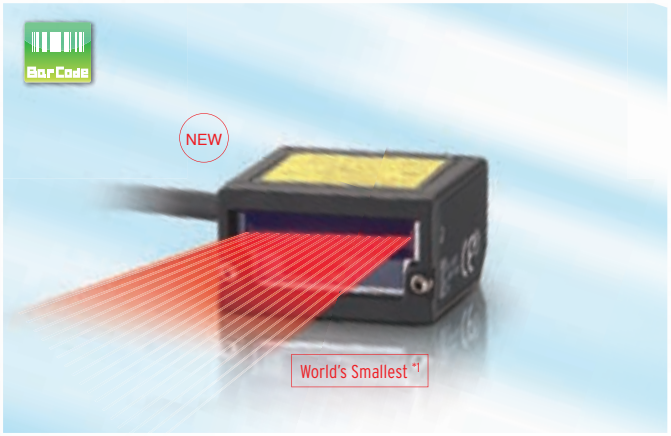
Ultra-compact, High-speed Readers

realizing

Code Reader

You can select the optimum products from
We provide Readers for everything from Bar Codes and 2D Codes
The lineup also includes Readers that

Ultra Compact and Fast



Laser-type Bar Code Reader
V500-R2 Series

- High speed: 1,000 scans/s
- Long distance: 270 mm
- World's Smallest

▶▶P4

Multi Code Reader
V400-R2 Series

- Fastest reading in the class:
  Reads moving objects at up to 500 m/min *2
- Long distance: 125 mm
- Ultra compact

▶▶P8

Conveyors

・Ultra compact for possible mounting in rail gaps.
・Stable reading of high-speed moving objects.

Semiconductor Manufacturing Equipment

・World's smallest reader handles 300-mm wafer loading ports.

Cartoners

・Prevention of mixing of different cartons by reading bar codes.

Labeler

・Reading to check printing conditions.

*1.According to OMRON investigation in January 2013.
*2.Performance may depend on the code that is read and the printing conditions.

and OCR Lineup

OMRON's wide lineup of tracing products.
printed on paper or labels to DPM directly printed on workpieces.
can read expiration dates and other text.

High-accuracy and Multifunctional

Multi Code Reader
FQ-CR1 Series

- HDR function to cut out ambient light interference.
- Polarizing filter to cut specular reflections.
- Verification with master data.

▶▶P 12

2D Code Reader for DPM
FQ-CR2 Series

- Reads direct part marking codes.
- Cuts halation from metallic surfaces.
- High-power LED that is effective for low contrast.

▶▶P 12

Optical Character Recognition Sensor
FQ2-CH Series

- New OCR algorithm.
- Easy application with no dictionary registration.
- Handles dot characters, stamped characters, and more.

▶▶P 16

Smart Camera
FQ2-S4 Series

- Code reader, OCR, and inspections.
- Lineup includes Integrated Sensors and C-mounts.
- High resolution of 760,000 or 1,300,000 pixels.

▶▶P 20

Case Packers

- Lineup of models with many installation distances from 38 to 970 mm.
- Stable reading of low-contrast codes.

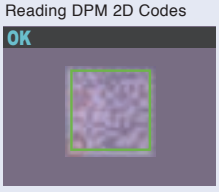
Reading 2D Codes

Reading Bar Codes

Automotive Processing Machines

- High-performance filters that cut specular reflections from metallic or glossy surfaces.

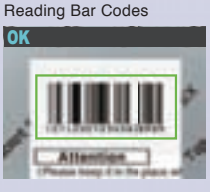
Reading DPM 2D Codes



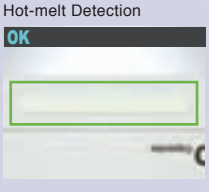
Cartoners

- Multi-processing of everything needed for cartoners: character verification, code reading, and inspections.

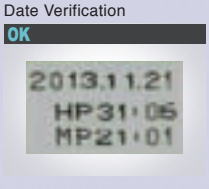
Reading Bar Codes



Hot-melt Detection



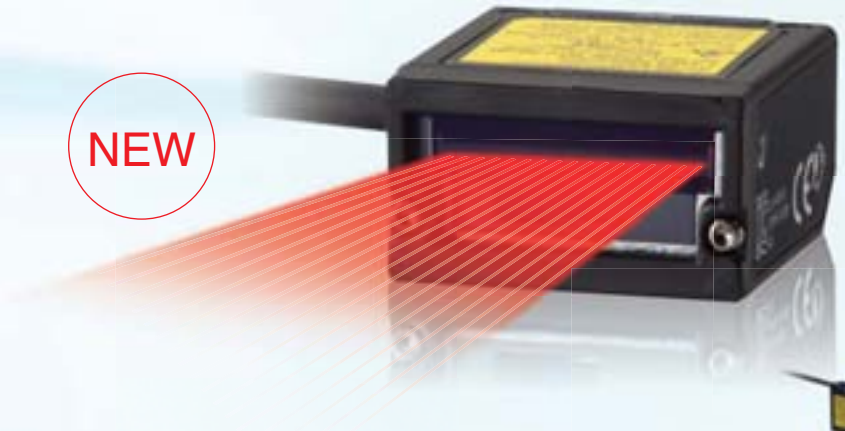
Date Verification

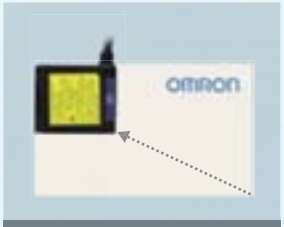


The World's Smallest* Bar Code Reader That Fits Essentially Anywhere

*According to OMRON investigation in January 2013.

