Rack Solution for Keysight Systems

Keysight Technologies offers 19-inch EIA (Electronics Industries Association) rack cabinets tailored to meet the needs of test and measurement instrumentation customers. Rack mounting is fast and easy with unique design features. A selection of options and accessories provides flexibility to meet the vast majority of racking applications.

Standard rack cabinet (E3661B)

Keysight Rack Features

- Vented top and rear door (with lock)
- Solid base
- Leveling screws
- Retractable anti-tip foot
- 4 Concealed lifting hooks. Each hook can support 227 kg (500 lbs).
- One Keysight System II rail kit, including a pair of rails.
- 3-Inch heavy duty casters
- Power distribution Unit (PDU) – must specify 110 V or 220 V
- Easy to remove side panels

Standard rack cabinets: E3661B (32 EIA), E7590A (25 EIA), E3662B (41 EIA)

Shipping Features

All racks and accessories are shipped with basic assembly completed, as shown.

Keysight Rack Value

Keysight racks have been designed and engineered to save time and money for our customers:

- Package design — Designed for easy unloading from the pallet.
- Pallet re-use — Racks are sent out with double pallets, as well as a ramp. Racks can be integrated on the pallet, which adds a convenient system for integrating the rack. The pallet has been tested up to 1000 pounds and can also be used to ship an integrated system.
- Fully assembled rack — Keysight ships racks fully assembled and ready for

equipment installation saving time and money. Accessories can be ordered and will be shipped ready to be integrated onto the rack.

- Unique column and rail design — Equipment installation time is cut in half because of Keysight's unique column and support rail design. Our special cutouts in the columns, spaced at EIA intervals and rail hooks assure instruments are mounted easily in the right place the first time!

Enhance Your Instrument Investment

Keysight racks are specifically designed for Keysight's test and measurement equipment, virtually ensuring a perfect fit. They will also accommodate non-Keysight equipment making them suitable for a mixed instrument environment.

Load a Rack in Less Time

The design of Keysight support rails can cut in half the time required to install equipment in a rack. The rails hang on discrete slots on the vertical mounting columns, corresponding to each EIA unit in the rack. Vertical adjustment between instruments is minimized by selecting the proper rail. Rails are available for Keysight System II instruments and for flat bottom instrument chassis (see page 34). The system was specifically designed to minimize the time required to install instruments.

Rack Systems Fast and Easily

Racks are shipped with all basic materials assembled. No time is lost preparing a rack with basic assembly. Accessories, kits and supplementary small parts are shipped separately, as ordered, and are ready for immediate configuration.

More than just a way of storing instruments, the racks reflect Keysight's reputation for quality and design. A sturdy frame provides structural integrity, which allows lightweight, easy-to-lift off side panels that allow for installation and easy access to equipment and cables. Rails are placed into keyed slots in the vertical columns, resulting in quick and accurate positioning.

Use Vertical Space Efficiently

Vertical space within a rack is measured in industry-standard EIA units, where 1 EIA unit = 1.75 inches (44.5 mm). Equipment height is also specified in EIA units. System configuration is made easier by counting EIA units from the base of the rack. A seamless fit of instrument and rail is ensured.

Manage Power Requirements

A power management system must be ordered. Option AW3 (110V) or option AW5 (220V). It is vertically mounted behind the rack rear column and supplies

power to the cabinet. An illuminated master switch, which is conveniently located on the front of the rack, provides easy access to turn the power on and off to the Power Distribution Unit (PDU) outlets.

To completely remove power from the PDU and the rack system, the PDU power cord needs to be removed electrical system, or if the rack system is connected to a dedicated circuit breaker, the breaker needs to be opened.

Protect from Heat Buildup

It is important for racks to efficiently dispose of heat. Instruments increasingly generate more heat, and in a compact rack mounted system the heat buildup can be detrimental to the system.

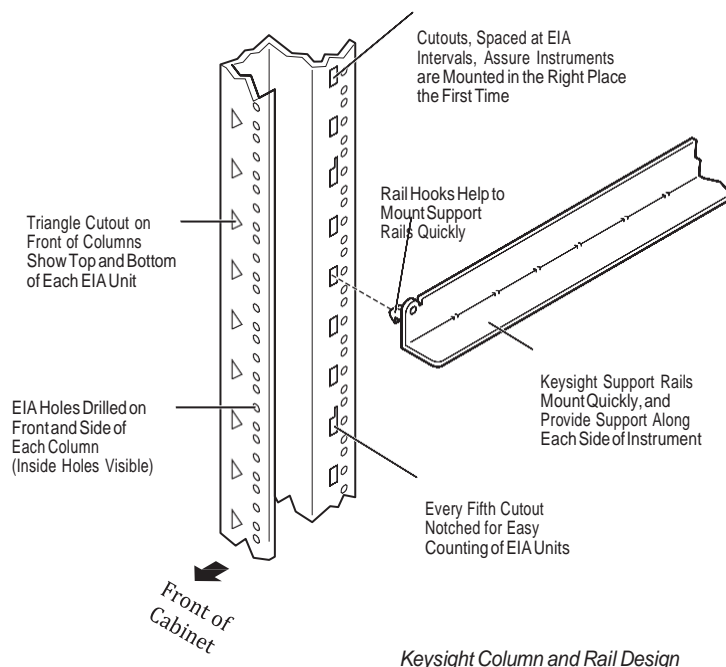

System-generated heat is removed by natural convection through a ventilation path incorporated in the roof of the racks. The vented rear door also helps reduce the heat captured within the rack. For greater heat dissipation, an optional top-mounted extractor fan is available. (see page 16)

Secure Instruments During Test

Both the rear door and the optional Plexiglas front door can be locked to secure against disruption of tests or unauthorized removal of system components. The symmetrical rear door design allows it to be mounted for opening to either left or right, useful for multi-bay configurations.

