

Product Overview

The QPQ1907 is a high-performance, high power Bulk Acoustic Wave (BAW) band-pass filter with extremely steep skirts, simultaneously exhibiting low loss in the Wi-Fi band and high near-in rejection in the 2.6GHz bands.

QPQ1907 is specifically designed to enable coexistence of Wi-Fi and LTE signals within the same device or in close proximity to one another..

Using common module packaging techniques to achieve the industry standard footprint while negating as many external passive placements to help end users ease of integration into their circuits
