

## SY10EP33V/SY100EP33V

5V/3.3V, 4GHz, ÷4 PECL/LVPECL Divider

Precision Edge®

ECL Pro™

### General Description

The SY10/100EP33V is an integrated ÷4 divider.

The V<sub>BB</sub> pin, an internally-generated voltage supply, is available to this device only. For single-ended input conditions, the unused differential input is connected to V<sub>BB</sub> as a switching reference voltage. V<sub>BB</sub> may also rebias AC-coupled inputs. When used, decouple V<sub>BB</sub> to V<sub>CC</sub> via a 0.01µF capacitor and limit current sourcing or sinking to 0.5mA. When not used, V<sub>BB</sub> should be left open.

The reset pin is asynchronous and is asserted on the rising edge. Upon power-up, the internal flip-flops will attain a random state; the reset allows for the synchronous use of multiple EP33s in a system.

The 100K Series includes internal temperature compensation circuitry.

Data sheets and support documentation can be found on Micrel's web site at [www.micrel.com](http://www.micrel.com).

### Features

- Guaranteed maximum frequency >4GHz
- 3.3V and 5V power supply options
- Guaranteed propagation delay <460ps over temperature
- Internal 75kΩ input pull-down resistors
- Wide operating temperature range (-40°C to +85°C)
- Available in 8-pin MSOP and SOIC packages

### Pin Configuration

Top View  
(Available in MSOP or SOIC Package)

### Pin Description

Pin Number	Pin Function
CLK, /CLK	ECL Clock Inputs with Internal 75kΩ Pull-Down Transistor. Default State is LOW
RESET	ECL Asynchronous Reset
VBB	Reference Voltage Output
Q, /Q	ECL Data Outputs

## Truth Table

CLK	/CLK	RESET	Q	/Q
X	X	Z <sup>(2)</sup>	L	H
		L	F	F

**Notes:**

1. F = Divide by 4 function.
2. Z = LOW to HIGH transition.

**Notes:**

1. Contact factory for die availability. Dice are guaranteed at T<sub>A</sub> = 25°C, DC Electricals only.
2. Tape and Reel.
3. Pb-Free package is recommended for new designs.

### Absolute Maximum Ratings<sup>(1)</sup>

Power Supply Voltage  
 $V_{EE} = 0$  ..... +6.0V to 0V  
 $V_{CC} = 0$  ..... -6.0V to 0V

Input Voltage  
 $V_{CC} = 0V$   
( $V_{IN}$  not more negative than  $V_{EE}$ ) ..... -6.0V to 0V  
 $V_{EE} = 0V$   
( $V_{IN}$  not more negative than  $V_{CC}$ ) ..... +6.0V to 0V

Output Current  
Continuous ..... 50mA  
Surge ..... 100mA

### Operating Ratings

Operating Temperature Range ( $T_A$ ) ..... -40°C to +85°C  
Lead Temperature ( $T_{LEAD}$ ) ..... +260°C  
Storage Temperature Range ( $T_{STORE}$ ) ..... -65°C to +150°C  
Thermal Resistance (Junction-to-Ambient)  
SOIC-8 ( $\theta_{JA}$ )  
Still Air ..... 160°C/W  
500lfpm ..... 109°C/W  
MSOP-8 ( $\theta_{JA}$ )  
Still Air ..... 206°C/W  
500lfpm ..... 155°C/W  
Thermal Resistance (Junction-to-Case)  
SOIC-8 ( $\theta_{JC}$ ) ..... 39°C/W  
MSOP-8 ( $\theta_{JC}$ ) ..... 39°C/W

**Notes:**

- Permanent device damage may occur if absolute maximum ratings are exceeded. This is a stress rating only and functional operation is not implied at conditions other than those detailed in the operational sections of this data sheet. Exposure to absolute maximum rating conditions for extended periods may affect device reliability.
- 10EP circuits are designed to meet the DC specifications shown in 10EP LVPECL DC EC Table after thermal equilibrium has been established. The circuit is in a test socket or mounted on a printed circuit board and traverse greater than 500lfpm is maintained.
- Input and output parameters vary 1:1 with  $V_{CC}$ .
- All loading with 50 $\Omega$  to  $V_{CC} - 2.0V$ .
- The  $V_{IHCMR}$  range is referenced to the most positive side of the differential input signal.

No license, whether express, implied, arising by estoppel or otherwise, to any intellectual property rights is granted by this document. Except as provided in Micrel's terms and conditions of sale for such products, Micrel assumes no liability whatsoever, and Micrel disclaims any express or implied warranty relating to the sale and/or use of Micrel products including liability or warranties relating to fitness for a particular purpose, merchantability, or infringement of any patent, copyright or other intellectual property right.

Micrel Products are not designed or authorized for use as components in life support appliances, devices or systems where malfunction of a product can reasonably be expected to result in personal injury. Life support devices or systems are devices or systems that (a) are intended for surgical implant into the body or (b) support or sustain life, and whose failure to perform can be reasonably expected to result in a significant injury to the user. A Purchaser's use or sale of Micrel Products for use in life support appliances, devices or systems is a Purchaser's own risk and Purchaser agrees to fully indemnify Micrel for any damages resulting from such use or sale.