Move Racks Easily

Each rack is provided with four 3-inch diameter, smooth-rolling, heavy-duty casters to facilitate moving racks over short distances. Four lifting hooks conveniently concealed in the top of the rack allow for transport, even when fully loaded. Each hook can support 227 kg (500 lbs) to easily handle the maximum recommended gross weight for a loaded rack of 816 kg (1800 lbs).

Enhance Stability

A front mounted retractable anti-tip stabilizer that can be extended into place with ease is standard on all racks. It provides temporary anti-tip capability for slide mounted products when they are in their extended position. Use the optional anti-tip ballast kit when permanent antitip capability is desired.

Improve Cable Management

Keysight racks, including the 1.3 m, 1.6 m and 2.0 m, have an additional 100 mm of internal space that is available at the rear of the rack. This convenient space is available for the installation of power distribution units (PDUs) and as a convenient location for cables, which are routed out the bottom of the rack. The added rear space also enhances air flow.

Ventilation

Keysight standard racks include a vented top cap and 100 mm additional internal rear space enhancing air flow.

Material

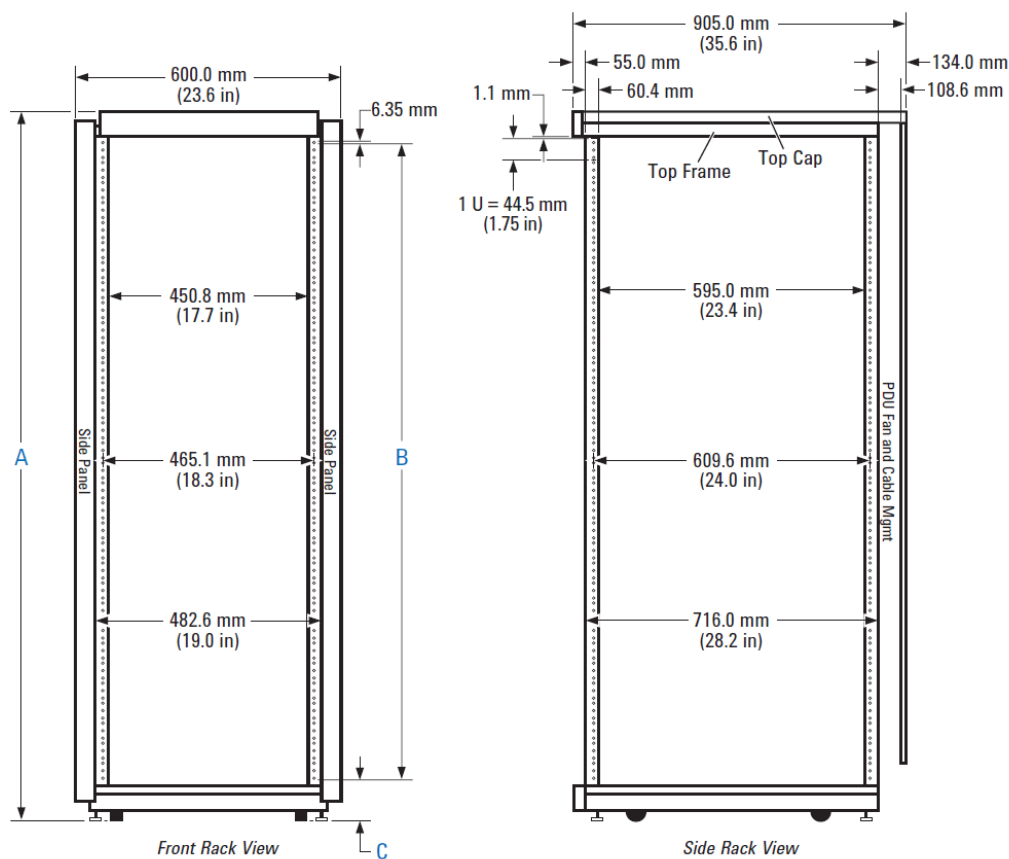

Frame/columns: 13 Ga. cold rolled steel.

Side Panels: 18 Ga. cold rolled steel.

E7590A Configurations

Solid side panels and a lockable vented rear door are standard equipment on the Keysight E7590A (1.3 m, 25 EIA Units) rack cabinet. To provide better value and save integration time, choose a variety of power distribution unit (PDU) options. Choose the PDU option you want, and your rack will arrive fully assembled and ready for use.

