

AS62V256A-70SIN

Low Voltage 32K x 8 SRAM

Features

- 32768 x 8 bit static CMOS RAM
 - 70 ns Access Time
 - Common data inputs and data outputs
 - Three-state outputs
 - Typ. operating supply current
70ns: 30 mA
 - Standby current < 40 μ A at 125 °C
 - TTL/CMOS-compatible
 - Power supply voltage 2.5 - 3.6 V
 - Operating temperature range
-40 °C to 85 °C
 - ESD protection > 2000 V
- (MIL STD 883C M3015.7)
- Latch-up immunity >100 mA
 - Package: SOP28 (300/330 mil)

Description

The AS62V256A-70SIN is a static RAM manufactured using a CMOS process technology with the following operating modes:

- Read
- Standby
- Write
- Data Retention

The memory array is based on a 6-Transistor cell. The circuit is activated by the falling edge of \bar{E} . The address and control inputs open simultaneously. According to the information of \bar{W} and \bar{G} , the data inputs, or outputs, are active. In a Read cycle, the data outputs are activated by the falling edge of \bar{G} , afterwards the data word will be available at the outputs DQ0-DQ7. After the address change, the data outputs

go High-Z until the new information is available. The data outputs have no preferred state. The Read cycle is finished by the falling edge of \bar{W} , or by the rising edge of \bar{E} , respectively. Data retention is guaranteed down to 2 V. With the exception of \bar{E} , all inputs consist of NOR gates, so that no pull-up/pull-down resistors are required.

Pin Configuration

Pin Description

| Signal Name | Signal Description |
|-------------|----------------------|
| A0 - A14 | Address Inputs |
| DQ0 - DQ7 | Data In/Out |
| \bar{E} | Chip Enable |
| \bar{G} | Output Enable |
| \bar{W} | Write Enable |
| VCC | Power Supply Voltage |
| VSS | Ground |

Characteristics

All voltages are referenced to $V_{SS} = 0$ V (ground).

All characteristics are valid in the power supply voltage range and in the operating temperature range specified.

Dynamic measurements are based on a rise and fall time of ≤ 5 ns, measured between 10 % and 90 % of V_I , as well as input levels of $V_{IL} = 0.2$ V and $V_{IH} = 2.8$ V. The timing reference level of all input and output signals is 1.5 V, with the exception of the t_{dis} -times and t_{en} -times, in which cases transition is measured ± 200 mV from steady-state voltage.

| Absolute Maximum Ratings ^a | Symbol | Min. | Max. | Unit |
|--|------------|------|-----------------------------|------|
| Power Supply Voltage | V_{CC} | -0.3 | 4.6 | V |
| Input Voltage | V_I | -0.5 | $V_{CC} + 0.5$ ^b | V |
| Output Voltage | V_O | -0.5 | $V_{CC} + 0.5$ ^b | V |
| Power Dissipation | P_D | - | 1 | W |
| Operating Temperature | T_a | -40 | 85 | °C |
| Storage Temperature | T_{stg} | -65 | 150 | °C |
| Output Short-Circuit Current at $V_{CC} = 3.3$ V and $V_O = 0$ V ^c | $ I_{OS} $ | | 100 | mA |

^a Stresses greater than those listed under „Absolute Maximum Ratings“ may cause permanent damage to the device. This is a stress rating only, and functional operation of the device at condition above those indicated in the operational sections of this specification is not implied. Exposure to absolute maximum rating conditions for extended periods may affect reliability

^b Maximum voltage is 4.6 V

^c Not more than 1 output should be shorted at the same time. Duration of the short circuit should not exceed 30 s.

| Recommended Operating Conditions | Symbol | Conditions | Min. | Max. | Unit |
|----------------------------------|----------|------------|------|----------------|------|
| Power Supply Voltage | V_{CC} | | 2.5 | 3.6 | V |
| Input Low Voltage ^d | V_{IL} | | -0.3 | 0.5 | V |
| Input High Voltage | V_{IH} | | 2.0 | $V_{CC} + 0.3$ | V |

^d -2 V at Pulse Width 30 ns

LIFE SUPPORT POLICY

Alliance Memory products are not designed, intended, or authorized for use as components in systems intended for surgical implant into the body, or other applications intended to support or sustain life, or for any other application in which the failure of the Alliance Memory product could create a situation where personal injury or death may occur. Components used in life-support devices or systems must be expressly authorized by Alliance Memory for such purpose.

LIMITED WARRANTY

The information in this document has been carefully checked and is believed to be reliable. However Alliance Memory makes no guarantee or warranty concerning the accuracy of said information and shall not be responsible for any loss or damage of whatever nature resulting from the use of, or reliance upon it. The information in this document describes the type of component and shall not be considered as assured characteristics. Alliance Memory does not guarantee that the use of any information contained herein will not infringe upon the patent, trade-mark, copyright, mask work right or other rights of third parties, and no patent or licence is implied hereby. This document does not in any way extent Alliance Memory's warranty on any product beyond that set forth in its standard terms and conditions of sale.

Alliance Memory reserves terms of delivery and reserves the right to make changes in the products or specifications, or both, presented in this publication at any time and without notice.

Вы можете приобрести в компании MosChip.

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибьюторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ РВ 0015-002 и ЭС РД 009
