As a global leader in vehicle electrical and electronic connection systems, Delphi offers full-service integration — designing, engineering and manufacturing a comprehensive line of high-quality and innovative connection products and systems.

Delphi
Global Connection Systems Catalog

Delphi Connection Systems is proud to introduce the latest edition of the Global Connection Systems Catalog. To assist you in clear product selection, we provide two selection guides.

The "**Product Family Selection Guide**" (pages *1.6* and *1.7*) serves as an overview of the different product families and their major design features. This will assist you in determining which product family best suits your needs.

The "**Product Family Features Guide**" (pages *1.8* and *1.9*) identifies specific functional attributes and descriptions associated with each product family.

The remainder of the catalog is divided by section according to product family. Each section has its own sidebar tab with product name for quick reference. Within each section, two pages depict a typical connection system family and associated technical information. To help you select a complete connection system, each section depicts all of the individual components required to form complete systems. Each complete connection system is pictured in the orientation in which it is assembled and includes not only major component dimensions but overall mated lengths.

Listed below is contact information for Delphi's **Customer Center** to help you with product ordering or additional information. In addition, Delphi's regional headquarters' contact information is listed on the back cover.

This 2006 Global Connection Systems Catalog contains information and application guidelines for a representative sample of the available Delphi products. These products are subjected to extensive mechanical, electrical, and environmental testing procedures to assure superior quality and performance.

We have made every effort to ensure that the information contained in this document is accurate; however, changes are often made to update our specifications, part numbers, or introduce new product families. An application or sales engineer can help you determine which product best suits your application guidelines. Our global engineering, manufacturing network, and distribution capabilities are available to help you select the most suitable product.

We recommend that you use this catalog as a guide only. For additional part numbers and specifications contact your sales account manager or call your regional support representative at the number listed on the back cover.

GT Series features tangless terminals and one of the lowest connector engage forces in the industry. Designed for both 1.50 and 2.80mm applications, GT also offers unsealed female USCAR footprint compliant versions.

Metri-Pack is a family of electrical connection systems which utilizes internationally standardized male blade sizes, allowing for flexibility in design. Blade widths range from 1.5 mm to 8 mm with maximum current ratings of 14 to 60 amps.

Micro-Pack Series electronic connectors are designed to meet the needs of low energy, high density applications.

064 Series unsealed header connectors and mating components meet USCAR design guidelines and interface footprints.

Ducon Series utilizes two-piece terminals that provide superior mechanical and electrical performance in a complete range of terminal sizes.

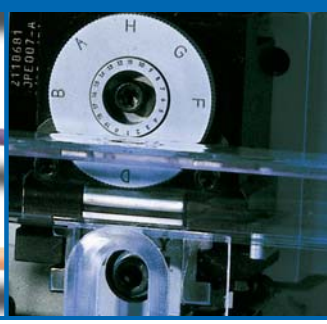
Special Products offer comprehensive and diverse product lines ranging from lamp sockets to device connections, featuring sophisticated connection systems technology.

Electrical Centers provide a centralized location for electrical power and signal distribution and its associated circuit protection – combining fuses, relays and interconnects.

Temperature Sensors are offered in a variety of vehicle applications to meet OEM specifications.

Supplemental Products are a broad selection of product lines that utilize state-of-the-art crimp, interface and sealing technologies, along with clips and connector carriers to provide positive positioning of components.

Application Tooling features automatic and hand tool terminal application systems, including presses, dies, and various popular hand tools.

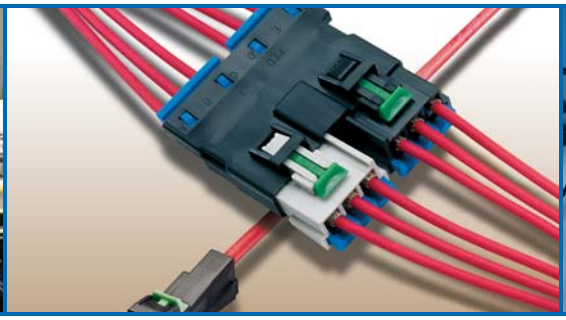


Experience

Delphi Connection Systems is a world leader in supplying vehicle power and signal distribution systems, with an unsurpassed reputation in the design, development, and manufacture of electrical and electronic connection systems and devices.

For more than 100 years, Delphi has been at the forefront of delivering advanced technologies to the vehicle and its occupants. We have a long history of automotive achievement including many industry firsts, from environmental issues to vehicle performance and safety.

Our innovative products exceed the most strenuous performance requirements and provide solid value to our customers. That kind of customer focus helps us work toward even greater product performance and *driving tomorrow's technology*.



Our Strength

With a worldwide workforce, Delphi provides both the advanced technical skills and hands-on logistical support to be a quality supplier of electrical and electronic systems architecture, and connection systems.

We work to develop partnerships with our customers to clearly identify their requirements and exceed their expectations. Our global teams are thorough, responsive, and customer-focused.

Our key is a global communication network linking all of our employees. By leveraging our resources and expertise regionally, we bring the solutions right to your door—wherever you may be.

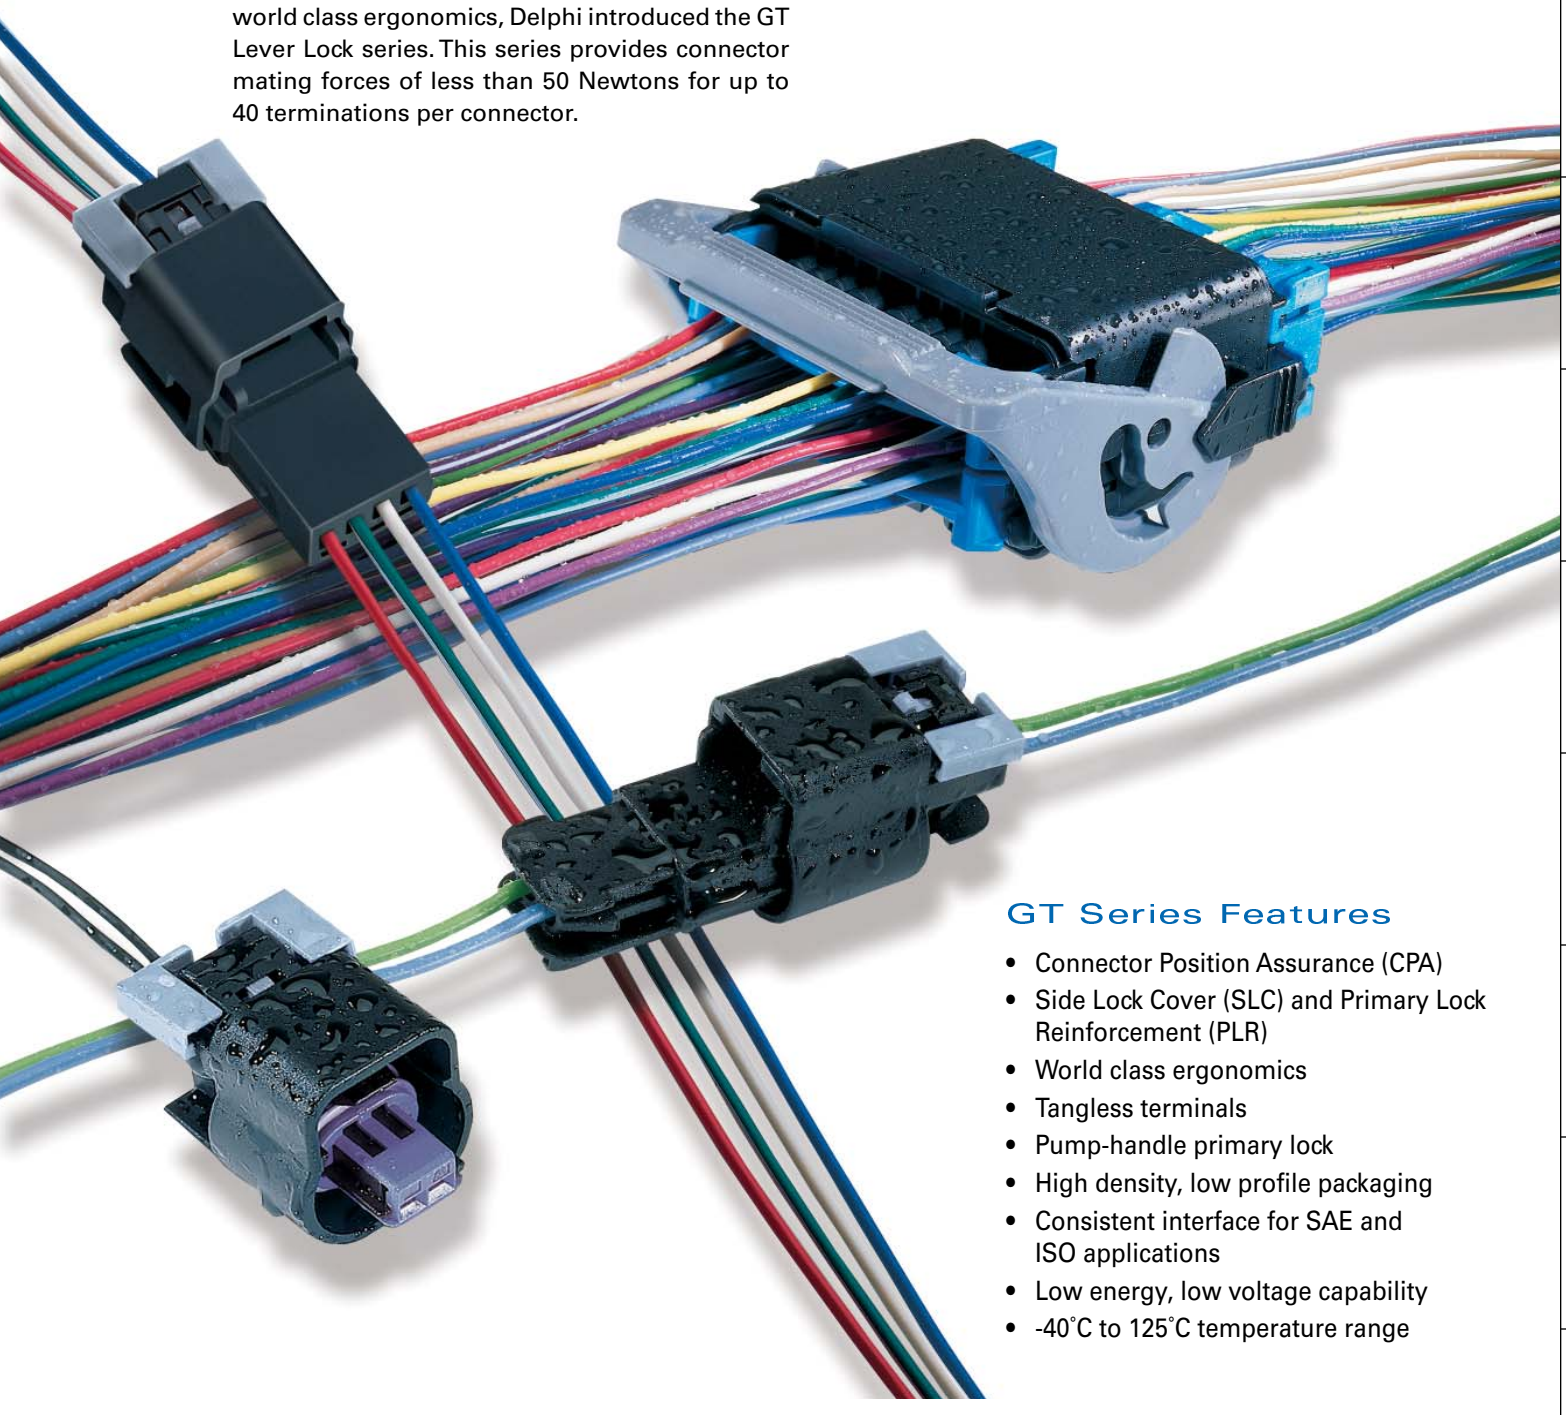
150, 280 & Lever Lock

The GT Connection System features tangless terminals and offers one of the lowest connector engage forces in the industry. Designed for both 1.50 and 2.80mm blade width applications, GT achieves superior electrical performance that meets or exceeds all known customer requirements, including USCAR standards. The unsealed systems are available in cavity variations between 2-way and 16-way. To maintain world class ergonomics, Delphi introduced the GT Lever Lock series. This series provides connector mating forces of less than 50 Newtons for up to 40 terminations per connector.

The sealed GT Connection System utilizes a new two-rib cable seal. This seal is smaller and uses less material than traditional three rib seal designs without impacting performance. The sealed systems are available in cavity variations between 2-way and 16-way. To maintain world class ergonomics, Delphi introduced the sealed GT Lever Lock series. This series provides connector mating forces of less than 50 Newtons for up to 40 terminations per connector.