Laser-type Bar Code Reader
V500-R2 Series





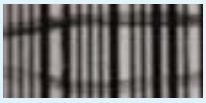
About 1/6th the Size of a Business Card

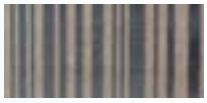
High-speed Reading at 1,000 Scans/Second

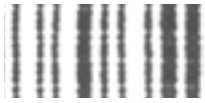
A high-speed motor and new algorithm gives surprising performance for the size to achieve stable reading even in high-speed takt machines of around 66,000 items/hour.

Enables Reading Imperfect Codes

Even though it is small, the V500-R2 with its new algorithm is adept at reading even the most imperfect codes. Raster scanning enables reading Bar Codes even if they are partially dirty or missing.

Dirt	Wear	Blurring	Shiny background	Inconsistent background	Dots
					






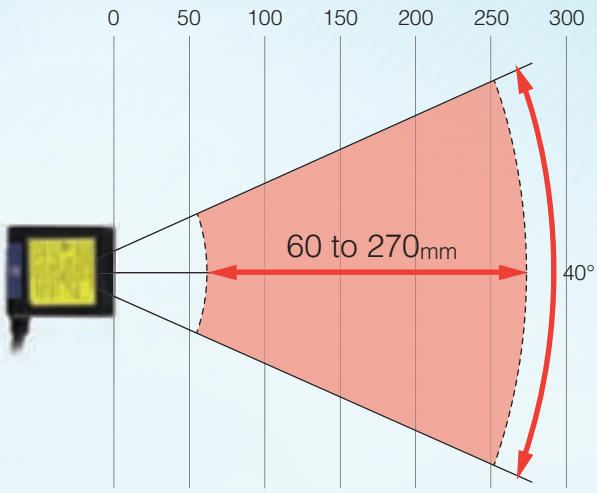
Resists Ambient Light Interference

Operation is possible with ambient illumination of up to 80,000 lx (sunlight), so the Code Reader can stably read even near Photoelectric Sensors with little influence from ambient light.

Ambient Light Interference Guidelines	
Florescent light	4,000 lx max.
Sunlight	80,000 lx max.

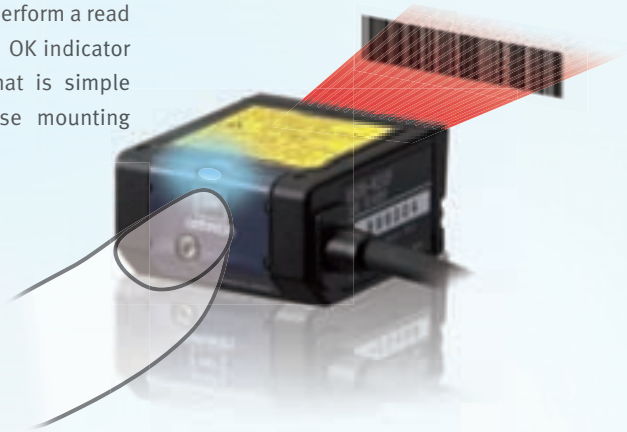
Long Range Up to 270 mm

The wide reading distance from 60 to 270 mm lets you handle variations in conveying and workpiece height without changing the installation.



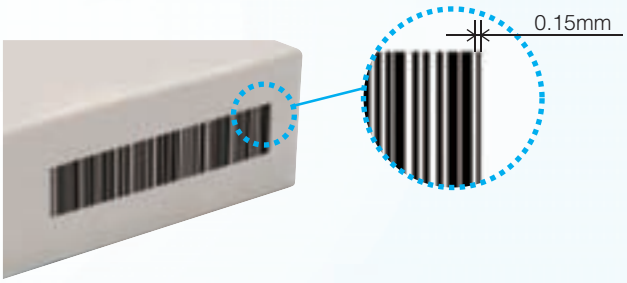
Reading Test Switch Provided

Just press the Scan button on the Reader to perform a read test. The results are provided with the Read OK indicator and buzzer. We achieved an operation that is simple enough for essentially anyone to increase mounting efficiency.



Minimum Readable Narrow Bar Width: 0.15 mm

Reading is even possible for Bar Codes with narrow bars of 0.15 mm.



GS1-Databar (RSS) Supported

The data-rich GS1-Databar (RSS code) Bar Codes can also be read.

Verification with Master Data

You can verify character strings to see if they match preset master data without a special device.

