# High-Performance Optical & Copper Products

Semtech designs the industry's most innovative optical, analog and mixed-signal semiconductor solutions to serve the rising global demand for high-speed data transmission products.

Semtech is an active contributor to networking standards development and has shipped over half a billion optical ICs. This combination of real-world experience and industry leadership enables us to deliver best-in-class solutions for our customers' designs.

Semtech also offers one of the industry's most comprehensive portfolios of optical transceiver IC products ranging from 100Mbps to over 100Gbps, supporting key industry standards such as Fibre Channel, InfiniBand®, Ethernet, CPRI, PON, SONET, and PCI Express®. Semtech is also investing in leading-edge technologies to enable communication systems at 400Gbps and beyond.

For our optical component and module customers, this highly differentiated set of products provides a unique roadmap that improves performance and reliability, while simplifying design, lowering costs and speeding time-to-market.

For systems designers and manufacturers working on the next generation of high-speed networks, Semtech's multi-lane and multi-rate 10Gbps-100Gbps backplane solutions provide cost-effective, low power, high-performance products to enable next-generation networks.

## Enabling High Performance, High-Speed

- Class leading IC solutions for 25G and 100G applications, including SFP28, QSFP28, CFPx, and AOCs
- Full portfolio of integrated solutions for all PON applications and complete reference designs
- Semtech's ClearEdge® CDR with low power, reference-free technology
- Transimpedance amplifiers (TIAs) that exceed the IEEE Stressed Receiver Sensitivity (SRS) specifications
- High performance, low power laser drivers
- Receive Optical Sub-Assembly (ROSA) based on Semtech's Rchip technology
- Industry's first single-chip 10G PON transceivers for symmetric and asymmetric applications
- Industry's first quad CDRs enabling long reach Infiniband® QDR, 40GbE and 100GbE applications
- Full portfolio of integrated solutions to address all SFP+ and XFP modules
- Dual-lane CDRs (Tx/Rx) with integrated DML or EML driver
- Protocol-independent repeaters/redrivers
- Limiting amplifiers (LA) that provide wideband, low noise post-amplification
- SFP+ reference design kits for optical modules to decrease design time

## Building the Future Together

As networking requirements continue to evolve, so will Semtech, by working with customers to provide solutions for tomorrow's networking challenges. One thing that won't change, however, is Semtech's commitment to being a reliable supplier and providing innovative approaches that deliver unrivaled performance for the most sophisticated applications.

# Technology Leadership for the Future of Optical Communications

## TECHNOLOGIES

### ClearEdge® CDRs

- Market leader in CDRs
- Reference-free operation
- Integrated solutions enable best performance and lowest power

### TIAs

Industry leading performance and proven reliability with over 400 million sold

### Laser Drivers & Limiting Amplifiers

High-performance integrated solutions for single- and multi-channel applications

### ROSAs

Best-in-class sensitivity, based on our patented Rchip technology

## MARKETS

### 100G Ethernet

Solutions for QSFP28 and CFPx modules as well as 100G AOCs

### 25G Ethernet

Market leading IC and ROSA solutions for SFP28 modules and AOCs

### 10G Ethernet & CPRI

- Complete portfolio of module IC and backplane solutions
- Solutions for XFP, SFP+, QSFP+ modules

### PON/FTTH

- Industry's first fully integrated 10G PON solutions
- Highly integrated chipset solutions for EPON & GPON ONU/OLT

### 16G Fibre Channel

Industry's first complete integrated IC solution for 16G Fibre Channel

# New Products

---

## **GN2105: Low-Power Quad 25Gbps CDR with DML Driver**

- Fully integrated Quad DML driver and industry-leading ClearEdge® CDR
- Enables <3.5W 100G QSFP28 PSM4 to LR4 designs, when coupled with GN2104S or GN2110
- DC Coupled DML driver allows for Chip-on-board and Passive DML TOSA applications
- Proprietary DML compensation technology maximizes performance with multiple DML laser vendors