GT Series Features

- Connector Position Assurance (CPA)
- Side Lock Cover (SLC) and Primary Lock Reinforcement (PLR)
- World class ergonomics
- Tangless terminals
- Pump-handle primary lock
- High density, low profile packaging
- Consistent interface for SAE and ISO applications
- Low energy, low voltage capability
- -40˚C to 125˚C temperature range

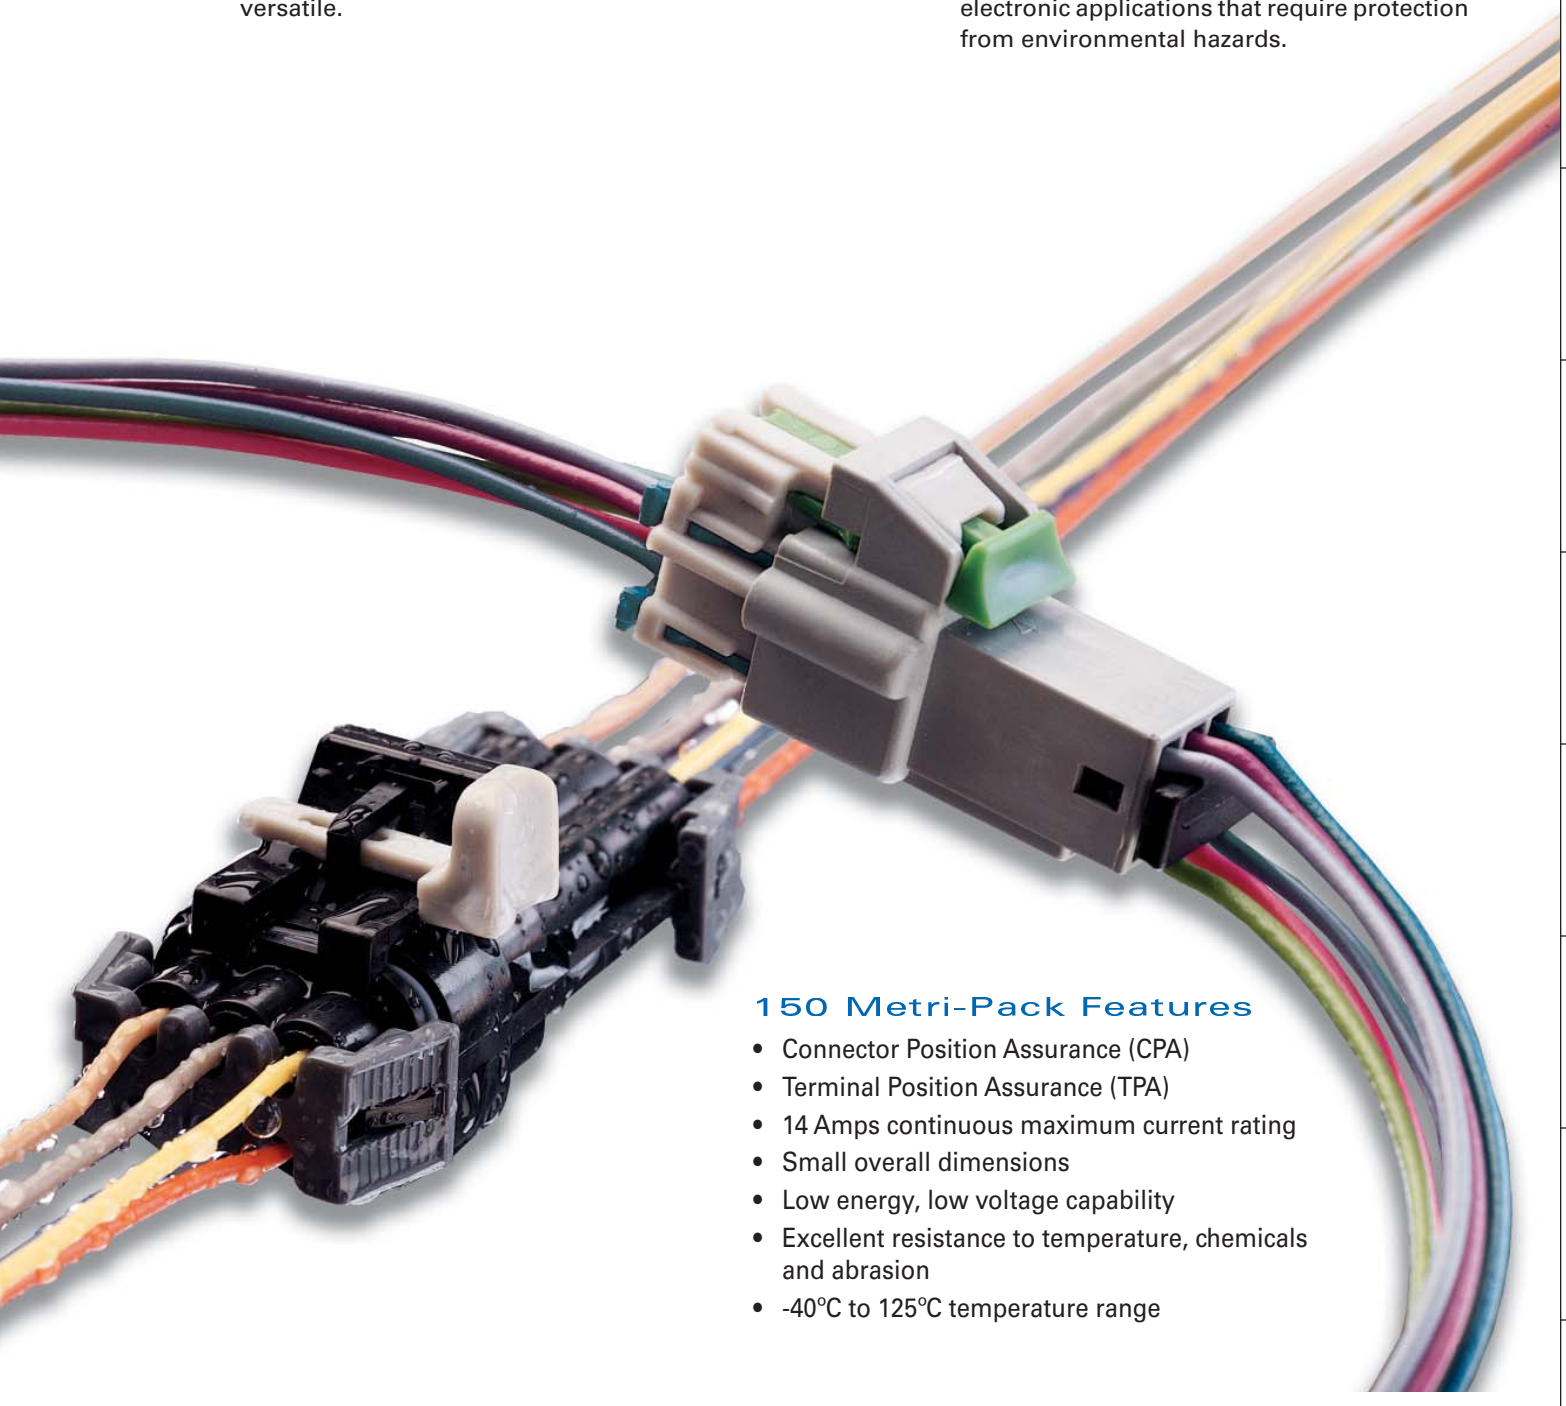
Available in device and in-line connections for vehicle applications, Metri-Pack 150 Series connectors can meet or exceed the requirements for most marine, appliance, and industrial control applications.

Ideally suited for limited space applications that do not require environmental protection, Metri-Pack 150 Series products are extremely versatile.

Available in device and in-line connections for underhood vehicle applications, Metri-Pack 150 Series sealed connectors can meet or exceed the requirements for most marine, appliance, and industrial control applications.

Utilizing triple-rib peripheral silicone rubber seals, Metri-Pack 150 Series sealed systems are ideally suited for critical, low-energy electronic applications that require protection from environmental hazards.



150 Metri-Pack Features

- Connector Position Assurance (CPA)
- Terminal Position Assurance (TPA)
- 14 Amps continuous maximum current rating
- Small overall dimensions
- Low energy, low voltage capability
- Excellent resistance to temperature, chemicals and abrasion
- -40°C to 125°C temperature range

Metri-Pack OBD II — On-Board Diagnostic Connection System

The On-Board Diagnostic Connection System is designed to meet SAE J1962 specifications using ISO standard male terminals. The 16 Terminal Male Test Equipment Connector includes a nylon insulator with ISO standard copper alloy male terminals. The Female Vehicle Connector is designed for under dash application, and accepts 150 Series Metri-Pack tangless female terminals available in silicon bronze.

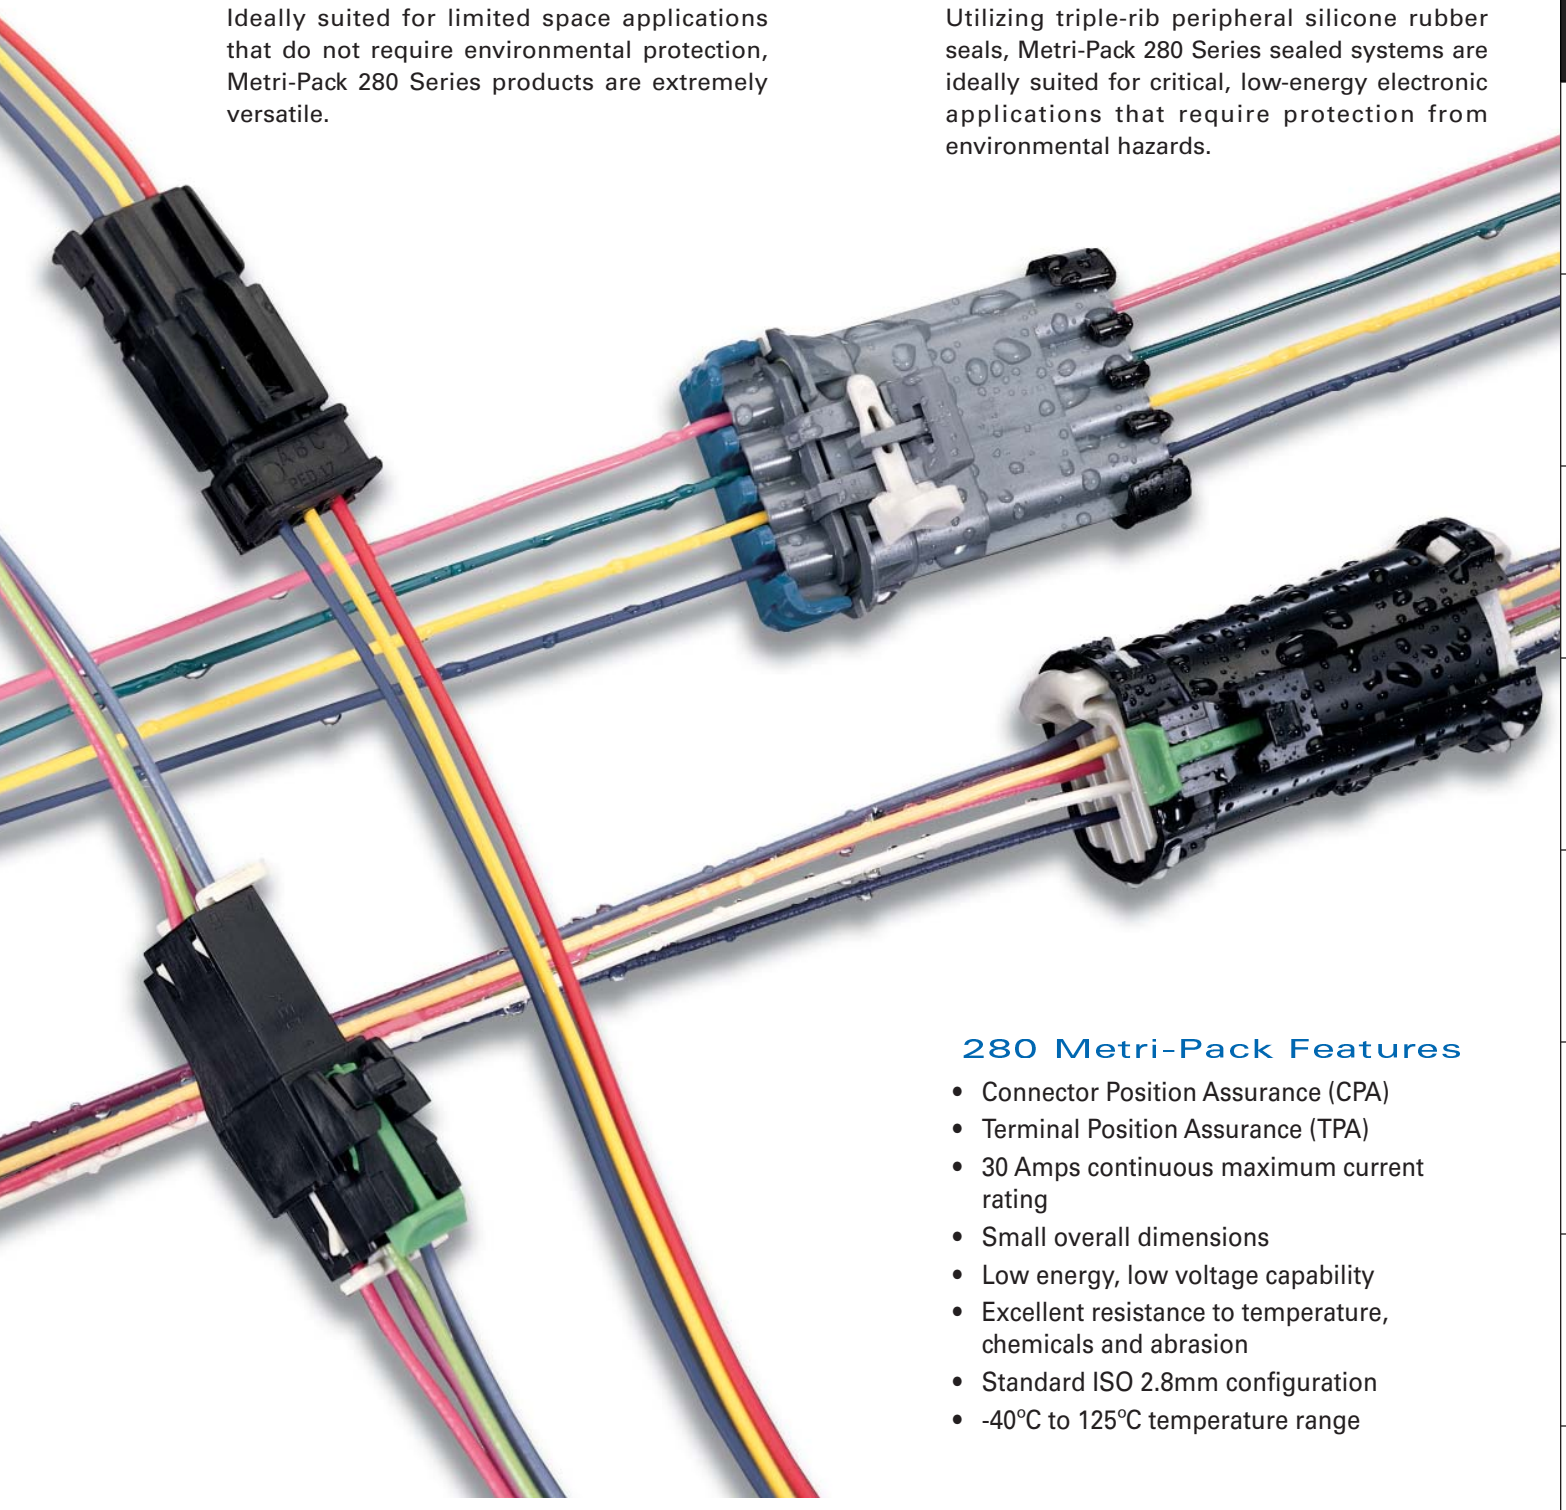
Available in device and in-line connections for vehicle applications, Metri-Pack 280 Series connectors can meet or exceed the requirements for most marine, appliance, and industrial control applications.

