

General Description

The MAX11300PMB1 peripheral module (Pmod™) provides the necessary hardware to interface the MAX11300 20-channel programmable mixed-signal I/O device to any system that utilizes Pmod-compatible expansion ports configurable for SPI communication. The device is a 12-bit multichannel analog-to-digital converter (ADC) and a 12-bit buffered DAC output in a single IC. This device also includes software-configurable general-purpose I/O ports. A local and two remote temperature sensors keep track of junction and environmental temperatures. Adjacent pairs of ports can also be used as logic translator or analog switch. Each pin can also be used as a positive input of a comparator with programmable threshold.

Refer to the MAX11300 IC data sheet for detailed information regarding operation of the device and the USB2PMB1 (Munich) adapter board data sheet for detailed information regarding the Munich board and GUI. Refer to the MAX11300 peripheral module and Munich adaptor board *Quick Start Guide* for step-by-step evaluation instructions. Refer to the MAX11300 Configuration Software User Guide for detailed information using the design tool.

Peripheral Module Board Photo

Pmod is a trademark of Digilent Inc.

Features and Benefits

- Up to 20 12-Bit ADC Programmable Inputs
- Up to 20 12-Bit DACs with 25mA Current Capability
 - 70mA max at +12V with On-Board Power Supply
 - Use External Power Supply at VDDIO (VDDIO Jumper Removed) if More Current is Needed
- Up to 20 Digital I/Os
- Up to 20 Comparator Inputs
- Internal or External Reference for ADC and DAC
- Individually Selectable ADC References for Each Port
- Internal Temperature Sensor (-40°C to +125°C, ±3°C Accuracy)
- Two Remote Temperature-Measurement Controllers (-40°C to +150°C, ±3°C Accuracy)
- 2x6-Pin Pmod-Compatible Connector (SPI)
- RoHS Compliant
- Proven PCB Layout
- Fully Assembled and Tested

Ordering Information appears at end of data sheet.

Detailed Description

SPI Interface

The MAX11300PMB1 Pmod can plug directly into a Pmod-compatible port (configured for SPI) through the X1 connector. For information on the SPI protocol, refer to the MAX11300 IC data sheet.

- Connector X1 provides connection of the module to the Pmod host. See [Table 1](#) and [Figure 1](#) for detailed description.
- Connectors SV1 and SV2 provide connection to the IC pins (MAX11300 ports 0–19). Connector SV3 is ground.
- Connectors EXT_TEMP1 and EXT_TEMP2 provide connection to the external temperature sensors.
- Connector VDDIO provides connection to the AVDDIO pins of the device, which is connected to the +12V power supply
- Connector VSSIO provides connection to the AVSSIO pins of the device, which is the analog negative supply for mixed-signal ports. Install the VSSIO jumper to connect AVSSIO to ground.

Figure 1. X1: Pmod SPI Connector Pin Configuration

Table 1. Connector X1 (SPI Communication)

PIN	SIGNAL	DESCRIPTION
1	CS	Chip Select. Assert low to enable the SPI interface.
2	MOSI	MAX11300 Serial Data Input
3	MISO	MAX11300 Serial-Data Output
4	SCLK	MAX11300 Serial-Clock Input
5, 11	GND	Ground
6, 12	+3.3V	+3.3V Power Supplies
7	INTB	Interrupt Open-Drain Output. Asserted low when the MAX11300 issues an interrupt.
8	—	No Connection
9	—	No Connection
10	CNVTB	ADC Conversion Control Input. Assert low to initiate an ADC conversion.

Default Jumper Setting

Verify that all jumpers are in their default positions, as follows:

- 1) Jumper VDDIO: Connect from VDDIO to +12V
- 2) Jumper VSSIO: Connect from VSSIO to GND
- 3) Jumpers EXT_TEMP1 and EXT_TEMP2: Open

Power Supplies

The Pmod contains the MAX8752 step-up DC-DC converter (U3), which upconverts the +3.3V power supply from the Pmod X1 connector to +13V. The MAX5084 (U2) linear regulator then regulates the +13V input to +5V output voltage, providing power supply to the positive analog supply AVDD of the IC. Another MAX5084 (U1) provides a +12V power supply to the positive analog supply of the mixed-signal ports (AVDDIO) of the IC. For bipolar applications, use an external power supply to provide negative voltage for AVSSIO. See [Figure 2](#).

Software Graphical User Interface (GUI)

The Munich software GUI is provided to facilitate evaluation of the Pmod.

Visit www.maximintegrated.com/evkitsoftware to download the latest version of the Munich GUI software. Refer to the MAX11300PMB1 peripheral module and Munich (USB2PMB1) adapter board *Quick Start Guide* for step-by-step evaluation using the Munich GUI.

External Power Supply

The on-board power supply provides 70mA max current at VDDIO = +12V. If additional current is needed, use an external power supply by removing the jumper connecting VDDIO to +12V and connecting a +12V external power supply to the VDDIO pin.

For bipolar applications, remove the jumper from VSSIO pin to GND and connect a negative power supply to the VSSIO pin. See [Figure 2](#) and refer to the MAX11300 IC data sheet for details.

External Temperature Sensors

Two-pin connector vertical headers, EXT_TEMP1 and EXT_TEMP2, are provided to measure the environment temperature. Connect the base and collector of diode-connected transistors, such as the 2N3906 to the TEMP1 or TEMP2 pin and the emitter to the EXT pin to measure the external temperature. See [Figures 3](#) and [4](#).

Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
