

Battery Disconnect Switch

FEATURES

- 6- to 18-V Operation
- Separate Logic Voltage Input
- Undervoltage Lockout (UVL) @ $V_L = 3\text{ V}$
- Shutdown Control Capability
- Safe Power Down

DESCRIPTION

The Si9717CY is a reverse blocking switch for battery disconnect applications. It is an integrated solution for multiple battery technology designs or designs that require isolation

from the power bus during charging. The Si9717CY is available in a 16-pin SOIC package and is rated for the commercial temperature range of 0 to 70°C.

Notes:

a. Room = 25°C, Full = as determined by the operating temperature suffix.

b. The algebraic convention whereby the most negative value is a minimum and the most positive a maximum, is used in this data sheet.

c. Typical values are for DESIGN AID ONLY, not guaranteed nor subject to production testing.

d. Tested at room temperature, high temperature guaranteed by statistical data correlation techniques.
