

## PRELIMINARY Product Specification

### RoHS-6 Compliant I-Temp 40km Multi-Rate XFP Optical Transceiver FTLX1612M3BTL

#### PRODUCT FEATURES

- Supports 9.95Gb/s to 11.3Gb/s bit rates
- Hot-pluggable XFP footprint
- Maximum link length of 40km
- RoHS-6 Compliant (lead-free)
- Temperature-stabilized 1550nm 800 ps/nm EML transmitter
- Duplex LC connector
- Power dissipation < 3.5W
- Built-in digital diagnostic functions
- Industrial temperature range: -40°C to 85°C
- Bail release mechanism

#### APPLICATIONS

- SONET OC-192 IR-2  
SDH STM S-64.2b  
SONET OC-192 IR-3  
SDH STM S-64.3b  
ITU-T G.709
- 10GBASE-ER/EW  
10GBASE-ER/EW + FEC
- 40km 10G Fibre Channel  
40km 10G Fibre Channel + FEC

Finisar's industrial temperature 40km FTLX1612M3BTL Small Form Factor 10Gb/s XFP transceivers comply with the current XFP Multi-Source Agreement (MSA) Specification<sup>1</sup>. They comply with SONET OC-192 IR-2, OC-192 IR-3, SDH STM S-64.2b, STM S-64.3b as well as with 10-Gigabit Ethernet 10GBASE-ER/EW per IEEE 802.3ae and 40km 10G Fibre Channel applications. Digital diagnostics functions are available via a 2-wire serial interface, as specified in the XFP MSA. The transceiver is RoHS compliant and lead free per Directive 2002/95/EC<sup>3</sup>, and Finisar Application Note AN-2038<sup>4</sup>.

| 27  |           | GND                                                                                         | Module Ground                                                                                                                        | 1    |
| 28  | CML-I     | TD-                                                                                         | Transmitter inverted data input                                                                                                      |      |
| 29  | CML-I     | TD+                                                                                         | Transmitter non-inverted data input                                                                                                  |      |
| 30  |           | GND                                                                                         | Module Ground                                                                                                                        | 1    |

**Notes:**

1. Module circuit ground is isolated from module chassis ground within the module.
2. Open collector; should be pulled up with 4.7k – 10kohms on host board to a voltage between 3.15V and 3.6V.

Diagram of Host Board Connector Block Pin Numbers and Names

## II. Absolute Maximum Ratings

| Parameter                  | Symbol          | Min  | Typ | Max | Unit | Ref. |
|----------------------------|-----------------|------|-----|-----|------|------|
| Maximum Supply Voltage 1   | Vcc3            | -0.5 |     | 4.0 | V    |      |
| Maximum Supply Voltage 2   | Vcc5            | -0.5 |     | 6.0 | V    |      |
| Storage Temperature        | T <sub>S</sub>  | -40  |     | 85  | °C   |      |
| Case Operating Temperature | T <sub>OP</sub> | -40  |     | 85  | °C   |      |

**III. Electrical Characteristics ( $T_{OP} = -40$  to  $85^{\circ}\text{C}$ ,  $V_{CC5} = 4.75$  to  $5.25$  Volts)**

| Parameter                           | Symbol                 | Min              | Typ     | Max                 | Unit | Ref. |
|-------------------------------------|------------------------|------------------|---------|---------------------|------|------|
| Main Supply Voltage                 | Vcc5                   | 4.75             |         | 5.25                | V    |      |

**Notes:**

- Maximum total power value is specified across the full temperature and voltage range.
- After internal AC coupling.
- Or open circuit.
- Into 100 ohms differential termination.
- 20 – 80 %
- Loss Of Signal is open collector to be pulled up with a 4.7k – 10kohm resistor to 3.15 – 3.6V. Logic 0 indicates normal operation; logic 1 indicates no signal detected.
- Per Section 2.7.1. in the XFP MSA Specification<sup>1</sup>.

**IV. Optical Characteristics ( $T_{OP} = -40$  to  $85\text{ }^{\circ}\text{C}$ ,  $V_{CC5} = 4.75$  to  $5.25$  Volts)**

Please note that the Transmitter of the FTLX1612M3BTL becomes operational within 5 seconds of power-up. This is due to the time required for the EML to reach its optimum operating temperature.

| Parameter                                      | Symbol      | Min  | Typ | Max   | Unit  | Ref. |

| Maximum Input Power                            | $P_{MAX}$   | -1   |     |       | dBm   |      |
| Optical Center Wavelength                      | $\lambda_C$ | 1270 |     | 1600  | nm    |      |
| Receiver Reflectance                           | $R_{TX}$    |      |     | -27   | dB    |      |
| Path penalty at 40km                           |             |      |     | 2     | dB    | 7    |
| LOS De-Assert                                  | $LOS_D$     |      |     | -22   | dBm   |      |
| LOS Assert                                     | $LOS_A$     | -28  |     |       | dBm   |      |
| LOS Hysteresis                                 |             | 0.5  |     |       | dB    |      |

