- Notes:** 1) The fuse must be mounted so that creepage and clearance distances are not impaired in any way.
 2) The fuse is suitable for use in intrinsically safe equipment and associated apparatus for voltage not exceeding 375V peak.
 3) Maximum surface temperature rise at 170% rated current: ≤200mA = 88°C, 250mA = 52°C, 500mA = 52°C, and 750mA = 45°C.

Temperature Derating Curve

- Notes:**
- 1) Derating depicted in this curve is in addition to the standard derating of 25% for continuous operation.
 - 2) The temperature derating curve represents the nominal conditions. For questions about temperature derating curve, please consult Littelfuse technical support for assistance.
