

KMT37

Magnetic Angle Sensor

SPECIFICATIONS

- ✦ AMR Sensor with 180° period
- ✦ For the use at moderate field strengths
- ✦ High accuracy
- ✦ Reliable SO8-package
- ✦ Qualified for automotive applications

The KMT37 is a magnetic field sensor based on the anisotropic magneto resistance effect, i.e. it is sensing the **magnetic field direction** independently on the magnetic field strength for applied field strengths $H \geq 14$ kA/m. The sensor contains two parallel supplied Wheatstone bridges, which enclose a sensitive angle of 45 degrees.

A rotating magnetic field in the surface parallel to the chip (x-y plane) will deliver two independent sinusoidal output signals, one following a $\cos(2\vartheta)$ and the second following a $\sin(2\vartheta)$ function, ϑ being the angle between sensor and field direction (See Figure 2).

FEATURES

- ✦ Contactless angular position
- ✦ Design optimized linearity
- ✦ High accuracy
- ✦ Low cost, low power
- ✦ Self diagnosis feature
- ✦ User has complete control over signal evaluation
- ✦ Reliable SO8-Package
- ✦ High rotational speed possible
- ✦ Extended operating temperature range
- ✦ (-40 °C to +150 °C)
- ✦ Ideal for harsh environments due to magnetic sensing principle
- ✦ RoHS compliant (lead free)

APPLICATIONS

- ✦ Absolute and incremental angle measurement
- ✦ Motor motion control
- ✦ Robotics
- ✦ Camera positioning
- ✦ Potentiometer replacement
- ✦ Position measurement in medical applications
- ✦ Automotive (steering angle, torque, etc.)

CHARACTERISTIC VALUES

Parameter	Condition	Symbol	Min	Typ	Max	Unit
Absolute maximum ratings						
Supply voltage		V_{CC}			10	V
Operating temperature		T_{OP}	-40		+150	°C
Storage temperature		T_{ST}	-50		+150	°C
Operating conditions						
Supply voltage		V_{CC}	0	5	8.5	V
Applied magnetic field		H	14	25	400	kA/m

General parameters						
Bridge resistance	T = 25 °C	R_B	2.4	3.0	3.6	k_{Ω}
max. signal amplitude	T = 25 °C, H = 25 kA/m	$\Leftrightarrow V/V_{CC}$	9	11	13	mV/V
Offset voltage 2)	T = 25 °C, H = 25 kA/m	V_{OFF}/V_{CC}	-1		+1	mV/V
Hysteresis 1) (Repeatability)	H = 14 kA/m H = 25 kA/m	Hyst		0.1 0.05	0.4 0.1	deg
Accuracy 1)	H = 14 kA/m H = 25 kA/m	$\Leftrightarrow \Rightarrow$		0.1 0.05	0.5 0.15	deg
TC of amplitude	H = 25 kA/m, 3)	TC_{SV}		-0.35		%/K
TC of bridge resistance	3)	TC_{BR}		+0.35		%/K
TC of offset voltage	H = 25 kA/m, 1), 2)	TC_{Voff}	-4	0	+4	$\mu V/V/K$
Amplitude synchronism	H = 25 kA/m, 4)	k	99.5	100	100.5	%
Sensitivity (zero crossing)	H = 25 kA/m, 4), $\Rightarrow 1 = 135^\circ, \Rightarrow 2 = 0^\circ$	$S_{\Rightarrow 1}$ or $S_{\Rightarrow 2}$	$\Leftrightarrow V_n/V_{CC} [mV/V] \times \blacktriangle / 180^\circ$			mV/V/deg
Peak output voltage	H = 25 kA/m, $V_{CC} = 5 V$, 4)	$V_{po\Omega}$	45	55	65	mV/V

- 1) Hysteresis and accuracy are depending nearly inversely proportional on the magnetic field strength. The accuracy is defined as the max. angular difference between actual field angle and measured angle calculated from the third and fifth harmonics of the Fourier spectrum. The hysteresis is defined as angular difference between left and right turn.
- 2) Offset voltages are calculated by measuring both output voltages at several field angles between 0 and 360°, then drawing a diagram with the output voltages as axis and fitting a circle to the signal points. The Offsets are the coordinates of the circle center.
- 3) Reference temperature (Temp. with parameter value = 100%) $T_{ref} = -25^\circ C$, calculated from values at $-25^\circ C$ and $+125^\circ C$.
- 4) This parameter is given for reference only and is not measured on a regular basis.

Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009

Офис по работе с юридическими лицами:
