## Precision modular connectors to suit your application

Since its creation in Switzerland in 1946 the LEMO Group has been recognized as a global leader of circular Push-Pull connectors and connector solutions. Today LEMO and its affiliated companies, REDEL and COELVER, are active in more than 80 countries with the help of over 40 subsidiaries and distributors.

## Over 5'000 REDEL connectors

The modular design of the REDEL range provides over 5'000 connectors from  $\varnothing$  14 mm to  $\varnothing$  21 mm, capable of handling cable diameters up to 9.5 mm and up to 32 contacts.

This vast portfolio enables you to select the ideal connector configuration to suit almost any specific requirement in most markets, including medical devices, test and measurement instruments, machinery, audio video broadcast, telecommunications and military.

## REDEL's Push-Pull Self-Latching Connection System

This self-latching system is renowned worldwide for its easy and quick mating and unmating features. It provides absolute security against vibration, shock or pull on the cable, and facilitates operation in a very limited space.

## UL Recognition

REDEL connectors are recognized by the Underwriters Laboratories (UL). The approval of the complete system (REDEL connector, cable and your equipment) will be easier because REDEL connectors are approved.

## CE Marking

CE marking  means that the appliance or equipment bearing it complies with the protection requirements of one or several European safety directives.

CE marking  applies to complete products or equipment, **but not to electromechanical components, such as connectors.**

## RoHS

REDEL connector specifications exceed the requirements of the RoHS directives (2011/65/EU) of the European Parliament and the latest amendments. This directive specifies the restrictions of the use of hazardous substances in electrical and electronic equipment marketed in Europe.

## REDEL connector range

The REDEL connectors are plastic Push-Pull connectors. These circular plastic connectors are especially adapted for applications such as medical electronics and test & measurement. REDEL offers a wide choice of connectors with various contact configurations: multipole contacts, coaxial, fibre optics and fluidic connectors. In addition, a range of one time use connectors and connectors for mains power is available. The REDEL connectors are available in 3 sizes, depending on the cable diameter.

## Features & Benefits

- Aesthetically pleasing design
- Lightweight
- Plastic shell made of PSU or PEI
- Extensive sterilisation (over 100 cycles)
- Excellent electrical safety (touch & scoop proof)
- Wide choice of colours for easy identification (grey, blue, yellow, black, red, green and white)
- Large choice of keying to avoid cross mating
- Various contact types: solder, crimp, print and elbow print 90°
- Disposable models

## Applications

- Medical electronics
- Test and measurement
- Industrial electronics
- Automotive

**1P SERIES**

## 1P Series

A well proven connector of a small size to accommodate cable diameter up to 6.5 mm and allow up to 14 solder contacts. Top quality lightweight and rugged materials have been chosen to optimize most applications. Polysulfone (PSU), UL certified as autoextinguishable, can be sterilized by gas or by steam. The contacts are gold-plated over copper and nickel to ensure at least 1000 mating/unmating cycles without significantly affecting the electrical characteristics. A keying system combined with colour coding can be incorporated on most connector models to assist in the prevention of mismatching. Colour coding of the plug collet nut and socket flange will give an instant visual indication of connector compatibility.

## Part numbering system

**PAG.M0.2GL.AC39A** Straight plug with cable collet and alignment key (G), multipole type with 2 male contacts to solder, grey PSU outershell, PEEK insulator, collet for a cable ø 2.7 to 3.9 mm and blue collet nut.

**PRG.M0.2GL.LC39A** Free socket with cable collet and alignment key (G), multipole with 2 female contacts to solder, grey PSU outershell, PEEK insulator, collet for a cable ø 2.7 to 3.9 mm and blue collet nut.

**PKG.M0.2GL.LA** Fixed socket with two nuts and alignment key (G), multipole type with 2 female contacts to solder, grey PSU outershell, PEEK insulator, and blue plastic front nut.

**Note:** 1) for extensive steam sterilization we recommend Polyetherimide ULTEM® (PEI).

2) contact available only with H and J keying and with 8, 10 or 14 contacts (inverted contacts).

3) collet nut and front nut colour table for PT● and PD● models.

## Standard models (IP50)

### Fixed socket

- 1 Outershell
- 2 Insulator
- 3 Female contact
- 4 Hexagonal nut
- 5 Front nut

### Straight plug

- 1 Outershell
- 2 Insulator
- 6 Latch sleeve
- 7 Male contact
- 8 Cable collet
- 9 Backnut

| Characteristics                                                     | Value      | Standards            |
|---------------------------------------------------------------------|------------|----------------------|
| Average retention force when pulling on the cable 1N = 0.102 kg     | 90 N       | IEC 60512-8 test 15f |
| Cable retention force (depends on cable construction) 1N = 0.102 kg | 50 - 150 N | IEC 60512-9 test 17c |

| Characteristics                 | Value         | Standards           |
|---------------------------------|---------------|---------------------|
| Endurance (latching)            | > 1000 cycles | IEC 60512-5 test 9a |
| Working temperature range (PSU) | -50/+150°C    | –                   |
| Working temperature range (PEI) | -50/+170°C    | –                   |

### PAG Straight plug, key (G) or keys (A, B, C, H and J), with cable collet

| Part Number      | Cable ø |     |
|------------------|---------|-----|
|                  | min     | max |
| PAG.M●.●GL.AC39G | 2.7     | 3.9 |
| PAG.M●.●GL.AC52G | 4.0     | 5.2 |
| PAG.M●.●GL.AC65G | 5.3     | 6.5 |

**Note:** replace ●.● by contact configuration (see page 19).

### PAG Straight plug, key (G) or keys (A, B, C, H and J), with cable collet and nut for fitting a bend relief

| Part Number       | Cable ø |     |
|-------------------|---------|-----|
|                   | min     | max |
| PAG.M●.●GL.AC39GZ | 2.7     | 3.9 |
| PAG.M●.●GL.AC52GZ | 4.0     | 5.2 |
| PAG.M●.●GL.AC65GZ | 5.3     | 6.5 |

**Note:** replace ●.● by contact configuration (see page 19).  
The bend relief must be ordered separately (see page 22).

**Note:** all dimensions are in millimeters

## PLG Fixed socket, key (G) or keys (A, B, C, H and J), nut fixing

Elbow socket models (IP50)

P

PPG Elbow socket, key (G) or keys (A, B, C), for printed circuit

| Part Number  | number of contacts |
|--------------|--------------------|
| PPG.M0.2GG.N | 2                  |
| PPG.M0.4GG.N | 4                  |
| PPG.M0.5GG.N | 5                  |
| PPG.M0.6GG.N | 6                  |
| PPG.M0.7GG.N | 7                  |
| PPG.M0.8GG.N | 8                  |
| PPG.M0.9GG.N | 9                  |
| PPG.M1.0GG.N | 10                 |

**Note:** only available with G or A, B, C keying. The insulator is made of PSU. Outershell material is grey or black PSU. For PCB drilling, see page 25.

PXG Elbow socket, key (G) or keys (A, B, C), with two nuts, for printed circuit

| Part Number   | number of contacts |
|---------------|--------------------|
| PXG.M0.2GG.NG | 2                  |
| PXG.M0.4GG.NG | 4                  |
| PXG.M0.5GG.NG | 5                  |
| PXG.M0.6GG.NG | 6                  |
| PXG.M0.7GG.NG | 7                  |
| PXG.M0.8GG.NG | 8                  |
| PXG.M0.9GG.NG | 9                  |
| PXG.M1.0GG.NG | 10                 |

**Note:** only available with G or A, B, C keying. The insulator is made of PSU. Outershell material is grey or black PSU. For PCB drilling, see page 25. Panel hole see page 24.

**Note:** all dimensions are in millimeters. For outershell in black PSU replace material code by «N».

## Disposable plug (limited use)

P J . M . A A . A T 3 8 B

### Fixed socket

- 1 Outershell
- 2 Latch sleeve
- 3 Male contact
- 4 Backshell

| Characteristics                 | Value     | Standards           |
|---------------------------------|-----------|---------------------|
| Endurance for PJ● (latching)    | 5 cycles  | IEC 60512-5 test 9a |
| Working temperature range (ABS) | -30/+90°C | –                   |
| Shell material                  | ABS       | –                   |

## PJG Straight disposable plug

| Part Number      | nb. of cts. | Test Voltage (kV rms) | Recommended Mating fixed socket part number |
|------------------|-------------|-----------------------|---------------------------------------------|
| PJG.M0.9AA.AT38B | 9           | 0.85                  | PKG.M0.9GL.LG                               |
| PJG.M1.0AA.AT38B | 10          | 0.85                  | PKG.M1.0GL.LG                               |
| PJG.M1.4AA.AT38B | 14          | 0.60                  | PKG.M1.4GL.LG                               |

**Note:** only G, A, B, C keying available.  
Only ABS plastic shell. White standard (B) or grey optional (G)  
Cables up to 3.8mm diameter. Available only with male solder contacts.  
Delivered in blister packs.

## Disposable socket (limited use)

**Note:** replace •• by contact configuration (see page 19).  
Outershell in black Delrin®  
The bend relief must be ordered separately (see page 22).

## Fluidic configuration (2 bars)

P . A 0 . 1 G Z .

