EVAL BOARD USER'S MANUAL

Introduction

This manual contains configuration, usage and main specifications regarding Electrostatic Capacitive Touch Sensor Evaluation Board (LC717A10ARGPGEVB).

For the latest edition of this manual, please refer to ON Semiconductor homepage. (<http://www.onsemi.com>)

Product Outline

This product is a board that can be used to evaluate LSI "LC717A10AR". Due to the fact it is 600 mil wide DIP shape, it is easy to use. It can be set up to evaluate any given touch switch pattern.

In order for evaluation, it is necessary to obtain an USB-to-Serial conversion module for SPI communication, a PC to evaluate software, and a board with a designed switch pattern.
