

## PR1 Relay Base for:

- Relays With SPDT or DPDT Contacts
- Solid-State Relays With the Same Structure

### Universal Modular System

The 15 mm (0.591 in.) wide PR1 relay base range is a modular system consisting of PR1-B... relay bases, compact electromechanical relays with SPDT or DPDT contacts, solid-state relays, and a comprehensive range of accessories. These include:

- Plug-in input/interference suppression modules
- Relay retaining bracket with labeling field and eject function
- Labels
- Continuous jumpers

Depending on the application, complete coupling relays can be created, which are optimized in terms of cost, function, and service life.

### Base Versions

The relay bases are available in two versions with screw connections<sup>3)</sup> - the flat 2/2 level PR1-BSC2 and the "logical" 1/3 level PR1-BSC3. The second version has coil and contact connections that are located opposite one another and thus meets the requirements of modern control cabinet concepts with clear isolation of control signals and load. Both bases can be extended in terms of functions through the use of keyed plug-in modules with various display and interference suppression elements.

### Cost-Effective Electromechanical Relays

Powerful and cost-effective REL-MR electromechanical miniature power relays are recommended for standard applications. They are available in the following versions:

- With one 16 A PDT contact
  - With two 8 A PDT contacts
  - In all popular AC and DC coil voltages
  - In power contact and gold contact versions
- Additional suitable standard and special relays (e.g., for lamp loads) are available on request<sup>4)</sup>.

### Alternative: Wear-Resistant Solid-State Relays

In critical applications, electromechanical relays reach their maximum service life relatively quickly. This is why, as an alternative, PR1-B... bases can be fitted with OPT wear-resistant solid-state relays with the same structure. These relays provide optimum service life for applications with a high switching frequency and/or for switching high DC loads.

	①	②
	PR1-BSC2...	PR1-BSC3...
Nominal voltage U <sup>1)</sup>	300 V AC	300 V AC
Nominal current I <sup>1)</sup>	12 A	12 A
Conductor cross section

Ambient temperature	-25°C...+85°C (-13°F...+185°F)	-25°C...+85°C (-13°F...+185°F)

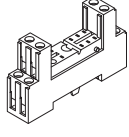

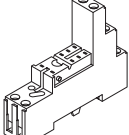

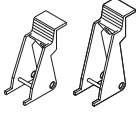

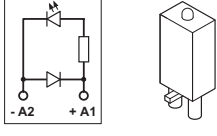

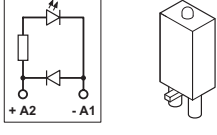

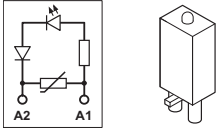

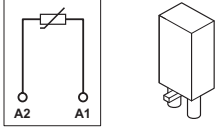

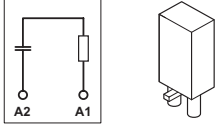

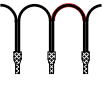

<sup>1)</sup> The maximum electrical data is relay dependent.

<sup>2)</sup> Details on request.

<sup>3)</sup> Spring-cage connections on request.

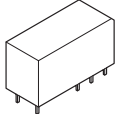

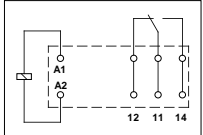

<sup>4)</sup> See INTERFACE catalog.

# PR1 Relay Base for Miniature Power Relays With SPDT or DPDT Contacts

Description	Type	Order No.	Pcs. Pkt.
<p><b>PR1 relay base</b>, for miniature power relays or miniature switching relays with SPDT or DPDT contacts or solid-state relays with a similar structure, 2/2 level version, screw connections, optional connection of input/interference suppression module, for mounting on , safe isolation of I/Os, including MP1 markers, 10 pcs. per pack</p> 	PR1-BSC2/2x21	28 33 51 8	10
<p><b>PR1 relay base</b>, for miniature power relays or miniature switching relays with SPDT or DPDT contacts or solid-state relays with a similar structure, 1/3 level version, screw connections, optional connection of input/interference suppression module, for mounting on , safe isolation of I/Os, including MP1 markers, 10 pcs. per pack</p> 	PR1-BSC3/2x21	28 33 52 1	10
<p><b>Relay retaining bracket</b>, with eject function and integrated device marking area (7.5 x 15 mm [0.295 x 0.591 in.]), suitable for PR1 relay base:          – For 16 mm (0.630 in.) high miniature power relays and solid-state relays<sup>1)</sup>          – For 25 mm (0.984 in.) high miniature switching relays<sup>1)</sup> and solid-state relays<sup>1)</sup></p> 	EL1-P16 EL1-P25	28 33 54 7 28 33 55 0	10 10

### Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