The REDEL fluidic connector has many applications for example in medical or dentistry equipment. The connector is a monotube type and primarily intended for use with air or inert gas.

| Characteristics                 | Value         | Standards           |
|---------------------------------|---------------|---------------------|
| Max. working pressure           | 2 bars        | –                   |
| Endurance (latching)            | > 1000 cycles | IEC 60512-5 test 9a |
| Working temperature range (PSU) | -20/+150°C    | –                   |

| Characteristics                | Value           | Standards |
|--------------------------------|-----------------|-----------|
| Inner fluidic contact diameter | 2.6 mm          | –         |
| Tube diameter inner/outer      | 4 mm / 6 mm     | –         |
| Fluidic tube material          | Ni plated brass | –         |
| O-ring material                | FPM (Viton®)    | –         |

**PAG** Straight plug, key (G) or keys (A, B, C, H and J), with cable collet

| Part Number      | ø max. tube (mm) | ø inner tube (mm) |
|------------------|------------------|-------------------|
| PAG.A0.1GZ.ZC65G | 6.5              | 4                 |

**Note:** For collet nut colour replace last digit (see table page 20).

**PAG** Straight plug, key (G) or keys (A, B, C, H and J), with cable collet and nut for fitting a bend relief

| Part Number       | ø max. tube (mm) | ø inner tube (mm) |
|-------------------|------------------|-------------------|
| PAG.A0.1GZ.ZC65GZ | 6.5              | 4                 |

The bend relief must be ordered separately (see page 22).

**Note:** all dimensions are in millimeters

**PLG** Fixed socket, key (G) or keys (A, B, C, H and J), with fluidic contact, nut fixing

| Part Number   | ø inner tube (mm) |
|---------------|-------------------|
| PLG.A0.1GZ.ZG | 4                 |

**Note:** For front nut colour replace last digit (see table page 20).  
Recommended tube Legris 102540601

**PKG** Fixed socket, key (G) or keys (A, B, C, H and J), with fluidic contact, with two nuts (back panel mounting)

| Part Number   | ø inner tube (mm) |
|---------------|-------------------|
| PKG.A0.1GZ.ZG | 4                 |

**Note:** For front nut colour replace last digit (see table page 20).  
Recommended tube Legris 102540601

**Note:** all dimensions are in millimeters

## Mains power configuration

The new PAH and PKH models are used for mains power in medical applications. The design of a special insulator offers the required creepage distance. The 3 contacts are only solder type with a maximum AWG 18 (wire size max 1.35 mm). The connectors are UL certified to be used at 250 Volt AC (9 Amps). See UL approval file number N°E242949.

| Characteristics                                                 | Value  | Standards            |
|-----------------------------------------------------------------|--------|----------------------|
| Test voltage (rms)                                              | 1.5 kV | IEC 60512-2 test 4a  |
| Rated voltage (rms)                                             | 250 V  | IEC 60601/UL 60601-1 |
| Average retention force when pulling on the cable 1N = 0.102 kg | 90 N   | IEC 60512-8 test 15f |

| Characteristics                                                     | Value        | Standards            |
|---------------------------------------------------------------------|--------------|----------------------|
| Cable retention force (depends on cable construction) 1N = 0.102 kg | 50 – 150 N   | IEC 60512-9 test 17c |
| Endurance (latching)                                                | >1000 cycles | IEC 60512-5 test 9a  |
| Working temperature range (PSU)                                     | -50/+150°C   | –                    |
| UL file number                                                      | E242949      | –                    |

### PAH Straight plug, key (H), with cable collet and nut for fitting a bend relief

| Part Number       | Cable ø |     |
|-------------------|---------|-----|
|                   | min     | max |
| PAH.N0.3GL.LC52GZ | 4.0     | 5.2 |
| PAH.N0.3GL.LC65GZ | 5.3     | 6.5 |
| PAH.N0.4GL.LC52GZ | 4.0     | 5.2 |
| PAH.N0.4GL.LC65GZ | 5.3     | 6.5 |

**Note:** The bend relief must be ordered separately (see page 22).

### PKH Fixed socket, key (H), with two nuts (back panel mounting)

| Part Number   |
|---------------|
| PKH.N0.3GL.AG |
| PKH.N0.4GL.AG |

**Note:** For front nut colour replace last digit (see table page 20).  
Not available with print contact.

**Note:** all dimensions are in millimeters

**Note:** 1) depending on specific application and related standard, more restrictive operating voltage may apply.

We suggest operating voltage = 1/3 test voltage, see page 68.

2) shortest distance in air between two conductive parts.

3) shortest distance along the surface of the insulating material between two conductive parts.

4) for PPG and PXG (with 10 contacts) electrical characteristics, please contact factory.

5) for a given AWG, the diameter of some stranded conductor design is larger than the solder cup diameter (see page 69).

6) UL file number: E242949

## Alignment key

P . . . . .

Verify the third digit of the part number in order to select the right keying.  
The standard keying is «G» coded.

|                          |         |        |        |        |             |        |
|--------------------------|---------|--------|--------|--------|-------------|--------|
| Keying (plug front view) |         |        |        |        |             |        |
| Reference                | G       | A      | B      | C      | H           | J      |
| Contact type for plug    | male    | male   | male   | male   | female      | female |
| Contact type for socket  | female  | female | female | female | male        | male   |
| Number of contacts       | 2 to 14 |        |        |        | 8, 10 or 14 |        |

## Outer shell material

P . . . . .

| Material | Ref. | Colour | Temperature   |
|----------|------|--------|---------------|
| PEI      | S    | Grey   | -50° / +170°C |
| PEI      | T    | Black  |               |
| PSU      | G    | Grey   | -50° / +150°C |
| PSU      | N    | Black  |               |

**Note:** for extensive sterilization use PEI. For complete connector in PEI (collet nut, front nut or flange also in PEI), available colours are grey or black only. Use colour coding grey or black according to colour coding table (see below)

## Contact type

P . . . . .

Select the type of contact: solder or crimp?

Plug

| Type   | Male | Female          |
|--------|------|-----------------|
| solder | A    | L <sup>1)</sup> |
| crimp  | C    | -               |

Socket

| Type      | Male            | Female |
|-----------|-----------------|--------|
| solder    | A <sup>1)</sup> | L      |
| crimp     | -               | M      |
| print     | D               | N      |
| print 90° | -               | V      |

**Note:** 1) only for H and J keying with 8, 10 or 14 contacts  
For complete connector in PEI (collet nut, front nut or flange also in PEI), available colours are grey or black only. Use colour coding grey or black according to colour coding table (see below)

When should I use crimp rather than solder contacts ?

### Soldering

- recommended for small volumes
- requires little amount of tooling (soldering iron)
- requires more time

### Crimping

- recommended for large volumes
- no heat is required to make the connection
- for contacts with high density
- for use in high temperature environment
- requires extra tooling (crimping tools)

## Colour coding

P . . . . .

|           | Colours |      |        |       |      |       |       |
|-----------|---------|------|--------|-------|------|-------|-------|
|           | grey    | blue | yellow | black | red  | green | white |
| Reference | G       | A    | J      | N     | R    | V     | B     |
| RAL code  | 7001    | 5002 | 1016   | 9005  | 3020 | 6024  | 9003  |

**Note:** the RAL colours are indicative and depend on raw material and production process. Colour may differ.

Easy identification with the assistance of colour coding.  
Outershell is only available in grey or black.

## Accessories

### PAG-PLG Insulator for crimp contacts

| Contact configuration | Insulator part number |                    |
|-----------------------|-----------------------|--------------------|
|                       | For male contact      | For female contact |
| M0.2                  | PAG.302.YL            | PLG.402.YL         |
| M0.4                  | PAG.304.YL            | PLG.404.YL         |
| M0.5                  | PAG.305.YL            | PLG.405.YL         |
| M0.6                  | PAG.306.YL            | PLG.406.YL         |
| M0.7                  | PAG.307.YL            | PLG.407.YL         |
| M0.8                  | PAG.308.YL            | PLG.408.YL         |

### PAG-PKG Crimp contacts, kit with the number of contacts in a tube

| Contact configuration | nb. of contacts | ø contact (mm) | Kit contact part number |             |
|-----------------------|-----------------|----------------|-------------------------|-------------|
|                       |                 |                | Male                    | Female      |
| M0.2                  | 2               | 1.3            | PAG.567.02C             | PKG.667.02M |
| M0.4                  | 4               | 0.9            | PAG.562.04C             | PKG.662.04M |
| M0.5                  | 5               | 0.9            | PAG.562.05C             | PKG.662.05M |
| M0.6                  | 6               | 0.7            | PAG.557.06C             | PKG.657.06M |
| M0.7                  | 7               | 0.7            | PAG.557.07C             | PKG.657.07M |
| M0.8                  | 8               | 0.7            | PAG.557.08C             | PKG.657.08M |

**Note:** upon request, contacts with reduced crimp barrel are available.

### PLA Collet

| Part Number | ø A (mm) | Cable ø (mm) |      |
|-------------|----------|--------------|------|
|             |          | min.         | max. |
| PLA.739.**  | 3.9      | 2.7          | 3.9  |
| PLA.752.**  | 5.2      | 4.0          | 5.2  |
| PLA.765.**  | 6.5      | 5.3          | 6.5  |

**Note:** \*\* = UG (grey PSU), TN (black PEI) or UN (black PSU).

### PKG Plastic front nut for PK● and PT● models

| Part Number | Mat. | Colours |
|-------------|------|---------|
| PKG.220.UA  | PSU  | blue    |
| PKG.220.UB  | PSU  | white   |
| PKG.220.UG  | PSU  | grey    |
| PKG.220.UJ  | PSU  | yellow  |
| PKG.220.UN  | PSU  | black   |
| PKG.220.UR  | PSU  | red     |
| PKG.220.UV  | PSU  | green   |
| PKG.220.TG  | PEI  | grey    |
| PKG.220.TN  | PEI  | black   |

