Product Highlights

The 28 Vdc MIL-COTS VIPAC family of power systems is a new class of user-defined, modular power solutions for the most demanding military applications. It incorporates preassembled and tested front ends (M-FIAM5B or M-FIAM9), Vicor Maxi, Mini and Micro series DC-DC converters (H or M-Grade), a choice of output connections and mechanical platforms. The 28 Vdc VIPAC can be specified with 1, 2 or 3 outputs with voltages as low as 3.3 Vdc to as high as 48 Vdc and power levels from 40 to 400 W per output. Additionally, the wide trim range of the modules can provide operating voltages from 500 mv to 52.8 V. The MIL VIPAC is available with an input of 28 Vdc in a variety of packages with profiles as low as 0.75".

For additional technical or design information; or to create a 28 Vdc VIPAC tailored to your specific requirements using Vicor's online configurator, please visit vicorpower.com.