## **GN2147 / GN2148 / GN2149: Low-Power Dual 24-28Gbps ClearEdge® CDRs with Integrated VCSEL Driver and TIA**

- GN2147 offers industry's higher integrated with Dual CDR + VCSEL Driver + TIA integrated in a compact single die size of 1.7x3.0mm
- GN2148 and GN2149 offers customer flexibility with CDR + VCSEL integration and CDR + TIA integration, respectively in a small die size of 1.2x2.9mm
- Enables low cost, high-performance 25Gbps AOCs and SFP28 SR modules

## **GN1159: 1.0 to 12.5Gbps LR Transceiver Chip with Digital Diagnostics**

- Based on industry proven GN1157/B
- Full suite of flexible Digital Diagnostics modes
- Advanced eye-shaping features
- Up to 92mA modulation and 120mA bias current

## **GN2104S: Low-Power Quad ClearEdge® CDR 25-28Gbps**

- Low power dissipation (340mW typical)
- Compact footprint ideal for QSFP28 and CFP4 modules

## **GN2106PS: Low-Power Quad ClearEdge® CDR with integrated EML drivers 25-28Gbps and Integrated Bias T Components**

- Fully monolithically integrated quad EML Driver and ClearEdge® CDR with integrated Bias T components to allow easier layout
- Provides reference-free signal conditioning for CFP4 and QSFP28 modules

## **GN2504: Low-Power Quad ClearEdge® CDR 25-28Gbps Reference-Free Repeater**

- Provides reference-free signal conditioning on backplanes and linecards
- Low power dissipation (600mW typical)

## **GN2108B: Quad 24-28Gbps Transmitter Array for SR4**

- Integrated ClearEdge® CDR and VCSEL array driver
- Enable extended reach up to 300m on OM4, and 150m on OM3

## **GN2110B: Quad 24-28Gbps Receiver Array for SR4**

- Integrated TIA array and ClearEdge® CDR offers industry leading performance for both 850nm and 1310nm applications
- 250um channel pitch

## **GN3358: High Gain 11.3Gbps Limiting APD ROSA**

- High output swing with pre-emphasis ideal for non-retimed applications
- Low power dissipation, best-in-class sensitivity
- Available with threshold adjust

## **GN3270: 28Gbps Limiting PIN ROSA**

- Low power dissipation (105mW)
- For 25GbE SFP28 applications

## **GN25L98: ONU Transceiver IC**

- PON Combo IC with integrated APD bias controller
- Single BOM can accommodate many different BOSA suppliers
- Programmable APD fault detection, shutdown and recovery

## **GN7151: 10G PON OLT EML/CDR Driver**

- 140mA bias current
- Low power
- 2.5V modulation voltage

## **GN28L95: 10G PON Combo IC**

- 2.5G dual loop Tx, 10G Rx
- BoB and module reference designs
- Low BOM cost

# Optical Applications

Semtech products offer a comprehensive selection of optical transceiver ICs and components for all 1-10GbE, CPRI, OC-192, and 100G module form factors.

# Laser Drivers and Limiting Amplifiers

High-performance laser drivers and limiting amplifiers for optical communications.

## APPLICATIONS:

- 10G EPON, XG-PON1 and XG-PON2
- 8G Fibre Channel
- 9.95Gbps OC-192 and 10.70Gbps OC-192 with FEC
- 10.3Gbps Ethernet
- 10.52Gbps Fibre Channel
- 11.1Gbps Ethernet over SONET/SDH
- 11.3Gbps Fibre Channel with Forward Error Correction
- 40G QSFP+ modules
- 6Gbps and 10Gbps CPRI modules for wireless front haul
- 100Gbps Ethernet

## LIMITING AMPLIFIERS:

### NT20045

Low cost 3.0V to 5.5V, 200Mbps limiting amplifier for SONET, SDH, ESCON and Fast Ethernet applications over optical fiber.

### NT24L73

1.25Gbps CMOS limiting amplifier with CML data outputs and signal status in an MSOP package.