### PAM.130.●● Nut for fitting a GMA.1B bend relief

**Note:** all dimensions are in millimeters

| Part Number | Mat. | Colours |
|-------------|------|---------|
| PAM.130.UA  | PSU  | blue    |
| PAM.130.UB  | PSU  | white   |
| PAM.130.UG  | PSU  | grey    |
| PAM.130.UJ  | PSU  | yellow  |
| PAM.130.UN  | PSU  | black   |
| PAM.130.UR  | PSU  | red     |
| PAM.130.UV  | PSU  | green   |
| PAM.130.TN  | PEI  | black   |
| PAM.130.TG  | PEI  | grey    |

**Note:** only for PA●, PR● or PT● models.

## PYG.02 Protective backshell for PY●

| Part Number     | ø C (mm) | Mat. | Colours |
|-----------------|----------|------|---------|
| PYG.02.5UG.0    | 2.5      | PSU  | grey    |
| PYG.02.5YG.0ABS | 2.5      | ABS  | grey    |
| PYG.02.7YG.0ABS | 2.7      | ABS  | grey    |
| PYG.02.5YG.0PSU | 2.5      | PSU  | grey    |

**Note:** ABS working temperature: -30°C +90°C.  
All dimensions are in millimeters.

## GMA.1B Bend relief

A bend relief absorbs the force that may be exerted on cables.  
These are designed for plugs and free sockets with cable collet and nut.

| Part Number   | Dimensions (mm) |    |         |      | Material                            | Temperature range |                |
|---------------|-----------------|----|---------|------|-------------------------------------|-------------------|----------------|
|               | Bend relief     |    | Cable ø |      |                                     | in dry atmosphere | in water steam |
|               | A               | L  | max.    | min. |                                     |                   |                |
| GMA.1B.025.DG | 2.5             | 30 | 2.9     | 2.5  | Desmopan 786 Polyurethane elastomer | -40°C, +80°C      | -              |
| GMA.1B.030.DG | 3.0             | 30 | 3.4     | 3.0  |                                     |                   |                |
| GMA.1B.035.DG | 3.5             | 30 | 3.9     | 3.5  |                                     |                   |                |
| GMA.1B.040.DG | 4.0             | 30 | 4.4     | 4.0  |                                     |                   |                |
| GMA.1B.045.DG | 4.5             | 30 | 4.9     | 4.5  |                                     |                   |                |
| GMA.1B.054.DG | 5.4             | 30 | 6.0     | 5.4  |                                     |                   |                |
| GMA.1B.065.DG | 6.5             | 30 | 7.0     | 6.5  |                                     |                   |                |
| GMA.1B.025.RG | 2.5             | 34 | 2.9     | 2.5  | Silicone elastomer VMQ              | -60°C, +200°C     | +140°C         |
| GMA.1B.030.RG | 3.0             | 34 | 3.4     | 3.0  |                                     |                   |                |
| GMA.1B.035.RG | 3.5             | 34 | 3.9     | 3.5  |                                     |                   |                |
| GMA.1B.040.RG | 4.0             | 34 | 4.4     | 4.0  |                                     |                   |                |
| GMA.1B.045.RG | 4.5             | 34 | 5.0     | 4.5  |                                     |                   |                |
| GMA.1B.051.RG | 5.1             | 34 | 5.6     | 5.1  |                                     |                   |                |
| GMA.1B.057.RG | 5.7             | 34 | 6.2     | 5.7  |                                     |                   |                |
| GMA.1B.063.RG | 6.3             | 34 | 7.0     | 6.3  |                                     |                   |                |

**Note:** the last letter «G» of the part number indicates a grey colour, see the adjacent table and replace letter «G» by the letter of the colour required.

**Note:** all dimensions are in millimeters

| Reference | Colours |
|-----------|---------|
| A         | blue    |
| B         | white   |
| G         | grey    |
| J         | yellow  |
| M         | brown   |
| N         | black   |
| R         | red     |
| S         | orange  |
| V         | green   |

**Note:** the selection of pigments, which should remain stable at high temperature, is limited by the new regulations. For this reason, some colours will be a shade different from those used for Desmopan bend reliefs. The selected solutions represent the best possible compromise.

## Tooling

**POP.125.GN** Spanner for outershell

**Note:** both spanners available as a kit, ref. POZ.12.18G.N.  
Material: PA 6.6

**POB.186.GN** Spanner for front nut

Material: PA 6.6

**DPC.91.701.V** Crimping tool

**DCE** Positioners for crimp contacts

**DCF** Automatic extraction tools for crimp contacts

| Configuration  | Contact ø (mm) | Conductor AWG | Positioner part number |                | Selector No Setting | Part number extractor |                |
|----------------|----------------|---------------|------------------------|----------------|---------------------|-----------------------|----------------|
|                |                |               | Male contact           | Female contact |                     | Male contact          | Female contact |
| M0.2           | 1.3            | 18-20         | DCE.91.135.BVD         | DCE.91.130.BVM | 8-7                 | DCF.91.133.5LT        | DCF.91.131.2LT |
| M0.4/M0.5      | 0.9            | 20-22-24      | DCE.91.095.BVD         | DCE.91.090.BVM | 6-5-5               | DCF.91.093.5LT        | DCF.91.090.2LT |
| M0.6/M0.7/M0.8 | 0.7            | 22-24-26      | DCE.91.075.BVD         | DCE.91.070.BVM | 6-5-5               | DCF.91.073.5LT        | DCF.91.070.2LT |

**Note:** the variance in conductor stranding diameter for the minimum AWG is such that some can have a cross section which is not sufficient to guarantee crimping as per IEC 60352-2 standard. All dimensions are in millimeters.

**DCK** Retention testing tools for crimp contacts

| Contact ø (mm) | Test force (N) | Testing tool part number |                 |
|----------------|----------------|--------------------------|-----------------|
|                |                | Male contact             | Female contact  |
| 0.7            | 10             | DCK.91.071.0LRC          | DCK.91.071.0LRM |
| 0.9            | 14             | DCK.91.091.4LRC          | DCK.91.091.4LRM |
| 1.3            | 25             | DCK.91.132.5LRC          | DCK.91.132.5LRM |

**Note:** all dimensions are in millimeters

## Panel hole

For PL●, PK●, PN●, PX●, PT● and PD●

For PM●

**Note:** PY\* is also designed for snap-on fixing into customer housing. Consult factory for information.  
– Socket mounting nut torque = 1.5 Nm.

## PCB drilling pattern

For straight contacts

**Note:** all dimensions are in millimeters

For 90° elbow contacts (A-A view)

For PPG and PXG models

## Assembly instructions

### Solder contacts

1. Strip the cable according to the lengths given in the table. Tin the conductors.

| Configuration | Dimensions (mm) |     |
|---------------|-----------------|-----|
|               | L               | T   |
| M0.2          | 14.0            | 4.0 |
| M0.4, M0.5    | 13.0            | 3.0 |
| M0.6 to M1.4  | 12.5            | 2.5 |
| N0.3          | 11.5            | 3.5 |
| N0.4          | 11.5            | 3.5 |

2. Slide the collet nut ① and then the collet ② onto the cable.

3. Solder conductors into contacts, making sure that neither solder nor flux gets onto the insulator or cable insulation.

4. Slide the collet ② forward and locate tag ③ in the slot ⑤ on the insulator ⑥.

Slide collet nut ① over collet ② and then push the whole assembly into the shell ⑦ whilst turning it to ensure that the tag ③ locates in the inside slot of the shell. Tighten the collet nut ① to the maximum torque of 0.25 Nm.

– Socket mounting nut torque = 1.5 Nm.

#### For PSU only:

We recommend ONLY the use of VTCS-6 Clear Vibra-tite or ThreeBond 1401 to secure the connector backnut. The use of other materials could result in damage to the connector. The only recommended chemical cleaner is Isopropyl Alcohol.

## Crimp contacts

1. Strip the cable according to the lengths given in the table.

| Configuration | Dimensions (mm) |     |
|---------------|-----------------|-----|
|               | L               | T   |
| M0.2 to M0.8  | 15.0            | 3.9 |

2. Slide the collet nut ① and then the collet ② onto the cable.

3. Fix the appropriate positioner (table page 23) in the crimping tool. Set selector to the number corresponding to the conductor AWG as indicated on the positioner label. Fit conductor into contact ④ and make sure it is visible through the inspection hole in the crimp barrel. Slide conductor-contact combination into the open crimping tool; make sure that the contact is fully pushed into the positioner. Close the tool. Remove from crimping tool and check that conductor is secure in contact and shows in inspection hole.

4. Now arrange contact-conductor combinations according to the insert marking and locate them into the insert ⑥. Check that all contacts are correctly located and remain in position when given a gentle pull.

5. Slide the collet ② forward and locate tag ③ in the slot ⑤ on the insulator ⑥. Slide collet nut ① over collet ② and then push the whole assembly into the shell ⑦ whilst turning it to ensure that the tag ③ locates in the inside slot of the shell. Tighten the collet nut ① to the maximum torque of 0.25 Nm.

– Socket mounting nut torque = 1.5 Nm.

### For PSU only:

We recommend ONLY the use of VTCS-6 Clear Vibra-tite or ThreeBond 1401 to secure the connector backnut. The use of other materials could result in damage to the connector. The only recommended chemical cleaner is Isopropyl Alcohol.

## Stamped contacts (For PJ●)

1. Strip the cable according to the lengths given in the drawing. Tin the conductors.

| Configuration    | Dimensions (mm) |     |
|------------------|-----------------|-----|
|                  | L               | T   |
| M0.9, M1.0, M1.4 | 15.0            | 3.0 |

2. Slide the backshell ① onto the cable

3. Contact removal

Automated removal: if using automated equipment to remove the contacts ②, cut as near to the curled portion of the contact to minimize the size of the remaining attachment tab.

