3M™ Cable

Cable Properties — Testing Method Summary

Cables can be used in various conductor configurations. Our testing is performed with what we consider the most typical configuration for the cable construction. See the respective product specification page for the tested configuration for each test value.

Impedance: (Z_o) is calculated — 1000 multiplied by the propagation delay, in nanoseconds per unit length (ns), divided by capacitance, in picofarads per unit length (pF) = Ohms (Ω). This calculation is verified by using a Time Domain Reflectometer (TDR), Tektronix 11801B Digital Sampling Oscilloscope with SD-24 TDR/Sampling head.

$$\text{IMPEDANCE } (\Omega) = \frac{\left[\text{PROPAGATION DELAY (nS/ft)}\right] \times 1000}{\text{CAPACITANCE (pF/ft)}}$$

Capacitance: (C) is measured — using a digital LCR meter, HP4275A Multi-frequency LCR meter, at 1 MHz, specified in picofarads per foot pF/ft.

Inductance: (L) is calculated — square characteristic impedance (Ω), multiplied by capacitance (pF/ft), divided by $1X10^6$ = Inductance (L) in μH/ft.

$$\text{INDUCTANCE } (\mu H) = \frac{\text{IMPEDANCE } (\Omega)^2 \times \text{CAPACITANCE (pF)}}{1{,}000{,}000}$$

Propagation Delay: (Pd) is measured — using a network analyzer, HP8753A, short the far end of a 10 foot cable sample, locate the null at 1 wavelength, multiplied by the reciprocal of the frequency in megahertz (mHz) by 100 = Pd in ns/ft.

$$\text{PD (nS/ft)} = \frac{1}{\text{FREQUENCY (MHz)}} \times 100$$

Insulation Resistance: is measured — at 500 volts, between conductors and water, after one hour immersion.

Important Notice

All statements, technical information, and recommendations related to 3M's products are based on information believed to be reliable, but the accuracy or completeness is not guaranteed. Before using this product, you must evaluate it and determine if it is suitable for your intended application. You assume all risks and liability associated with such use. Any statements related to the product which are not contained in 3M's current publications, or any contrary statements contained on your purchase order shall have no force or effect unless expressly agreed upon, in writing, by an authorized officer of 3M.

Warranty; Limited Remedy; Limited Liability.

This product will be free from defects in material and manufacture for a period of 1 year from the date of purchase. **3M MAKES NO OTHER WARRANTIES INCLUDING, BUT NOT LIMITED TO, ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.** If this product is defective within the warranty period stated above, your exclusive remedy shall be, at 3M's option, to replace or repair the 3M product or refund the purchase price of the 3M product. **Except where prohibited by law, 3M will not be liable for any loss or damage arising from this 3M product, whether direct, indirect, special, incidental or consequential regardless of the legal theory asserted.**

Общество с ограниченной ответственностью «МосЧип» ИНН 7719860671 / КПП 771901001
Адрес: 105318, г.Москва, ул.Щербаковская д.3, офис 1107

Данный компонент на территории Российской Федерации

Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

http://moschip.ru/get-element

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