## LASER DRIVERS:

### GN1185

High-performance Quad 25–28Gbps DML driver for active TOSAs targeting 100G applications.

### GN1181

High-performance 28G single channel DML driver for active TOSAs.

### NT20042

Low cost 3.3V/5.0V 300 Mbps LED driver for SONET/SDH, ESCON and Fast Ethernet applications over optical fiber.

### NT22L33

3.3V/5.0V CMOS laser driver for data rates of 125Mbps to 1.25Gbps.

### GN1160, GN1161, GN1163

Very low power laser drivers for DFB/VCSEL applications, RSSI feature for compatibility with our high gain ROSA's, enabling SFP+ modules without limiting amplifiers.

### GN1190

Quad VCSEL driver for parallel and multi-channel datacom & telecom modules. Low power consumption, 210mW typical for 4 channels. Use with GN1090 quad TIA.

## LIMITING AMPLIFIERS

| Part Number | Overview              | Data Rate (Gbps) | Gain (dB) | BW    | Supply (V) | Noise Figure (uV) | Applications        |
|-------------|-----------------------|------------------|-----------|-------|------------|-------------------|---------------------|
| NT20045     | 200Mbps Limiting Amp  | 0.2              | 60        | 0.125 | 3.3/5.0    | 80                | OC-3, Fast Ethernet |
| NT24L73     | 1.25Gbps Limiting Amp | 1.25             | 46        | 0.938 | 3.3        | 300               | OC-3, OC-12, GbE    |

## LASER DRIVERS

| Part Number | Overview                     | Data Rate (Gbps) | Max Mod / Bias Current (mA) | Supply (V)     | Pkg          | Applications                          |
|-------------|------------------------------|------------------|-----------------------------|----------------|--------------|---------------------------------------|
| NT20042     | 300Mbps LED Driver           | 0.3              | 100                         | 3.3/5.0        | QSOP-16      | OC-3, Fast Ethernet                   |
| NT22L33     | 1.25Gbps FP/DFB Laser Driver | 1.25             | 70/80                       | 3.3/5.0        | QFN-24 (4mm) | OC-3, OC-12, GbE                      |
| GN1160      | DFB Driver                   | to 11.3          | 90/120                      | 3.3 (Opt. 2.8) | QFN-28       | 10GE SFP+ 10GBASE-LR                  |
| GN1163*     | DFB Driver                   | to 11.9          | 90/120                      | 3.3 (Opt. 2.8) | QFN-24       | QSFP+ 10GBASE-LR                      |
| GN1161*     | VCSEL Driver                 | to 11.3          | 20/15                       | 3.3 (Opt. 2.8) | QFN-28       | 10GbE SFP+ 10GBASE-SR                 |
| GN1190      | Quad VCSEL Driver            | to 14.3          | 12/12                       | 3.3            | Bare Die     | 40Gbps Ethernet, Infiniband, QSFP+    |
| GN1181*     | DFB Driver                   | 25-28            | 55m/70                      | 2.3/3.3        | Bare Die     | 25GbE and 100GbE Ethernet active TOSA |
| GN1185*     | Quad DFB driver              | 25-28            | 55m/70                      | 2.3/3.3        | Bare Die     | 100GbE Ethernet active TOSA           |

# TIA's

Wideband, low noise transimpedance amplifiers (TIAs) for your optical communication applications.

Semtech offers a portfolio of fully integrated BiCMOS and pure CMOS transimpedance amplifiers providing wideband, low noise pre-amplification of a current signal from a PIN photodiode or APD.

Semtech's TIAs offer best-in-class performance in limiting, linear or automatic gain control versions for use in high-performance optical receivers operating from 155Mbps to 28Gbps.