Manual removal

Gently remove each of the individual contacts ② by breaking in both directions as shown. If any portion of the attachment tab remains on the contact ②, clip off to minimize risk of shorting.

4. Solder conductors into contacts ②, making sure that neither solder nor flux gets onto the cable insulation.

5. Arrange the contact-conductor combinations according to the marking on the plug ③ and locate them into the plug by gently pushing the contact-conductor into the proper hole until fully seated. Check that all contacts ② are correctly located and remain in position when given a gentle pull.

6. Slide backshell ① forward and align the tabs to the slots on the plug ③. Snap backshell onto the plug to complete the assembly. Various strain relief techniques can be incorporated, depending on application.

7. If the need arises to remove an installed contact, during the assembly process or subsequent repair, individual contacts can be removed using LEMO extraction tool (part number: DCF.91.050.2LT). DO NOT reuse extracted contacts. The only recommended chemical cleaner is Isopropyl Alcohol.

### Straight plug with bend relief

### Fixed socket

### Free socket

**2P SERIES**

## 2P Series

This Ø 18 mm connector accommodates cable diameter up to 9.2 mm and allows up to 34 solder or crimp contacts. Top quality lightweight but rugged materials have been chosen to optimize most applications. Polysulfone (PSU), UL certified as autoextinguishable, can be sterilized by gas or by steam. The contacts are gold-plated over copper and nickel to ensure at least 1000 mating/unmating cycles without significantly affecting the electrical characteristics. Three keys on the plug nose will allow blind mating. Colour coding of the plug and socket flange will give an instant visual indication as to whether connectors are compatible or not. Water resistant to IP 66 options are available.

### Standard models (page 34 to 36)

### Watertight models (page 37 to 38)

### Fluidic configuration (page 39)

## Part numbering system

**CAB.M16.GLA.C92G** Straight plug with cable collet and alignment key (B), multipole type with 16 male contacts to solder, grey PSU outershell, PEEK insulator, collet for a cable ø 7.3 to 9.2 mm and grey front ring.

**CRB.M16.GLL.C92G** Free socket with two nuts and alignment key (B), multipole type with 16 female contacts to solder, grey PSU outershell, PEEK insulator, collet for a cable ø 7.3 to 9.2 mm and grey front ring.

**CKB.M16.GLLG** Fixed socket with two nuts and alignment key (B), multipole type with 16 female contacts to solder, grey PSU outershell, PEEK insulator, and grey front ring.

**Note:** 1) for extensive steam sterilization we propose polytherimide ULTEM® (PEI)

2) model available only with H and J keying and with 26 or 34 contacts (inverted contacts)

## Standard models (IP50)

### Fixed socket

- 1 Outershell
- 2 Insulator
- 3 Female crimp contact
- 4 Hexagonal nut

### Straight plug

- 1 Outershell
- 2 Latch sleeve
- 3 Insulator
- 4 Male crimp contact
- 5 Collet + mid piece
- 6 Collet nut

| Characteristics                                                     | Value       | Standards            |
|---------------------------------------------------------------------|-------------|----------------------|
| Average retention force when pulling on the cable 1N = 0.102 kg     | 150 N       | IEC 60512-8 test 15f |
| Cable retention force (depends on cable construction) 1N = 0.102 kg | 150 - 250 N | IEC 60512-9 test 17c |

| Characteristics                 | Value         | Standards           |
|---------------------------------|---------------|---------------------|
| Endurance (latching)            | > 1000 cycles | IEC 60512-5 test 9a |
| Working temperature range (PSU) | -50/+150°C    | –                   |
| Working temperature range (PEI) | -50/+170°C    | –                   |

### CAB Straight plug with cable collet

| Part Number      | Cable ø |     |
|------------------|---------|-----|
|                  | min     | max |
| CAB.M●●.GLA.C52G | 3.2     | 5.2 |
| CAB.M●●.GLA.C72G | 5.3     | 7.2 |
| CAB.M●●.GLA.C92G | 7.3     | 9.2 |

### CAB Straight plug with cable collet and nut for fitting a bend relief

| Part Number       | Cable ø |     |
|-------------------|---------|-----|
|                   | min     | max |
| CAB.M●●.GLA.C52GZ | 3.2     | 5.2 |
| CAB.M●●.GLA.C72GZ | 5.3     | 7.2 |
| CAB.M●●.GLA.C92GZ | 7.3     | 9.2 |

**Note:** the bend relief must be ordered separately (see page 44).

## CKB Fixed socket with two nuts (back panel mounting)

| Part Number  | number of contacts | Contact |       |       |   |       |     |
|--------------|--------------------|---------|-------|-------|---|-------|-----|
|              |                    | Solder  |       | Crimp |   | Print |     |
|              |                    | N       | a max | N     | a | c     | Ø d |
| CKB.M16.GLLG | 16                 | 23.8    | 3.4   | 25.1  | 0 | 5.6   | 0.7 |
| CKB.M19.GLLG | 19                 | 23.8    | 4.9   | 25.1  | 0 | 5.6   | 0.7 |
| CKB.M26.GLLG | 26                 | 23.8    | 4.7   | 25.1  | 0 | 3.4   | 0.5 |
| CKB.M32.GLLG | 32                 | 23.8    | 4.7   | 25.1  | 0 | 3.4   | 0.5 |

**Note:** for PCB drilling pattern see page 46.  
Panel hole see page 46.

## CKB Fixed socket with two nuts with 90° contacts (back panel mounting)

| Part Number  | number of contacts |
|--------------|--------------------|
| CKB.M16.GLVG | 16                 |
| CKB.M19.GLVG | 19                 |
| CKB.M26.GLVG | 26                 |

**Note:** for PCB drilling pattern see page 46.  
Panel hole see page 46.

## CLB Fixed socket, nut fixing

| Part Number  | number of contacts | Contact |       |       |   |       |     |
|--------------|--------------------|---------|-------|-------|---|-------|-----|
|              |                    | Solder  |       | Crimp |   | Print |     |
|              |                    | N       | a max | N     | a | c     | Ø d |
| CLB.M16.GLLG | 16                 | 23.8    | 3.4   | 25.1  | 0 | 5.6   | 0.7 |
| CLB.M19.GLLG | 19                 | 23.8    | 4.9   | 25.1  | 0 | 5.6   | 0.7 |
| CLB.M26.GLLG | 26                 | 23.8    | 4.7   | 25.1  | 0 | 3.4   | 0.5 |
| CLB.M32.GLLG | 32                 | 23.8    | 4.7   | 25.1  | 0 | 3.4   | 0.5 |

**Note:** for PCB drilling pattern see page 46.  
Panel hole see page 46.

## CRB Free socket with cable collet

| Part Number      | Cable ø |     |
|------------------|---------|-----|
|                  | min     | max |
| CRB.M●●.GLL.C52G | 3.2     | 5.2 |
| CRB.M●●.GLL.C72G | 5.3     | 7.2 |
| CRB.M●●.GLL.C92G | 7.3     | 9.2 |

## CRB Free socket with cable collet and nut for fitting a bend relief

| Part Number       | Cable ø |     |
|-------------------|---------|-----|
|                   | min     | max |
| CRB.M●●.GLL.C52GZ | 3.2     | 5.2 |
| CRB.M●●.GLL.C72GZ | 5.3     | 7.2 |
| CRB.M●●.GLL.C92GZ | 7.3     | 9.2 |

**Note:** the bend relief must be ordered separately (see page 44).

## Watertight models (IP66)

### Fixed socket

- 1 Outershell
- 2 Insulator
- 3 Female crimp contact
- 4 Hexagonal nut
- 5 O-ring

### Straight plug

- 1 Outershell
- 2 Latch sleeve
- 3 Insulator
- 4 Male crimp contact
- 5 Collet + mid piece
- 6 Collet nut
- 7 Front seal
- 8 Gasket

| Characteristics                                                     | Value      | Standards            |
|---------------------------------------------------------------------|------------|----------------------|
| Average retention force when pulling on the cable 1N = 0.102 kg     | 90 N       | IEC 60512-8 test 15f |
| Cable retention force (depends on cable construction) 1N = 0.102 kg | 50 - 150 N | IEC 60512-9 test 17c |

| Characteristics                 | Value         | Standards           |
|---------------------------------|---------------|---------------------|
| Endurance (latching)            | > 1000 cycles | IEC 60512-5 test 9a |
| Working temperature range (PSU) | -50/+150°C    | -                   |
| Working temperature range (PEI) | -50/+170°C    | -                   |
| Index protection                | IP66          | IEC-60529           |

### CFB Straight plug with cable collet and nut for fitting a bend relief

| Part Number       | Cable ø |     |
|-------------------|---------|-----|
|                   | min     | max |
| CFB.M●●.GLA.C52GZ | 3.2     | 5.2 |
| CFB.M●●.GLA.C72GZ | 5.3     | 7.2 |
| CFB.M●●.GLA.C92GZ | 7.3     | 9.2 |

**Note:** the bend relief must be ordered separately (see page 44).

### CNB Fixed socket, nut fixing

| Part Number  | number of contacts | Contact |       |       |   |       |     |
|--------------|--------------------|---------|-------|-------|---|-------|-----|
|              |                    | Solder  |       | Crimp |   | Print |     |
|              |                    | N       | a max | N     | a | c     | ø d |
| CNB.M16.GLLG | 16                 | 23.8    | 3.4   | 25.1  | 0 | 5.6   | 0.7 |
| CNB.M19.GLLG | 19                 | 23.8    | 4.9   | 25.1  | 0 | 5.6   | 0.7 |
| CNB.M26.GLLG | 26                 | 23.8    | 4.7   | 25.1  | 0 | 3.4   | 0.5 |
| CNB.M32.GLLG | 32                 | 23.8    | 4.7   | 25.1  | 0 | 3.4   | 0.5 |