Power Distribution Unit (PDU) Options:

Factory installed PDUs are available in a 100-120V North American configuration (AW3) or a 200-240V International configuration (AW5). See the table below for descriptions and ordering information. PDUs mount vertically behind the rear column and do not reduce the mounting space in the rack. Factory installation includes the specified PDU and a lighted, low-voltage power switch mounted in the rack’s forehead bezel.

The low voltage switch only removes power from the PDU outlet receptacles. To completely remove power from the PDU and the rack system, the PDU power cord needs to be removed from the premise electrical system or, if the rack system is connected to a dedicated circuit breaker, the breaker needs to be opened.

You can add a second PDU easily at a later date. See Page 12 for details.

- What you get in the box**
- Rack cabinet (assembled with vented, lockable rear door,
 - 2 removable side panels, vented top, solid base)
 - Leveling screws
 - Retractable anti-tip foot
 - Four 3-inch heavy duty casters
 - One System II rail kit (one set of Keysight instrument rails)
 - Factory installed PDU (110 V option AW3 or 220 V option AW5)
 - Forehead bezel with lighted safety switch

Must Read Box
Racks must specify a PDU Option: (AW3 or AW5)

Factory Installed PDU Option Description		
PDUs include: Forehead bezel with lighted switch, supplemental circuit breakers, IEC-320 upper receptacle for fan or other use.		1.3m
American PDU 100-120V, 16A		25 EIA North
1 IEC-320 C-13 and 5 NEMA 5-15R Receptacles		E7590A+
2 m cord with 5-20P non-locking plug		Option AW5
(To add a 2nd PDU by yourself, order accessory E4451-67000)

2 m cord with no plug, user installs local plug		
(To add a 2nd PDU by yourself, order accessory E4453-67000)		

E3661B and E3662B Configurations

The Keysight E3661B (1.6 m, 32 EIA Units) and E3662B (2.0 m, 41 EIA Units) rack cabinets have a variety of options. Each rack is delivered fully assembled and ready to use. Each rack comes with sides, vented rear door, and one PDU (either 110 V or 220 V).

Factory installed PDUs are available in a 100-120 V North American configuration (AW3) or a 200-240 V International configuration (AW5). See the table on page 10 for descriptions and ordering information.

You can add a second PDU easily at a later date. See page 12 for details.

E3661B	1.6	32	AW3	AW5

Multi-Bay System Configurations

Keysight tie kits allow you to create multi-bay solutions. These kits connect rack columns, and provide clearance for front and rear door operation. Start by filling in the configuration guide (left) and then select the kits for your application.

Multi-bay System Tie Kits

Tie kits include cosmetic panels which connect and finish the front, rear and top of adjacent racks. Order one tie kit for each pair of racks to be joined.

Tie Kit Ordering Information

E4468BZ 1.6 m

T

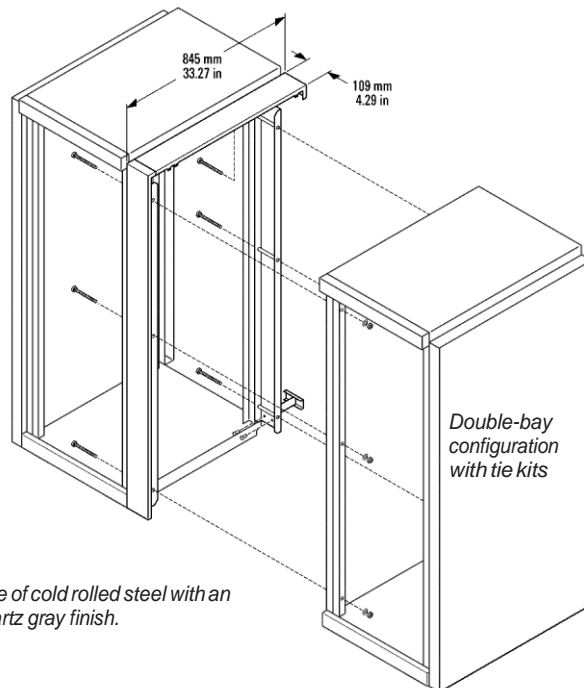

What you get in the box

One Reartie

One Fronttie

One Top tie

Kits are made of cold rolled steel with an attractive quartz gray finish.

Rack Accessories

Power Distribution Units

The power distribution unit conveniently supplies power to equipment mounted in the rack. The PDU is available in 110- or 220-volt options to accommodate American and international environments. The PDU is mounted vertically behind the rear column and does not reduce vertical mounting space in the rack.

A lighted master power switch is supplied with the PDU. The switch controls a relay in 1 or 2 PDUs. The system's power can be conveniently switched on and off using the master switch. The switch also provides rapid system shutdown in case of emergency. It uses low voltage signal lines for safety and to minimize electrical noise.

- Supplemental circuit breakers are provided on both hot (live) and neutral lines.
- All PDUs are single phase.
- A maximum of two PDUs can be installed in one rack.
- The top receptacle of all PDUs is configured as IEC-320 and is intended for the extractor fan. It can be used for other purposes if no fan is installed.
- Keysight offers various power cords. See the power cord selection to select the power cord that is appropriate for your location and rack solution.

Must Read Box

All racks come with a PDU (option AW3, 110 V or AW5, 220 V). A second PDU can be ordered per the chart below.

What you get in the box

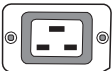

- Power distribution unit
- Master power switch
- Power cord and plug

Plexiglas® Front Door

Plexiglas® front door (E4462BZ)

Protect your equipment with a full length Plexiglas front door. An attractive, transparent smoke-colored Plexiglas front door provides a consistent appearance to the rack and is lockable to control access to the instruments and peripherals mounted in the rack. The front door is also useful for keeping equipment free from dust.

The Plexiglas Front Door offers the following features:

- Can be installed to hinge on either the left or right side for maximum flexibility.

- Fast, easy customer installation.
- Doors include all necessary mounting hardware.
- Provides 64 mm (2.52 in) space to accommodate instrument front panels.
- Does not interfere with access to the master power switch.
- Mounts into an outer set of holes on the front columns and does not interfere with EIA mounting holes.
- Spacers between the door frame and Plexiglas create an airflow space.

Must Read Box

An extractor fan is strongly recommended to assist cooling when a front door is mounted. See page 17.

Rear Doors

Standard racks include vented rear doors. To replace, a solid door should be ordered.

Features of the rear door kit include:

- Can be installed to hinge on either the left or right side for maximum flexibility.

- Easy customer installation.
- All necessary mounting hardware.
- Lockable for access security.

Mounting hardware is included with the rear door. However, you may also purchase a separate rear door hinge (see p/n C2786-00012C) if desired.

What you get in the box

- 1 Vented rear door
- 1 Latch catch
- Mounting hardware

Extractor Fans

Extractor fans are used to increase air flow through the rack cabinet. Keysight’s fan improves natural convection cooling by increasing the airflow in the rack. Use of the fan enhances the movement of warm air from the bottom of the rack up and out through the vented top cap, providing cooling to the entire length of the rack.

The customer installable extractor fan mounts easily under the top cap into the top frame of the rack. It moves air at 342 cubic meters per hour (200 cubic feet per minute). The fan does not reduce the space available for rack mounting instruments.

- Use when rack internal temperatures are 15°C (27°F) above ambient.
- Fans are highly recommended for racks with a front door.
- One fan per rack.
- Select an appropriate fan that fits your local AC voltage.
- Fans plug into the upper IEC 320 outlet on PDU.

Width	482.6 mm (19 in)
Inside Width	441 mm (17.375 in)
Load Capacity	68 kg (150 lbs)

What you get in the box

- 1 Stationary shelf
- 2 Rear brackets
- Mounting hardware

Sliding Shelf

The sliding shelf provides a flat surface with full product accessibility. It can be used in all Keysight racks to support equipment that may not have its own rackmount kit. The shelf and slides are preassembled for easy installation.

Attractive features of the sliding shelf include:

- Snap-in design for easy installation
- Smooth edges

Consider purchasing the steel ballast (C2790AC) to use with the sliding shelf. The ballast provides anti-tip capability when the shelf is extended.

- Mounting hardware

Work Surface

The work surface is stationary and is designed to remain securely in place. The work surface provides a convenient work shelf utility area at the front of the rack. It can be used as a writing space or to hold accessories.

Consider purchasing the steel ballast (C2790AC) to use with the work surface. The ballast provides anti-tip capability.

Work surface installed in rack

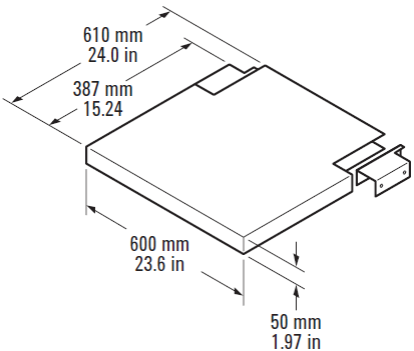

Work surface (46298SZ)

Ordering Information

Part No.	Description	EIA Units
46298SZ	Work surface	2

Specifications

	46298SZ
Material	Cold-rolled steel
Weight	12.7 kg (28 lbs)
Color	Quartz gray
Depth	610 mm (24 in.) to 387 mm (15.24 in.)
Width	600 mm (23.6 in.)
Load Capacity	22.7 kg (50 lbs)

- What you get in the box**
- Work surface
 - Support rails
 - 2 Left, 2 right filler rail panels
 - Mounting hardware

Ballast

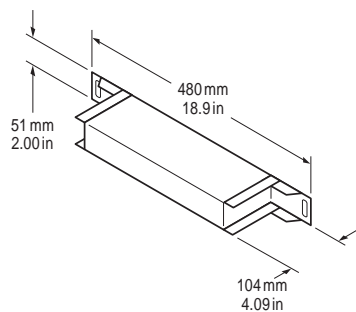

A ballast kit includes a 30 pound weight to provide anti-tip protection. Ballast deters the cabinet from tipping forward if heavy slide-mounted devices are extended from the rack.

