# **LED Shunt**

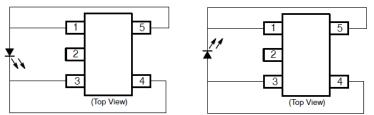

The HBL1015/25 Series are electronic shunts which provide a current bypass in the case of LEDs going into open circuit. LEDs are by nature quite fragile when subjected to transients and surge conditions. There are also many cases where high reliability of the LED lighting must be maintained such as in headlights, lighthouses, bridges, aircraft, runways and so forth. In these cases the low cost addition of the HBL device will provide full assurance that an entire string of LEDs will not extinguish should one LED fail open. The HBL device is also applicable to other loads where circuit continuity is required. The devices can be used with LED string currents from 140 to 500 mA.

#### Features

- A Bidirectional Device
- Automatically Resets Itself if the LED Heals Itself or is Replaced
- ON-State Voltage Typically 1.8 V
- OFF-State Current less than 0.5 µA
- These are Pb–Free Devices

### **Typical Applications**

- LEDs where Preventive Maintenance is Impractical
- LED Headlights
- LEDs with High Reliability Requirements
- Crowbar Protection for Open Circuit Conditions
- Overvoltage Protection for Sensitive Circuits

1. Device is bidirectional. Either configuration shown is acceptable.

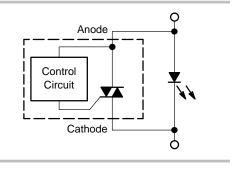

2. Pin 2 must be electrically floating

(Note: Microdot may be in either location)

### **ORDERING INFORMATION**

See detailed ordering and shipping information in the package dimensions section on page 4 of this data sheet.

#### **MAXIMUM RATINGS**

Rating	Symbol	Value	Unit
On–State Current, (T <sub>A</sub> = 25°C) (Note 1) (Note 2) (Note 3)	I <sub>T(AVG)</sub>	500 425 250	mA
Thermal Resistance, Junction-to-Air (Note 1) (Note 2) (Note 3)	$\theta_{JA}$	140 150 255	°C/W
Operating Temperature Range	TJ	-40 to 150	°C
Non–Operating Temperature Range	TJ	150	°C
Lead Temperature, Soldering (10 Sec)	TL	260	°C

Stresses exceeding those listed in the Maximum Ratings table may damage the device. If any of these limits are exceeded, device functionality should not be assumed, damage may occur and reliability may be affected.

1. Mounted onto a 1500 mm<sup>2</sup>, Denka K1, 1.5 mm AI, 2 kV thermally conductive dielectric, 2 oz. Cu, or equivalent board. Heat sinking should be spread equally among all pins (caution: pin 2 must be electrically isolated).
Mounted onto a 2–layer, 1000 mm<sup>2</sup> per layer, 3 oz Cu, FR4 PCB. Heat sinking should be spread equally among all pins (caution: pin 2 must

be electrically isolated).

Mounted onto a 2-layer, 50 mm<sup>2</sup> per layer, 1 oz Cu, FR4 PCB. Heat sinking should be spread equally among all pins (caution: pin 2 must 3. be electrically isolated).

NOTE: Normally this device would be mounted on the same copper heat sink and adjacent to the LED(s). If the LED(s) were to go open, then the HBL shunt would now dissipate the power using the same copper heat sink. Since the HBL has a voltage that is lower than that of the LED(s), then the power dissipation would be easily handled by the same heat sink as the LED.

Symbol	Characteristics	Min	Min	Тур	Max	Unit
V <sub>(BR)</sub>	Breakdown Voltage: The minimum voltage across the device in or at the breakdown region. Measured at $I_{BR} = 1$ mA.	HBL1015	8.0			V
		HBL1025	11.5			
	Holding Current: The minimum current required to maintain the device in the on-state.	HBL1015			125	mA
		HBL1025			125	
V <sub>BO</sub>	Breakover Voltage: The voltage across the device in the breakover region. Measured at $I_{BO}$ = 10 mA.	HBL1015			14.0	V
		HBL1025			16.0	
	Off–State Current: The dc value of current that results from the application of the off-state voltage. This is measured at 8.0 V for HBL1015 and 11.5 V for HBL1025.	HBL1015			0.5	μΑ
		HBL1025			0.5	
V <sub>T</sub>	On-State Voltage	HBL1015	1.2	1.8	2.4	V
		HBL1025	1.2	1.8	2.4	

#### ELECTRICAL CHARACTERISTICS (Unless otherwise noted: T<sub>A</sub> = 25°C)

Product parametric performance is indicated in the Electrical Characteristics for the listed test conditions, unless otherwise noted. Product performance may not be indicated by the Electrical Characteristics if operated under different conditions.

### **TYPICAL PERFORMANCE CURVES**

Общество с ограниченной ответственностью «МосЧип» ИНН 7719860671 / КПП 771901001 Адрес: 105318, г.Москва, ул.Щербаковская д.З, офис 1107

# Данный компонент на территории Российской Федерации

Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

# http://moschip.ru/get-element

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