## FEATURES

- Wideband, low noise
- Limiting, linear and AGC versions
- Fully integrated on-chip de-coupling for low cost and best performance

## APPLICATIONS

- ITU/IEEE-based transmission systems
- 10G and 100G Ethernet
- SONET/SDH based transmission systems, test equipment and optical modules from OC-3 to OC-192
- 8G and 16G Fibre Channel
- Serial data systems up to 28Gbps
- PON/FTTH systems – BPON, EPON, GPON, 10GEPON and XG-PON
- 6G and 1–12G CPRI modules for wireless front haul
- 100Gbps client side modules

## GN1081, GN1084, GN1085

1x28Gbps and 4x28Gbps limiting TIA optimized for 100GBASE-LR4 applications.

## GN7068

10Gbps limiting TIA designed for APD applications such as ROSAs for 10G PON OLT and 10GBASE-ZR transceivers modules.

## GN7050, GN7051, GN7052, GN7053

Limiting TIA designed specifically for 1G EPON, 1G GPON, 2.5G XG-PON and 10G EPON OLT applications.

## GN1068

14Gbps multi-rate limiting TIA providing high gain and wideband performance for use in Ethernet and 16G Fibre Channel applications.

## GN1056

10Gbps linear TIA for high-performance APD applications such as ultra-long haul telecom and submarine applications.

## GN1058

10Gbps high gain TIA optimized for applications requiring AGC, such as 10GBASE-LRM and DWDM receivers for low OSNR environments.

## GN1090

Quad 14.5Gbps array receiver for parallel and multi-channel datacom and telecom modules. Advanced receiver design for excellent optical performance and very low power consumption (240mW total for 4 channels). Use with GN1190 Quad VCSEL Driver.

## NT25L55

2.5Gbps Super TIA for GPON ONU with high sensitivity better than -30dBm over all conditions.

**NT25L51**

2.5Gbps CMOS TIA for FTTH and Telecom Fiber transceiver applications with automatic gain control enabling over 27dB of dynamic operating range.

**NT24L55**

Super high sensitivity, high-performance CMOS 1.25Gbps TIA with 35dB of dynamic operating range designed for FTTH applications such as GEAPON transceivers and long haul telecom/datacom applications.

**NT24L50**

1.25Gbps high sensitivity TIA with automatic gain control for FTTH and Datacom Fiber transceiver applications.

**NT23L50**

622Mbps high sensitivity TIA for FTTH and Telecom Fiber transceiver applications.

**NT20R67**

Low cost 3.3V to 5.0V CMOS PIN TIA with automatic gain control and more than 43dB dynamic range for Optical Fiber applications up to 200Mbps.

**TIA's**

| Part Number | Overview                          | Data Rate (Gbps)      | Gain (kΩ)          | BW (GHz)            | Supply (V) | Noise  | Applications  |
|-------------|-----------------------------------|-----------------------|--------------------|---------------------|------------|--------|---|
| NT20R67     | 155Mbps AGC TIA                   | 0.155                 | 63                 | 0.165               | 3.3/5.0    | 11nA   | OC-3, Fast Ethernet                                 |
| NT20067     | 155Mbps AGC TIA                   | 0.155                 | 23                 | 0.165               | 3.3/5.0    | 11nA   | OC-3, Fast Ethernet                                 |
| NT23L50     | 622Mbps AGC TIA                   | 0.622                 | 50                 | 0.32                | 3.3        | 60nA   | OC-12, BPON   |
| NT24L50     | 1.25Gbps AGC TIA                  | 1.25                  | 25                 | 0.75                | 3.3        | 92nA   | GbE, EPON   |
| NT24L55     | 1.25Gbps High Sensitivity AGC TIA | 1.25                  | 46                 | 0.75                | 3.3        | 74nA   | EPON  |
| NT25L51     | 2.5Gbps AGC TIA                   | 2.5                   | 8                  | 1.7                 | 3.3        | 230nA  | OC-48, GPON (APD)                                   |
| GN25L53*    | 3.1Gbps AGC TIA                   | 3.1                   | 5.5                | 1.9                 | 3.3        | 335nA  | CPRI, GPON, OC-48 (APD)                             |
| NT25L55*    | 2.5Gbps High Sensitivity AGC TIA  | 2.5                   | 21                 | 1.4                 | 3.3        | 87nA   | GPON (PD)   |
| NT28L52*    | 10G Limiting                      | to 10.3               | 2.35               | 7                   | 3.3        | 1.2μA  | PON, 10GBASE-SR                                     |
| GN1056      | 10G Linear                        | to 11.3               | 500/1              | 12                  | 3.3        | 1μA    | OC-192  |

# Transceiver ICs (LD & LA)

High-performance laser drivers and limiting amplifiers for optical communications.