Keysight rack cabinets include a standard, pull-out anti-tip foot that can be extended temporarily for servicing. Ballast provides an extra margin of safety to counteract the extra weight incurred when an accessory extends from the rack, such as a work surface.

- Each ballast kit contains a 30 lb. ballast and mounting hardware.
- The ballast mounts on the rear columns of the rack and provides a counterweight for equipment that extends out from the front of the rack.

Ballast should be employed when using the following rack accessories:

- Slide mounted instruments
- Work surface
- Monitor
- Keyboard

Specifications

Material	Cold-rolled steel
Weight	13.6 kg (30 lb)
Color	Quartz gray
Length	104 mm (4.1 in)
Height	51 mm (2.0 in)
Width	480 mm (18.9 in)

Ballast standard mounting (C2790AC)

Ballast, alternate mounting (C2790AC)

Must Read Box

Always mount ballast in the rear of the rack. Racks should not be shipped with ballast installed.

What you get in the box

- Ballast
- Mounting hardware

Ordering Information

C2790AC	30 lb steel, fits all rack heights

Monitor and Keyboard Rack Mount Kits

Monitor Rackmount Kit

Safely and securely install your monitor with the Keysight monitor rackmount kit. The Keysight monitor rackmount kit can accommodate 14" to 19" monitors. The kit consists of a shelf, all required mounting hardware, and cosmetic panels for the sides of the monitor. (Note: No top bevel is included in the kit.)

Consider purchasing the steel ballast (C2790AC) to use with the monitor rackmount kit. The ballast provides anti-tip capability when the shelf is extended.

**What you get
in the box**

- 1 Monitor base
- 2 Decorative panels
- 2 Rear brackets
- Mounting hardware

Keyboard and Mouse
Rackmount Kits

Select a fixed or retractable keyboard and mouse kit appropriate for you needs (keyboard and mouse not included). Consider purchasing the ballast kit for added stability (C2790AC)

Retractable Keyboard Kit

Keysight’s compact shelving kit provides a convenient enclosed keyboard system that requires minimum rack space, saving valuable space for your instruments. The kit can accommodate any standard keyboard and mouse. The retractable keyboard shelf slides into the rack when not in use. When retracted, the shelf does not extend from the rack. Keyboard security is available by using a front door on the rack cabinet. The keyboard kit includes all mounting hardware.

Specifications

Instrument Rackmount Kits

Instrument Compatibility with Racks

Keysight’s modular cabinet system offers bench-stacking and rackmounting versatility. These cabinets are designed for compatibility with EIA and IEC standards, both in width and height.

Modular cabinets are currently defined as System II and System II Plus instruments. These are identical in form, fit and function. The only difference is the color.

System II and System II Plus cabinets are available in standard sizes. As shown in the illustration, instrument depths have 5 sizes and instrument heights have 6 sizes. They are measured in millimeters and inches.

The instrument width is measured in module width (MW). The module width measurement is an important feature for determining rackmounting requirements. 1 MW is equivalent to the full width of the rack.

Most equipment can be ordered with handles and flanges at the time the equipment is ordered. If you have an instrument without the necessary hardware, then use the following pages to add flanges and handles.

Mounting Other Instruments

Some Keysight instruments are use non-System II cabinets. These products typically have rackmounting options.

See the specific product’s data sheet for those details.

Non-Keysight instruments that comply with the industry-standard units may be easily rackmounted as well.

kits, shown on pages 25-30, include metric fasteners to make them compatible with metric-fastener cabinets. Metric-fastener cabinets are identified with a “metric” embossment in the front bezel casting under the plastic trim strip and on the middle of the rear bezel casting.

Handles and Rackmount Flange Kits

Handles and rack flanges are available for all System II cabinets. They find most use on full width modules or combinations of narrower modules locked together to form one module width (MW). See page 23 for information about module widths and instrument heights and depths.

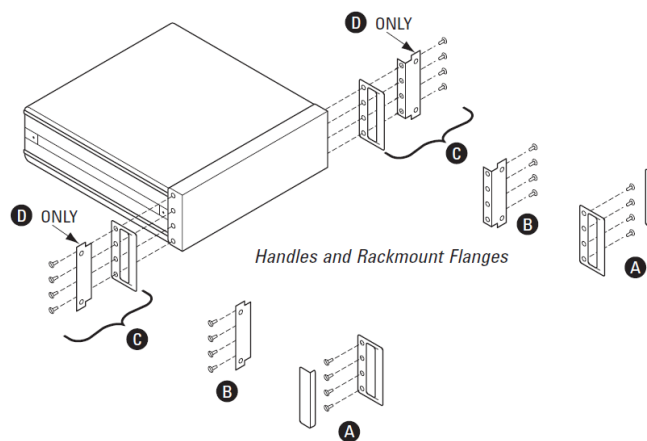

Flanges secure the instrument to the front mounting column of the rack. All Keysight flange kits attach to the instrument using pre-existing holes in

the instrument case. Flanges alone will not support the weight of an instrument in the rack. The appropriate rails or slides must be purchased for support.

Certain instruments are supplied with front handles as part of the selling price. Handles and rack flanges can be supplied with most instruments for an added cost by specifying the appropriate option at the time of order.