**Note:** for PCB drilling pattern see page 46.  
Panel hole see page 46.

CSB Free socket with cable collet and nut for fitting a bend relief

| Part Number       | Cable ø |     |
|-------------------|---------|-----|
|                   | min     | max |
| CSB.M●●.GLL.C52GZ | 3.2     | 5.2 |
| CSB.M●●.GLL.C72GZ | 5.3     | 7.2 |
| CSB.M●●.GLL.C92GZ | 7.3     | 9.2 |

**Note:** the bend relief must be ordered separately (see page 44).

## Fluidic models

### Fixed socket

- 1 Outershell
- 2 Insulator
- 3 Female crimp contact
- 4 Hexagonal nut

### Straight plug

- 1 Outershell
- 2 Latch sleeve
- 3 Insulator
- 4 Male crimp contact
- 5 Collet + mid piece
- 6 Collet nut

| Characteristics                                                     | Value      | Standards            |
|---------------------------------------------------------------------|------------|----------------------|
| Average retention force when pulling on the cable 1N = 0.102 kg     | 90 N       | IEC 60512-8 test 15f |
| Cable retention force (depends on cable construction) 1N = 0.102 kg | 50 - 150 N | IEC 60512-9 test 17c |

| Characteristics                 | Value         | Standards           |
|---------------------------------|---------------|---------------------|
| Endurance (latching)            | > 1000 cycles | IEC 60512-5 test 9a |
| Working temperature range (PSU) | -50/+150°C    | –                   |
| Working temperature range (PEI) | -50/+170°C    | –                   |

### CAB Straight plug with cable collet

| Part Number      | Cable ø |     |
|------------------|---------|-----|
|                  | min     | max |
| CAB.012.GLA.C52G | 3.2     | 5.2 |

**Note:** 1) depending on specific application and related standard, more restrictive operating voltage may apply.

We suggest operating voltage = 1/3 test voltage, see page 68.

2) shortest distance in air between two conductive parts.

3) shortest distance along the surface of the insulating material between two conductive parts.

4) available only with 26 or 34 contacts, H or J keying (inverted contacts).

5) for a given AWG, the diameter of some stranded conductor design is larger than the solder cup diameter (see page 69).

**Note:** 1) depending on specific application and related standard, more restrictive operating voltage may apply.

We suggest operating voltage = 1/3 test voltage, see page 68.

2) shortest distance in air between two conductive parts.

3) shortest distance along the surface of the insulating material between two conductive parts.

4) configuration 804 and 810 use «C» type coaxial contact.

5) for a given AWG, the diameter of some stranded conductor design is larger than the solder cup diameter (see page 69).

6) configuration P12 and P15 use fluidic contact with valve (FGG.P1.150.AC.V and EGG.P1.150.AC.V). Contacts must be ordered separately.

## Alignment key

C . . . . .

Verify the third digit of the part number in order to select the right keying.  
The standard keying is «B» coded.

| Contact type for socket  | female                                                                            | male                                                                              | male                                                                              |
| Nb. of contacts          | 2 to 32                                                                           | 26 or 34                                                                          |                                                                                   |

## Outer shell material

C . . . . .

| Material | Ref. | Colour | Temperature   |
|----------|------|--------|---------------|
| PEI      | S    | Grey   | -50° / +170°C |
| PSU      | G    | Grey   | -50° / +150°C |
| PSU      | N    | Black  |               |

**Note:** for extensive sterilization use PEI

## Contact type

C . . . . .

Select the type of contact: solder or crimp?

Plug

| Type   | Male | Female          |
|--------|------|-----------------|
| solder | A    | L <sup>1)</sup> |
| crimp  | C    | -               |

Socket

| Type      | Male            | Female |
|-----------|-----------------|--------|
| solder    | A <sup>1)</sup> | L      |
| crimp     | -               | M      |
| print     | -               | N      |
| print 90° | -               | V      |

**Note:** 1) only for H and J keying with 26 or 34 contacts

When should I use crimp rather than solder contacts ?

### Soldering

- recommended for small volumes
- requires little amount of tooling (soldering iron)
- requires more time

### Crimping

- recommended for large volumes
- no heat is required to make the connection
- for contacts with high density
- for use in high temperature environment
- requires extra tooling (crimping tools)

## Colour coding

C . . . . .

|           | Colours |      |        |       |      |       |
|-----------|---------|------|--------|-------|------|-------|
|           | grey    | blue | yellow | black | red  | green |
| Reference | G       | A    | J      | N     | R    | V     |
| RAL code  | 7001    | 5002 | 1016   | 9005  | 3020 | 6024  |

**Note:** the RAL colours are indicative and depend on raw material and production process. Colour may differ.

Easy identification with the assistance of colour coding.  
Outershell is only available in grey or black.

## Accessories

### CAG-CLG Insulator for crimp contacts

| Contact configuration | Insulator part number |                    |
|-----------------------|-----------------------|--------------------|

### CAG Collet

| Part Number | ø A (mm) | Cable ø (mm) |      |
|-------------|----------|--------------|------|
|             |          | min.         | max. |
| CAG.752.*** | 5.2      | 3.2          | 5.2  |
| CAG.772.*** | 7.2      | 5.3          | 7.2  |
| CAG.792.*** | 9.2      | 7.3          | 9.2  |

**Note:** \*\*\* = UGG (grey PSU), UGN (black PSU), TGG (grey PEI)

### CKG Plastic front nut for CKB models

| Part Number | Mat. | Colours |
|-------------|------|---------|
| CKG.240.UA  | PSU  | blue    |
| CKG.240.UG  | PSU  | grey    |
| CKG.240.UJ  | PSU  | yellow  |
| CKG.240.UN  | PSU  | black   |
| CKG.240.UR  | PSU  | red     |
| CKG.240.UV  | PSU  | green   |

### CAM Nut for fitting a GMA.2B bend relief

|            | Mat. | Colours |
|------------|------|---------|
| CAM.130.UG | PSU  | grey    |
| CAM.130.UN | PSU  | black   |
| CAM.130.TG | PEI  | grey    |

**Note:** all dimensions are in millimeters

## FGG.P1 Male fluidic contact with valve

**Note:** Connectors are delivered without the P1 contacts.

Part Number

FGG.P1.150.ACV

## EGG.P1 Female fluidic contact with valve

**Note:** Connectors are delivered without the P1 contacts.

Part Number

EGG.P1.150.ACV

## GMA Bend relief

A bend relief absorbs the force that may be exerted on cables.  
These are designed for plugs and free sockets with cable collet and nut.

| Part Number   | Dimensions (mm) |    |         |      | Material                            | Temperature range |                |
|---------------|-----------------|----|---------|------|-------------------------------------|-------------------|----------------|
|               | Bend relief     |    | Cable ø |      |                                     | in dry atmosphere | in water steam |
|               | A               | L  | max.    | min. |                                     |                   |                |
| GMA.2B.040.DG | 4.0             | 36 | 4.5     | 4.0  | Desmopan 786 Polyurethane elastomer | -40°C, +80°C      | -              |
| GMA.2B.045.DG | 4.5             | 36 | 5.0     | 4.5  |                                     |                   |                |
| GMA.2B.050.DG | 5.0             | 36 | 5.5     | 5.0  |                                     |                   |                |
| GMA.2B.060.DG | 6.0             | 36 | 6.5     | 6.0  |                                     |                   |                |

| GMA.2B.080.DG | 7.8             | 36 | 8.8     | 7.8  |                                     |                   |                |
| GMA.2B.040.RG | 4.0             | 41 | 4.4     | 4.0  | Silicone elastomer VMQ              | -60°C, +200°C     | +140°C         |
| GMA.2B.045.RG | 4.5             | 41 | 5.0     | 4.5  |                                     |                   |                |
| GMA.2B.051.RG | 5.1             | 41 | 5.6     | 5.1  |                                     |                   |                |
| GMA.2B.057.RG | 5.7             | 41 | 6.2     | 5.7  |                                     |                   |                |
| GMA.2B.063.RG | 6.3             | 41 | 7.0     | 6.3  |                                     |                   |                |
| GMA.2B.071.RG | 7.1             | 41 | 7.9     | 7.1  |                                     |                   |                |
| GMA.2B.080.RG | 8.0             | 41 | 9.0     | 8.0  |                                     |                   |                |

**Note:** the last letter «G» of the part number indicates a grey colour, see the adjacent table and replace letter «G» by the letter of the colour required.

| Reference | Colours |
|-----------|---------|
| A         | blue    |
| B         | white   |
| G         | grey    |
| J         | yellow  |
| M         | brown   |
| N         | black   |
| R         | red     |
| S         | orange  |
| V         | green   |

**Note:** the selection of pigments, which should remain stable at high temperature, is limited by the new regulations. For this reason, some colours will be a shade different from those used for Desmopan bend reliefs. The selected solutions represent the best possible compromise.

