Power Up/Down and Operational Controls

Scenario 1	Sequence for power up and power down from the phone battery or supply that is connected to RFSW1012 VBATT Pin.
Power Up	Turn on VBATT (supply), then EN, then CTRL. Then (20mS or greater), apply RF signal
Power Down	Turn off RF signal, then CTRL, then EN, turn off VBATT (supply)
Scenario 2	Sequence for going in and out of a shutdown mode, keeping the VBATT or supply on, but disabling / enabling the RFSW1012 by the EN pin
Power Up	Turn on EN (enable), then CTRL, then (5mS or greater), turn on RF Signal
Power Down	Turn off RF signal, then CTRL, then EN (disable)
Scenario 3	When changing switch positions between RF1 and RF2, no RF signal should be applied to any RF port while the CTRL is changing states
Switching Ports	Turn off RF signal, then change CTRL state, then wait (5mS or greater), then turn on RF signal