Alternatively, the equivalent mounting hardware may be ordered after receipt of the instrument using the information listed on the following page. These order options include:

- A** Front Handle Kit
- B** Rackmount Flange Kits
- C** Handles with Rack Flanges
- D** Flange Kit for Instruments with Previously Supplied Handles

Must Read Box

The rackmount flange kits secure your instrument to the front columns of the rack. You must also select the appropriate rails or slides to support the weight of the instrument in the rack. See pages 33 & 34 for rail and slide information.

Front handle kit (5063-9229) (1CN005A)

Front Handle Kit

Order a front handle kit when your instrument does not come with pre-installed handles. Check to make sure your instrument requires handles, as many instruments are supplied with previously installed handles.

- Flanges attach to pre-existing holes in the instrument case

What you get in the box

- 2 Handles
- 2 Trim strips Metric fasteners

Rackmount Flange Kits

Flange kits are available for all System II instruments. Flanges attach to pre-existing holes in the instrument case. These flanges do not have a notch for handles, and therefore cannot be used for instruments that have handles.

- Flanges attach to pre-existing holes in the instrument case

Rackmount flange kit (5063-9216) (1CM015A)

What you get in the box

2 Flanges Metric fasteners
Mounting screws

Flange kit with handles (5063-9223) (1CP020A)

Flange Kits with Handles

This kit includes both flanges and handles.

- Flanges attach to pre-existing holes in the instrument case

What you get in the box

2 Handles
2 Flanges Metric fasteners
Mounting screws

Rackmount Flange Kit for Instruments with Previously Supplied Handles

Certain Keysight instruments are supplied with front handles. These flange kits have a special cut out to accommodate the handles.

- Flanges attach to pre-existing holes in the instrument case

What you get in the box

- 2 Flanges
- Metric fasteners
- Mounting screws

Rackmount flange kit for instruments with previously supplied handles (5063-9236) (1CM043A)

Selecting a Rackmount Flange or Handle Kit

The table below lists the kits available for use after receipt of the equipment. Field installation is straightforward.

- A plastic trim strip is easily removed and the handle or flange attaches with screws supplied in the kit.
- Before rackmounting, bottom feet must be removed.

Ordering Information (New Phantom Gray (Quartz Gray))

Rackmount Adapter Kits

Rackmount adapter kits are available to mount an instrument, or combination of instruments, that is less than one full module width (MW).

- Individual 1/4 MW or 1/2 MW modules use the kits shown in the table below.
- Combinations of 1/4 MW or 1/2 MW (of equal depth) are first joined side-by-side with the Lock Link Kit (see page 30) for PN5061-9694). Combinations joined side-by-side must be the same depth and height. Then the rackmount adapter kit is applied. If modules are of unequal depth or height, a support shelf (as shown on page 28) can be used.
- For combinations of instruments adding to 1 MW, use the rackmount flange kit (see Selecting a Rackmount Flange or Handle Kit, page 26).
- Hole patterns conform to EIA and IEC standards.

Rackmount adapter kits for 88.1 mm instrument module height (5063-9239, 5063-9240 (34190A), (5063-9241) (1CM019A)

Lock Link Kits and Locking Feet Kits

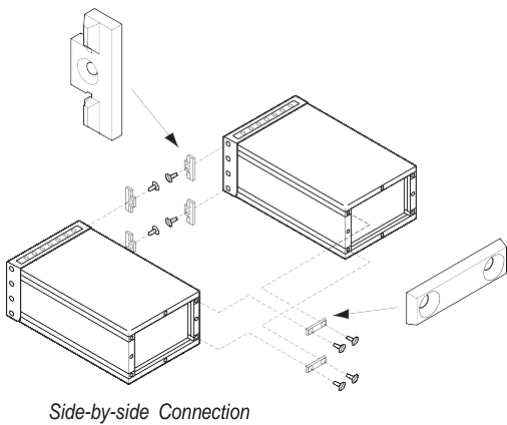

All submodule cabinets of equal depths can be linked together vertically or side-by-side with hardware in the lock link kit. Cabinet frames are already pre-threaded to allow quick assembly.

For side-by-side connections, the Lock Link Kit contains 12 front hooks and 6 rear links, enough for 3 side-by-side joints. For submodule vertical connections, the kit also contains

4 front hooks and 4 rear links, enough for 2 over/under joints. The kit includes metric screws.

The Locking Feet Kit (5062-3999) is designed to accommodate full module vertical combinations of greater weight. The Lock Link Kit is recommended for only submodule vertical combinations, as well as side-by-side combinations.

Rail and Slide Kits

Keysight offers a variety of rail kits to meet instrument and controller rack mounting requirements.

