# Flip Chip PIN Diode

#### Features

- Low Series Resistance
- Low Capacitance
- Fast Switching Speed
- Silicon Nitride Passivation
- Polymer Scratch Protection
- RoHS Compliant

### Description

M/A-COM Technology Solutions MA4FCP200 is a silicon flip chip PIN diode fabricated using a patented HMIC process which provides for repeatable electrical characteristics. This diode is fabricated on epitaxial wafers using a process designed for extremely low parasitics. The diode is fully passivated with silicon nitride to minimize leakage current. The chip also has an additional polymer layer for impact and scratch protection to prevent damage to the active area during handling.

# **Applications**

1

The small outline and low 0.05pS RC product, make the device useful in multi-throw switches and switched phase shifter circuits requiring <20nS switching speeds at operating frequencies up to 18GHz.

# Absolute Maximum Ratings<sup>1</sup> $T_{AMB} = +25^{\circ}C$ (unless otherwise specified)

Parameter	Absolute Maximum	
Forward Current	100mA	
Reverse Voltage	- 70V	
Operating Temperature	- 55°C to + 125°C	
Storage Temperature	- 55°C to + 150°C	
Dissipated Power	100mW	
Mounting Temperature	+300°C for 10 seconds	

# 1. Exceeding any of these limits may cause permanent damage to the chip.

# Electrical Specifications @ T<sub>AMB</sub> +25°C

- 1. Total capacitance is equivalent to the sum of junction capacitance, Cj, plus the die parasitic capacitance, Cp.
- 2. The series resistance, R<sub>s</sub>, is equal to the total diode resistance which also includes the resistance of the junction, Rj.
- 3. Rs and Cp measured on an HP4291A with die mounted in an ODS-186 package.
- 4. Steady-state Thermal Resistance measured with die mounted in an ODS-186 package.

# ESD

These devices very susceptible to ESD and are rated Class 0 (0-199V) per HBM MIL-STD-883, method 3015.7 [C = 100pF  $\pm$ 10%, R = 1.5kW  $\pm$ 1%]. Even though tested die pass 100V ESD, they must be handled in a static-free environment.

Rev. V3

# **Handling Procedures**

All semiconductor chips should be handled with care to avoid damage or contamination from perspiration and skin oils. The use of plastic tipped tweezers or vacuum pickups is strongly recommended for individual components. Bulk handling should insure that abrasion and mechanical shock are minimized.

# **Bonding Techniques**

These devices were designed for insertion onto hard or soft substrates with the junction side down. They can be mounted with electrically conductive epoxy or with a eutectic solder preform. However, tin rich solders will scavenge gold from the bottom contacts and are not recommended. Indalloy or 80/20, Au/Sn, solders are acceptable. Maximum soldering temperature must be <300°C for <10 sec. These chips are designed to be inserted onto hard or soft substrates with the junction side down. They should be mounted onto silkscreened circuits using electrically conductive Ag epoxy, approximately 1-2 mils in thickness and cured at approximately 90°C to 150°C per manufacturer's schedule. For extended cure times, >30 minutes, temperatures must be kept below 200°C. The die can also be assembled using non conductive epoxy with the junction side up, and wire or ribbon bonds made to the pads.

#### **Circuit Mounting Dimensions (Inches)**

# Данный компонент на территории Российской Федерации

Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

# http://moschip.ru/get-element

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
