

High brightness LED array driver with diagnostics for automotive applications based on the STAP16DPS05 and STM8A

Data brief

Features

- Stand-alone mode:
 - Demonstrates pre-configured patterns (with adjustable brightness/speed) such as rolling text, wave effect, dot sequence, etc.
 - On-board buttons to switch between the demos
 - Potentiometer as a slider to control speed or brightness of the pattern
 - Open circuit, short circuit using open-circuit/short-circuit jumpers
- GUI mode:
 - All the features present in stand-alone mode can be controlled using the GUI
 - Global brightness control to change the brightness of all channels
 - Frame programming mode and 4 predefined presets with variable transition time between frames
 - Open/short error detection and representation on the GUI
 - Error detection in “no loop” and in loop of 0.5 s and 1 s
- RoHS compliant

Description

The STEVAL-ILL059V1 evaluation board is a high brightness LED array driver application with diagnostics based on the automotive grade, low voltage, 16-bit constant current LED sink driver STAP16DPS05 from STMicroelectronics.

The LED driver is configured and controlled through an 8-bit automotive grade STM8A microcontroller via SPI interface.

An automotive grade A5974D DC-DC converter provides the voltages and power for the overall functioning of the board.

This board can be used to demonstrate the LED driver features or used to aid in application development.

Software applications can be written, downloaded and debugged using the on-board SWIM connector.

Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
