

QUICK START GUIDE FOR DEMONSTRATION CIRCUIT 625

1MHZ, 1A SYNCHRONOUS BUCK-BOOST CONVERTER

LTC3441

DESCRIPTION

Demonstration Circuit 625 is a constant-frequency synchronous Buck-Boost converter using the LTC3441. The input range is from 2.4V to 5.5V, making it ideal for single-cell lithium-ion or three-cell NiCd/NiMH battery applications. This converter provides up to 95% efficiency, much higher than traditional Buck-Boost converters. For 2.5V minimum input voltage, this converter can provide up to 1A load current.

The output voltage is set at 3.3V. A different output voltage in the range of 2.4V to 5.25V can be obtained by changing one of the feedback resistors. The switching frequency is set at 1MHz, which is a good trade-off between efficiency and size. Applying twice the desired

frequency at the MODE/SYNC pin can also synchronize the switching frequency between 1.15MHz to 1.7MHz. In shutdown, the IC draws less than 1 μ A.

When using long wire connections to the input sources (such as wall adaptors), there can be input over voltage transients during initial plug-in. C8 is installed on DC625 to damp the possible voltage transients. C8 is not needed for any application when input source is close to the regulator. Please refer to Application Note 88 for details.

Design files for this circuit board are available. Call the LTC factory.

Table 1. Performance Summary ($T_A = 25^\circ\text{C}$ unless otherwise noted)

PARAMETER	CONDITION	VALUE
Minimum Input Voltage	-40°C to 85°C	2.4V (2.5V minimum input for 1A load)
Maximum Input Voltage	-40°C to 85°C	5.5V
Output Voltage V_{OUT}	$V_{IN} = 2.5\text{V}$ to 5.25V , $I_{OUT} = 0\text{A}$ to 1A	$3.3\text{V} \pm 3\%$
Maximum Output Current	$V_{IN} = 2.5\text{V}$ to 5.25V	1A
Typical Output Ripple V_{OUT}	$V_{IN} = 3.0\text{V}$, $I_{OUT} = 1\text{A}$ (20MHz BW)	40mV _{P-P}
Typical Switching Frequency		1MHz
Efficiency	$V_{IN} = 4.2\text{V}$, $I_{OUT} = 0.2\text{A}$	94% Typical
	$V_{IN} = 4.2\text{V}$, $I_{OUT} = 1\text{A}$	89% Typical
On/Off Control	Logic Low Voltage-Off, -40°C to 85°C	0.4V MAX
	Logic High Voltage-On	2.4V MIN

QUICK START PROCEDURE

Demonstration circuit 625 is easy to set up to evaluate the performance of the LTC3441. Refer to Figure 1 for proper measurement equipment setup and follow the procedure below:

NOTE: When measuring the input or output voltage ripple, care must be taken to avoid a long ground lead on the oscilloscope probe. Measure the input or output voltage ripple by touching the probe tip directly across the V_{in}

QUICK START GUIDE FOR DEMONSTRATION CIRCUIT 625

1MHZ, 1A SYNCHRONOUS BUCK-BOOST CONVERTER

or Vout and GND terminals. See Figure 2 for proper scope probe technique.

1. Place jumpers in the following positions:

JP1 RUN

JP2 FIXED FREQ.

2. With power off, connect the input power supply to Vin and GND.
3. Turn on the power at the input.

NOTE: Make sure that the input voltage does not exceed 5.5V.

4. Check for the proper output voltage. $V_{out} = 3.2V$ to $3.4V$.

NOTE: If there is no output, temporarily disconnect the load to make sure that the load is not set too high.

5. Once the proper output voltage is established, adjust the load within the operating range and observe the output voltage regulation, ripple voltage, efficiency and other parameters.

Данный компонент на территории Российской Федерации

Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