Ideally suited for limited space applications that do not require environmental protection, Metri-Pack 280 Series products are extremely versatile.

Available in device and in-line connections for underhood vehicle applications, Metri-Pack 280 Series sealed connectors can meet or exceed the requirements for most marine, appliance, and industrial control applications.

Utilizing triple-rib peripheral silicone rubber seals, Metri-Pack 280 Series sealed systems are ideally suited for critical, low-energy electronic applications that require protection from environmental hazards.



280 Metri-Pack Features

- Connector Position Assurance (CPA)
- Terminal Position Assurance (TPA)
- 30 Amps continuous maximum current rating
- Small overall dimensions
- Low energy, low voltage capability
- Excellent resistance to temperature, chemicals and abrasion
- Standard ISO 2.8mm configuration
- -40°C to 125°C temperature range

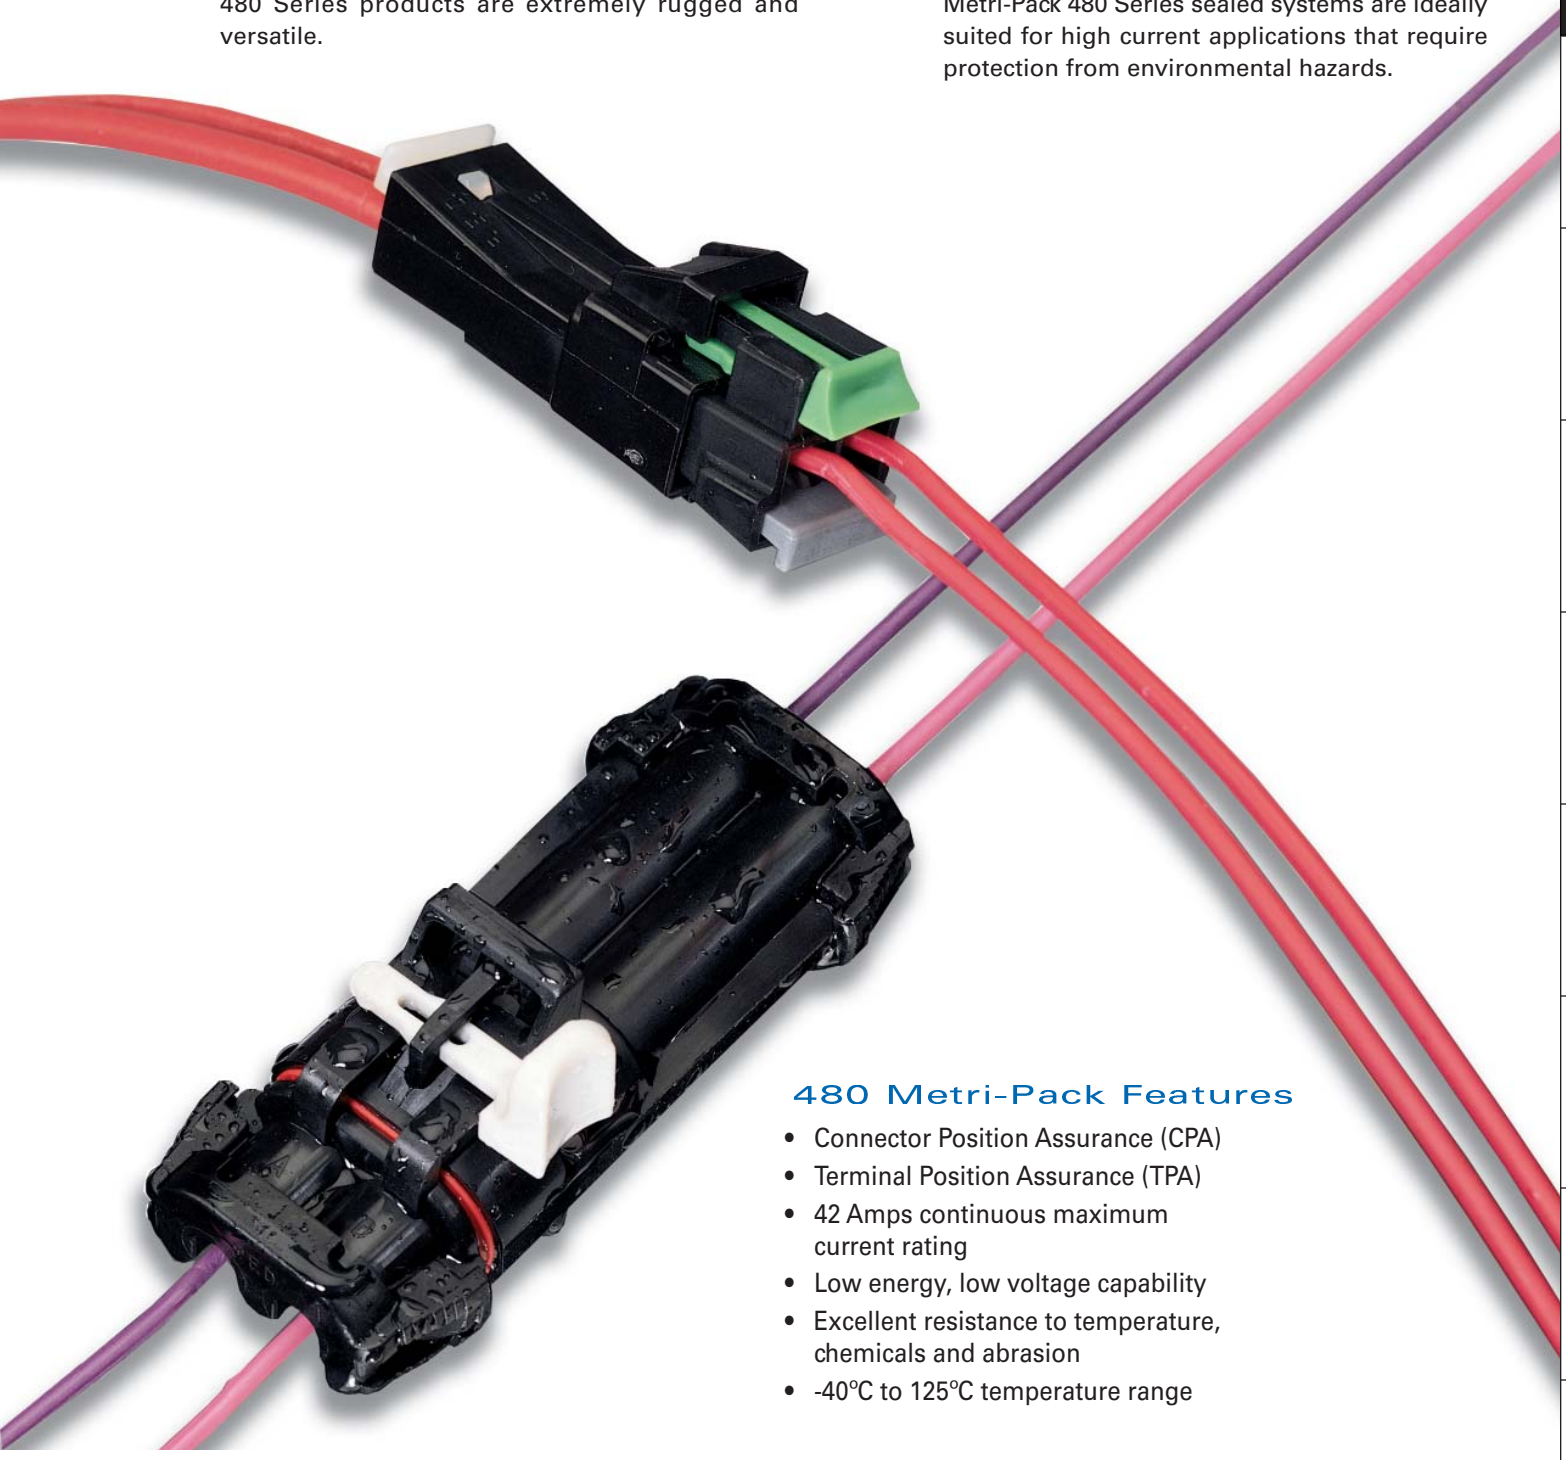
480

Available in device and in-line connections for vehicle applications, Metri-Pack 480 Series connectors can meet or exceed the requirements for most marine, appliance, and industrial control applications.

Ideally suited for high current applications that do not require environmental protection, Metri-Pack 480 Series products are extremely rugged and versatile.

Available in device and in-line connections for underhood vehicle applications, Metri-Pack 480 Series sealed connectors can meet or exceed the requirements for most marine, appliance, and industrial control applications.

Utilizing triple-rib peripheral silicone rubber seals, Metri-Pack 480 Series sealed systems are ideally suited for high current applications that require protection from environmental hazards.



