**B** - relations between make voltage and ambient temperature after initial coil heating up with 1.1 U<sub>n</sub> at continues load of I<sub>n</sub> on contacts. Make voltage is not higher than the value read on Y axis (multiplication of rated voltage).  
 1, 2, 3 - values on Y axis represent allowed overvoltage on coil at certain ambient temperature and contact load:

 2 - 50% of rated load  
 3 - rated load