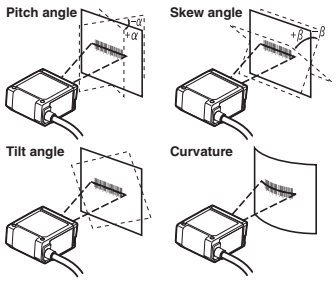
Ratings and Performance

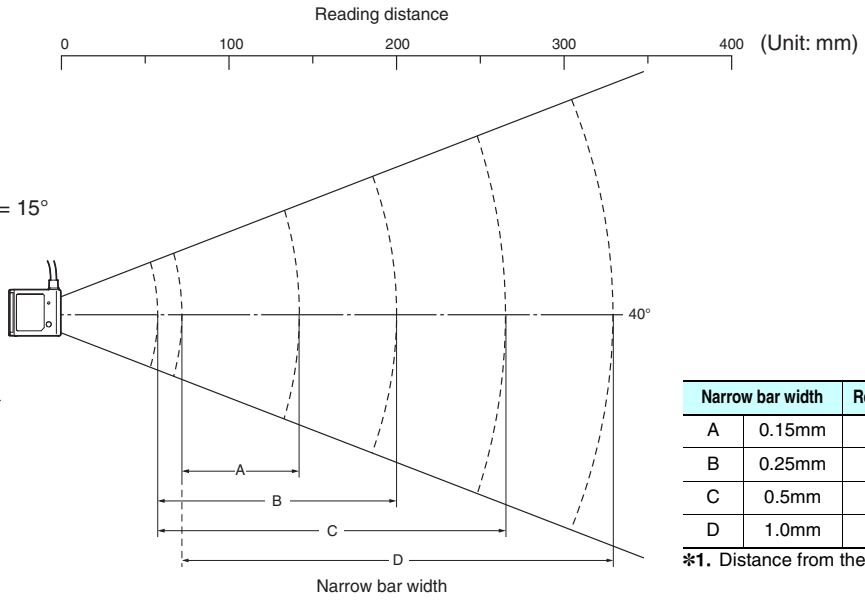
Model		V500-R2CF
Direction of view		Front view
Applicable codes	**Bar code**	WPC(JAN/EAN/UPC), Codabar(NW-7), ITF, Industrial 2 of 5(STF), Code39, Code93, Code128, GS1-128(EAN-128), GS1-Databar(RSS-14), GS1-Databar Limited(RSS Limited), GS1-Databar Expanded(RSSExpanded)
	Number of reading digits	No upper limit (depends on bar width and reading distance)
Reading performance(*)	**Minimum resolution**	Bar code: 0.15 mm
	Contrast (PCS)	0.45 or more (white reflectance 70 % or more)
	Reading distance	60 to 270 mm (At narrow bar: 0.5 mm)
	Reading angle	Within 40° (Including margins at left and right sides)
	Pitch angle (α)	±30°
	Skew angle (β)	±60° (However, exclude from 10° upper side to 8° lower side)
	Tilt angle (γ)	±25°
	Reading of bar codes on curved surfaces (R)	R ≧ 20mm (UPC 12 digit)
	Light source	Red laser diode (Wave length: 650 nm)
	Light output	1.0m W or less (Correspond to JIS class 2)
	Scan type	Raster scan
	Number of scan	1000 scan/sec.
Interface	**Communication specification**	RS-232C
	OK/NG outputs	NPN open collector output (cable work required)
Function setting method		Menu sheet reading method or host command method
Functional specifications	**Reading trigger**	External trigger (Transistor input), Trigger by command (RS-232C), Trigger a test reading by pressing the SCAN button on the product
	OK/NG signals	OK signal is turned on to indicate a successful read NG signal is turned on to indicate a successful read of a non-registered label
	Indication LED	OK LED (green) illuminates to indicate a successful read
	Buzzer	Notifies a successful reading with a buzzer sound (Muting available)
Power supply specification	**Power voltage**	4.5 to 5.5 VDC
	Consumption current	During operation: 500 mA or less; during standby: 150 mA or less
	Inrush current	2.0 A MAX
Environmental specifications	**Ambient temperature range**	At operation: 0 to + 45°C At storage: -20 to + 60°C
	Ambient humidity range	At operation and storage: 20 to 85% RH (with no icing or condensation)
	Ambient atmosphere	No corrosive gases
	Ambient light	Fluorescent lamp: 4,000lx or less, Sunlight: 80,000lx or less
	Vibration resistance	10 to 150 Hz, half amplitude 0.35 mm, 3 directions (X/Y/Z), 8 minutes each 10 times
Degree of protection		IP54 (IEC60529)
Weight	**Main unit only**	Approximately 80 g
	Including accessories	Approximately 190 g (including mounting bracket, insulation plate and screws)
	Packaged weight	Approximately 270 g (including packing carton)
Dimensions	**Main unit**	Approximately 29(W) × 34.5(D) × 17(H)mm
	Packing carton	Approximately 245(W) × 110(D) × 40(H)mm
Input/output connector		Round DIN connector
Code length		Approximately 1.5 m
Minimum bending radius of cord		Approximately 23 mm
Accessories		Operation manual, menu sheet, mounting bracket, insulation plate, M3 × 6 screw (two), M3 × 8 screws (one), M5 × 10 screws (two)
Material, Color	**Upper case**	Magnesium diecast, black
	Front panel	PC, black
	Labels	PET
	Reading window	PMMA, transparent
	Cable	Polyvinyl chloride (PVC), black
	Insulation plate	ABS, black
	Mounting bracket	SUS304, silver

✻ Unless otherwise specified, use a JAN x1 , MRD 63% or higher (PCS = 0.9 or higher) bar code with a pitch angle $\alpha = 0°$, a skew angle $\beta = 15°$, a tilt angle $\gamma = 0°$, and a curvature R = ∞.

Reading range performance (typical example)

Explained with examples of following conditions:
- Contrast: MRD 63 % (PCS = 0.9)
- Bar code: CODE39
- Installation condition:
  Pitch angle α = 0°, skew angle β = 15°
  Tilt angle γ = 0°, curvature R = ∞





Narrow bar width		Reading distance (*1)
A	0.15mm	70 to 140mm
B	0.25mm	60 to 200mm
C	0.5mm	60 to 270mm
D	1.0mm	70 to 330mm

*1. Distance from the end of the case.

Safety Precautions for Laser Equipment

⚠ WARNING

Avoid eye exposure to direct or scattered radiation reflected by a mirror surface.
Laser beam emitted from a laser has high power density and may become blind when the beam is directed into eyes.

Laser Label Indications

This warning label is attached to the Bar Code Reader.
Never remove this label or place objects in front of it.