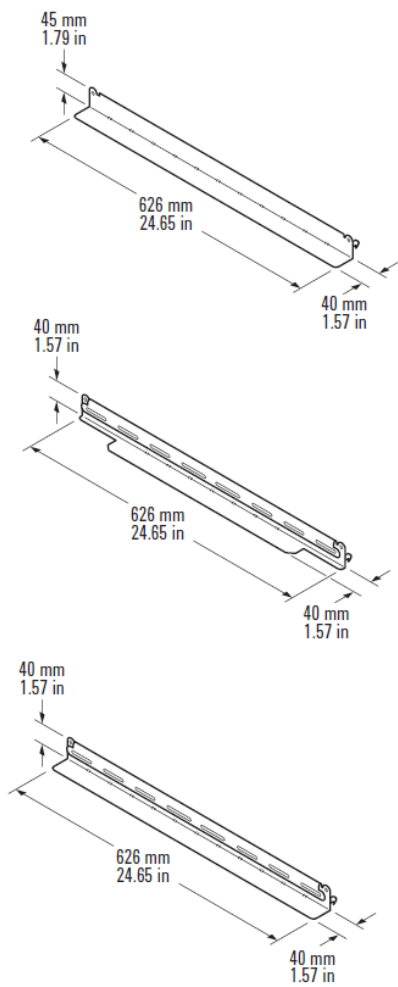

Instrument rackmount kits alone are not designed to support the full weight of most instruments and may deform or break. Rails and slides are available to support the rear of the instrument.

Proper rail selection is important to maximize the use of all EIA units in a rack and to assure proper fit vertically between instrument front panels.

Keysight offers a set of support rails that can cut in half the time required to install equipment in a rack. The rails hang on discrete slots on the vertical mounting columns, corresponding

to each EIA unit in the rack. Vertical adjustment between instruments is minimized by selecting the proper rail. The system was specifically designed to minimize the time required to install Keysight instrumentation, and can be used with other equipment.

Rails will support up to 113 kg (250 lbs).

3rd party rail kit (E3664AC)

VXI rail kit (E3665AC)

Basic rail kit (E3663AC)

E3664AC	3rd Party Rail Kit
E3665AC	VXI Rail Kit

Slide Kits

Rack slides are available for full width System II cabinets to permit easy access to internal spaces. Each kit consists of two slides that mount directly to System II cabinet slide handle recess spaces (after removing the side handles). The slides also mount directly to vertical support columns in Keysight racks.

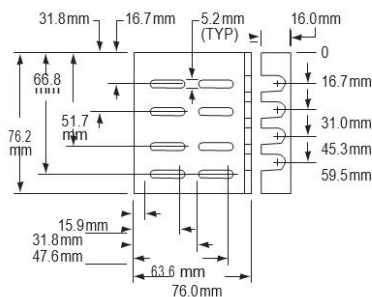

- Non-tilting standard-duty slides carry 38.6 kg (85 lb) maximum load.
- Non-tilting heavy-duty slides carry 79.3 kg (175 lb) maximum load.
- Slide kits are compatible with inch and metric instruments.

Heavy-duty slide kit (B) and non-Keysight rack slide bracket kit (D)

Testmobiles and Accessories

Keysight Testmobile Carts add protection and mobility to test instruments and systems. The convenience of mobility makes instruments readily available when needed. The cart effectively extends the amount of lab bench space. Ergonomic cart and accessory design makes test equipment accessible to the operator, whether seated or standing at the test area. Additionally, several operators can cost effectively share expensive equipment that has been mounted on a Testmobile Cart.

Keysight testmobile carts are offered in cart capacities to provide optimum instrument test configuration:

- Scope cart, 59 kg (130 lb)
- System cart, 227 kg (500 lb).

A variety of easy-to-mount accessories are available for customized solutions.

Add Mobility to Your Instruments

Keysight Testmobile carts provide convenient mobility of test equipment, PCs, or workstations to make them readily available when needed. This capability effectively extends the amount of lab bench space available. Mar-resistant, heavy-duty 5-inch hard rubber casters make moving instruments easy. All casters swivel, which lets the cart move right up to the workbench.

Bring the Equipment to the Test

Rather than bringing the test to the equipment, Keysight Testmobile carts bring the equipment to the test, to save time and get right to the task. Testmobile carts provide a convenient way to move everything from a small oscilloscope to a complete test system to the work to be tested.

Share Expensive Instruments

Keysight Testmobile carts allow several operators in a work group to cost-effectively share expensive equipment. In the case of a small test system,

all instruments can be conveniently combined in one place through the sufficient space, load capacity, and rackmount capability of the testmobile system cart.

Protect Your Investment

Unlike general-purpose cart design, Keysight testmobile carts have a nylon strap and steel buckle that secure instruments to the cart, and instrument feet fit securely in slots in both upper tilt tray and lower fixed tray. Expensive instruments are prevented from sliding or tipping off the cart. Locking brakes on rear wheels provide added safety and convenience.

Use Instruments with Ease

The ergonomically designed tilt tray adjusts 30-plus degrees for viewing and using instruments in comfort whether seated or standing. Lifting and carrying heavy instruments is no longer necessary with the mobility provided by Keysight testmobile carts.

Testmobile Key Features

Keysight's Testmobile Carts offer the following attractive features:

- Ergonomic design. Test equipment is operator-accessible whether seated or standing.
- Heavy-duty casters make moving instruments easy.
- Includes a nylon strap and steel buckles to secure instruments to the cart.
- Tilt tray adjusts 30-plus degrees for viewing comfort.