Notes:

1. ER = 8.2dB minium for data rates 9.9Gb/s to 10.7Gb/s.
2. Guaranteed minimum OMA for 9.9Gb/s - 11.3 Gb/s.
3. Measured with a host jitter of 50 mUI peak-to-peak.
4. Measured with a host jitter of 7 mUI RMS.
5. Measured with worst ER; BER<10<sup>-12</sup>; PRBS31. Equivalent to -14.3 dBm OMA at ER = 8.2 dB.
6. Per IEEE 802.3ae. Equivalent to -14.3 dBm average power at Infinite ER.
7. Dispersion penalty is measured in loopback using 18 ps/(nm\*km) fiber (SMF-28).

## V. General Specifications

| Parameter                  | Symbol    | Min  | Typ | Max        | Units | Ref. |
|----------------------------|-----------|------|-----|------------|-------|------|
| Bit Rate                   | BR        | 9.95 |     | 11.3       | Gb/s  | 1    |
| Bit Error Ratio            | BER       |      |     | $10^{-12}$ |       | 2    |
| Max. Supported Link Length | $L_{MAX}$ |      | 40  |            | km    | 1    |

### Notes:

- SONET OC-192 IR-2, OC-192 IR-3, 10GBASE-ER/EW, 10G Fibre Channel, ITU-T G.709, 10GBASE-ER/EW + FEC, 10G Fibre Channel + FEC
- Tested with a  $2^{31} - 1$  PRBS

## VI. Environmental Specifications

Finisar XFP transceivers have an operating temperature range from -40°C to +85°C case temperature.

| Parameter                  | Symbol    | Min | Typ | Max | Units | Ref. |
|----------------------------|-----------|-----|-----|-----|-------|------|
| Case Operating Temperature | $T_{op}$  | -40 |     | 85  | °C    |      |
| Storage Temperature        | $T_{sto}$ | -40 |     | 85  | °C    |      |

## VII. Regulatory Compliance

Finisar XFP transceivers are Class 1 Laser Products. They are certified per the following standards:

| Feature           | Agency   | Standard                                                                                               | Certificate Number |
|-------------------|----------|--------------------------------------------------------------------------------------------------------|--------------------|
| Laser Eye Safety  | FDA/CDRH | CDRH 21 CFR 1040 and Laser Notice 50                                                                   | TBD                |
| Laser Eye Safety  | TÜV      | EN 60825-1: 1994+A11:1996+A2:2001<br>IEC 60825-1: 1993+A1:1997+A2:2001<br>IEC 60825-2: 2000, Edition 2 | TBD                |
| Electrical Safety | TÜV      | EN 60950                                                                                               | TBD                |
| Electrical Safety | UL/CSA   | CLASS 3862.07<br>CLASS 3862.87                                                                         | TBD                |

Copies of the referenced certificates are available at Finisar Corporation upon request.

## VIII. Digital Diagnostics Functions

As defined by the XFP MSA<sup>1</sup>, Finisar XFP transceivers provide digital diagnostic functions via a 2-wire serial interface, which allows real-time access to the following operating parameters:

- Transceiver temperature
- Laser bias current
- Transmitted optical power
- Received optical power
- Transceiver supply voltage

It also provides a sophisticated system of alarm and warning flags, which may be used to alert end-users when particular operating parameters are outside of a factory-set normal range.

The operating and diagnostics information is monitored and reported by a Digital Diagnostics Transceiver Controller (DDTC) inside the transceiver, which is accessed through the 2-wire serial interface. When the serial protocol is activated, the serial clock signal (SCL pin) is generated by the host. The positive edge clocks data into the XFP transceiver into those segments of its memory map that are not write-protected. The negative edge clocks data from the XFP transceiver. The serial data signal (SDA pin) is bi-directional for serial data transfer. The host uses SDA in conjunction with SCL to mark the start and end of serial protocol activation. The memories are organized as a series of 8-bit data words that can be addressed individually or sequentially. The 2-wire serial interface provides sequential or random access to the 8 bit parameters, addressed from 000h to the maximum address of the memory.

For more detailed information, including memory map definitions, please see the XFP MSA documentation<sup>1</sup>.

## IX. Mechanical Specifications

Finisar's XFP transceivers are compliant with the dimensions defined by the XFP Multi-Sourcing Agreement (MSA).

XFP Transceiver (dimensions are in mm)

## X. PCB Layout and Bezel Recommendations

### XFP Host Board Mechanical Layout (dimensions are in mm)

### XFP Detail Host Board Mechanical Layout (dimensions are in mm)

## Данный компонент на территории Российской Федерации

**Вы можете приобрести в компании MosChip.**

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