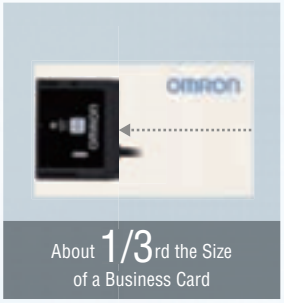
The Ultra-small Multi-code Reader That Can Handle Speed

Multi Code Reader
V400-R2 Series

NEW



Improves Machine Takt Time with the Fastest Reading in the Class: Reads Moving Objects at Up to 500 m/min*

It is not just the size that makes this Reader easy to build into equipment. It enables stable reading of moving objects on high-speed lines. Build it into equipment to read moving objects, which is achieved with a new algorithm.

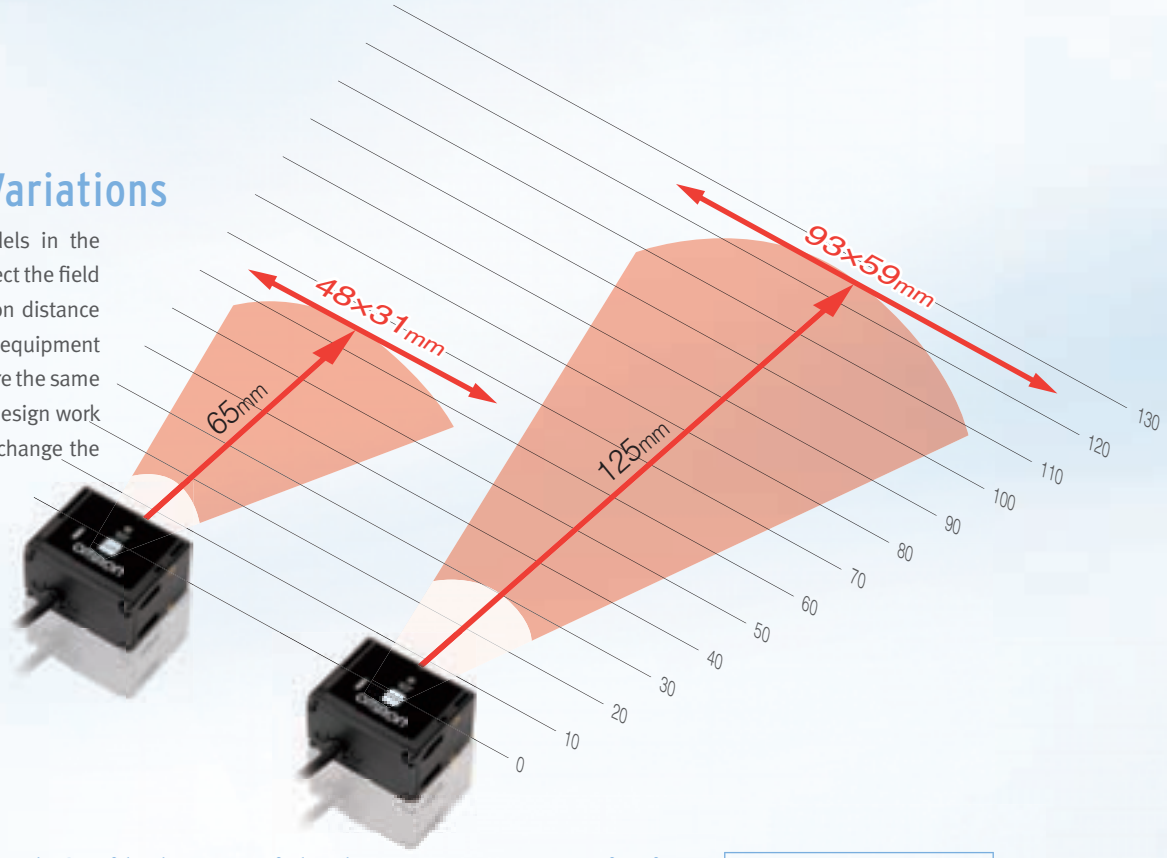
* Performance may depend on the code that is read and the printing conditions.

Stable Reading of Imperfect Codes

The V400-R2 with its new algorithm is adept even the most imperfect codes. Even for codes that were previously difficult to read, you can change the exposure time and gain to achieve the optimum settings to enable reading.

Distance Variations

There are two models in the lineup to let you select the field of view or installation distance that is best for the equipment type. Both models are the same size, so additional design work is not necessary to change the model.

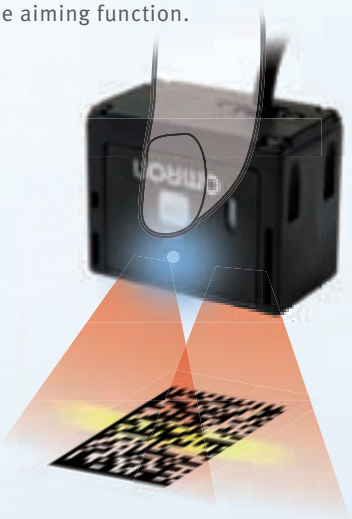


Reading Test Switch Provided

We achieved an operation that is simple enough for essentially anyone. Just press the Scan button on the Reader to perform a read test. The results are provided with the Read OK indicator and buzzer.

Aiming Positioning Function

A guide light lets you easily find the ideal installation position. You can easily and quickly position the codes with the aiming function.



Body Resists Environments to IP65

IP65 protection is provided because that is generally the level that is required to build devices into equipment. That enables reliable application in harsh environments subject to water and mist.

GS1-Databar (RSS) Supported

The data-rich GS1-Databar (RSS code) Bar Codes can also be read. This enables reliable applications in the pharmaceutical industry, where GS1-Databar (RSS code) Bar Codes are becoming popular.

Verification with Master Data

You can verify character strings to see if they match preset master data without a special device.

