

## Evaluation Board for 10W Single-Output Switch-Mode Power Supply

### 1 Description

The iW1818-EVAL evaluation board implements a 10W power supply based on Dialog Semiconductor's iW1818 **AccuSwitch™** digital off-line power supply controller IC. The evaluation board supplies a 5V, 2A regulated output voltage using a primary-side controlled quasi-resonant flyback converter that meets the U.S. Department of Energy's most recent level VI efficiency standard and the EU's Code of Conduct, Version 5, Tier 2 standard for both active mode and no-load standby power consumption.

The iW1818 controller integrates an 800V power BJT transistor to lower the power supply BOM cost and uses Dialog's advanced **PrimAccurate™** digital control technology to eliminate the need for external secondary-side feedback components, further reducing component count and cost, while improving reliability. It operates in quasi-resonant mode to improve efficiency and help meet EMI standards. This quasi-resonant operation and Dialog's **EZ-EMI®** technology enable excellent EMI performance with minimal external filtering. Proprietary control technology allows high efficiency across a broad range of loads, which enables the iW1818 to meet stringent international standards for power supply efficiency.

### 2 Features

- Wide input voltage range: 90V<sub>AC</sub> to 264V<sub>AC</sub>
- Output voltage: 5V
- Output current: 2A
- Total output power: 10W max.
- Integrated 800V BJT
- Active mode efficiency > 80%
- Supports high capacitance loads up to 6,000μF
- Low no-load power: < 50mW (at 230 V<sub>AC</sub>)
- **EZ-EMI®** technology: excellent EMI performance with a minimum of EMI filtering components
- Quasi-resonant operation
- Low component count and small PCB footprint
- iW1818 IC protections:
  - » Output short-circuit, over-current, over-voltage
  - » Input voltage protection: brown-out, brown-in, unplug
  - » Over-temperature protection - internal sensor

### 3 Applications

- Power Supplies for:
  - » White Goods
  - » Home Appliances
  - » Industrial Control
  - » Network Devices

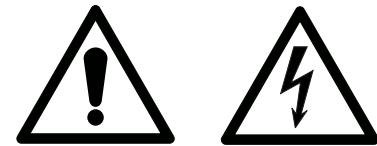

## Evaluation Board for 10W Single-Output Switch-Mode Power Supply

### WARNING

#### Disclaimer for High Voltage (Mains Powered) Evaluation Boards

##### Warning

This evaluation board is powered by AC mains voltage. When powered, this evaluation board generates non-insulated high voltages which may produce electrical shock, burn, and/or fire hazards, resulting in risk of property damage, personal injury, and/or death.

**When the evaluation board is powered, never touch the board or its electrical circuits since they may be operating at high voltages that can cause an electrical shock hazard.**

##### TO BE USED FOR EVALUATION PURPOSES ONLY

This board is intended for evaluation purposes only and not intended for commercial use in an end product. Any other use is strictly prohibited by Dialog Semiconductor.

##### WORK AREA AND PERSONAL SAFETY

This board should be used in a test area/laboratory specifically designed and designated for working with, and evaluating high-voltage electrical devices. Only trained and qualified professional personnel with experience, knowledge and training in the use of high-voltage electrical circuits should use this evaluation board. Trained personnel must use required personal protective equipment and required laboratory equipment when working with the evaluation board.

The professional personnel operating this evaluation board and the test area/laboratory in which it is operated must be qualified according to the local regulations, guidelines and labor laws applicable to working with non-isolated mains voltages and high voltage circuits.

An isolated housing is highly recommended when using this evaluation board.

Use this evaluation board at your own risk.

##### NOT AGENCY APPROVED

This evaluation board has not been agency tested or approved for safety, technical performance, and/or regulatory requirements, such as electromagnetic interference or other technical regulatory or safety requirements.

### 4 Evaluation Board Specifications

The table below shows the electrical specifications of the evalution board specified at  $T_A = 25^\circ\text{C}$ , unless otherwise noted.