480 Metri-Pack Features

- Connector Position Assurance (CPA)
- Terminal Position Assurance (TPA)
- 42 Amps continuous maximum current rating
- Low energy, low voltage capability
- Excellent resistance to temperature, chemicals and abrasion
- -40°C to 125°C temperature range

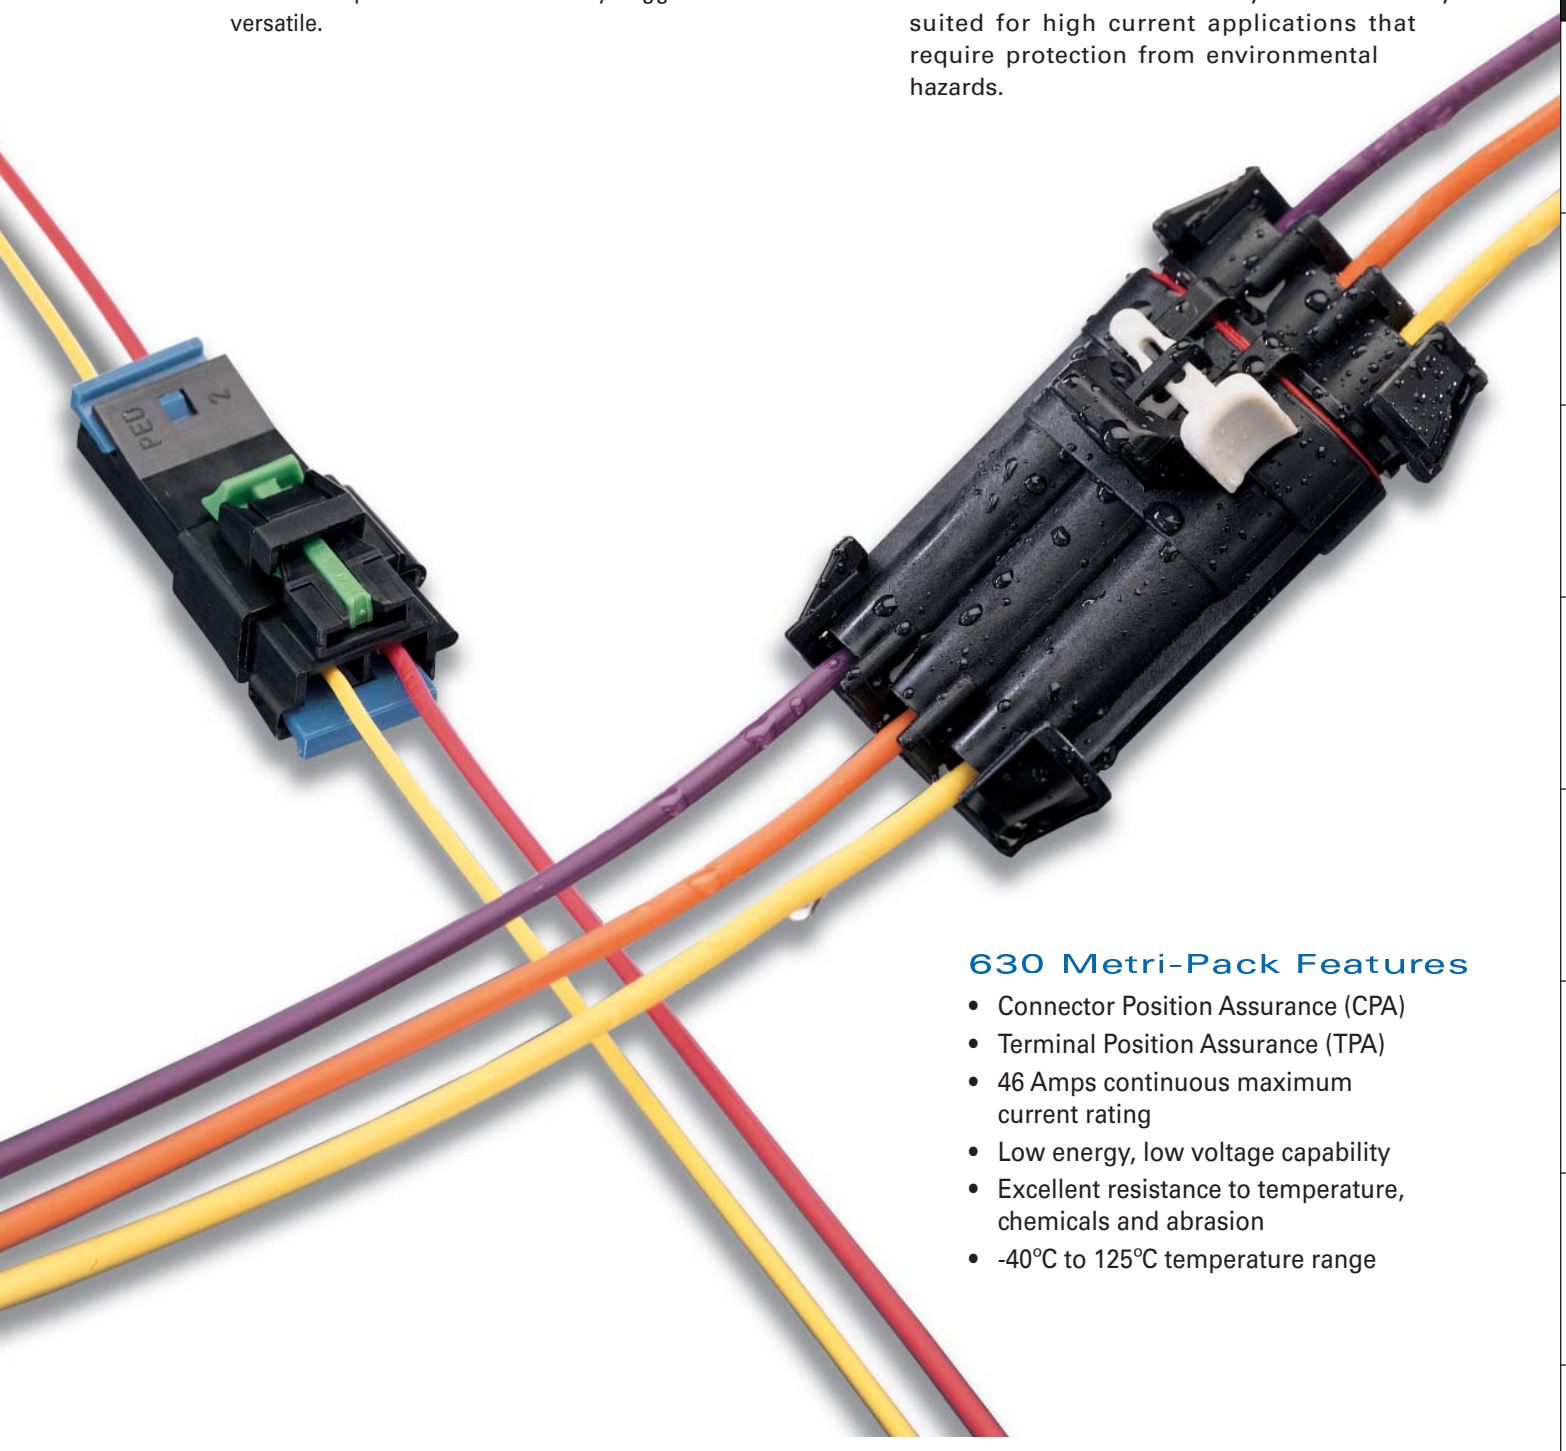
Available in device and in-line connections for vehicle applications, Metri-Pack 630 Series connectors can meet or exceed the requirements for most marine, appliance, and industrial control applications.

Ideally suited for high current applications that do not require environmental protection, Metri-Pack 630 Series products are extremely rugged and versatile.

Available in device and in-line connections for underhood vehicle applications, Metri-Pack 630 Series sealed connectors can meet or exceed the requirements for most marine, appliance, and industrial control applications.

Utilizing triple-rib peripheral silicone rubber seals, Metri-Pack 630 Series sealed systems are ideally suited for high current applications that require protection from environmental hazards.



630 Metri-Pack Features

- Connector Position Assurance (CPA)
- Terminal Position Assurance (TPA)
- 46 Amps continuous maximum current rating
- Low energy, low voltage capability
- Excellent resistance to temperature, chemicals and abrasion
- -40°C to 125°C temperature range

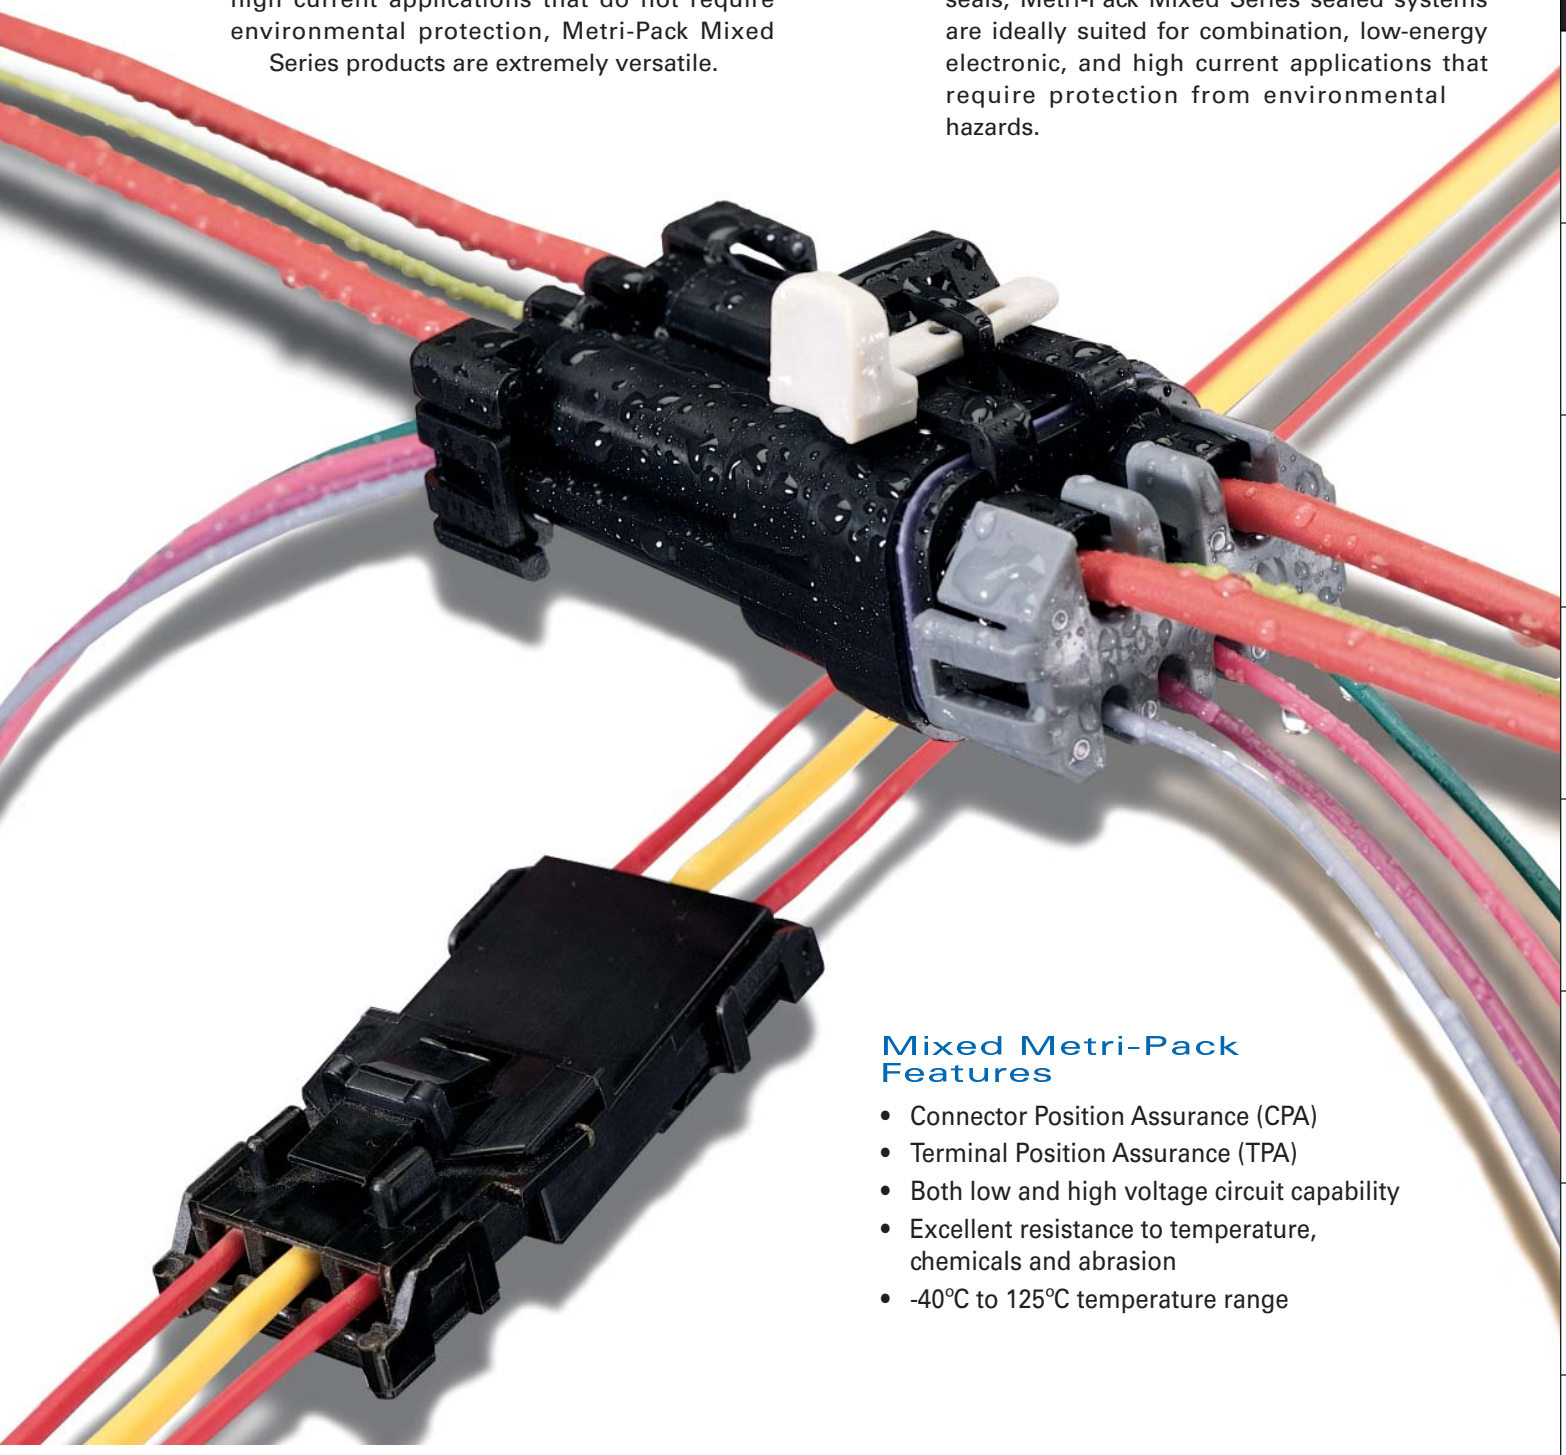
Mixed

Available in device and in-line connections for vehicle applications, Metri-Pack Mixed Series connectors can meet or exceed the requirements for most marine, appliance, and industrial control applications.