## Tooling

### DPC.91.701.V Crimping tool

### DCE Positioners for crimp contacts

### DCF Automatic extraction tools for crimp contacts

| Type            | Conductor (mm) | Contact ø AWG | Positioner part number |                 | Selector No Setting | Part number extractor               |
|-----------------|----------------|---------------|------------------------|-----------------|---------------------|-------------------------------------|
|                 |                |               | Male                   | Female          |                     | For male contact and female contact |
| M02             | 2.0            | 12-14-16      | DCE.91.202.BVCM        | DCE.91.202.BVCM | -                   | DCC.91.202.5LA <sup>1)</sup>        |
| M03             | 1.6            | 14-16-18      | DCE.91.162.BVCM        | DCE.91.162.BVCM | -                   | DCF.91.162.2LT                      |
| M04/M05/M06/M07 | 1.3            | 18-20         | DCE.91.132.BVC         | DCE.91.132.BVM  | 8-7                 | DCF.91.131.2LT                      |
| M08/M10         | 0.9            | 20-22-24      | DCE.91.092.BVC         | DCE.91.092.BVM  | 6-5-5               | DCF.91.090.2LT                      |
| M12/M16/M19     | 0.7            | 22-24-26      | DCE.91.072.BVC         | DCE.91.072.BVM  | 6-5-5               | DCF.91.070.2LT                      |
| M26/M32         | 0.5            | 28-30-32      | DCE.91.052.BVC         | DCE.91.052.BVM  |                     |                                     |

**Note:** 1) this model is thumb-operated.

This model is used for male and female contacts. The variance in conductor stranding diameter for the minimum AWG is such that some can have a cross section which is not sufficient to guarantee crimping as per IEC 60352-2 standard.

### DCK Retention testing tools for crimp contacts

| Contact ø (mm) | Test force (N) | Testing tool part number |                 |
|----------------|----------------|--------------------------|-----------------|
|                |                | Male contact             | Female contact  |
| 0.7            | 10             | DCK.91.071.0LRC          | DCK.91.071.0LRM |
| 0.9            | 14             | DCK.91.091.4LRC          | DCK.91.091.4LRM |
| 1.3            | 25             | DCK.91.132.5LRC          | DCK.91.132.5LRM |

## Assembly instructions

### Solder contacts

1. Strip the cable according to the lengths given in the table. Tin the conductors.

| Configuration           | Dimensions (mm) |     |
|-------------------------|-----------------|-----|
|                         | L               | T   |
| M02                     | 19.0            | 4.0 |
| M03                     | 19.0            | 3.5 |
| M04, M05, M06, M07      | 18.0            | 3.5 |
| M08, M10, M12, M16, M19 | 17.0            | 3.0 |
| M26, M32                | 17.0            | 2.5 |

2. Slide the collet nut ① and then the collet ② onto the cable.

3. Solder conductors into contacts, making sure that neither solder nor flux gets onto the insulator or cable insulation.

4. Slide the collet ② forward and locate slot ③ in the key of the insulator ⑤.

Slide collet nut ① over collet ② and then push the whole assembly into the shell ⑦ whilst positioning it to ensure that the slot ⑥ of insulator ⑤ locates in the inside key of the shell. Tighten the collet nut ① to the maximum torque of 0.5 Nm.

#### For PSU only:

We recommend ONLY the use of VTCS-6 Clear Vibra-tite or ThreeBond 1401 to secure the connector backnut. The use of other materials could result in damage to the connector. The only recommended chemical cleaner is Isopropyl Alcohol.

## Crimp contacts

1. Strip the cable according to the lengths given in the table.

| Configuration      | Dimensions (mm) |     |
|--------------------|-----------------|-----|
|                    | L               | T   |
| M02                | 17.0            | 5.5 |
| M03                | 17.0            | 5.5 |
| M04, M05, M06, M07 | 15.0            | 4.0 |
| M08, M10, M12      | 15.0            | 4.0 |
| M16, M19           | 15.0            | 4.0 |

2. Slide the collet nut ① and then the collet ② onto the cable.
3. Fix the appropriate positioner (table page 45) in the crimping tool. Set selector to the number corresponding to the conductor AWG as indicated on the positioner label. Fit conductor into contact ④ and make sure it is visible through the inspection hole in the crimp barrel. Slide conductor-contact combination into the open crimping tool; make sure that the contact is fully pushed into the positioner. Close the tool. Remove from crimping tool and check that conductor is secure in contact and shows in inspection hole.
4. Now arrange contact-conductor combinations according to the insert marking and locate them into the insert ⑥. Check that all contacts are correctly located and remain in position when given a gentle pull.
5. Slide the collet ② forward and locate slot ③ in the key of the insulator ⑤. Slide collet nut ① over collet ② and then push the whole assembly into the shell ⑦ whilst positioning it to ensure that the slot ⑥ of insulator ⑤ locates in the inside key of the shell. Tighten the collet nut ① to the maximum torque of 0.5 Nm.

### For PSU only:

We recommend ONLY the use of VTCS-6 Clear Vibra-tite or ThreeBond 1401 to secure the connector backnut. The use of other materials could result in damage to the connector. The only recommended chemical cleaner is Isopropyl Alcohol.

## Assembly instructions for watertight models

### Solder contacts

1. Strip the cable according to the lengths given in the table. Tin the conductors.

| Configuration           | Dimensions (mm) |     |
|-------------------------|-----------------|-----|
|                         | L               | T   |
| M02                     | 19.0            | 4.0 |
| M03                     | 19.0            | 3.5 |
| M04, M05, M06, M07      | 18.0            | 3.5 |
| M08, M10, M12, M16, M19 | 17.0            | 3.0 |
| M26, M32                | 17.0            | 2.5 |

2. Slide the bend relief ⑧, the collet nut ① and then the collet ② onto the cable.

3. Solder conductors into contacts, making sure that neither solder nor flux gets onto the insulator or cable insulation. Fill up completely the inside of the collet ② and the gap between conductors with the adhesive/sealant DOW CORNING type 3145RTV.

4. Slide the collet ② forward and locate slot ③ in the key of the insulator ⑤. Slide collet nut ① over collet ② and then push the whole assembly into the shell ⑦ whilst positioning it to ensure that the slot ⑥ of insulator ⑤ locates in the inside key of the shell. Tighten the collet nut ① to the maximum torque of 0.5 Nm. Push the bend relief ⑧ onto the collet nut ①.

#### For PSU only:

We recommend ONLY the use of VTCS-6 Clear Vibra-tite or ThreeBond 1401 to secure the connector backnut. The use of other materials could result in damage to the connector. The only recommended chemical cleaner is Isopropyl Alcohol.

## Crimp contacts

1. Strip the cable according to the lengths given in the table.

| Configuration      | Dimensions (mm) |     |
|--------------------|-----------------|-----|
|                    | L               | T   |
| M02                | 17.0            | 5.5 |
| M03                | 17.0            | 5.5 |
| M04, M05, M06, M07 | 15.0            | 4.0 |
| M08, M10, M12      | 15.0            | 4.0 |
| M16, M19           | 15.0            | 4.0 |

2. Slide the bend relief<sup>®</sup>, the collet nut ① and then the collet ② onto the cable.

3. Fix the appropriate positioner (table page 45) in the crimping tool. Set selector to the number corresponding to the conductor AWG as indicated on the positioner label. Fit conductor into contact ④ and make sure it is visible through the inspection hole in the crimp barrel. Slide conductor-contact combination into the open crimping tool; make sure that the contact is fully pushed into the positioner. Close the tool. Remove from crimping tool and check that conductor is secure in contact and shows in inspection hole.

4. Now arrange contact-conductor combinations according to the insert marking and locate them into the insert ⑥. Check that all contacts are correctly located and remain in position when given a gentle pull.

5. Slide the collet ② forward and locate slot ③ in the key of the insulator ④. Slide collet nut ① over collet ② and then push the whole assembly into the shell ⑦ whilst positioning it to ensure that the slot ⑤ of insulator ④ locates in the inside slot of the shell. Tighten the collet nut ① to the maximum torque of 0.5 Nm.  
Push the bend relief<sup>®</sup> onto the collet nut ①.

### For PSU only:

We recommend ONLY the use of VTCS-6 Clear Vibra-tite or ThreeBond 1401 to secure the connector backnut. The use of other materials could result in damage to the connector. The only recommended chemical cleaner is Isopropyl Alcohol.

## Exploded view of the REDEL 3P

### Straight plug

### Fixed socket

### Fixed socket with square flange

**3P SERIES**

3P Series

Historically the 3P is LEMO's first series of completely plastic connectors. It is designed to accommodate cable diameters up to 9.5 mm. Available in 11 different contact configurations including multicontact, and hybrid HV/electrical; coax/electrical; fibre optic/electrical, fluidic, the 3P series has been specifically designed for all applications requiring minimum weight, maximum electrical insulation values, and high thermal and mechanical properties, as well as suitability for either vapour or gas sterilization and for cold sterilization with a chemical product. These connectors provide remarkable safety by using nonconductive materials and four different systems to prevent accidental cross-mating, i. e. colour coding, housing keying, insert keying and insert polarization.

Standard models

Alignment keys and insert polarization

The 3P series makes it possible for the user to configure his own keying system. The insert can be located into 11 different angular positions relative to the external alignment key.

**Note:** the reference letter:  
- on the plug insert, is placed to the left of the alignment key.  
- on the socket insert, is placed to the right of the alignment key.

| Rear view of a socket | Insert code | Angle    |          |
|-----------------------|-------------|----------|----------|
|                       |             | Plug     | Socket   |
|                       | A           | 180°     | 180°     |
|                       | B           | 147° 16' | 212° 44' |
|                       | C           | 114° 33' | 245° 27' |
|                       | D           | 81° 49'  | 278° 11' |
|                       | E           | 49° 05'  | 310° 55' |

|                       | K           | 245° 27' | 114° 33' |
|                       | L           | 212° 44' | 147° 16' |

## Part numbering system

**FGG.3P.306.PLWD75G** Straight plug with key and cable seal, 3P series, multipole type with 6 contacts, outer shell in grey PSU, PEEK insulator, male solder contact, D type collet for 6.7 mm to 7.5 mm diameter cable and grey coloured ring.