Highly Advanced, Multi-functional Code Reader That Can Handle Low-contrast and Glossy Surfaces

Multi Code Reader
FQ-CR1 Series

2D Code Reader for Direct Part Marking codes
FQ-CR2 Series

FQ-CR1 | FQ-CR2

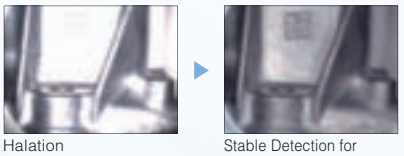
High-power LEDs

The wider the field of view, the more difficult it is to maintain consistent lighting within the field, causing errors in reading. The built-in LEDs of the FQ-CR Series use a unique OMRON DR optical system for effective light usage to maintain consistent lighting within the field of view at a brightness that is four times that of previous models.

Previous Lighting | High-power Lighting

HDR Function to Cut Out Ambient Light Interference

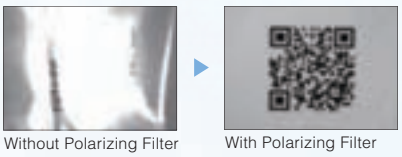
The HDR (high dynamic range) function minimizes the influence of changes in lighting conditions and light reflection. This enables stable inspections even for materials that are difficult to light evenly, such as metal parts or glossy films, or in locations subject to external light interference.



Halation | Stable Detection for Metal Surfaces Subject to Gloss and Inconsistent Lighting

Polarizing Filter to Cut Specular Reflections

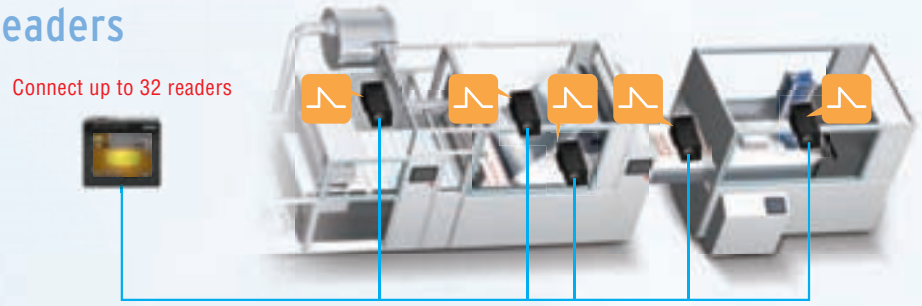
A polarizing filter is included to cut specular reflection from glossy surfaces. This enables stable code reading even for metallic or other glossy surfaces.



Without Polarizing Filter | With Polarizing Filter

Connection of Up to 32 Readers

Up to 32 Code Readers can be controlled from the Touch Finder setup console. Expansion of required processes is simple.



FQ-CR2

Removing Printing Irregularities or Noise

You can apply up to three of the four unique filters developed by OMRON in the desired order to remove printing irregularities and noise, in order to achieve a stable reading.

Combining Filtering

Erosion and dilation can be combined to connect dots without changing the dot thickness.

Types of Filtering

Smooth	Smooths the image.	Erosion	For white codes, reduces the cell size. Effective for reading separated dot codes.
Dilate	For white codes, increases the cell size. Effective for reading codes with cell spreading.	Median	Removes noise.

Retry Reading Until Successful

Code Readers must be able to read codes even for poor printing conditions. You can automatically retry reading while changing the exposure time and other reading conditions, even for changing workpieces or environments, to enable a stable reading.

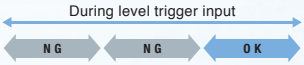
The following retry functions are provided.

1 **Retrying the Specified Number of Times with the Same Conditions**

Reading is performed the specified number of times for the same scene.

2 **Retrying While External Trigger Is Input**

Reading is performed until successful, as long as an external level trigger is input.



3 **Retrying While Changing the Shutter Speed**

Reading is performed for the same scene while changing the exposure time in stages.

4 **Retrying While Changing the Reading Conditions**

When reading DPM codes, inconsistencies in printing conditions can result in NGs if reading is performed with only one set of reading settings. The FQ-CR allows you to register up to 32 sets of reading conditions as scenes and retry reading while changing the scenes in order. The system automatically determines the scenes with the highest usage rates and changes the order to start with them to flexibly handle changes in reading conditions. Of course you can specify a fixed order if required.

Register 32 sets of reading conditions.
Rapidly switch to the optimum reading conditions.

FQ-CR1

Verification with Master Data

You can verify character strings to see if they match preset master data without a special device.

An OCR Sensor with Built-in Dictionary for Reading Expiration Dates and Lot Numbers

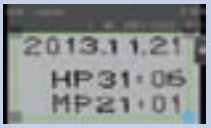
Optical Character Recognition Sensor
FQ-CH Series

Approx. 80 Built-in Fonts

The large amount of data in the built-in dictionary contains approximately 80 different fonts that are used on FA sites.Variations for worn characters, blurring, distortion, different backgrounds, and size changes have been included to enable stable and highly accurate reading with the built-in dictionary even for some variations in the characters.It is not necessary to set parameters to compensate for character contrast or positional offsetting.

Time is required for character registration in the dictionary.

① Draw boxes around characters.

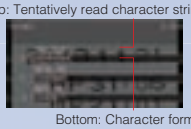


Up to four lines can be read. The following characters can be read.

- Letters of the alphabet: A to Z (uppercase)
- Numbers: 0 to 9
- Symbols: ' - . : /

② Set the character formats.

Top: Tentatively read character string



Bottom: Character format

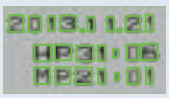
The character format is displayed from the read results. Set the character format according the format of the characters to read.

- Letter: $
- Number: #
- Symbol: @
- Not read: *
- Number or letter: ?