## GN1157/57B/59/58

Semtech's latest, lowest power transceiver IC for SFP+ LR/SR applications with integrated APC and advanced eye shaping features.

## GN28L95

Combined 10Gbps limiting post amplifier and 2.5Gbps burst mode laser driver for cost critical 10GEAPON and XG-PON asymmetric applications. GN28L95 features robust automatic ER control and integrated APD controller.

## GN25L96, GN25L96

2.5Gbps CMOS programmable burst mode laser driver and post amplifier optimized for wide laser compatibility and TIA sensitivity.

## GN25L98

2.5Gbps CMOS burst mode laser driver and limiting post amplifier with automatic ERC control and integrated APD controller.

## GN7354, GN7355

10G EPON transceiver for next-generation PON systems. The GN7355 combines a 10G burst mode laser driver with a receive CDR and is targeted at 10G EPON symmetric applications. The GN7354 is a pin-for-pin compatible, de-rated version of the GN7355 intended to address the 1.25Gbps and 2.5Gbps transmit data rate, and cost pressures of the 10Gbps asymmetric EPON and XG-PON applications.

## GN1411A/12B/44/44S

The GN1411A/GN1412A are highly-integrated, low-power, small footprint transceivers that are ideal for SFP+ LR/ER optical modules.

# ClearEdge™ CDRs

Semtech's multi-lane signal conditioners based on our reference-free ClearEdge™ CDR platform with integrated drivers and TIAs offer the lowest power, smallest footprint solutions for XFP, retimed SFP+, 25G and 100G modules, and AOCs.

## ENABLING NEXT-GENERATION 100G MARKETS

Semtech 100G ClearEdge™ CDR portfolio integrates our proven Quad 24G-28G CDRs with VCSEL, DML or EML drivers for transmit with TIAs for receive, targeting both short reach and long reach modules. Our proven integration and the industry's lowest power and superior performance simplifies 100G designs and lowers cost.

## ENABLING SFP28 AND 25GBS AOCs

The GN2147 dual CDR with integrated VCSEL driver and TIA enables high-performance and low cost SFP28 SR modules and AOCs. The single chip design and advanced transmit compensation enables low cost solutions using a single lens design as well as low bandwidth VCSELs for exceptional BOM savings.

## FEATURE SET FOR DWDM AND TUNABLE APPLICATIONS

The GN2040 family has a rich feature set to enable optimal performance in DWDM and Tunable applications. The features include slice level adjust, programmable peaking on the receive path input and sampling clock phase adjust.

## LOW COST, SMALL FOOTPRINT SOLUTION

Semtech's fully integrated CDR solutions including the GN2040 family and GN2017A enable high density module designs including DWDM, Fibre Channel and Tunable applications. Package solutions at 5x5mm 32-QFN and even as small as 4x4mm 32-QFN are available with full feature sets.

# ROSAs

Best-in-class receive optical sub-assemblies (ROSAs) based on patented Rchip technology.

Semtech's complete line of PIN and APD ROSA products spans 1310nm nanometer (nm) to 1550nm including limiting, linear and automatic gain control (AGC) functionality. Our PIN ROSAs operate at  $+3.3V \pm 10\%$  and from  $-40^{\circ}C$  to  $+85^{\circ}C$ , with highly accurate RSSI functionality and industry best dynamic range. The ROSA products feature patented Rchip packaged in a fully compliant SC or LC type optical subassembly and are available with optional flex circuits.

Super high gain Rchip ROSAs deliver  $35k\Omega$  of gain that eliminates the cost and power of the limiting amplifier for SFP+ applications.