Ideally suited for combination low energy and high current applications that do not require environmental protection, Metri-Pack Mixed Series products are extremely versatile.

Available in device and in-line connections for underhood vehicle applications, Metri-Pack Mixed Series sealed connectors can meet or exceed the requirements for most marine, appliance, and industrial control applications.

Utilizing triple-rib peripheral silicone rubber seals, Metri-Pack Mixed Series sealed systems are ideally suited for combination, low-energy electronic, and high current applications that require protection from environmental hazards.



Mixed Metri-Pack Features

- Connector Position Assurance (CPA)
- Terminal Position Assurance (TPA)
- Both low and high voltage circuit capability
- Excellent resistance to temperature, chemicals and abrasion
- -40°C to 125°C temperature range

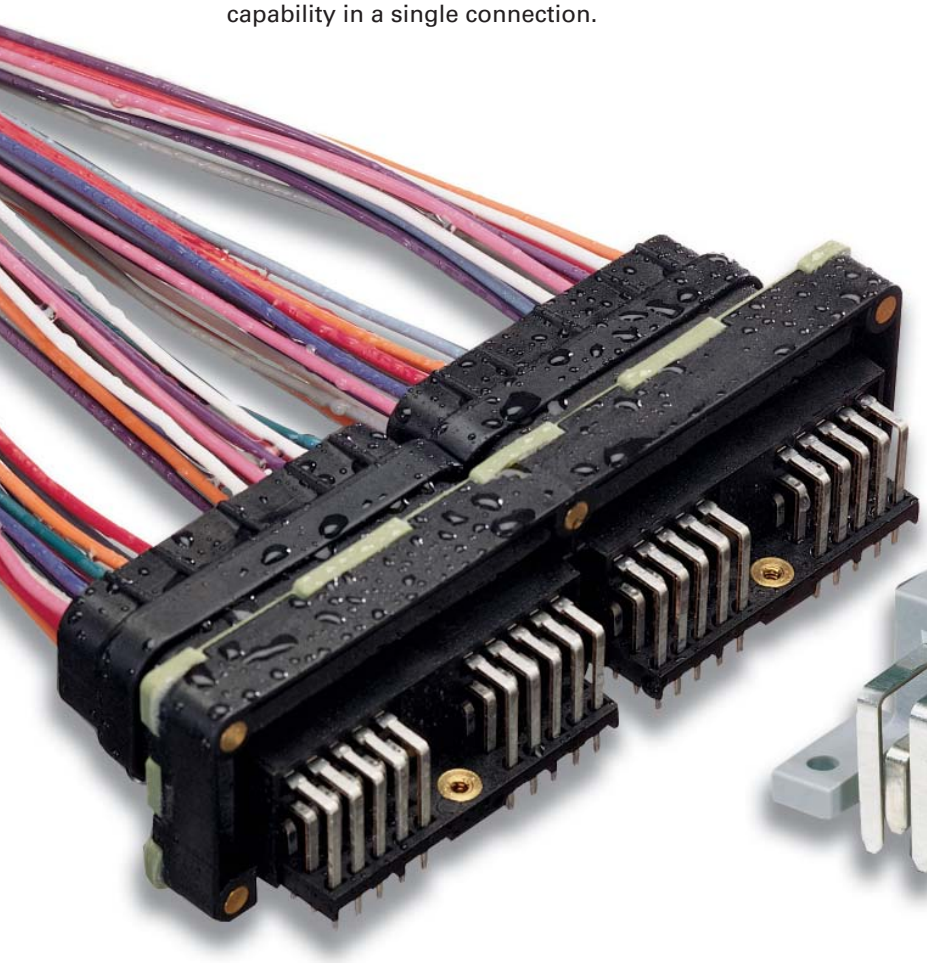
Header

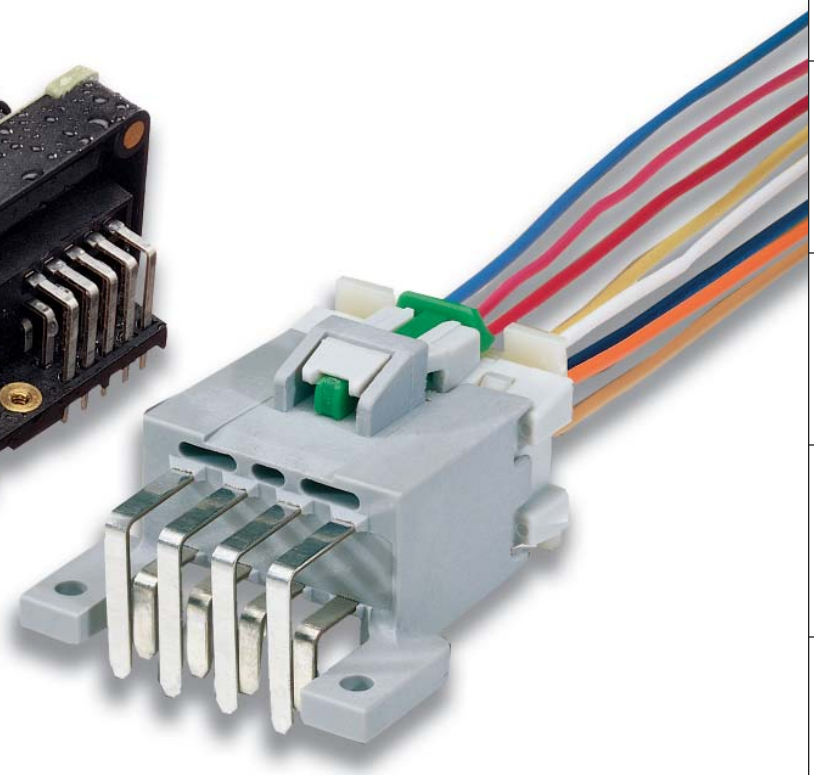
The Metri-Pack 280 Series unsealed electronic header is a versatile, and extremely rugged system designed to meet customer's power circuit needs.

This system offers the combination of excellent low energy electronic circuits and power circuit capability in a single connection.

The Metri-Pack 150 Series sealed electronic header is a rugged system designed for severe underhood environments. This system offers the combination of excellent low energy electronic circuits and power circuit capability in a single connection.

Metri-Pack 150 Series sealed header systems are ideally suited for critical, low-energy electronic applications that require protection from environmental hazards.





Metri-Pack Header Features

- Terminal Position Assurance (TPA)
- 14 Amps continuous maximum current rating for 150 Metri-Pack Series
- 30 Amps continuous maximum current rating for 280 Metri-Pack Series
- Low energy, low voltage capability
- Small overall dimensions
- Bolt assist connector to connector lock
- -40°C to 125°C temperature range

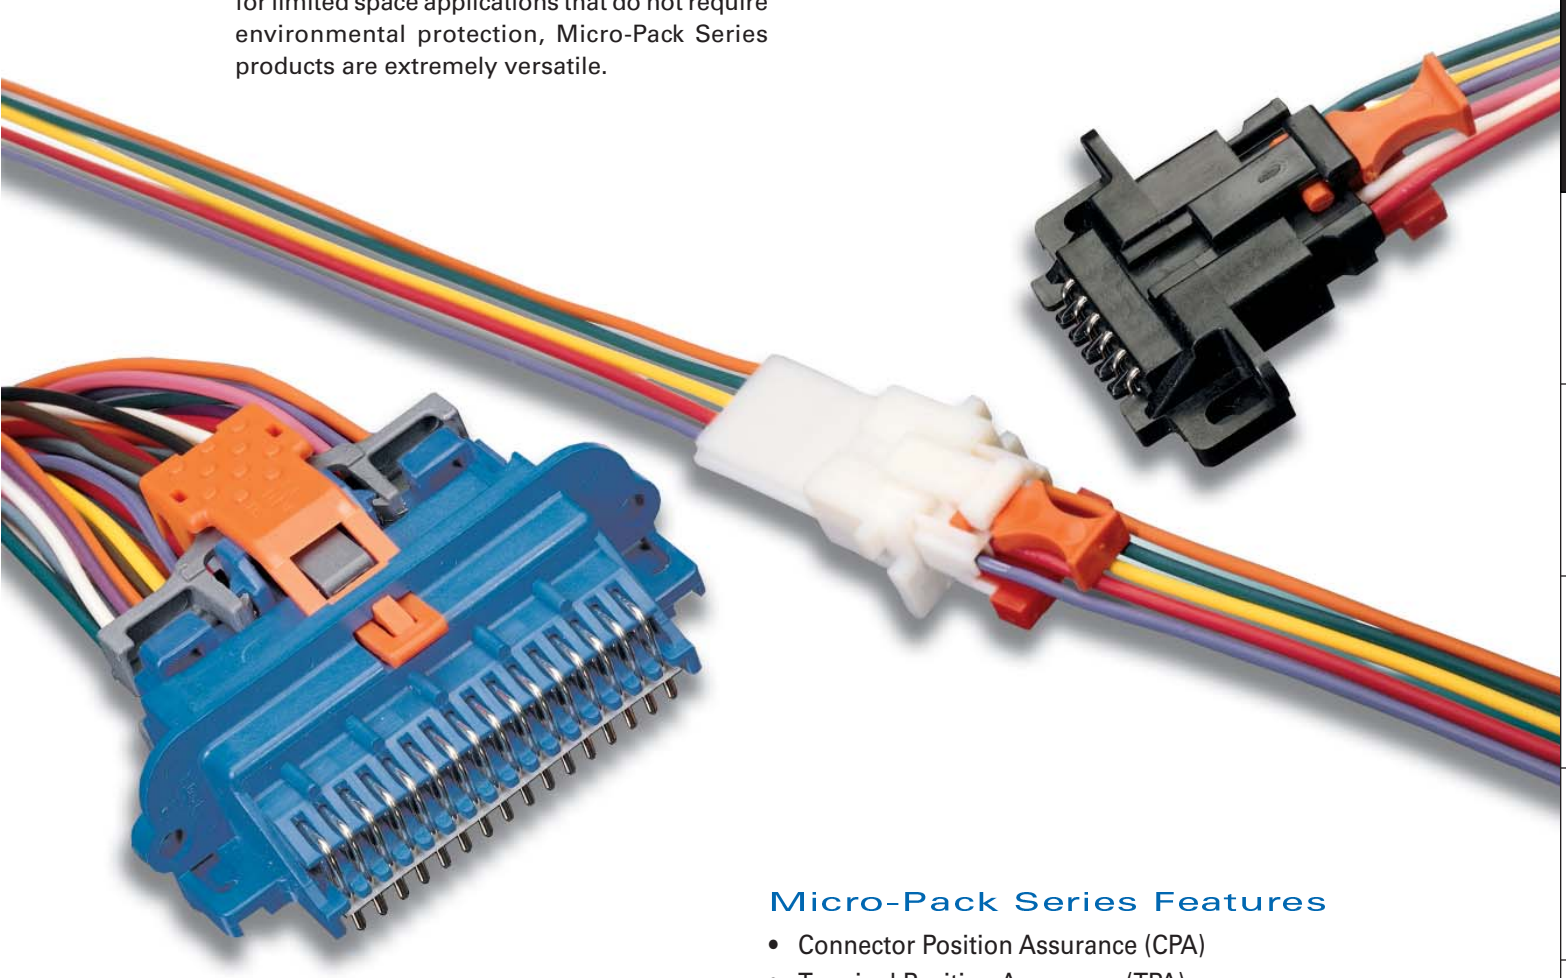
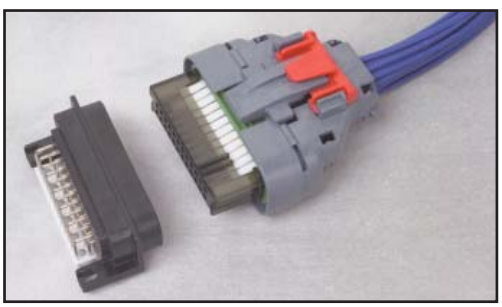
100 In-Line, 100 Header & 100W Header

Available in electronic header and in-line connections, Micro-Pack Series connector is an excellent low energy system designed to meet the needs of high density applications.

Header connectors are available in straight, 90°, and 180° mounting to either flexible or hard board circuits. While inlines are ideally suited for limited space applications that do not require environmental protection, Micro-Pack Series products are extremely versatile.

The 100W Series is available in both electronic header and in-line connection systems. This Micro-Pack Series connection is an excellent low energy system designed to meet the needs of high density applications, requiring protection from environmental hazards. Delphi's 100W header connector mates to either flexible or hard circuit board applications.