③ Press the TEACH Button.

The character extraction conditions are automatically adjusted according to the conditions of the printed characters.

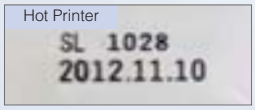
Reading is started.



Different printers use different printing devices.

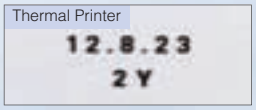
Characters from most printers can be read, including dot and impact printers. Handles Approx. 80 Fonts

Hot Printer

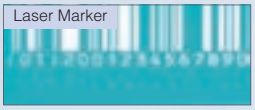


Inkjet Printer

Thermal Printer



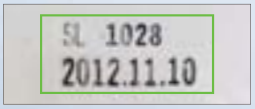
Laser Marker



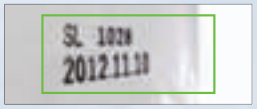
Worn and inclined characters cannot be read.

Unique recognition technology enables stable recognition of worn or distorted characters.

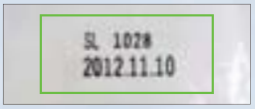
Worn Characters



Inclined Characters



Small Characters



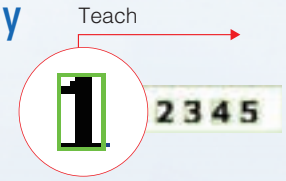
Utilities That Make Everyday Operation Easier

Verification to Reduce Setup Work

You can verify the read character data against the character data registered in the master data. Master data registration is easy. A character string is read and the result is registered in the master data. This reduces setting time and mistakes in setting character strings. You can register up to 32 character strings in the master data and easily change the current master data with an external signal.

Registration in Model Dictionary

You can add characters to the dictionary. You can achieve reliable operation when reading special fonts even if reading was not stable with the default settings.



Registered

Logging Images and Reading Data

The read images and reading results can be temporarily saved in the sensor, and up to 10,000 images and 10,000,000 reading results can be saved in a 4-GB SD card. You can select logging both OK and NG results or only NG results to aid in traceability.

Sensor

Images: 20
Reading results: 1,000 max.

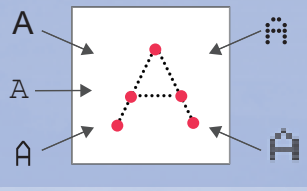
Touch Finder

Images: Approx. 10,000
Reading results: Approx. 10,000,000 (with 4-GB SD card)

New OCR Algorithm: Matching with Structural Models

Even in cases like the following one, where character registration is required for image matching methods, no character registration is required to read the characters with this new method, which matches structural models of characteristic points.

Structural models record the characteristics of each character in approximately 80 fonts.



The position and structure of characteristic points are used to recognize characters.

Main functions	Inspection items	OCR • Alphabet A to Z • Number 0 to 9 • Symbol ' - . : / Model dictionary
	Image filter	Weak smoothing, Strong smoothing, Dilate, Erosion, Median, Extract edges, Extract horizontal edges, Extract vertical edges, Enhance edges, Background suppression
	Verification function	Supported
	Retry function	Normal retry, Exposure retry, Scene retry, Trigger retry
	Number of simultaneous measurements	32
	Position compensation	Supported (360° Model position compensation, Edge position compensation)
	Number of registered scenes	32
Image input	Image processing method	Monochrome
	Image filter	High dynamic range (HDR) and polarizing filter (attachment)
	Image elements	1/3-inch Monochrome CMOS
	Shutter	Built-in lighting ON: 1/250 to 1/50,000 s Built-in lighting OFF: 1/1 to 1/50,000 s
	Processing resolution	752 × 480
	Partial input function	Supported horizontally only
Lighting	Lighting method	Pulse
	Lighting color	White
Data logging	Measurement data	In Sensor: 1,000 items (If a Touch Finder is used, results can be saved up to the capacity of an SD card.)
	Images	In Sensor: 20 images (If a Touch Finder is used, images can be saved up to the capacity of an SD card.)
Auxiliary function		Math (arithmetic, calculation functions, trigonometric functions, and logic functions)
Measurement trigger		External trigger (single or continuous) Communications trigger (Ethernet TCP no-protocol, Ethernet UDP no-protocol, Ethernet FINS/TCP no-protocol, EtherNet/IP, PLC Link, or PROFINET)
I/O specifications	Input signals	7 signals • Single measurement input (TRIG) • Control command input (IN0 to IN5)
	Output signals	3 signals • Control output (BUSY) • Overall judgement output (OR) • Error output (ERROR) **Note:** The assignments of the three output signals (OUT0 to OUT2) can be changed to the individual judgements of the inspection items, the image input ready output (READY), or the external lighting timing output (STGOUT).
	Ethernet specifications	100Base-TX/10Base-T
	Communications	Ethernet TCP no-protocol, Ethernet UDP no-protocol, Ethernet FINS/TCP no-protocol, EtherNet/IP, PLC Link, or PROFINET
	I/O expansion	Possible by connecting FQ-SDU1_ Sensor Data Unit. 11 inputs and 24 outputs
	RS-232C	Possible by connecting FQ-SDU2_ Sensor Data Unit. 8 inputs and 7 outputs
Ratings	Power supply voltage	21.6 to 26.4 VDC (including ripple)
	Current consumption	2.4 A max.
Environmental immunity	Ambient temperature range	Operating: 0 to 40°C, Storage: -25 to 65°C (with no icing or condensation)
	Ambient humidity range	Operating and storage: 35% to 85% (with no condensation)
	Ambient atmosphere	No corrosive gas
	Vibration resistance(destruction)	10 to 150 Hz, single amplitude: 0.35 mm, X/Y/Z directions 8 min each, 10 times
	Shock resistance(destruction)	150 m/s^2 3 times each in 6 direction (up, down, right, left, forward, and backward)
	Degree of protection	IEC 60529 IP67 (Except when Polarizing Filter Attachment is mounted or connector cap is removed.)
Materials		Sensor: PBT, PC, SUS, Mounting Bracket: PBT, Polarizing Filter Attachment: PBT, PC Ethernet connector: Oil-resistance vinyl compound, I/O connector: Lead-free heat-resistant PVC