Enhance Instrument Output

Keysight Testmobile system and instrument carts can be customized with a range of easy-to-mount accessories:

- Work surface and antistatic mat that provide a secure, static free work area in front of the instrument
- Plotter/printer stand, which can be set up either 305 mm or 381 mm (12 in or 15 in) high, enables hardcopy output on the spot
- Storage drawer (3.5 inch or 5.25 inch) for a convenient place to store probes, cables, and manuals
- Angle rails for supporting rack mounted instruments
- Attractive quartz gray color

Testmobile Cart Selection Criteria

A key criterion for cart selection is instrument depth. For instruments with a depth up to 17 inches, select the Keysight 1180CZ testmobile scope cart. The Keysight 1181BZ testmobile system cart should be used for instruments up to 24 inches. Static drag chain is supplied on the 1181BZ.

Testmobile scope cart (1180CZ Plus accessories)

Testmobile Scope Cart, 1180CZ

The Scope Cart is conveniently shipped virtually assembled, except for its handle and casters.

- Tilt tray load capacity = 29.5 kg (65 lb)
- Total load capacity = 59 kg (130 lb)
- Tilt tray = 457 mm W x 457 mm D (18 in W x 18 in D)

Testmobile Printer/Plotter Stand

Conveniently mount a printer or plotter on top of a system or instrument testmobile with the Keysight testmobile printer/plotter stand.

What you get in the box

- Printer tray
- Vertical side supports
- Torx T15 screwdriver

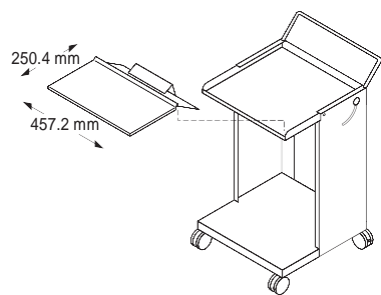

Specifications

	35181HZ
Material	Cold-rolled steel
Weight	8.16 kg (18 lbs)
Color	Quartz gray
Length	533 mm (21 in)
Height	305 mm (12 in) or 381 mm (15 in)
Width	381 mm (15 in)
Load Capacity	11.34 kg (25 lbs)
Compatibility	1181BZ

Ordering Information

Part No.	Description
35181HZ	Testmobile printer/plotter stand

Testmobile Work Surface

Keysight’s testmobile work surface provides additional work space on a testmobile cart. It can be used for accessories, writing, or a keyboard and mouse. The work surface attaches to the testmobile tilt tray.

Specifications

35181KZ	
Material	Cold-rolled steel
Weight	4.99 kg (11 lbs)
Color	Quartz gray
Length	533 mm (21 in)
Width	305 mm (12 in)
Compatibility	1181BZ

What you get in the box

- Work surface
- Torx T15 screwdriver
- Mounting hardware

Ordering Information

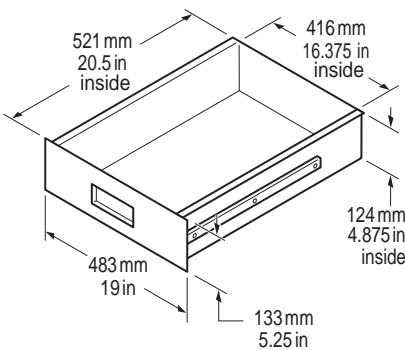

Part No.	Description
35181KZ	Work surface for 1181BZ

Storage Drawer

Keysight’s testmobile storage drawer provides storage space for miscellaneous items such as tools, manuals, probes or cables.

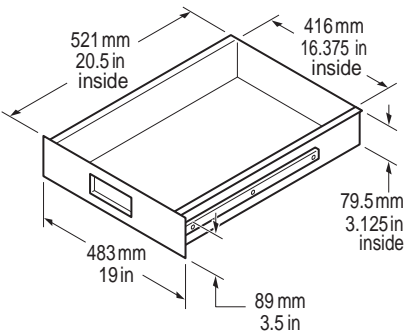

Drawer installed in rack

35181M Drawer

What you get in the box
Drawer with slides attached
Mounting hardware

35181J Drawer

Specifications

	35181J	
Material	Cold-rolled steel	Cold-rolled steel
Weight	7.26 kg (16 lbs)	8.16 kg (18 lbs)
Color	Quartz gray	Quartz gray
Length	521 mm (20.5 in)	521 mm (20.5 in)
Height	89 mm (3.5 in)	133 mm (5.25 in)
Width	483 mm (19 in)	483 mm (19 in)

Ordering Information

Part No.	Description
35181J	3.5" Storage Drawer
35181M	5.25" Storage Drawer

Conclusion

Keysight Technologies offers 19-inch EIA (Electronics Industries Association) rack cabinets tailored to meet the needs of test and measurement instrumentation customers. Keysight racks are specifically designed for Keysight's test and measurement equipment, virtually ensuring a perfect fit. They will also accommodate non-Keysight equipment making them suitable for a mixed instrument environment. Rack mounting is fast and easy with unique design features. A selection of options and accessories provides flexibility to meet the vast majority of racking applications.

Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