Micro-Pack Series Features

- Connector Position Assurance (CPA)
- Terminal Position Assurance (TPA)
- 5 Amps continuous maximum current rating for Micro-Pack 100 Series
- 7.5 Amps continuous maximum current rating for Micro-Pack 100W Series
- Small overall dimensions
- High circuit density
- Low energy, low voltage capability
- -40°C to 85°C temperature range for Micro-Pack 100 Series
- -40°C to 125°C temperature range for Micro-Pack 100W Series

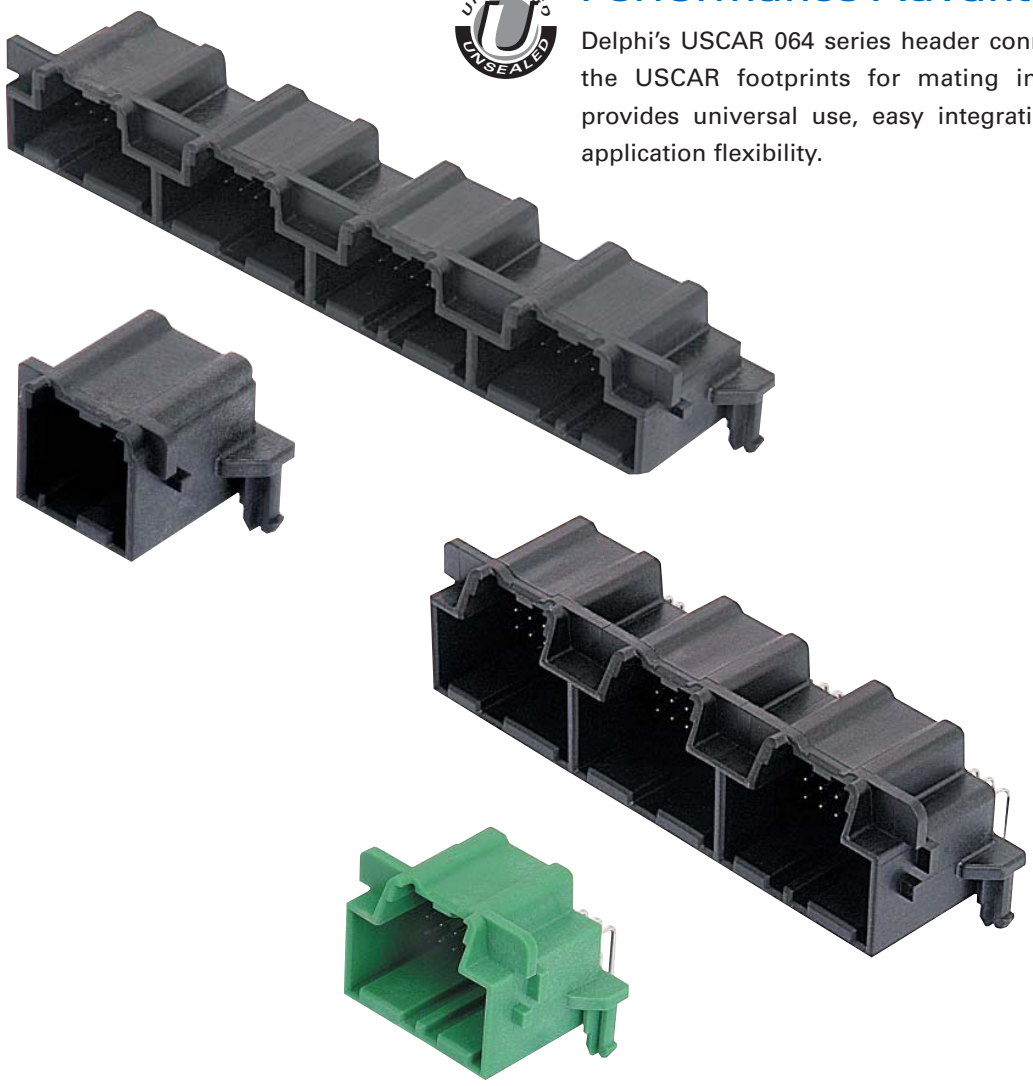
Unsealed Header Connectors & Mating Components



Performance Advantages

Delphi's USCAR 064 series header connectors satisfy the USCAR footprints for mating interfaces. This provides universal use, easy integration and broad application flexibility.

Meeting USCAR Standards

Delphi's standard 064 series unsealed header connectors are USCAR* compliant. These products:

- meet USCAR design guidelines (per SAE/USCAR-12 Revision 2, Dec. 2001)
- meet published USCAR interface footprints
- are validated to USCAR specifications (per SAE/USCAR-2 Revision 3, April 2001)

Two header types are available. They include:

- Standard one-row headers
- Standard two-row headers

Both header types are available in either right angle or straight pin versions.

Mating Connectors

Delphi also offers a complete line of 064 series female mating connectors in USCAR indexes A to F.

*USCAR is the United States Council for Automotive Research.

Introduction

Benefits/Features:

- USCAR compliant
- Intermateability
- Interchangeability
- Industry standard design and specifications
- Provides broad application flexibility
- Hand-mateable connections (75N maximum engage force)
- Provides ergonomic assembly and efficient installation
- Standard tin-plated interfaces are cost-effective
- Optional gold-plated interfaces enhance reliability for specific applications
- Secondary terminal lock for enhanced robustness
- Connector position assist (CPA) for superior connection reliability
- Color coding by index options for improved assembly

Tooling

Delphi's 064 series header connectors and components are validated to USCAR specifications (per SAE/USCAR-2 Revision 3, April 2001). All components in this catalog can be supplied from low volume tooling, many of which are available from high volume production tooling as well. PPAP certification can be supplied for low volume production intent tooling if requested.

Typical Applications

Delphi's 064 series header products can be used in the automotive and transportation markets. They are suitable for device, in-line and board-to-wire applications in the following:

- Satellite radios
- Infotainment devices
- Automotive body modules and systems
- HVAC systems

In addition to the markets described, 064 series connectors may apply to other application categories, many of which are listed on the overview chart on page 4.3. Delphi can also provide custom designs based on customer requirements.

0.8, 1.5, 2.8, 4.8, 6.3 and Mixed

Available in both in-line and device connections for all underhood vehicle applications. By utilizing multiple contact points, the system offers exceptional electrical stability, even in high vibration applications.

Available in both device and in-line connection systems for all vehicle applications. Exceptional performance in both high and low current applications.

Ducon Features

- High current performance
- Multiple contact points
- Small overall dimensions
- Low energy, low voltage capability
- Excellent resistance to temperature, chemicals, abrasion and vibration
- Terminal Position Assurance (TPA)
- Rugged two piece terminal construction

Lamp Sockets, Splice Savers, Weather-Pack, VF & DS Connections

Lamp Socket Features

- Advanced bulb to terminal interface technology
- Accommodates a wide variety of bulbs—B1, C2 bayonet, W2, W3 wedge, H7 with GT280 interface
- Available sealed or unsealed systems
- Multiple focal lengths
- Right angle or axial mounting features with easy assembly and release provisions

VF Series Features

- Accommodates a wide variety of devices
- Small overall dimensions
- Terminal Position Assurance (TPA)
- Connector Position Assurance (CPA)

DS Series Features

- Fuel injector applications
- High sealing protection
- Reliable electrical interface
- Secure locking mechanism

Weather-Pack Features

- Connector Position Assurance (CPA)
- Terminal Position Assurance (TPA)
- 20 Amps continuous maximum current rating
- Sealed system
- Pin and Sleeve configuration
- Dual locking tabs on terminals
- Low energy, low voltage capability
- -40˚C to 125˚C temperature range

Splice Saver Features

- Eliminates the need for solder
- Flexible configuration
- Uses 280 Metri-Pack or 150 GT terminals
- Uses ISO or SAE compatible terminals
- Low profile connector with cap lock
- Available in sealed/unsealed and grounded/non-grounded versions

Lamp Sockets

Lamp Sockets are a comprehensive and diverse product line featuring sophisticated connection systems technology. Available connection systems accommodate virtually every size and type of light bulb, as well as all varieties of bulb mounting features.

Splice Savers

Splice Saver connectors are capable of providing one or several splices within a single connection assembly. Splicing is accomplished within the male cap assembly using a segmented bus blade.

Weather-Pack

An environmentally sealed connection system that utilizes triple-rib peripheral silicone rubber seals and individual towers to provide terminal isolation for connector alignment. Weather-Pack sealed systems are ideally suited for critical applications that require protection from environmental hazards.

DS Connections

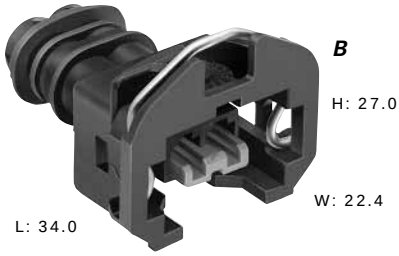
A. Part No: 12196895

Description:	Connector Assembly 2F
Size:	31.4L x 24.0H x 21.0W
Color:	Black
Material:	PA66 30% GF
Terminals:	See Page 6.26
Seals:	See Page 6.26
Typical App:	Injector

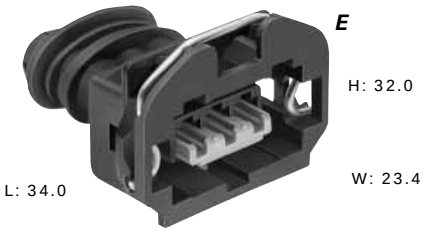
D. Part No: 12158456

Description:	Connector Assembly 3F
Size:	31.4L x 29.0H x 21.0W
Color:	Black
Material:	PA66 30% GF
Terminals:	See Page 6.26
Seals:	See Page 6.26
Typical App:	Fuel Pump



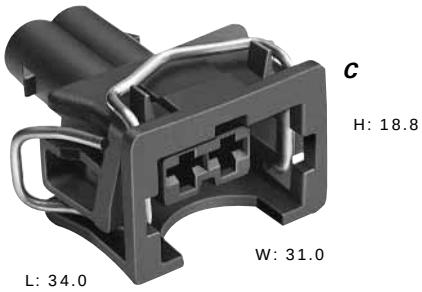
B. Part No: 15364309

Description:	Connector Assembly 2F
Size:	34.0L x 27.0H x 22.4W
Color:	Black
Material:	PA66 30% GF
Terminals:	See Page 6.26
Seals:	See Page 6.26
Typical App:	Injector



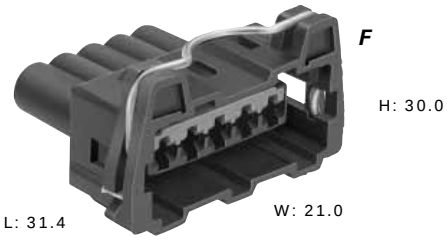
E. Part No: 15364318

Description:	Connector Assembly 3F
Size:	34.0L x 32.0H x 23.4W
Color:	Black
Material:	PA66 30% GF
Terminals:	See Page 6.26
Seals:	See Page 6.26
Typical App:	Fuel Pump



C. Part No: 12084126

Description:	Connector Assembly 2F
Size:	34.0L x 18.8H x 31.0W
Color:	Black
Material:	PA66 30% GF
Terminals:	See Page 6.26
Typical App:	Injector



F. Part No: 12158457

Description:	Connector Assembly 5F
Size:	31.4L x 39.0H x 21.0W
Color:	Black
Material:	PA66 30% GF
Terminals:	See Page 6.26
Seals:	See Page 6.26
Typical App:	Ignition System

Modular & Traditional

Delphi designs and manufactures various types of electrical centers to meet all unique customer requirements. Delphi's Electrical Centers can be custom designed or supplied from existing designs to meet your needs. Centers are available in Modular and Traditional style, and have the flexibility to accept both SAE and ISO approved device footprints.

Electrical Center Features

- Centralizes all circuit protection within a wiring system
- Accommodates Mini-Relay and Micro-Relays as well as MINI® Fuses and MAXI™ Fuses
- Modular Electrical Centers create a unique electrical center by combining appropriate modules into a standardized base

Temperature Sensors

Delphi's growing line of temperature sensors is a perfect integration of product and process technologies. Our crimpless conductive path design enables automatic processing for efficient, cost-effective sensor manufacturing.

Capable of matching any calibration criteria, these reliable and durable sensors can be packaged into customer systems worldwide. These products can be promptly brought to market, utilizing Delphi's global network of engineering and manufacturing locations.

Our sensor product line offers a variety of designs for various sensing applications. In addition, we are currently developing humidity sensor products for EMS and HVAC applications including intake air humidity measurement, cabin air relative humidity, and integrated dew point and glass temperature for use in fog predication algorithms.

Temperature Sensor Features

- Rugged housing design
- Customized electrical and mechanical mounting
- Design flexibility
- Few components, cost effective

Air

Description

Air temperature sensors are continuous function devices that change resistance inversely proportional to temperature. These sensors consist of two major components: the high temperature thermoplastic shell and a thermistor pre-mold sub-assembly. The plastic shell is custom designed to meet specific mounting and packaging requirements. Containing an NTC thermistor, the patented pre-mold assembly is inserted into the shell.

