                   |     |      |     | mm    |
| material              | PBT (UL94V-0)                                    |     |      |     |       |
| weight                |                                                  |     | 37.3 |     | g     |

## MECHANICAL DRAWING

units: mm [inch]

wire: UL 1061, 26 AWG

Note: 1. Wires only present on versions with output signals.

## APPLICATION NOTES

### Auto Restart Protection/Current Limit Protection

When the fan motor is locked, the device will cut off the drive current within two to six seconds and restart automatically after a few seconds. If the lock situation is continued, the device will work on a repeated cycle of cut-off and restart until the lock is released. (See Figure 1 below).

**Figure 1 Current Limit Protection**

### Lock Sensor/Rotation Detector

Lock Sensor is used to detect if the fan motor is operating or stopped. Alarm High: the output will be logical low when fan is operating and be logical high when fan motor is locked. (See Figures 2~3 below).

**Figure 2 Alarm High Output Waveform**

**Figure 3 RD Signal Output Circuit: Open Collector**

### Pulse Sensor/Tachometer Signal/FG

Pulse Sensor is for detecting the rotational speed of the fan motor. At locked rotor condition, the signal stops cycling and the output is fixed at VoH or VoL (See Figures 4~5 below).

**Figure 4 Output Waveform**

**Figure 5 FG Signal Output Circuit: Open Collector**

### PMW Control Signal

A speed control lead can be provided that will accept a PWM signal from the customer circuit to vary the speed of the fan. The change in speed is linear by changing the Duty-Cycle of the PWM. Open collector type and pull-up voltage is changed by maximum operating voltage and sink current by consuming current. (See Figure 6 below).

**Figure 6 Duty Cycle**

## REVISION HISTORY

| rev. | description                                           | date       |
|------|-------------------------------------------------------|------------|
| 1.0  | initial release                                       | 08/15/2016 |
| 1.01 | updated datasheet                                     | 07/27/2017 |
| 1.02 | updated to be certified to EN 62368-1 safety standard | 07/09/2019 |

CUI offers a one (1) year limited warranty. Complete warranty information is listed on our website.

CUI reserves the right to make changes to the product at any time without notice. Information provided by CUI is believed to be accurate and reliable. However, no responsibility is assumed by CUI for its use, nor for any infringements of patents or other rights of third parties which may result from its use.

CUI products are not authorized or warranted for use as critical components in equipment that requires an extremely high level of reliability. A critical component is any component of a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system, or to affect its safety or effectiveness.

## Данный компонент на территории Российской Федерации

**Вы можете приобрести в компании MosChip.**

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