**PHG.3P.310.NLWD75G** Free socket with key and cable seal, 3P series, multipole with 6 contacts, outer shell in black PSU, PEEK insulator, female solder contact, D type collet for 6.7 mm to 7.5 mm diameter cable and black coloured ring.

**EGG.3P.306.PLWG** Fixed socket with key, 3P series, multipole type with 6 contacts, outer shell in grey PSU, PEEK insulator, female solder contact and grey coloured ring.

**Note:** 1) the variant position of the part number is used to specify the colour of the coloured ring. For grey PSU (material Code P).

2) for the high voltage type «709» use «J» enhanced PEEK material code. The standard colour is grey and nothing is mentioned in the variant position.

3) the letters W or Y are also used for special arrangements.

## EGG Fixed socket with key, nut fixing

| Part Number     | number of contacts | Contact |       |       |     |       |     |
|-----------------|--------------------|---------|-------|-------|-----|-------|-----|
|                 |                    | Solder  |       | Crimp |     | Print |     |
|                 |                    | N       | a max | N     | a   | c     | ø d |
| EGG.3P.306.PLWG | 6+1LV              | 27      | 4.7   | 27    | 4.7 | 5.5   | 0.7 |
| EGG.3P.310.PLWG | 10+1LV             | 27      | 4.7   | 27    | 4.7 | 5.5   | 0.7 |
| EGG.3P.314.PLWG | 14+1LV             | 27      | 4.7   | 27    | 4.7 | 5.5   | 0.7 |
| EGG.3P.318.PLWG | 18+1LV             | 27      | 4.7   | 27    | 4.7 | -     | -   |

**Note:** for PCB drilling pattern see page 65.  
Panel hole see page 65.

## EBG Fixed socket with key, square flange and screw fixing

| Part Number     |
|-----------------|
| EBG.3P.306.PLWG |
| EBG.3P.310.PLWG |
| EBG.3P.314.PLWG |

**Note:** for PCB drilling pattern see page 65.  
Panel hole see page 65.

## PHG Free socket with key and cable seal

| Part Number        | Cable ø |     |
|--------------------|---------|-----|
|                    | min     | max |
| PHG.3P.●●●.NLWD75N | 6.7     | 7.5 |
| PHG.3P.●●●.NLWD85N | 7.6     | 8.5 |
| PHG.3P.●●●.NLWD95N | 8.6     | 9.5 |

**Note:** the picture shows outershell in black PSU.

|                           |                      |                        | 96K       | 11+1LV<br>1FO <sup>4)</sup>  | 0.7      | 0.6                                | •            | -     | -                | 2.7                                                    | 0.75                                 | 0.75                                     | 3.0               |
| Fluidic<br>Hybrid +LV     |                      |                        | 033       | 3Fluid.<br>+ 3LV             | 0.9      | -                                  | -            | •     | -                | 3.0                                                    | 1.45                                 | 1.45                                     | 9.0               |

**Note:** 1) depending on specific application and related standard, more restrictive operating voltage may apply.

We suggest operating voltage = 1/3 test voltage, see page 68.

2) shortest distance in air between two conductive parts.

3) shortest distance along the surface of the insulating material between two conductive parts.

4) fibre optic contact must be ordered separately (see page 61)

5) for a given AWG, the diameter of some stranded conductor design is larger than the solder cup diameter (see page 69).

6) configuration 809 use «C» type coaxial contact.

## Contact type

Select the type of contact: solder or crimp?

|      |        |      |
|------|--------|------|
| Plug | Type   | Male |
|      | solder | W    |
|      | crimp  | Y    |

|        |        |        |
|--------|--------|--------|
| Socket | Type   | Female |
|        | solder | W      |
|        | crimp  | Y      |
|        | print  | N      |

When should I use crimp rather than solder contacts ?

### Soldering

- recommended for small volumes
- requires little amount of tooling (soldering iron)
- requires more time

### Crimping

- recommended for large volumes
- no heat is required to make the connection
- for contacts with high density
- for use in high temperature environment
- requires extra tooling (crimping tools)

## Colour coding

|           | Colours |      |        |       |      |       |       |       |
|-----------|---------|------|--------|-------|------|-------|-------|-------|
|           | grey    | blue | yellow | black | red  | green | brown | white |
| Reference | G       | A    | J      | N     | R    | V     | M     | B     |
| RAL code  | 7001    | 5002 | 1016   | 9005  | 3020 | 6024  | 8002  | 9003  |

**Note:** the RAL colours are indicative and depend on raw material and production process. Colour may differ.

Easy identification with the assistance of colour coding. Outershell is only available in grey, black or white (see page 55).

## Accessories

### FGG-EGG Insulator for crimp contacts

| Contact configuration | Insulator part number |               |

| GEB.3P.240.UN | PSU  | black   |

| Part Number   | Mat. | Colours |
|---------------|------|---------|
| EBG.3P.260.UB | PSU  | white   |
| EBG.3P.260.UG | PSU  | grey    |
| EBG.3P.260.UN | PSU  | black   |

**Note:** a finishing cover is supplied with all EBG fixed sockets with a square flange. Models EBG sockets, with a square flange, can also be mounted without using the fixing screws.

## GMA Bend relief

| Part Number   | Cut | Cable ø (mm) |      |
|---------------|-----|--------------|------|
|               |     | min.         | max. |
| GMA.3P.050.SN | –   | 3.0          | 3.9  |
|               | A   | 4.0          | 4.9  |
|               | B   | 5.0          | 5.9  |
|               | C   | 6.0          | 7.0  |

Material: Black thermoplastic rubber

**Note:** the cable entry of the FGG plugs can be fitted with a flexible bend relief which can accommodate cables of 3 to 7 mm in diameter. The adjustment to the diameter is done by cutting the conical end. The bend relief is mounted inside the nut. The cable must have a sheath with a large enough diameter in order to be held by the clamping system.

## Fibre optic contact

For the hybrid type LV + fibre optic, fibre optic contacts must be ordered separately.

### FFS.F1 Male F1 Fibre Optic Contact for plug

| Reference        | Ferrule inside ø (µm) | Fibre type |
|------------------|-----------------------|------------|
| FFS.F1.GB1.ACE30 | 235                   | HCS        |
| FFS.F1.HB1.AAE30 | 335                   | HCS        |
| FFS.F1.JB1.AAE30 | 435                   | HCS        |
| FFS.F1.KB1.AAE30 | 640                   | HCS        |
| FFS.F1.RB1.AAE30 | 1100                  | Polymer    |

**Note:** other ferrule inside diameter, consult us.

### PSS.F1 Female F1 Fibre Optic Contact for socket

| Reference        | Ferrule inside ø (µm) | Fibre type |
|------------------|-----------------------|------------|
| PSS.F1.GB1.ACE30 | 235                   | HCS        |
| PSS.F1.HB1.AAE30 | 335                   | HCS        |
| PSS.F1.JB1.AAE30 | 435                   | HCS        |
| PSS.F1.KB1.AAE30 | 640                   | HCS        |
| PSS.F1.RB1.AAE30 | 1100                  | Polymer    |

**Note:** other ferrule inside diameter, consult us.

### FFS.F2 Male F2 Fibre Optic Contact for plug

| Reference        | Ferrule inside ø (µm) | Fibre type |
|------------------|-----------------------|------------|
| FFS.F2.BA2.LCE30 | 125                   | 9/125      |
| FFS.F2.BB2.LCE30 | 126                   | 9/125      |
| FFS.F2.BD2.LCE30 | 128                   | 50/125     |
| FFS.F2.BD2.LCE30 | 128                   | 62.5/125   |
| FFS.F2.FB2.LCE30 | 144                   | 100/40     |

**Note:** all dimensions are in millimeters.

PSS.F2 Female F2 Fibre Optic Contact for socket

| Reference        | Ferrule inside<br>ø (µm) | Fibre type |
|------------------|--------------------------|------------|
| PSS.F2.BA2.LCE30 | 125                      | 9/125      |
| PSS.F2.BB2.LCE30 | 126                      | 9/125      |
| PSS.F2.BD2.LCE30 | 128                      | 50/125     |
| PSS.F2.BD2.LCE30 | 128                      | 62.5/125   |
| PSS.F2.FB2.LCE30 | 144                      | 100/40     |

**Note:** all dimensions are in millimeters.

Recommended coaxial cables

| Group <sup>1)</sup> |   |   | Type      |
|---------------------|---|---|-----------|
| 1                   | 2 | 3 |           |
| •                   |   |   | RG.174A/U |
|                     | • |   | RG.178B/U |
|                     |   | • | RG.179B/U |
|                     |   | • | RG.187A/U |
| •                   |   |   | RG.188A/U |
|                     | • |   | RG.196A/U |
| •                   |   |   | RG.316/U  |

**Note:** 1) the cable group number corresponding to the cable must be written in the variant position of the part number (see page 55).