Typical Application

The air sensors measure the engine intake air temperature in the manifold, in the intake air duct, and in the air cleaner. They provide a signal to the Powertrain Control Module (PCM).

HVAC Air

Description

The Heating Ventilation Air Conditioning temperature sensor is a continuous function device that changes resistance inversely proportional to temperature. The discharge air sensor consists of an NTC thermistor with a crimpless conductive path protected by a plastic body.

Typical Application

The discharge air sensor measures the inside air temperature and provides a signal to the automatic climate control unit.

Coolant/Fluid

Description

Coolant/Fluid temperature sensors are continuous function devices that change resistance inversely proportional to temperature. These brass sensors consist of five major components: the brass shell, thermal grease, insulating sleeve, gasket, and insert molded connector. The shell utilizes customized thread and hex sizes per application requirements and the connector contains an NTC thermistor with a crimpless conductive path.

Typical Application

The brass sensors measure the temperature of the engine oil, the fuel or the engine coolant and provide a signal to the Powertrain Control Module (PCM).

Transmission

Description

Transmission temperature sensors are continuous function devices that change resistance inversely proportional to temperature. The two primary types of sensors that monitor the automatic transmission fluid are: the metal stator temperature sensor and the plastic sump temperature sensor. The stator sensor consists of a brass or stainless steel shell, thermal grease, insulating sleeve, gasket, and insert-molded connector containing an NTC thermistor. The sump sensor consists of a high temperature plastic shell and a patented pre-mold sub-assembly that contains an NTC thermistor with a crimpless conductive path.

Typical Application

These sensors measure the fluid temperature in two transmission environments: in-line near the stator and the sump tank. A signal is provided to the Powertrain Control Module (PCM).

Mounting Thread Size:	1/8"-27 PTF

Thermal & Electrical Properties	
Typical voltage supply:	5V dc
Operating temperature:	
Sensor tip:	-40˚C to 200˚C
Connector:	-40˚C to 150˚C
Resistive range (Ω):	See Chart C
Dissipation constant:	12mW/˚C
Thermal time constant:	10 seconds
Accuracy:	See Chart C

Ring Terminals, Battery Terminals, 56 Series, Carriers & Clips

Ring Terminal Features

- Advanced crimp wing design
- Complete selection of English and Metric stud-hole sizes
- Wide variety of locking and orientation features

Battery Terminal Features

- State of the art crimp interface technology
- Designed for all appropriate battery and starter cable gage sizes and cable types
- Battery terminals mate to: side post, top post, or top stud batteries
- Starter terminals have anti-rotation features for ease of installation

56 Series Device Features

- Proven connection systems reliability
- Compatible connection systems to most devices
- State of the art crimp interface technology

Clip Features

- Broad product selection
- Clips attach easily and securely to connectors via mechanical locking design
- Proven anti-rattle design features

Ring Terminals

A wide selection of basic washer style and spade style terminals with design features to accommodate various application requirements. These terminals are designed with both core and insulation crimp wings and employ the same state of the art crimp design features as our entire connection systems family.

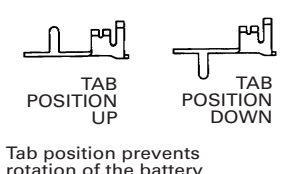
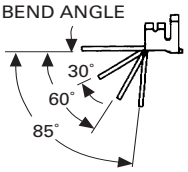
Battery / Heavy Duty Terminals

Delphi offers a complete line of top and side mounted battery terminals for all applications. Anti-rotation tabs are included for ease of installation and assembly. Stamped and serrated crimp wings offer unparalleled crimp reliability and durability.



Tab position prevents rotation of the battery terminal during installation.



Delphi offers ***battery cable assemblies*** for applications requiring an angled terminal. Contact your regional support representative.

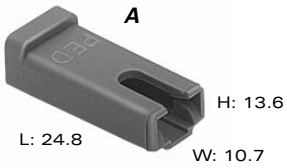
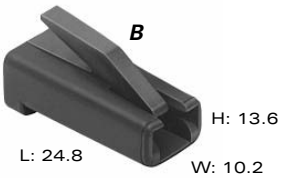
Using a proven terminal interface technology and an enhanced crimp configuration, 56 Series Device Connections remain an industry standard. A number of standard industry device connection systems are immediately available.



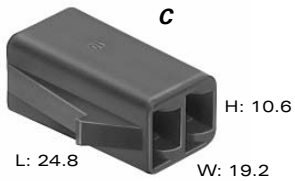
A. Part No: 12015306

Description:	Connector 1F
Size:	24.8L x 13.6H x 10.7W
Color:	Gray
Material:	PA66 HS IM
Terminals:	See Above, 56 Series
Typical App:	Switch



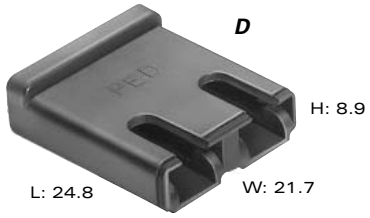
B. Part No: 12004267

Description:	Connector 1F
Size:	24.8L x 13.6H x 10.2W
Color:	Black
Material:	PP IM
Terminals:	See Above, 56 Series
Typical App:	Horn



C. Part No: 08900863

Description:	Connector 2F
Size:	24.8L x 10.6H x 19.2W
Color:	Black
Material:	PP
Terminals:	See Above, 56 Series
Typical App:	Switch



D. Part No: 02973407

Description:	Connector 2F
Size:	24.8L x 8.9H x 21.7W
Color:	Black
Material:	PP
Terminals:	See Above, 56 Series
Typical App:	Various

SECTION NOTES:

- Nib on terminal provides increased retention when used with specific mating blade.

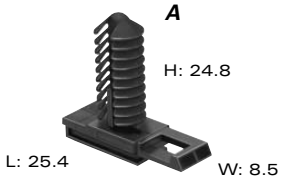
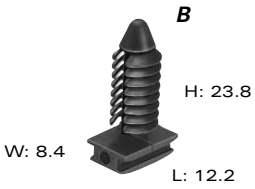
Clips

Connectors are positively positioned within the vehicle via the use of Delphi's integral connector clips. These clips are easily assembled to the connectors and reliably remain in position. Designs incorporate features that prevent movement or rattling regardless of driving conditions.



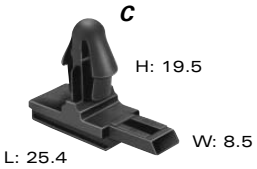
A. Part No: 12186353

Description:	Clip (Self Locking)
Size:	25.4L x 24.8H x 8.5W
Color:	Black
Material:	PA66 HS IM



B. Part No: 12047835

Description:	Clip
Size:	12.2L x 23.8H x 8.4W
Color:	Black
Material:	PA6
Note:	Attach by sonic weld (preferred) or adhesive.



C. Part No: 12084149 (Black)

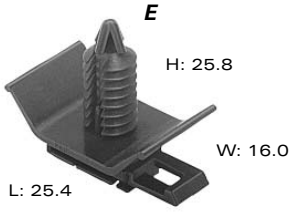
Material:	PP IM

Part No: 12110290 (Gray)

Material:	PA66 HS IM
Description:	Clip (Self Locking)
Size:	25.4L x 19.5H x 8.5W

D. Part No: 12110517

Description:	Clip (Self Locking)
Size:	32.3L x 26.8H x 25.4W
Color:	Black
Material:	PA66 HS IM



E. Part No: 12110783

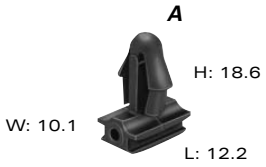
Description:	Clip (Self Locking)
Size:	25.4L x 25.8H x 16.0W
Color:	Black
Material:	PA66 HS IM

SECTION NOTES:

- Product information shown is a representative sample of the available plastic and metal clips.
- Self-locking clips require connectors with self-locking features.

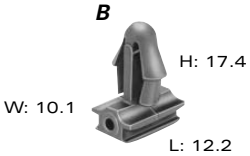
NOTE: Specifications in this catalog are for general reference only and are subject to change without notice. To verify product information, please contact a Delphi representative.

Clips



A. Part No: 08905563

Description:	Clip
Size:	12.2L x 18.6H x 10.1W
Color:	Black
Material:	PP IM
Note:	Attach by sonic weld (preferred) or adhesive.



B. Part No: 12084561

Description:	Clip
Size:	12.2L x 17.4H x 10.1W
Color:	Gray
Material:	PA66 HS IM
Note:	Attach by sonic weld (preferred) or adhesive.

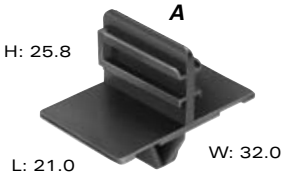
Connector Carriers

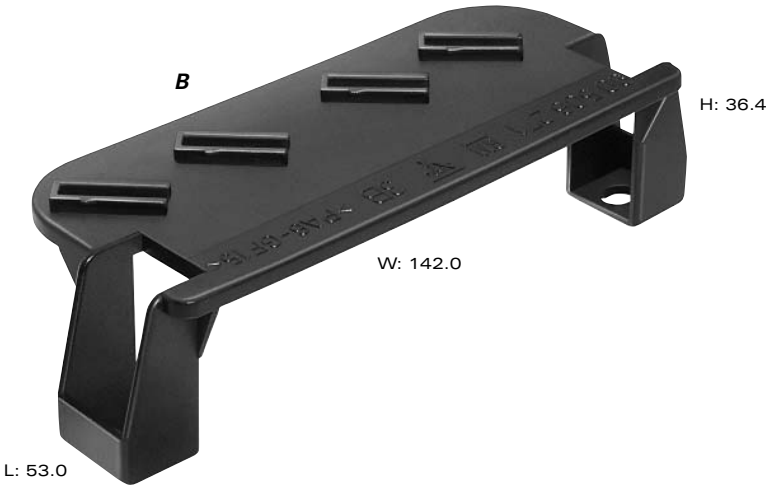
A. Part No: 12185083

Description:	2 Position Carrier
Size:	21.0L x 25.8H x 32.0W
Color:	Black
Material:	PA6 15% GF



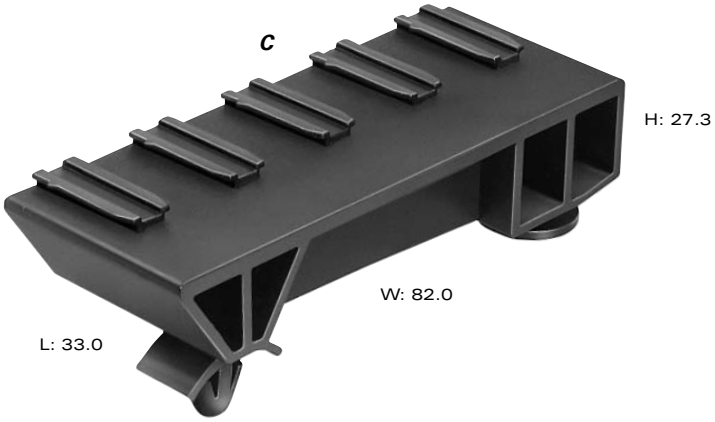
B. Part No: 10719975

Description:	4 Position Carrier
Size:	53.0L x 36.4H x 142.0W
Color:	Black
Material:	PA6 15% GF



C. Part No: 10740405

Description:	5 Position Carrier
Size:	33.0L x 27.3H x 82.0W
Color:	Black
Material:	PP 20% GF



D. Part No: 10720085

Description:	8 Position* Carrier
Size:	98.0L x 37.5H x 194.5W
Color:	Black
Material:	PA6 15% GF

