*1 In case of modular power supply, the value changes by composing and load factor of installed output modules. The values in specifications mean each the model are composed of voluntary modules that are 5V (code : C), 12V (code : E), 24V (code : H) and the output power is total

output wattage under the prescribed conditions.
 *2 More than 3sec. to restart. Io=100%
 *3 Complies with IEC60950 and DEN-AN 60Hz and 100% load.
 *4 Refer to instruction manual 4.2 Derating in detail.
 *5 Each output module, RC and AUX are isolated.

*6 Case size contains neither the terminal blocks, screw nor.
 *7 Primary inrush current / Secondary inrush current.
 *8 Please contact us about safety approvals for the model with option.
 *9 Please contact us about class C.
 * A sound may occur from power supply at pulse loading.

ACE

- *1 Operating condition of peak current : Peak current is less than 10sec, duty is less than 35% and average current is less than rated current. (rated current2 at Module W, Z, 9, Q and V)
- *2 Measured by 20MHz oscilloscope or Ripple-Noise meter (Equivalent to KEISOKU-GIKEN : RM101). Ripple and Ripple Noise is measured by using measuring board with capacitor of 22 μ F within 150mm from output terminal.
- *3 Drift is changed in DC output for an eight hour period after half-hour warm-up at 25°C, with the input voltage held constant at the rated input/output.
- *4 When the output voltage of module A is used less than 2.0V, keep minimum output current 2.6A.
- *5 It is a value from 0 to rated output current1. The current on non-measurement side is fixed.
- *6 It is a value from 0 to rated output current2. The current on non-measurement side is fixed.
- *7 The sum of +power and -power must be less than output power(Y:50W, W:76.8W, Z:75W, 9:76.8W, Q:153.6W, V:165W).

- *8 Ratings of V2 can draw up to 50% of rated current at the time of 0A in load of V1. (Only module S,T,U. refer to instruction manual 4.2 for details.)
- * Each output of module Y-Z, 9, Q and V is a ground common type (not isolated), each output of module S,T and U is isolated.
- * For ACE300F,450F and 650F , input and output terminals can be set at the same side if Input module (code:I) is installed instead of the most left module.
- * Modules which can correspond to medical electrical equipment (UL2601-1, EN60601-1) are all modules except module S, T and U. Refer to instruction manual 7. for details.