Smart Camera

The High End of OMRON Tracing Products That Operates as a Code Reader or OCR and Also Performs Inspections

Smart Camera
FQ2-S4 Series

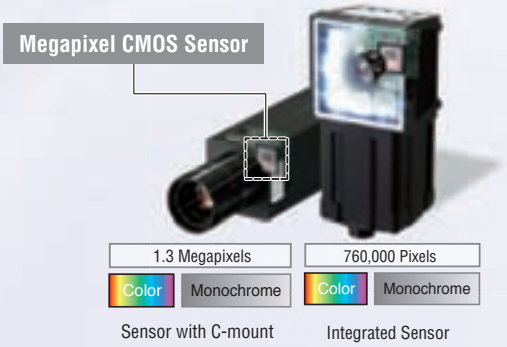
A Complete Range of Top-end Functions

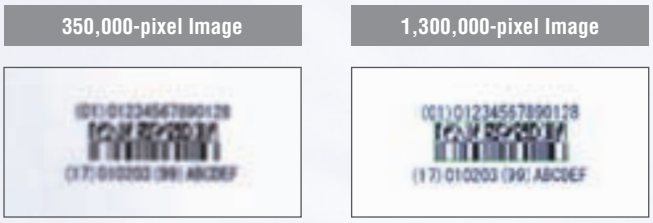
A complete set of functions for stable reading even with low contrast or shiny surfaces along with high-demand communications interfaces. Printed character checking, Bar Code checking, packaging condition inspections, and much more with just one Smart Camera.

Code Reader	High-speed image processor	Megapixel capacity	Real color	Monochrome	C -mount	9 inspection items	11 image filters	32 -camera expansion	360° position compensation	Ultra-wide field of view	DAP partial input
OCR	HDR	Sub-pixel processing	High-power lighting	IP67	E-IP	PLC Link	FINS	34 I/O points	RS-232C	Password	Image inversion

Reads both Codes and Characters in One View with 1.3 Megapixels

It is generally said that a resolution of 700,000 pixels or higher is required to read both codes and characters in one field of view. The FQ2-S4 Series includes 760,000-pixel models with built-in lighting as well as 1,300,000-pixel models with C-mounts for a flexible selection of fields of view so you can stably read information-heavy codes with one read image.

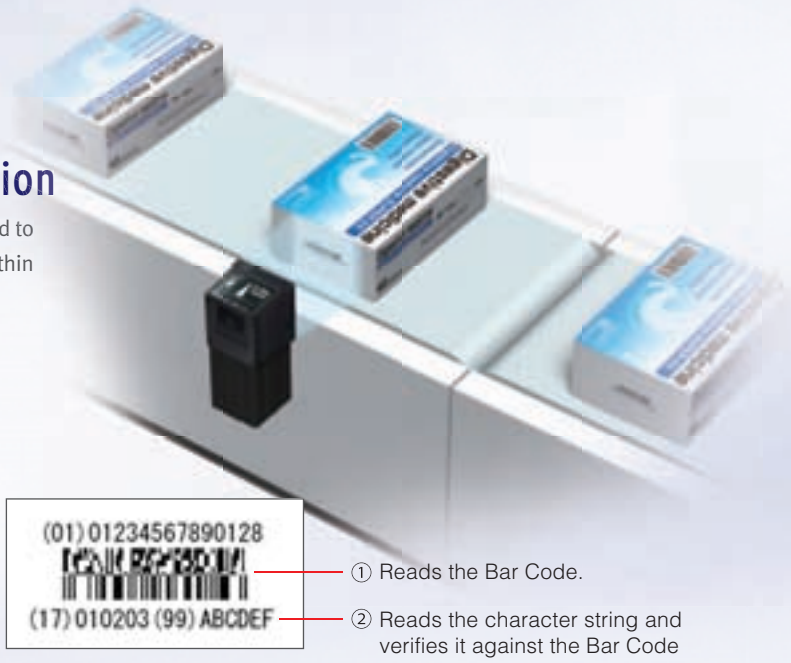




Code and Character Verification

OCR and Code Reading inspection items can be combined to read codes and verify them against character strings all within the FQ2. No programming of external devices is required.

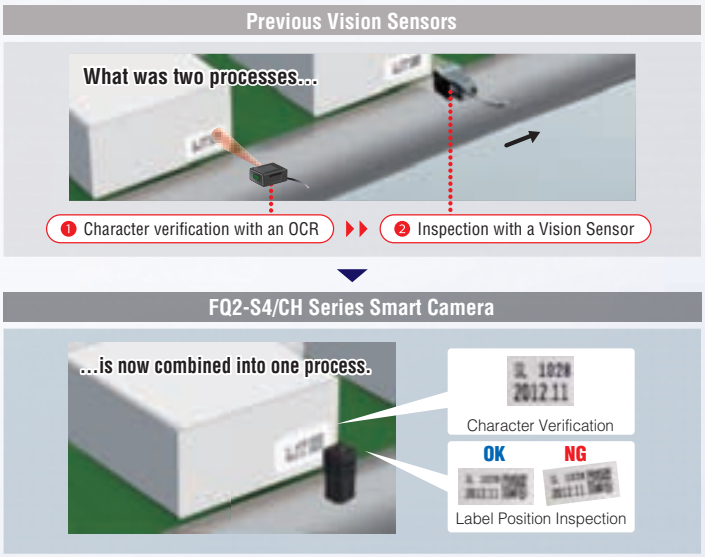
Measurement Flow	Purpose
Position Compensation	Compensates for the position of the box.
Reading	
① Bar Code	① Reads the Bar Code.
② OCR	② Reads the character string and verifies it against the Bar Code in ①.
Outputs	
Data	Outputs the verified character string.