Tooling

DPC.91.701.V Crimping tool

DCE Positioners for crimp contacts

DCF Automatic extraction tools for crimp contacts

| Contact type | Conductor (mm) | Contact ø AWG | Positioner part number |                | Selector No Setting | Part number extractor               |
|--------------|----------------|---------------|------------------------|----------------|---------------------|-------------------------------------|
|              |                |               | Male                   | Female         |                     | For male contact and female contact |
| 306          | 0.9            | 20-22-24      | DCE.91.093.PVC         | DCE.91.093.PVM | 6-5-5               | DCF.91.093.5LT                      |
| 310          | 0.9            | 20-22-24      | DCE.91.093.PVC         | DCE.91.093.PVM | 6-5-5               | DCF.91.093.5LT                      |
| 314          | 0.9            | 20-22-24      | DCE.91.093.PVC         | DCE.91.093.PVM | 6-5-5               | DCF.91.093.5LT                      |

**Note:** this model is used for male and female contacts.  
The variance in conductor stranding diameter for the minimum AWG is such that some can have a cross section which is not sufficient to guarantee crimping as per IEC 60352-2 standard. All dimensions are in millimeters.

## Assembly instructions

### Solder LV contacts

1. Strip the cable according to the lengths given in the table. Tin the conductors. In case of a screened cable separate the braid and twist it apart as shown.

| Configuration | Dimensions (mm) |     |
|---------------|-----------------|-----|
|               | L               | T   |
| 306 - 310     | 13.0            | 3.0 |
| 314 - 318     | 13.0            | 3.0 |

2. Slide the retaining nut ①, the washer ②, the seal ③ and the clamping sleeve ④. In case of a screened cable solder the braid into the earthing contact ⑥.

3. In case of a screened cable introduce the earthing contact ⑥ into the insert ⑧. Check that contact is correctly located and remains in position when given a gentle pull. Solder conductors into contacts, making sure that neither solder nor flux gets onto the insulator or cable insulation.

4. Slide the clamping sleeve ④ forward and locate tag ⑤ into one of the insulator slot according to the selected polarization code. Make sure that same code is used for plug and socket. Tight the screw of the clamping sleeve ④ to secure the cable. Slide washer and seal against clamping sleeve.

5. Push the whole assembly into the shell ⑨ whilst turning it to insure that the tag ⑤ is correctly located in the inside slot of the shell. Tighten the retaining nut ① to the maximum torque of 1.2 Nm.

– Socket mounting nut or screws = 2.3 Nm.

#### For PSU only:

We recommend ONLY the use of VTCS-6 Clear Vibra-tite or ThreeBond 1401 to secure the connector backnut. The use of other materials could result in damage to the connector. The only recommended chemical cleaner is Isopropyl Alcohol.

## Crimp LV contacts

1. Strip the cable according to the lengths given in the table. Tin the conductors. In case of a screened cable separate the braid and twist it apart as shown.

| Configuration | Dimensions (mm) |     |
|---------------|-----------------|-----|
|               | L               | T   |
| 306, 310, 314 | 19.0            | 5.4 |

2. Slide the retaining nut ①, the washer ②, the seal ③ and the clamping sleeve ④.
- In case of a screened cable solder the braid into the earthing contact ⑥.

3. Fix the appropriate positioner (table page 51) in the crimping tool. Set selector to the number corresponding to the conductor AWG as indicated on the positioner label. Fit conductor into contact ⑦ and make sure it is visible through the inspection hole in the crimp barrel. Slide conductor-contact combination into the open crimping tool; make sure that the contact is fully pushed into the positioner. Close the tool. Remove from crimping tool and check that conductor is secure in contact and shows in inspection hole.

4. Now arrange contact-conductor combinations according to the insert marking and locate them into the insert ⑤. Check that all contacts are correctly located and remain in position when given a gentle pull. In case of a screened cable introduce the earthing contact ⑥ into the insert ⑧. Check that contact is correctly located and remains in position when given a gentle pull.

5. Slide the clamping sleeve ④ forward and locate tag ⑤ into one of the insulator slot according to the selected polarization code. Make sure that same code is used for plug and socket. Tight the screw of the clamping sleeve ④ to secure the cable. Slide washer and seal against clamping sleeve.

6. Push the whole assembly into the shell ⑨ whilst turning it to insure that the tag ⑤ is correctly located in the inside slot of the shell. Tighten the retaining nut ① to the maximum torque of 1.2 Nm.

– Socket mounting nut or screws = 2.3 Nm.

### For PSU only:

We recommend ONLY the use of VTCS-6 Clear Vibra-tite or ThreeBond 1401 to secure the connector backnut. The use of other materials could result in damage to the connector. The only recommended chemical cleaner is Isopropyl Alcohol.

## Mechanical latching characteristics

$F_v$ : average latching force

$F_d$ : average unmating force with axial pull on the outer release sleeve

$F_a$ : average retention force for straight pull on the collet nut

### PSU shell material

| Force (N) | Series |     |      |
|-----------|--------|-----|------|
|           | 1P     | 2P  | 3P   |
| $F_v$     | 8.0    | 5.5 | 7.5  |
| $F_d$     | 8.0    | 8.5 | 17.0 |
| $F_a$     | 100    | 150 | 120  |

### PEI shell material

| Force (N) | Series |     |
|-----------|--------|-----|
|           | 1P     | 2P  |
| $F_v$     | 6.5    | 6.0 |
| $F_d$     | 6.5    | 9.0 |
| $F_a$     | 120    | 100 |

**Notes:** 1N = 0.102 kg.  
Mechanical endurance: 1000 cycles.

**Notes:** The forces were measured on PSU outer shells not fitted with contacts. The mechanical endurance represents the number of cycles after which the latching system is still effective (1 cycle = 1 latching/unlatching – 300 cycles per hour). The values were measured according to the standard IEC 60512-7, test 13a.

### Contact resistance with relation to the number of mating cycles

(measured according to IEC 60512-2 test 2a)

Average values measured after the mating cycles and the salt spray test according to IEC 60512-6 test 11f.

| A ø (mm) | Contact resistance (mΩ) |
|----------|-------------------------|
|          | 1000 cycles             |
| 0.5      | < 8.5                   |
| 0.7      | < 6.5                   |
| 0.9      | < 4.5                   |
| 1.3      | < 2.8                   |
| 1.6      | < 2.6                   |
| 2.0      | < 2.9                   |

**Note:** 1) 21 days at 95% RH according to IEC 60068-2-3.

### Insulation resistance between the contacts and contact/shell

(measured according to IEC 60512-2 test 3a)

| Insulating material               | Multipole          |
|-----------------------------------|--------------------|
|                                   | PEEK               |
| new                               | > $10^{12} \Omega$ |
| after humidity test <sup>1)</sup> | > $10^{10} \Omega$ |

### Test voltage

Test voltage ( $U_e$ ) :  
(measured according to the IEC 60512-2 test 4a standard)

It corresponds to 75% of the mean breakdown voltage.  
Test voltage is applied at 500 V/s and the test duration is 1 minute.

This test has been carried out with a mated plug and socket, with power supply only on the plug end.

Operating voltage ( $U_s$ ) :  
It is proposed according to the following ratio :  $U_s = \frac{U_e}{3}$

### Caution:

For a number of applications, safety requirements for electrical appliances are more severe with regard to operating voltage.

In such cases operating voltage is defined according to creepage distance and air clearance between live parts.

Please consult us for the choice of a connector by indicating the safety standard to be met by the product.

## Technical tables

Table of American Wire Gauge

| AWG   | Construction |            | Ø wire max |       | Wire section |                      |
|-------|--------------|------------|------------|-------|--------------|----------------------|
|       | Strand nb    | AWG/strand | (mm)       | (in)  | (mm²)        | (sq in)              |
| 0     | 259          | 24         | 11.277     | 0.444 | 52.90        | 0.0820               |

## Product safety notice

**PLEASE READ AND FOLLOW ALL INSTRUCTIONS CAREFULLY AND CONSULT ALL RELEVANT NATIONAL AND INTERNATIONAL SAFETY REGULATIONS FOR YOUR APPLICATION. IMPROPER HANDLING, CABLE ASSEMBLY, OR WRONG USE OF CONNECTORS CAN RESULT IN HAZARDOUS SITUATIONS.**

### 1. SHOCK AND FIRE HAZARD

Incorrect wiring, the use of damaged components, presence of foreign objects (such as metal debris), and / or residue (such as cleaning fluids), can result in short circuits, overheating, and / or risk of electric shock.

Mated components should never be disconnected while live as this may result in an exposed electric arc and local overheating, resulting in possible damage to components.

### 2. HANDLING

Connectors and their components should be visually inspected for damage prior to installation and assembly. Suspect components should be rejected or returned to the factory for verification.

Connector assembly and installation should only be carried out by properly trained personnel. Proper tools must be used during installation and / or assembly in order to obtain safe and reliable performance.

### 3. USE

Connectors with exposed contacts should never be live (or on the current supply side of a circuit). Under general conditions voltages above 30 VAC and 42 VDC are considered hazardous and proper measures should be taken to eliminate all risk of transmission of such voltages to any exposed metal part of the connector.

### 4. TEST AND OPERATING VOLTAGES

The maximum admissible operating voltage depends upon the national or international standards in force for the application in question. Air and creepage distances impact the operating voltage; reference values are indicated in the catalog however these may be influenced by PC board design and / or wiring harnesses.

The test voltage indicated in the catalog is 75% of the mean breakdown voltage; the test is applied at 500 V/s and the test duration is 1 minute.

### 5. CE MARKING

CE marking  means that the appliance or equipment bearing it complies with the protection requirements of one or several European safety directives.

CE marking  applies to complete products or equipment, **but not to electromechanical components, such as connectors.**

### 6. PRODUCT IMPROVEMENTS

The LEMO Group reserves the right to modify and improve to our products or specifications without providing prior notification.

## Данный компонент на территории Российской Федерации

**Вы можете приобрести в компании MosChip.**

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