## FEATURES:

- Best-in-class stressed receiver sensitivity
- High gain to ensure exceptional crosstalk performance within the module
- Patented Rchip technology to ensure maximum module manufacturing yield
- Super high gain delivers most integrated, lowest power SFP+ solution

## APPLICATIONS:

- 10GBASE-SR
- 10GBASE-LR
- 10GBASE-ER
- 10GBASE-LRM
- OC-192 SR-1
- OC-192 IR-2
- 10G EPON
- 80km
- DWDM
- 8GFC & 10GFC
- 25G Ethernet

## GN3050

10km limiting ROSA provides excellent performance achieving  $-21dBm$  unstressed sensitivity. Ideal for 10GBASELR and SR1.

## GN3250

10/40 km XMD compatible limiting ROSA provides excellent  $-21dBm$  unstressed sensitivity and high ORL for 10GBASE-ER and IR-2 applications.

## GN3052

AGC ROSA for 10GbE LRM and linear applications. Interoperability with all leading EDC solutions for LRM.

## GN3357

11.3Gbps APD ROSA with high gain linear AGC TIA for both 80km limiting and DWDM applications requiring excellent OSNR performance.

## GN3257

10/40km linear AGC ROSA offering excellent performance in low-OSNR environments, coupled with low power consumption.

## GN3268

10/40km XMD compatible low power (94mW) limiting ROSA.

## GN3270

A limiting 25Gbps PIN ROSA in a TO-46 style co-axial package, with excellent sensitivity performance coupled with low power consumption.

GN3250  
ROSA

# Copper Applications

Semtech offers a comprehensive selection of IC solutions for high speed serial line card and backplane communication applications.

# Backplane & Linecard Signal Conditioners

Semtech's multi-channel signal conditioners enhance the reach and robustness of high-speed serial links by compensating for transmission losses and re-setting the crosstalk and jitter budgets.

## HIGH LEVEL OF INTEGRATION AND SMALL FOOTPRINT

Semtech's backplane and linecard signal conditioners are ideal for small form factor modules or dense backplane/linecard applications.

## FULL PORTFOLIO

Semtech products offer solutions for Ethernet, Infiniband, Fibre Channel and PCI Express. Solutions are available with and without CDR functionality.

## DRIVE LONG BACKPLANES OR CABLES

A combination of Equalizer, DFE and ClearEdge™ CDR technology allows for an optimal solution to drive long, dense backplanes or cables at high speeds.

## LOW POWER

Semtech's ClearEdge™ CDR products require the lowest power in the industry, a key factor as densities increase.

## RESET THE JITTER AND CROSSTALK BUDGETS

Using CDRs will reset the jitter budget, substantially increasing the robustness of the system and allowing for design flexibility. Using CDRs in multi-channel systems will also reset the crosstalk budget, an increasing concern at higher data rates.

## Multi-Lane Signal Conditioners

| Part Number    | Data Rate (Gbps)            | Lanes | CDR | Ref Clock | Input Stage            | De-emphasis | Supply (V) | Pkg     | Applications   |

# Optical Module Reference Design Kit

Improve the performance and time to market of your SFP+ design with Semtech Optical Module Reference Design Kits.

## FAST TIME-TO-MARKET

Semtech's reference design kits offer training through schematics, layout files and a design guide as well as prompt support from our experienced applications engineers, reducing both design costs and time to market. This type of system is currently executed in the FTTx market, as the ability to reuse the 10G symmetric SFP+ design to address the 10G asymmetric market is incorporated.

## BROAD RANGE OF REFERENCE DESIGNS AVAILABLE

Reference design kits are offered to cover a wide variety of SFP+ applications, including symmetrical and asymmetrical PON, and 10GbE SR and LR applications.

For Ethernet SFP+, designs are available for both the traditional architecture (including a LA in the receive chain), as well as a new LA-free architecture enabled by Semtech's High Gain ROSA portfolio.

### Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