Character Verification and Label Position Inspection

Although previously performed as separate processes, character verification and inspections can now both be performed with one FQ2 Sensor. This helps you reduce costs and save space.

Measurement Flow	Purpose
Image Filters	Adjusts the image so that it is easier to inspect.
Position Compensation	Compensates for the position of the box.
Inspections	
① OCR	① Reads the lot number and date.
② Search	② Label position inspection
Calculations and Outputs	
Individual Judgement Output	Outputs the judgements of ① and ②.



Code Reading and Component Positioning

The Sensor can measure angles of rotation and other position information, so it can also be used for positioning. Inspections can also be performed for the number and size of holes along with the position information.

Measurement Flow	Purpose
Image Filters	Adjusts the image so that it is easier to inspect
Inspections and Measurements	
① Shape Search II	① Component incline and position
② Labeling	② Number of holes and hole sizes
③ 2D-code(DPM)	③ Reads 2D Code
Calculations and Outputs	
Calculation	Calculates data for external output.
Data Output	Outputs the position information and incline.

READ AND UNDERSTAND THIS CATALOG

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

WARRANTY

OMRON's exclusive warranty is that the products are free from defects in materials and workmanship for a period of one year (or other period if specified) from date of sale by OMRON.

OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, REGARDING NON-INFRINGEMENT, MERCHANTABILITY, OR FITNESS FOR PARTICULAR PURPOSE OF THE PRODUCTS. ANY BUYER OR USER ACKNOWLEDGES THAT THE BUYER OR USER ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. OMRON DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED.

LIMITATIONS OF LIABILITY

OMRON SHALL NOT BE RESPONSIBLE FOR SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED ON CONTRACT, WARRANTY, NEGLIGENCE, OR STRICT LIABILITY.

In no event shall responsibility of OMRON for any act exceed the individual price of the product on which liability is asserted.

IN NO EVENT SHALL OMRON BE RESPONSIBLE FOR WARRANTY, REPAIR, OR OTHER CLAIMS REGARDING THE PRODUCTS UNLESS OMRON'S ANALYSIS CONFIRMS THAT THE PRODUCTS WERE PROPERLY HANDLED, STORED, INSTALLED, AND MAINTAINED AND NOT SUBJECT TO CONTAMINATION, ABUSE, MISUSE, OR INAPPROPRIATE MODIFICATION OR REPAIR.

SUITABILITY FOR USE

THE PRODUCTS CONTAINED IN THIS CATALOG ARE NOT SAFETY RATED. THEY ARE NOT DESIGNED OR RATED FOR ENSURING SAFETY OF PERSONS, AND SHOULD NOT BE RELIED UPON AS A SAFETY COMPONENT OR PROTECTIVE DEVICE FOR SUCH PURPOSES. Please refer to separate catalogs for OMRON's safety rated products.

OMRON shall not be responsible for conformity with any standards, codes, or regulations that apply to the combination of products in the customer's application or use of the product.

At the customer's request, OMRON will provide applicable third party certification documents identifying ratings and limitations of use that apply to the products. This information by itself is not sufficient for a complete determination of the suitability of the products in combination with the end product, machine, system, or other application or use.

The following are some examples of applications for which particular attention must be given. This is not intended to be an exhaustive list of all possible uses of the products, nor is it intended to imply that the uses listed may be suitable for the products:

- Outdoor use, uses involving potential chemical contamination or electrical interference, or conditions or uses not described in this document.
- Nuclear energy control systems, combustion systems, railroad systems, aviation systems, medical equipment, amusement machines, vehicles, safety equipment, and installations subject to separate industry or government regulations.
- Systems, machines, and equipment that could present a risk to life or property.

Please know and observe all prohibitions of use applicable to the products.

NEVER USE THE PRODUCTS FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

PERFORMANCE DATA

Performance data given in this document is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of OMRON's test conditions, and the users must correlate it to actual application requirements. Actual performance is subject to the OMRON Warranty and Limitations of Liability.

CHANGE IN SPECIFICATIONS

Product specifications and accessories may be changed at any time based on improvements and other reasons.

It is our practice to change model numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the product may be changed without any notice. When in doubt, special model numbers may be assigned to fix or establish key specifications for your application on your request. Please consult with your OMRON representative at any time to confirm actual specifications of purchased products.

DIMENSIONS AND WEIGHTS

Dimensions and weights are nominal and are not to be used for manufacturing purposes, even when tolerances are shown.

ERRORS AND OMISSIONS

The information in this document has been carefully checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical, or proofreading errors, or omissions.

PROGRAMMABLE PRODUCTS

OMRON shall not be responsible for the user's programming of a programmable product, or any consequence thereof.

COPYRIGHT AND COPY PERMISSION

This document shall not be copied for sales or promotions without permission.

This document is protected by copyright and is intended solely for use in conjunction with the product. Please notify us before copying or reproducing this document in any manner, for any other purpose. If copying or transmitting this document to another, please copy or transmit it in its entirety.

Note: Do not use this document to operate the Unit.

Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

http://moschip.ru/get-element

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
