

CEL's MeshConnect ICs combine a powerful RF transceiver with an industry-standard, 8051-based 8-bit microprocessor. Available in a QFN48 or VFBGA72 package, these low cost, highly integrated System-on-Chip radios can help simplify your design, reduce its size, lower its power consumption, and reduce your overall system costs.

At +8 dBm, the MeshConnect IC delivers the industry's leading output power. Combined with excellent -98 dBm receiver sensitivity, the MeshConnect IC provides a best-in-class link budget of 106 dB. The high output power ensures immunity to interference from other 2.4GHz transmissions, while the high sensitivity and link budget can help eliminate the need for power amplifiers and peripheral range extension components.

With 1 Mbps data rates and an on-chip Voice CODEC the MeshConnect IC can handle high-bandwidth voice /data transmission. A variety of other robust peripherals — battery monitor, temperature sensor, RSSI and AES encryption engines — are all designed to help lower your system component count.

MeshConnect ICs are ideal for home and building automation, lighting control, solar/wind, HVAC control, security networks, cable replacement, video, asset management, AMR/AMI, remote sensing and voice applications. With their low Tx, Rx and standby power consumption, they're an excellent choice when battery life is critical.

MeshConnect ICs are part of a broad family of CEL ZigBee products, including integrated radio modules and discrete power amplifiers, LNAs and RFIC switches for ZigBee range extension.

Integrated RF Transceiver/MCU for ZigBee / IEEE 802.15.4 Networks

FEATURES

- Integrated 2.4 GHz Transceiver and 8-bit 8051-based Microprocessor
- 106 dB RF Link Budget
- Supports up to 1Mbps Wireless Networks
- On-chip Voice CODEC
- On-chip AES Encryption Engine
- On-chip Battery Monitor and Temperature Sensor
- On-chip RSSI Engine
- Four 16-bit Timers, Two PWMs
- Two UARTs plus SPI Interface
- Single 16MHz Crystal Design
- Single-Differential Bidirectional Antenna Interface

SPECIFICATIONS

Operating Voltage	1.5 – 3.3V
Output Power	+8 dBm max
Sensitivity	-98 dBm
Flash Memory	96 KB
Data Memory	8 KB
Power Consumption	
<i>Transmit Mode</i>	<i>QFN48:</i> 30.6 mA @ 0 dBm <i>VFBGA72:</i> 29.7 mA @ 0 dBm
<i>Receive Mode</i>	33.2 mA
<i>Standby Mode</i>	0.3 μA

APPLICATIONS

- Home & Building Automation
- Lighting Control
- Solar/Wind
- HVAC Control
- Security Networks
- Cable Replacement
- Video
- Asset Management
- AMR/AMI
- Remote Sensing
- Voice

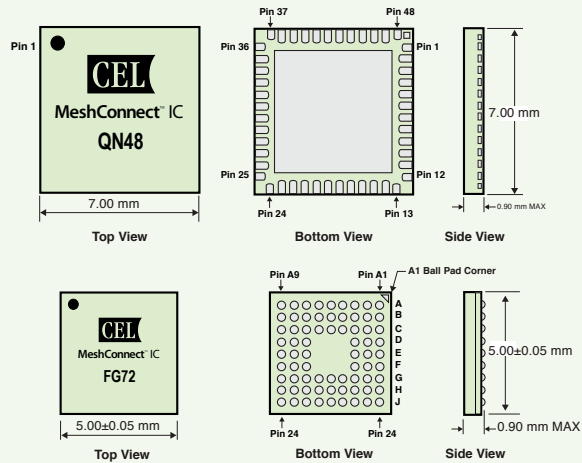

MeshConnect IC Block Diagram

CEL MeshConnect™ Product Family

MeshConnect™ Module	
ZICM2410P0-1	Module with integrated PCB antenna
ZICM2410P0-1-SN	Module with integrated PCB antenna and SNAP OS with MAC address
ZICM2410P0-1C	Module with connector for external antenna option
ZICM2410P0-1C-SN	Module with integrated PCB antenna and SNAP OS with MAC address
MeshConnect™ Extended Range Module	
ZICM2410P2-2	Extended Range Module with integrated PCB antenna
ZICM2410P2-2-SN	Module with integrated PCB antenna and SNAP OS with MAC address
ZICM2410P2-2C	Extended Range Module with connector for external antenna option
ZICM2410P2-2C-SN	Module with integrated PCB antenna and SNAP OS with MAC address
MeshConnect™ System on Chip ICs	
ZIC2410QN48	48 pin QFN package
ZIC2410FG72	72 pin VFBGA package

MODULE DIMENSIONS (mm)

See Data Sheet for Pin Outs, RF and Electrical Specifications.

MeshConnect™ Development Kits

ZICM2410P0-KIT2-1	Evaluation and Development Kit for both Transceiver ICs and MeshConnect Module
ZICM2410P2-KIT1-1	Evaluation and Development Kit for both Transceiver ICs and Extended Range Module

Данный компонент на территории Российской Федерации

Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009

Офис по работе с юридическими лицами:
