

DIGI XBEE® SX DEVELOPMENT KIT

Provides a hands-on way to learn how to use Digi XBee SX high-power 900 MHz modules for device connectivity and sensor networking.

Digi's XBee SX Development Kit is a great way to learn how to use Digi XBee RF modules for device connectivity and true peer-to-peer mesh device networking with our DigiMesh® protocol. DigiMesh is a proprietary networking topology that supports advanced networking features including sleeping routers and dense mesh networks.

Digi XBee SX 900 MHz RF modules are the “muscle modules” of the Digi XBee Ecosystem, providing a combination of reliability and redundancy for OEMs building low-power, mission-critical wireless devices. With RF line-of-sight ranges up to 65 miles and strong interference blocking, these modules are ideal for applications requiring the combination of range, data redundancy and data reliability.

This kit is designed for anyone interested in getting started in the world of Digi XBee. Hardware and software engineers, corporate technologists, or educators and students can quickly learn more about DigiMesh technology through hands-on examples in the kit, utilizing Digi XBee SX modules.

Digi XBee SX Modules Included in the Kit

Digi XBee SX modules can be configured easily using Digi's free XCTU software or via Digi's simplified AT or API command sets. They are pre-certified for use in multiple countries and

The Kit Includes:

- ✓ 2 Digi XBee-PRO SX (1W) U.FL Modules on Development Board
- ✓ 1 Digi XBee SX (20mW) U.FL Module
- ✓ 1 Digi XBee USB Interface Board - SMT Socket
