

General Description

The MAX6079 evaluation kit (EV kit) provides a proven design to evaluate the MAX6079 low-noise precision ceramic voltage reference. The output voltage is set at 2.5V.

The EV kit comes installed with a MAX6079ALA25+ in 8-pin ceramic Leadless Chip Carrier (LCC) package.

Features

- Configurable for Precision Current Source
- Proven PCB Layout
- Fully Assembled and Tested

Ordering Information appears at end of data sheet.

Quick Start

Required Equipment

- MAX6079 EV kit
- +5V DC power supply
- Voltmeter

Procedure

The EV kit is fully assembled and tested. Follow the steps below to verify board operation:

- 1) Set the DC power supply to +5V. Connect the positive terminal to the IN test point and the negative terminal to GNDF test point.
- 2) Connect the voltmeter between OUTF and GNDF test point.
- 3) Turn on the DC power supply.
- 4) Verify that the voltmeter displays 2.5V.

General Description of Hardware

The MAX6079 EV kit demonstrates the MAX6079, a very low noise and low-drift voltage reference in a small 8-pin LCC package. The EV kit requires a +2.8V to +5.5V input supply voltage at the IN pin for normal operation.

EN

Drive the EN pin high to enable the MAX6079. Drive the EN pin low to disable the device.

Precision Current Source

To use the EV kit as a precision current source, remove the resistor at R3, install a 0Ω resistor at location R4, and connect the X test point to GNDF. Install an appropriate resistor at location R5 to determine the current by using the following equation.

$$I_{\text{SOURCE}} = \frac{V_{\text{OUT}}}{R_5}$$

Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
