## NEW! PowerLOK™ Circuit Breaker Lockout Devices

Panduit's new PowerLOK™ Circuit Breaker Lockout Devices include many innovative features to provide a versatile, easy to use lockout/tagout device. These devices can be applied to single or multi-pole circuit breakers (such as 120/277V breakers) to prevent the breaker from being turned back on; for safe performance of maintenance or service in accordance with lockout/tagout procedures.

**Two Metal Contacts**
Provide a contact area that is evenly distributed on the breaker handle for a secure and reliable connection without damage to the breaker handle itself

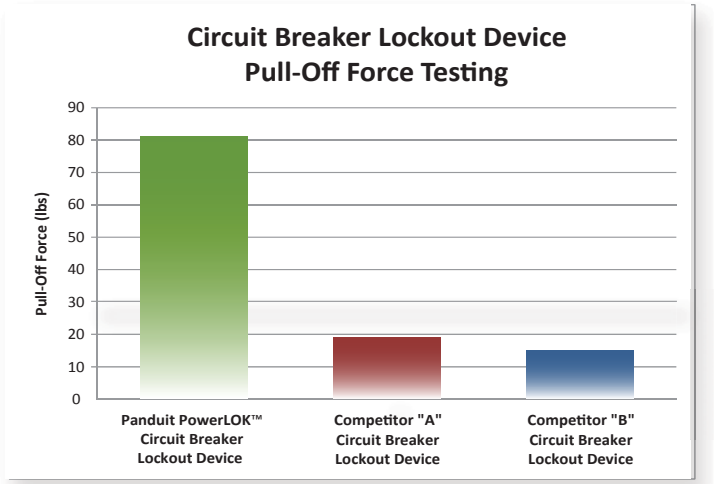

**Fits Single and Multi-Pole Circuit Breakers**
Jaws designed to grasp the tie-bar of two and three pole circuit breakers, allowing one part to be used in multiple applications

**Two-Position Padlock Design**
Allows padlock to be installed horizontally or vertically to accommodate space

**Two-Piece Construction**
Delivers outstanding clamping force, to assure the circuit breaker will remain locked out once the device is applied for improved reliability and safety

## PowerLOK™ Circuit Breaker Lockout Devices Deliver Industry-Leading Clamping Force

Test results based on pull-off force of each device when force applied perpendicular to the circuit breaker.
For more information on the test contact Panduit at: safety@panduit.com.

The PowerLOK™ Circuit Breaker Lockout Devices are designed for superior engagement with the circuit breaker to deliver industry-leading pull-off resistance performance. The two-piece construction, metal contacts, and jaws that encircle the circuit breaker handle create superior clamping force for a reliable and secure connection. Pull-off force test results indicate the Panduit® PowerLOK™ devices deliver over 3X the pull-off resistance when compared to competitor products used in the same application.