Description	Symbol	Min	Typ	Max	Units	Comment
<b>Input</b>						
Voltage	$V_{\text{IN}}$	90		264	$V_{\text{AC}}$	2 wire
Frequency	$f_{\text{LINE}}$	47	50/60	63	Hz	
No-load input power (230V <sub>AC</sub> )				50	mW	
<b>Output</b>						
Output voltage	$V_{\text{OUT}}$	4.75	5.00	5.25	V	Measured at the end of PCB
Output current	$I_{\text{OUT}}$	0		2	A	
Output ripple voltage	$V_{\text{RIPPLE}}$			200	$\text{mV}_{\text{P-P}}$	Connected with 10 $\mu\text{F}$ E-cap and 100nF C-cap; $I_{\text{OUT}} = 2\text{A}@T_A = 25^\circ\text{C}$ 20MHz Bandwidth
<b>Total Output Power</b>						
Continuous output power	$P_{\text{OUT}}$		10		W	
Over current protection	OCP			2.8	A	Auto-restart
Active mode efficiency	$\eta$	80.7			%	Average of efficiency measured at 25%/50%/75%/100% $V_{\text{IN}} = 115V_{\text{AC}}$
<b>Environmental</b>						
Safety (Note 1)	Designed to Meet UL1310 (up to 120V <sub>AC</sub> ) Designed to Meet EN60335-1:2012					
Ambient temperature	$T_{\text{AMB}}$	0		40	$^\circ\text{C}$	Free convection, sea level

Note 1: The iW1818-EVAL has been designed to meet EN60335-1:2012 and UL1310 (up to 120V<sub>AC</sub>), however individual boards have not been tested or verified to these standards.

### Disclaimer

This evaluation board is provided for evaluation purposes only and is not intended for commercial use in any end product. Dialog Semiconductor expressly disclaims all warranties, express, implied or statutory, including (but not limited to) the implied warranties of non-infringement, suitability for a specific application(s) or end product(s), product quality or reliability. All risks and liability regarding quality, use or performance of this evaluation board are those of the customer/user.

The user, and/or user's employer, if user is using this evaluation board for employer-related purposes, assumes all responsibility and liability for proper and safe handling of the evaluation boards and indemnify Dialog Semiconductor from any and all claims arising from use of the evaluation board.

The user, and/or user's employer, if user is using this evaluation board for employer-related purposes, understands that this evaluation board has not been agency tested or approved for safety, technical performance, and/or regulatory requirements, by any agency. This includes electromagnetic interference or other technical regulatory or safety testing and certifications.

The user, and/or user's employer, if user is using this evaluation board for employer-related purposes, assumes all responsibility for using this evaluation board in a test area or laboratory which is qualified and/or certified according to the local regulations, guidelines and labor laws applicable to working with non-isolated mains voltages and high voltage circuits.

Information in this document is believed to be accurate and reliable. However, Dialog Semiconductor does not give any representations or warranties, expressed or implied, as to the accuracy or completeness of such information. **Данный компонент на территории Российской Федерации****Вы можете приобрести в компании MosChip.**

Для оперативного оформления запроса Вам необходимо перейти по данной ссылке:

<http://moschip.ru/get-element>

Вы можете разместить у нас заказ для любого Вашего проекта, будь то серийное производство или разработка единичного прибора.

В нашем ассортименте представлены ведущие мировые производители активных и пассивных электронных компонентов.

Нашей специализацией является поставка электронной компонентной базы двойного назначения, продукции таких производителей как XILINX, Intel (ex.ALTERA), Vicor, Microchip, Texas Instruments, Analog Devices, Mini-Circuits, Amphenol, Glenair.

Сотрудничество с глобальными дистрибуторами электронных компонентов, предоставляет возможность заказывать и получать с международных складов практически любой перечень компонентов в оптимальные для Вас сроки.

На всех этапах разработки и производства наши партнеры могут получить квалифицированную поддержку опытных инженеров.

Система менеджмента качества компании отвечает требованиям в соответствии с ГОСТ Р ИСО 9001, ГОСТ Р В 0015-002 и ЭС РД 009