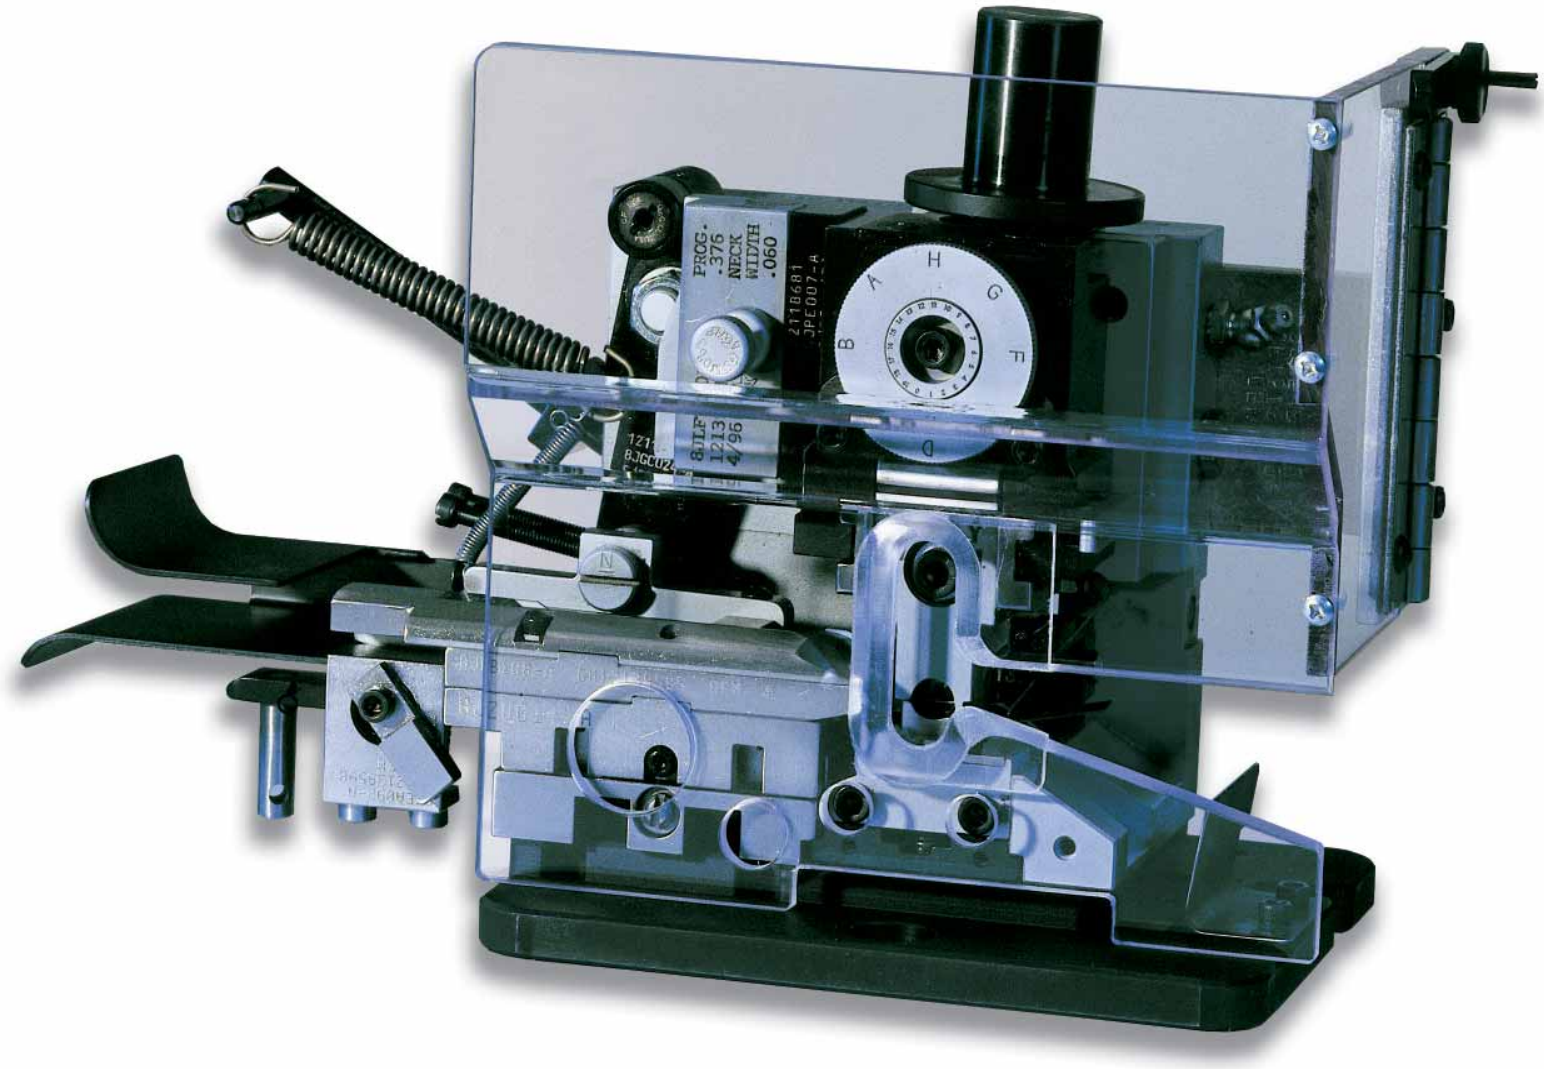
Application Tooling

Delphi offers application tooling for both automatic and hand tool operations. This section highlights various presses and dies as well as some of our more common hand tools.



Additional information on our automatic dies and presses is available by calling North American Regional Sales and Service number:

1-800-DIE-INFO (1-800-343-4636)

(All other regions contact regional support representative)

Additional information on our hand tools is available by contacting your regional support representative.

Application Tooling

Delphi Presses:

Delphi offers two bench-style Speed-O-Matic presses.

3-ton used for: Metri-Pack, Weather-Pack, ComPack, Micro-Pack, and Pack-Con terminals.

5-ton used for: 56/58/59 series terminals and ring terminals.

Safety Feature:

- An optional single stroke mechanism will prevent the press from recycling if the electrical anti-repeat should fail.

Motor Features:

- 1/2 H.P. (5-Ton) or 1/3 H.P. (3-Ton). 115V, 1750 rpm, single phase, 60 cycle.

Presses may be purchased, leased or rented. Contact your account representative.

Easy maintenance

Application rate of up to 4,000 terminals per hour

Safety guard

Proven press in the connection systems industry

The press of choice for Delphi

Rugged

Factory life of over 40 years

Optional heavy-duty stand

Delphi Speed-O-Matic Dies:

Delphi Speed-O-Matic dies used together with our Speed-O-Matic 3-Ton or 5-Ton press will allow a maximum application rate of up to 4,000 terminals per hour. Speed-O-Matic dies can be set up to run a variety of applications.

Therefore, when ordering an applicator die, please provide Delphi with the following information:

- Terminal part number
- Gauge of cable to be crimped
- Type of cable insulation

Speed-O-Matic dies may be purchased, and certain dies are also available for rental or lease. Contact your account representative.

Please see cross-reference sheet for terminal-to-die information. See Page 10.14.

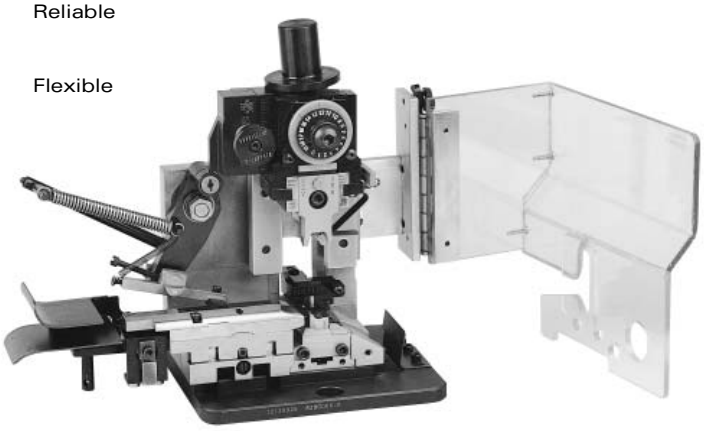
Application Tooling

Reliable

Flexible



Quick and easy die changes

Delphi E-Z Pack Die:

E-Z Pack Die can best be described as an advanced and flexible terminal application system.

Features:

- This die consists of a die base, quick change module (terminal specific), and a conversion kit that adapts the base to various presses.
- This die may be installed in Delphi's 3 or 5-ton press, or into other manufacturers' presses with an adapter kit.
- This die may be bench mounted or installed on wire processing cutter equipment.

Advantages:

- Reduces changeover time and downtime.
- Die changes are performed quickly and easily, without a need for special tools. Simply remove the tool module and insert the next module into the die base.

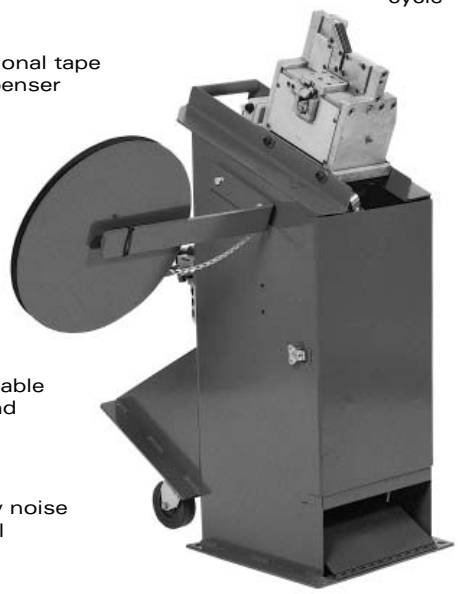
E-Z Pack Dies may be purchased, leased or rented. Contact your account representative.

Please see cross reference sheet for terminal-to-die information. See Page 10.14.

Efficient

Automatic cutter cycle

Optional tape dispenser



Portable stand

Low noise level

Requires minimal floor space

Optional liquid solder pot

Delphi Low Profile Splice Die and Stand:

This air operated press and die allows splicing of two or more wire leads and provides good visibility to crimping area.

Die and stand sold as a unit.

Specifications:

Overall height:	1143mm (45 inches)
Overall width:	914mm (36 inches)
Overall depth:	610mm (24 inches)

NOTE: Specifications in this catalog are for general reference only and are subject to change without notice. To verify product information, please contact a Delphi representative.

Application Tooling

Delphi Flex-Guard Conduit Cutter:

This versatile machine is designed for use both as a production line machine and for bulk conduit cutting operations.

For production line operations:

- With machine modifications, will cut up to three different lengths of conduit in any pre-determined sequence.

For bulk cutting operations:

- Will cut as many as 99,999 pieces of conduit of the same length in one continuous operation.

This cutter requires both electrical and pneumatic connections.

Specifications:

Overall height:	1854mm (73 inches)
Overall width:	787mm (31 inches)
Overall depth:	330mm (13 inches)

Power Requirements:

Electrical-440 volt, 60 cycle AC, 110 volt may be requested.

Cuts various lengths

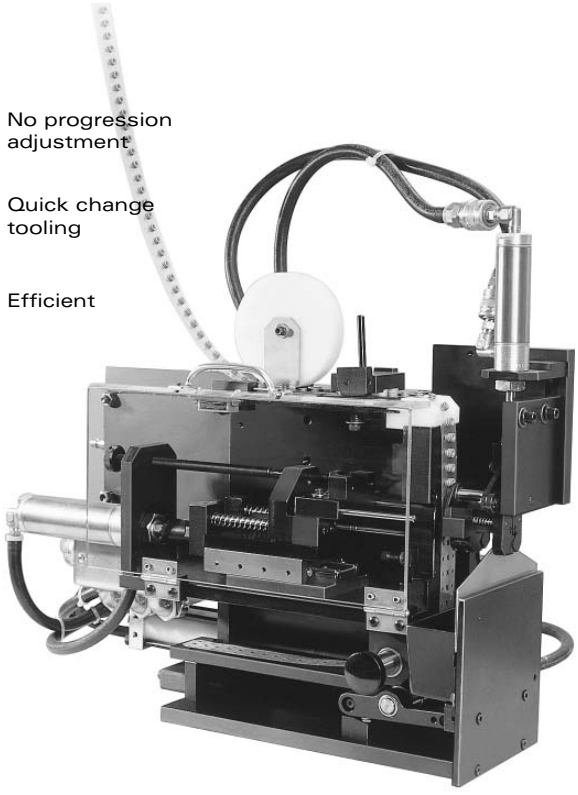
Versatile

Easy to operate

Delphi Automatic Cable Seal Applicator:

This tool is designed to automatically apply cable seals from a continuous mylar carrier strip onto unstripped cable. Cable may range in size from 0.22mm^2 gauge (thin wall) to 5.0mm^2 gauge (heavy wall).

This applicator is designed for use on automatic cable processing equipment.



No progression adjustment

Quick change tooling

Efficient

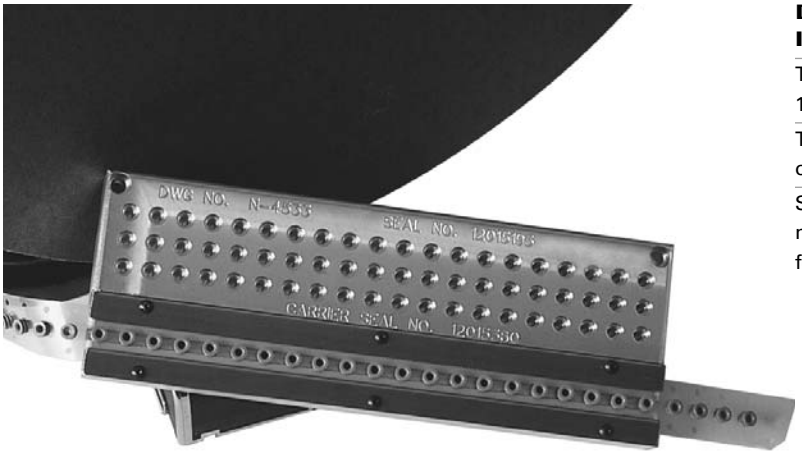
Application Tooling



Delphi Manual Cable Seal Insertion Block:

This block is a machined piece of aluminum, approximately 1" thick, 6" wide, and 12" long.

There are 80 holes drilled to correspond to the dimensions of Delphi's various cable seals.

Seals may be inserted into the block as loose piece or on mylar tape if desired. This Seal Insertion Block is designed for lower volume applications.

Weather-Pack 6060 Gauge as a Process Control Aid:

Specifications:

Weight:	480g (1.05 lb.)
Length:	102mm (4 inches)
Width:	38mm (1-1/2 inches)
Height:	35mm (1-3/8 inches)

This gauge is used as a process aid to verify that terminals are crimped and mated properly.
